

HSBC Global Investment Funds

MEXICO EQUITY

Monthly report 30 June 2023 | Share class AC

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Mexican shares.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Mexico. The Fund may invest up to 10% of its assets in other funds, including HSBC funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Performance

Share class details

Key metrics

NAV per share	USD 10.58

Monthly performance commentary

At sector level, stock selection was positive for the month. Positive performance came from Consumer Staples and Communication Services, though this was offset by negative stock selection in Financials and Real Estate.

Financials security, REGIONAL SAB DE CV with total effect 0.15% was the top contributor. Additionally, Materials security, INDUSTRIAS PENOLES SAB DE CV was the second largest contributor with total effect 0.09%. Health Care security, GENOMMA LAB INTERNACIONAL-B also contributed with total effect 0.05%.

On the other side, detractors included Industrials holding, GRUPO CARSO SAB DE CV-SER A1 with a total effect of -0.25%, Financials holding, GENTERA SAB DE CV 10224473 with a total effect of -0.09%, and an underweight allocation to materials security, GCC SAB DE CV with a total effect of -0.06%.

During this period, no positions were opened.
No positions were closed.

Sector allocation effects are residual to stock selection. At sector level, effects were negative, given an overweight exposure to Communication Services.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range. The reference benchmark has a high level of concentration. This means that a small number of securities make up a significant proportion of the benchmark.
