JPM UK Dynamic Fund

Class: JPM UK Dynamic Fund A - Net Income

Fund overview

ISIN GB0009697920	Sedol 0969792	Bloomberg FLUKDYI LN	Reuters GB0009697920.LUF
----------------------	------------------	-------------------------	-----------------------------

Investment objective: To maximise capital growth over the long-term (5-10 years) by investing at least 80% of the Fund's assets in UK equities.

Investment approach

- Uses a bottom-up stock selection process.
- Uses the full breadth of the eligible equity investment universe through a combination of fundamental research insights and quantitative analysis.
- Uses a best ideas approach to finding the most attractive investment ideas with minimal constraints.

BENCHMARK USES

The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

For additional information on the fund's target market please refer to the Prospectus.

Synthetic risk and reward indicator Based on share class volatility for the past 5 years. See Key Investor Information Document (KIID) for details.

Performance information

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees.

Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not

include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

Information Sources

Fund information, including performance calculations and other data, is provided by J.P. Morgan Asset Management (the marketing name for the asset management businesses of JPMorgan Chase & Co and its affiliates worldwide).

JPMorgan Asset Management (UK) Limited Registered address: 25 Bank Street, Canary Wharf, London E14 5JP, United Kingdom. Authorised and regulated by the Financial Conduct Authority. Registered in England No. 0161446.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Quoted Price The single price at which all client orders are executed.

Rayner Spencer Mills rated fund rating as at 31 July 2022.

Uses both a qualitative and quantitative assessment of the funds.

The fund is simply rated or not.

The Adviser Centre, as at 31 July 2022.

They have three key ratings: Established; Positive Watch; Recommended.

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio (IR) measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
