Fund Fact Sheet

P2strategies Europe ex-UK Fund - Class I EUR

March 2016

FUND OBJECTIVE

The investment objective of the Fund is to provide long term capital growth through exposure to European equity markets excluding the UK. The Fund also utilises a risk management strategy designed to reduce volatility and minimise losses in declining markets. Income will not be a consideration.

INVESTMENT STRATEGY

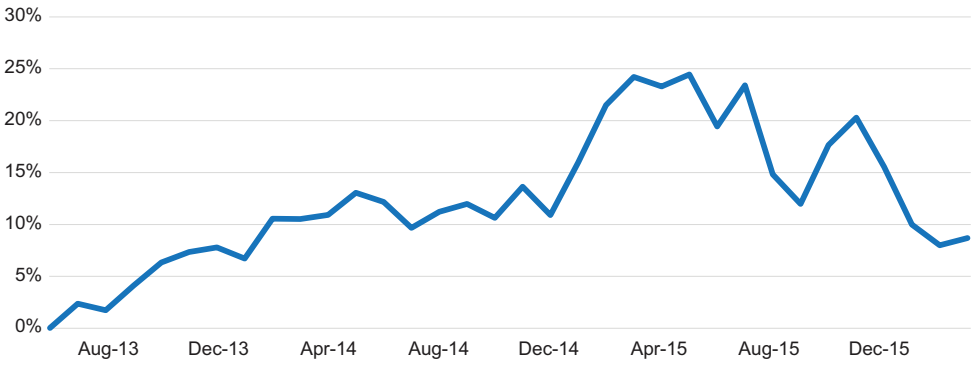

The Fund combines equity exposure for growth, with a risk management strategy designed to reduce volatility and minimise losses in declining markets.

Equity Exposure: Equity exposure is achieved by investing in the Sanlam Europe excluding UK Equity Tracker Fund. The Fund aims to replicate the performance of the European (excluding the UK) equity markets by tracking the MSCI Europe ex UK Index.

Risk Management: The risk management strategy aims to reduce the losses of the equity markets during severe market decline by using cash to buy short futures contracts (futures) which change in value inversely with equity market movements. Therefore, when the equity markets fall, the futures increase in value offsetting some of the losses from the equities.

In rising equity markets, full participation in the growth of the markets may be forsaken to some extent for the benefit of limiting losses in falling markets.

GLOSSARY

Average Volatility:	Measures the amount of variability in the value of the investment over the measurement period. Generally, the higher the volatility measure the riskier the investment since there is a potential for large value movements. The Average Volatility is calculated as the annualised standard deviation of daily log returns.
Return/Volatility Ratio:	Indicates the amount of return an investment produces per unit of risk. When comparing this measure between two investments, the one with the higher ratio is generally superior from a return and risk perspective.
Sharpe Ratio:	Indicates whether a portfolio's returns are due to smart investment decisions or a result of excess risk, the greater the number, the better its risk-adjusted performance has been.
Maximum Drawdown:	Gives the percentage change between the highest value and lowest value for an investment over a measurement period. This measure is used to display the downside risk of the investment over the measurement period.
% Positive mths:	Percentage of months where the return was positive.

DISCLAIMER

The Fund is a sub-fund of the Sanlam Universal Funds plc, an open-ended umbrella type investment company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Communities (UCITS) Regulation, 2003 as amended (the Regulations). It is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521. The Sanlam Universal Funds Plc full prospectus, the Fund supplement, and the KIID is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription application forms, all of which must be read in their entirety together with the Sanlam Universal Funds plc prospectus, Fund supplement and the KIID. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Past performance of a fund is no guarantee as to its performance in the future. Independent Financial advice, should be sought as not all investments are suitable for all investors. Collective Investment Schemes (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. The fund price is calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income and expense accruals. Trail commission and incentives may be paid and are for the account of the manager. Performance figures quoted are from Sanlam International Investments Limited and are shown net of fees. Performance figures for periods longer than 12 months are annualised. Sanlam Asset Management is a registered business name of Sanlam Asset Management (Ireland) Limited. Sanlam Asset Management (Ireland) Limited is authorised and regulated by the Central Bank of Ireland as a UCITS IV Management Company and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.
