FUND MANAGER(S)

Multi Asset Solutions UK Team

The Multi-Asset Solutions UK (MAS UK) team is part of a functional unit known as Global Multi-Asset Solutions (GMAS). The MAS UK team benefits from investment specialists with decades of cumulative experience in managing portfolios across a wide range of investment strategies and market environments and access to the research and infrastructure provided by the GMAS unit.

DEFINITIONS

Pay Date: This is the date on which the fund will pay income to eligible investors.

XD Date: This is the date after which new investors who buy shares in the fund will not be eligible to receive the next income payment.

Historic Yield: The sum of income payments announced in the previous 12 months, divided by the fund price as at the date of the factsheet.

Annual Income Delivered: Sum of all income payments made over the fund's last accounting year. Each income payment is a percentage of the fund price as at the previous XD date, with each accounting year ending on 31 July.

Investors may be subject to tax on income payments they receive.

FUND OBJECTIVE AND POLICY

The Fund's objective is to provide income with the potential for capital growth over 5+ years. The Fund has a target annual income of 3 - 4% per annum (not guaranteed). The Fund aims to stay within a risk profile classification (RPC) (with volatility parameters) of 4 as set and monitored by an external risk rating company (not guaranteed). The Fund is in the Santander Atlas Portfolio range. The lower the RPC number, typically the lower the fund's volatility (exposure to more volatile assets e.g. shares). More information on volatility and RPCs is provided in the Prospectus glossary. The Fund is actively managed and invests 80-100% in other Collective Investment Schemes (CIS). It obtains exposure globally (inc. non-developed markets) to: bonds, and company shares; up to: 20% to alternative strategies, 10% to commodities, 10% to real estate, and 15% to cash/cash like instruments. Typically it will invest at least 70% in a combination of shares and bonds. Derivatives (inc. passives) will be used regularly for investment purposes and efficient portfolio management (inc. hedging). The ACD considers market, economic and geopolitical outlook in choosing asset/sub-asset classes, geographies and sectors to seek exposure to, and uses its expertise (active management) to select CIS. The ACD will tend to favour actively managed CIS, but up to 100% of the Fund can be in passively managed CIS (typically 35-50%). The Fund is not managed with reference to a benchmark, and the Comparator Benchmark has been chosen as it provides comparison of performance against a sector that largely consists of other multi asset funds which have the ability to invest globally.

Past performance is not a reliable indicator of future results. The value of investments and revenue from them can fall as well as rise and investors may not get back the amount originally invested. Please note that the value of any foreign investments may be affected by changes in currency exchange rates.

RISK AND REWARD PROFILE

LOWER RISK

HIGHER RISK

Typically lower rewards

Typically higher rewards

Risk and Reward Indicator: The Risk and Reward Indicator table shown above demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money, and the lowest risk and reward indicator does not mean risk free. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The value of your investment is not guaranteed and you may get back less than the original amount you invested. Investors should refer to the most up to date Key Investor Information Document available from our website.
