

# 7IM Real Return Fund

As at 31 October 2020

# 7IM

## INVESTMENT OBJECTIVE

The investment objective of the fund is to seek growth in real terms over the medium to longer term. The fund will aim to provide a total return, net of fees, that exceeds UK inflation (as measured by Consumer Prices Index-All Items) by 2% on average over a rolling three year horizon. Capital invested in the Sub-fund is at risk and there is no guarantee that a positive return will be delivered over any one or a number of rolling three year periods. There may be a moderate risk to capital.

## INVESTMENT PROCESS

The Real Return Fund looks to deliver an inflation-beating return, whilst limiting sensitivity to equity price movements.

The investment process focusses on identifying the drivers of risks and returns and is not constrained to investing in traditional asset classes. The manager has freedom to allocate to any asset class, driven by where it perceives attractive risk-return trade-offs over the time horizon of any investment.

## WHAT YOU NEED TO CONSIDER

Prior to investing, you need to consider the level of risk you are prepared to take, how much growth you want to achieve, and over what time period. If you have a long time to grow your investments you might be able to ride out market ups and downs better than someone who needs their money in just 5 years. You should regularly reassess the suitability of your investments to ensure that they continue to meet your investment goals and suit your time horizon. You should be aware that there can be no guarantees. The value of investments may go up and down and you may get back less than you invested originally.

## TARGET MARKET

The 7IM Real Return Fund target market is investors who are seeking moderate positive returns over inflation over the medium term, and whose appetite is restricted to experiencing limited fluctuations in the value of the fund. The fund is not appropriate for investors who are seeking guaranteed returns or no loss of capital over any time period.

## PERFORMANCE COMPARATOR

The fund's performance may be compared to the IA Targeted Absolute Return Shares which has been chosen because it is representative of the fund's agreed risk profile and the type of assets in which it invests. It is therefore an appropriate comparator for the fund's performance.

## TARGET BENCHMARK

The Consumer Prices Index-All Items (plus 2%) has been selected as a target benchmark because it is a key measure of consumer inflation in the United Kingdom and is therefore an appropriate target for the fund. Shareholders should use the Index to assess the performance of the fund.

## IMPORTANT INFORMATION

The specific details of the funds including investment policy, charges and the particular risks associated with the funds are explained in the Prospectus and Key Investor Information Documentation (KIIDs) – a link to these is available via the 7IM website ([www.7im.co.uk](http://www.7im.co.uk)).

- ‡ Please allow up to 10 working days after the Distribution Date for dividends to be processed and applied to individual client accounts.
- † Ongoing Charges Figure includes 7IM Annual Management Charge. Source: KIIDs 02/11/2020.

\*7IM's funds are mapped against a selection of third party risk profiling tools to assist advisers as part of suitability assessments for clients. Such tools are however only one aspect of an adviser's suitability process and other such as the clients' investment term / horizon and knowledge and experience should also be considered. The methodology of third party risk profiling tools is not endorsed by 7IM and individual fund risk profiling scores may not correspond precisely to the risk indicators in the 7IM fund literature.
