

# Sanlam Global High Quality Fund

March 2022 | Factsheet

## Overview

The Fund is an actively managed portfolio of global equities with a high quality bias, high conviction and benchmark agnostic, with sector and regional positioning driven by bottom-up stock selection. The investment process is unconstrained seeking to invest in companies with predictable revenue growth that produces sustainable economic value.

## Performance – past performance is not a guide to future performance

Class C returns are used to illustrate the fund's longest track record and it is a restricted share class per the fund information table on the next page. It is not available to retail clients. Class I is available to retail clients with a 0.75% p.a. management fee, which would result in lower performance than shown. Please see table below for the effect of these charges on performance. **Please see the table overleaf for other available share classes and total fees, or contact us for details.** Source: Sanlam, SAMI, StatPro

## Performance (%)

	Inception	1mth	YTD	1yr	3yrs	5yrs	Since Inception

Netease	3.6%
Bayer	3.6%
Total	41.2%

\* Portfolio yield is calculated by adding the gross dividend amounts for all dividend types that have gone 'ex' over the past 12 months based on the dividend frequency.

\*\* Distribution yield is the amount received by an investor, and is the sum of distributions paid over the past 12 months, based on the frequency and divided by the last price

The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty. The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Yield is calculated on historic dividend income from the preceding 12 months. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangement's. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager, the Investment Manager or at [sanlam.co.uk](https://www.sanlam.co.uk). A full summary of investor rights can also be found online at <https://www.sanlam.com/ireland/Documents/SAMI%20Shareholder%20Engagement%20Policy.pdf>. Documents are provided in English.

## Monthly commentary

The Sanlam Global High-Quality Fund underperformed the MSCI World Index during the month by 2.3%, with the fund up 2.4%.

The best performing stock during the month was Bayer (+21.5%). Crop Science is Bayer's largest division and made up 46% of 2021 revenues. Crop prices have been very strong recently, partly due to the inflationary impact of Russia's invasion of Ukraine. With prices higher, farmers are better incentivised to plant more crops, which requires greater use of Bayer's products, both in the planting of the crops (seeds) and the protecting of them (fertiliser). We would expect this dynamic to continue for the next few months at least. Bayer's Pharmaceuticals division has also received various bits of good news recently, including positive data for their stroke drug, asundexian. This has also aided positive sentiment. London Stock Exchange Group (+21.2%) and Akamai (+12.4%) were other top performers during the month. LSE posted strong results that the market took well, and they also managed to dispose of a sub-division for a favourable price, with the net proceeds returned to investors via a share buyback.

In terms of the laggards, Yum China (-18.4%) and Tencent (-9.7%) both underperformed the market. Yum China suffered from more heavy-handed lockdowns in China as a response to the increased spread of the omicron variant of covid-19. There was also a lot of noise in the month concerning the continued viability of Chinese ADRs continuing to be listed on US exchanges. The US authorities continue to threaten delisting of the ADRs if they are not allowed full access to Chinese accounts. Tencent continues to suffer from a weaker macro environment, which resulted in some less-than-inspiring Q4 results.
