As at 31 August 2019

**SEVEN**   
Investment Management

## INVESTMENT OBJECTIVE

The fund aims to provide a balance of income and capital appreciation. There may be some risk to capital.

## INVESTMENT PROCESS

Our process begins with the formulation of a strategic asset allocation. This asset allocation is reviewed regularly based on our assessment of current economic, political and market conditions. These investment decisions are implemented predominantly with active and passive securities.

## WHAT YOU NEED TO CONSIDER

In making your choice of investment you need to consider the level of risk you are prepared to take, how much growth you need to achieve, and over what time. In short, how much are you prepared to lose; are you a slow and steady investor or might you be comfortable taking more risk for the possibility of more return? If you have a long time to grow your investments you might be able to ride out market ups and downs better than someone who needs their money in just 5 years.

Risk is however not the only factor to consider. You should also regularly reassess the suitability of your investments to ensure that they continue to meet your investment goals and suit your time horizon. And of course you must always remember that, there can be no guarantees; the value of investments may go up and down and you may get back less than you invested originally.
