

Fund Overview

Base Currency for Fund	GBP
Total Net Assets (GBP)	1.16 billion
Fund Inception Date	17.10.2011
Number of Issuers	36
Benchmark	FTSE 250 ex-Investment Trusts Index
IA Sector	UK All Companies
ISA Status	Yes

Summary of Investment Objective

The Fund aims to grow in value by more than the FTSE 250 (ex-Investment Trusts) Index, from a combination of income and investment growth over a three to five-year period after all fees and costs are deducted.

Fund Management

Prior to 7 August 2021, the Fund was named Franklin UK Mid Cap Fund.

Past performance is not an indicator or a guarantee of future performance. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details are in the fund's base currency, include the reinvested dividends net of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Fund performance is based on the mid price of the Rensburg UK Mid Cap Growth Trust from its launch on 12/07/1999 to 30/09/2011 and the net asset value of the Franklin UK Mid Cap Fund A(inc) shares thereafter.

Please refer to the "How We Measure Performance" section for more details about the benchmark.

How We Measure Performance

We measure performance and price shares in the Fund in British pounds (GBP).

The FTSE 250 (ex-Investment Trusts) Index is the Fund's performance target and constrains the Fund's investment universe. It is widely available and reflects the performance of medium-sized companies.

The Fund's performance may also be compared against the Investment Association UK All Companies sector average, which reflects the performance of the Fund's competitors.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: liquidity risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Factors" section of the Fund in the current prospectus of Franklin Templeton Funds.

Glossary

Historical 3 Yr EPS Growth: A measure of the growth of earnings per share over a trailing 3 year period. For a portfolio, the value represents a weighted average of the stocks it holds.

Historical 3 Yr Sales Growth: The rate at which sales have increased for the fund's underlying holdings over the last three years.

Price to Earnings (12-mo Forward): A measure of the price to earnings ratio for a stock using the forecasted earnings for the next 12 months. For a portfolio, the value represents a weighted average of the stocks it holds.

Return on Equity: A measure of a corporation's profitability that reveals how much profit a company generates with the money shareholders have invested. For a portfolio, the value represents a weighted average of the stocks it holds.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Prior to 7 August 2021, the Fund was named Franklin UK Mid Cap Fund.

Given the variety of investment options available today, we suggest investors seek guidance from a Financial Adviser.

Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Ongoing Charges: The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Performance attribution is calculated in the base currency of the fund.
