

Aviva Investors Multi-asset Core Fund V Class 2

ISIN	BLOOMBERG	ASSET CLASS	NAV	FUND SIZE	AS AT
GB00BMGWHB36	AVMACV2 LN	Multi Asset	136.57 GBX	GBP 60.50m	31 Mar 2024

Fund overview

Objective: The Fund aims to grow your investment over the long term (5 years or more) through a combination of income and capital growth. The Fund targets an overall average return before charges and taxes of at least 0.30% greater than the performance benchmark per year, measured over 3-year rolling periods. The Fund aims for an average volatility of 100% of the volatility of global equities.

Investments: The Fund invests in a broad range of global asset classes (including emerging markets) that may include shares, bonds, cash, property, and commodities, and gains this exposure by investing in other funds managed by Aviva Investors companies, directly in these assets, or through the use of derivatives. The Fund makes significant use of derivative instruments for investment purposes.

Strategy & Environmental, Social and Governance (ESG) criteria: The Fund is actively managed but will make use of active, passive and semi passive methods to gain exposure to global asset classes. The Fund uses an asset allocation model to blend asset classes for diversification, the asset allocation model determines, within a range, the Fund's allocation to the different asset classes. For the exposure to shares in global companies, it will use a passive sampling approach, with an active ESG overlay. The expectation is that the Fund's exposure to shares in global companies will have a better ESG profile relative to the ESG profile of the underlying markets, whilst still seeking to align to their performance. We actively engage with companies with the aim of influencing behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment (RI) policy framework. Full details of the Fund's Objective & Investment Policy, and the associated RI policy is available on our website and prospectus.

Key facts

Fund Managers	Guillaume Paillat since 30/11/2020 Sotirios Nakos since 30/11/2020

Market cap

Rather than using a fixed number of cap stocks, Morningstar uses a flexible system that isn't adversely affected by overall movements in the market. Stocks are divided into seven regions based on their country of domicile, organised in descending order by size and the cumulative capitalisation as a percentage of the total is calculated for each stock. Giant-cap stocks refer to the top 40% of the cumulative capitalisation of each region, large-cap represents the next 30%, mid-cap represents the next 20%, small-cap the next 7% with micro covering the balance.

ESG Indicators

	Fund	Benchmark
MSCI Score (Adjusted) (Corporates)	7.15	6.77
MSCI Government Score (Sovereigns)	5.56	6.69
Scope 1&2 Carbon Intensity Score	94.95	118.14

The “Underlying Markets” for global equities in developed markets and Sovereign issuers are defined as the MSCI® World Index and Bloomberg® Global Aggregate Treasuries Index respectively. *MSCI's scores are intended to measure a company's resilience to financially material environmental, societal and governance risks, being risks to financial performance. MSCI scores are not intended to be a measure of corporate “goodness” or a synonym for sustainable investing. MSCI scores assess how companies manage risk compared with peers, not across industries. ^The sovereign issuer score is based on the overall environmental, social, and governance (ESG) performance of a country/region. #Carbon Intensity is measured by determining the weighted average carbon dioxide equivalent (CO2 e) emissions per unit of sales of each company using the latest available data provided by MSCI.

Fund targets

The Performance Index and Volatility Index have been selected as an appropriate measure for the Funds performance and risk targets, because they are representative of the type of assets in which the Fund is likely to invest.

Fund risks

Investment risk & currency risk:

The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

Emerging market risk:

Investments can be made in emerging markets. These markets may be volatile and carry higher risk than developed markets.

Derivatives risk:

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

Glossary

Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

Volatility (%)

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

Credit Rating

Independent ratings agencies assign different ratings to bonds depending on the bond issuers' financial strength and their outlook as well as their ability to pay interest on time and meet all of their liabilities. We use appropriate industry recognised ratings as detailed in source notes.

Distribution yield

This reflects the amount that is expected to be distributed over the next 12 months as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions. You may be subject to further tax on your distributions. The yield is not guaranteed.

Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

Management Fee

The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.

Modified duration

A calculation that expresses the measurable change in the value of a security in response to a change in interest rates - (under analysis).

Spread Duration

The Spread Duration measures the sensitivity of a security's price to changes in its Option Adjusted Spread (OAS) relative to the Treasury Curve.

Ongoing charge

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

Performance fee

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

Tracking error (%)

A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.

NAV

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

The source for all performance, portfolio and fund breakdown data is Morningstar unless indicated otherwise. For share classes that have not yet completed 5 years, the cumulative performance chart will start from the first full month. All data is as at the date of the Factsheet, unless indicated otherwise.
