

HSBC Investment Funds

Income Fund

Monthly report 29 February 2024 | Share class Inc C

Investment objective

The Fund aims to provide income together with growth in the long term, which is a period of five years or more. The Fund intends to provide a level of income consistent with the Investment Association UK Equity Income sector definition.

Investment strategy

To achieve its objective, the Fund will invest at least 80% of its value in the shares (equities) of UK companies, including preference shares. UK companies are those that are based in the UK or earn at least 80% of their revenue from the UK. Typically the Fund will invest in the shares of 40 to 70 companies. The Fund is managed with reference to the FTSE All-Share Index (the "Index"). The level of risk the Fund may take is considered relative to the Index as part of the portfolio construction process. This means the Fund returns are more likely to be closer to the returns of the Index than if there were no limits on the level of risk the Fund may take. The Index is also considered as part of our investment risk monitoring process, to check that the overall level of risk taken by the Fund manager is not inconsistent with the UK equities market. The performance of the Fund is therefore shown against the performance of the FTSE All-Share Index.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.

Share class details

Key metrics

NAV per share	GBP 3.19
Performance 1 month	-0.17%
Volatility 3 years	10.12%

Monthly performance commentary

At sector level, stock selection was negative for the month. Positive performance came from Basic Materials and Health Care, though this was offset by negative stock selection in Consumer Discretionary and Industrials.

Basic Materials security, GLENCORE PLC with total effect 0.25% was the top contributor. Additionally, Financials security, BARCLAYS PLC was the second largest contributor with total effect 0.24%. Consumer Staples security, RECKITT BENCKISER GROUP PLC also contributed with total effect 0.23%.

On the other side, detractors included Consumer Discretionary security BARRATT DEVELOPMENTS PLC with total effect -0.28%, Industrials holding, ROLLS-ROYCE HOLDINGS PLC with total effect -0.25%, and Consumer Discretionary holding, TAYLOR WIMPEY PLC with total effect -0.20%.

During this period, no positions were opened or closed.

Sector allocation effects are residual to stock selection. At sector level, effects were positive, given an overweight exposure to Industrials.
