Objectives and investment policy

Objective: To generate income and increase the value of the unitholder's investment over the long term (capital growth and income). The Fund aims to achieve this with less net asset value volatility than global equity markets.

Investment policy: The Fund's investments will include collective investment schemes (which in turn will invest in a wide range of assets such as equities, bonds, property, hedge Funds, private equity, commodities, currency and cash) including those managed by the Investment Manager and/or its associated group companies. The Fund may also invest directly into a wide range of asset classes.

Fund manager's report

Market review

Global equity markets were modestly positive over the month. In the US, the Federal Reserve's expectation that it will not raise interest rates in 2019 supported share prices. In Europe, sentiment was more subdued as concerns about slowing economic growth and trade uncertainty weighed on performance.

Local Currency Emerging Market debt experienced mixed performance in March. While bond prices remained resilient over the month, Emerging Market currencies depreciated on aggregate. The most notable negative currency contributions came from Turkey, Brazil and Argentina.

Portfolio changes

We increased our exposure to infrastructure through allocations to The Renewable Infrastructure Group and Greencoat Renewables, which both raised capital via attractively priced placings. This was funded from a reduction in cash.

^AThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 0.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.

^BThe Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Multi-Manager Portfolio daily fund prices are available at www.aberdeen-asset.co.uk

Important information

Risk factors you should consider before investing:

- The value of units and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risks. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
- Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- This Fund can use derivatives in order to meet its investment objectives. This may result in gains or losses that are greater than the original amount invested.
- A full list of risks applicable to this Fund can be found in the Prospectus.
