## What this fund does

The fund seeks to achieve long term capital growth through a portfolio of investments with exposure to the US economy. The team follows an active investment approach based on stock selection driven by the fund manager's assessment of valuation. The Fund has a flexible approach with no inbuilt bias to sector or company size.

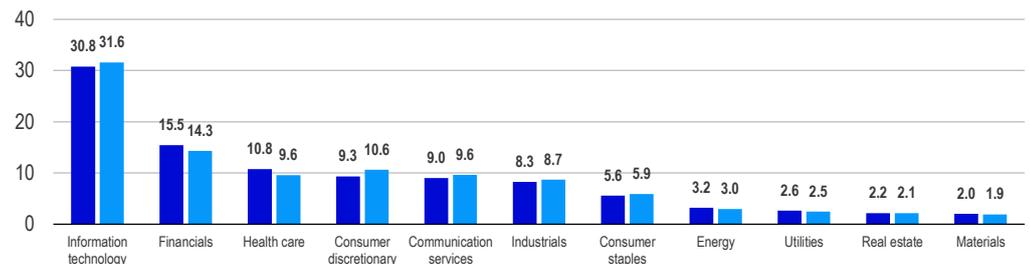

## Fund objective

The Fund aims to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the US. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non US companies), money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash.

The allocation of stock is based on Country of Risk

■ Fund ■ Index

## Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- The Fund is invested in companies primarily domiciled in one country, any unfavourable conditions presented on them through country-specific conditions such as changes in regulation, business or economic policy may have a more negative impact on the Fund's performance than on the performance of a Fund that is geographically diversified.

## Five year performance

## Important information

Views and opinions are based on current market conditions and are subject to change.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication. If investors are unsure if this product is suitable for them, they should seek advice from a financial adviser.

For the most up to date information on our funds, please refer to the relevant fund and share class-specific Key Investor Information Documents, the Supplementary Information Document, the financial reports and the Prospectus, which are available using the contact details shown.

The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. Investors may be subject to tax on their distributions.

| Cash           | 0.69   |
| Not available  | 0.00   |
| Total          | 100.00 |

Not available category refers to securities whose market capitalisation value was not available at time of document production.

Performance figures are based on the Z Accumulation share class. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 31 May 2025 unless otherwise stated. Sector average performance is calculated on an equivalent basis. Source: Fund - Invesco, Benchmark - Lipper.

## Benchmark

Investment Association North America Sector<sup>^</sup>

This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

<sup>^</sup> Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

## Glossary

**ACR/ Annual Compound Return:** Compound returns represent the cumulative effect that gains and losses have on invested capital over time. Annual Compound Return is the annual rate of return that would be required for an investment to grow from its starting balance to its ending balance.

**Asset mix:** Breakdown of all assets types held within an investment fund or portfolio.

**Benchmark:** A standard against which an investment fund or portfolio is measured to give an indication of relative performance.

**Country of risk:** Used to classify stocks, identifies the main country of operations/ exposure of a firm.

**Distribution frequency:** How often dividends and/or interest generated by an investment product are disbursed to investors.

**Historic yield:** Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. Investors may be subject to tax on their distributions

**Holdings:** The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs.

**ICVC:** Investment Company with Variable Capital. A type of collective investment portfolio that invests in different equities, bonds and other securities.

**Index:** A collection of stocks chosen to represent the performance of a particular market or sector, e.g. FTSE 100 or S&P 500.

**Market capitalisation:** How much a company is worth as determined by the stock market. Calculated as the total market value of all shares.

**Portfolio characteristics:** The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs (Exchange Traded Funds).
