WHY INVEST IN A HL MULTI-MANAGER FUND?

- Professional management from one of the largest and best resourced fund research teams in the UK.
- Broad exposure to a range of investment styles in one, convenient fund.
- Our size and scale allows us to negotiate significant discounts with some of the underlying managers to reduce costs.
- Access to some managers not widely available to the retail market.

Any changes we make within our Multi-Manager funds are not subject to capital gains tax. An investor may only be subject to capital gains tax, once their investment is sold.

INVESTMENT PROCESS

We believe our quantitative analysis is one of the major differentiating factors between ourselves and the rest of the industry. Using in-house generated statistical programs, our team create a forensic analysis of fund managers to understand what lies behind the raw performance numbers. Our fund managers and research analysts use this analysis when conducting fund manager interviews. We benefit from unrivalled access to fund managers meeting several hundred managers a year. The combination of quantitative and qualitative analysis allows us to identify funds we believe have the greatest potential for long-term outperformance.

We are looking to invest in funds managed by experts with a passion for investment and we want these experienced fund managers to work in a culture that promotes and incentivises strong long-term performance.

RISK SUMMARY

The value of investments and any income can fall, therefore investors could get back less than invested. Past performance is not a guide to future returns. Neither capital nor income is guaranteed. Investments should be regarded as long-term, five years or more. Tax rules can change and the value of any benefits will depend on personal circumstances.

Before investing in this fund please read the Key Investor Information document. Please note this factsheet is not personal advice and should not be viewed as a promotion of any of the individual underlying funds profiled. The selection of the underlying funds does not take into consideration personal circumstances. We offer an advisory service for investors who are unsure whether an investment is suitable for their circumstances.

The fund's strategy, and therefore level of risk, can change over time. Economic factors such as interest rates, inflation and supply and demand can affect all investments.

This fund invests in smaller companies, which are more volatile and sometimes more difficult to trade than larger companies.

This fund is permitted to use derivatives such as warrants, options and futures for 'Efficient Portfolio Management' (EPM). They can be used to effectively take a position (or reduce an existing position) in an investment, allowing positions to be altered more quickly and cost-effectively than dealing directly. The use of these instruments can, under certain circumstances, increase volatility and risk.
