

abrdn Sterling Inflation-Linked Bond Fund

I Acc GBP

31 March 2024

Objective

To generate income and some growth over the long term (5 years or more) by investing in UK Government inflation-linked bonds.

Performance Target: To achieve the return of the FTSE Actuaries UK Index Linked Gilts (Over 5 years) Index plus 0.5% per annum (before charges). There is no certainty or promise that the Performance Target will be achieved.

The FTSE Actuaries UK Index Linked Gilts (Over 5 years) Index (the "Index") is a representative index of the UK market for inflation-linked bonds with a maturity of up to 5 years.

Portfolio securities

- The fund invests at least 80% in inflation-linked government bonds (which are like loans to governments that pay a variable interest rate linked to inflation) issued or guaranteed by the UK Government.
- The fund may also invest in inflation-linked and non inflation-linked investment grade corporate bonds (which are like loans to companies that pay interest and are regarded as having a low default risk) and other bonds issued anywhere in the world. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-sterling bonds.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

Performance Data: Share Class I Acc.

Benchmark history: Performance target – FTSE Actuaries UK Index Linked Gilts (Over 5 Years) +0.50%

Source: Lipper. Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

"Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark. These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

Past performance is not a guide to future returns and future returns are not guaranteed.

Derivative usage

- The fund will make routine use of derivatives to reduce risk, reduce cost and/ or generate additional income or growth consistent with the risk profile of the fund.
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset. They can generate returns when the value of these underlying assets rise (long positions) or fall (short positions).
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.abrdn.com The Prospectus also contains a glossary of key terms used in this document.

¹Yield to Maturity as at 31/03/2024 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.20% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

The fund is a sub-fund of abrdn OEIC I, an authorised open-ended investment company (OEIC).
