

abrdn Japan Equity Tracker Fund

B Accumulation GBP

29 February 2024

Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI Japan Index.

Performance Target: To match the return of the MSCI Japan Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI Japan Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested
- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.

Management process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI Japan Index ("tracking error") will be in the region of 0.0-0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/ outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI Japan Index are priced are different. The fund is valued at 12:00, but the MSCI Japan Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the MSCI Japan Index were priced at the same time.

(e) Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

Derivative usage

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited. Benchmark DetailsThe Benchmark Index rebalances on a quarterly basis. ¹The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) of 0.10% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

²The Historic Yield as at 31/01/2024 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

³These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.
