Rolling 12 months performance (%)

Past performance is not a reliable indicator of future results. Source for performance figures - Legg Mason. Performance is calculated on a NAV to NAV, with gross income reinvested without initial charges but reflecting annual management fees. Sales charges, taxes and other locally applied costs have not been deducted. This Fund may not be exchangeable with other Franklin Templeton managed funds. Please see the Fund's offering documents or contact your service agent for more information.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. For more information, visit www.morningstar.co.uk.

Performance shown includes periods prior to the Fund's inception date, reflecting performance of a predecessor fund (the Salomon Brothers Global Horizons U.S. Aggressive Growth Fund) with a substantially similar investment objective and policy and whose assets were transferred into this Fund on 20 April 2007. Please refer below for more information.¹

Top ten holdings (%)

Comcast Corp	8.05	Vertex Pharmaceuticals Inc	4.84
Biogen Inc	5.82	Broadcom Inc	4.83
Twitter Inc	5.61	Seagate Technology Holdings PLC	4.14
TE Connectivity Ltd	5.47	Liberty Media Corp-Liberty SiriusXM	4.04
UnitedHealth Group Inc	5.04	Liberty Broadband Corp	3.79

* Refer to the Definitions section on page 2

Percentages are based on total portfolio as of date displayed and are subject to change at any time. Holdings and allocations breakdowns are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned or securities in the industries shown. Source: Legg Mason

¹ The performance is for Class A Distribution Shares and prior to the Fund's inception date includes that of Class A Accumulation Shares of the predecessor fund. The performance data should be used for illustrative purposes only as performance prior to the inception date has not been adjusted to reflect the higher fees of the Fund. As at 20 April 2007, the Fund's fixed annual expenses for Class A Shares (investment management fees, custody and administration fees and shareholder servicing fees) were around 1.80% in comparison to the predecessor fund of 1.42% - there may be other variable costs not included in these figures. This means that the performance of the predecessor fund would have been lower had its expenses equalled those of the Fund. Please note that the Fund's TER is subject to change.

\$1,000 - \$5,000	12.79

Investment risks

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

A temporary negative cash position may be due to (1) unsettled trade activity (2) permitted purposes, such as borrowing or derivatives use, if allowed by the prospectus.

Sector breakdown (%)			
Information Technology	35.34	Financials	0.42
Communication Services	34.10	Other Inc. Cash and Cash Equivalents	0.11
Health Care	25.33

Energy	1.00		

Definitions

Risk and reward profile: There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund. The lowest category does not mean a risk-free investment. The fund does not offer any capital guarantee or protection.

Sharpe ratio: A risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance. **Treynor ratio:** Measure of risk adjusted portfolio performance where Beta acts as a proxy for the level of risk associated with a given portfolio. **Tracking error:** Dispersal of differences between the returns obtained by the Fund and the benchmark variation. **Information ratio:** The ratio of annualized expected residual return to residual risk. **Risk adjusted alpha:** Measures the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** Measures the sensitivity of the fund to the movements of its benchmark. **R-Squared:** Measures the strength of the linear relationship between the fund and its benchmark. RSquared at 1.00 implies perfect linear relationship and zero implies no relationship exists. **M-Squared:** A measure of portfolio risk, the Modigliani ratio serves to adjust for the risk that a given portfolio takes in excess of the risk-free rate. **Standard deviation:** Measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

RSMR Rating Source: Rayner Spencer Mills Research Limited ("RSMR"). RSMR does not and cannot provide advice to investors on the suitability or appropriateness of any funds or investments.

Important information
