Company Investment Objectives and Policy

The Company's investment objective is to achieve long-term capital growth through investing in a diversified portfolio of public and private equity companies. The portfolio composition at any one time will reflect the opportunities available to the Portfolio Manager, the performance of the underlying investee companies and the maturity of the portfolio. The Company may become a significant shareholder in any of the underlying portfolio companies. While the intention is for quoted public companies to represent not less than 20 per cent of gross assets over the long-term, the actual exposure may vary from time to time reflecting the maturity of the portfolio and market environment at that time.

The latest Annual Report includes the investment policy which you should read in conjunction with the KIID before investing, these are available on our Schroders website. Relevant risk as associated with this Company are shown overleaf and should be carefully considered before making any investment.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Performance

Performance (%)	YTD	3 months	6 months
Share Price	-36.1	-12.2	-36.1

Risk considerations

Long-term outcomes are more binary – extremely attractive rewards for success but some businesses will inevitably fail to fulfil their potential and this may expose investors to the risk of capital losses. As it can take years for young businesses to fulfil their potential, this investment requires patience. The price of shares in the Company is determined by market supply and demand, and this may be different to the net asset value of the Company. This means the price may be volatile in response to changes in demand. The Company may invest in overseas securities and be exposed to currencies other than pound sterling – as a result, exchange rate movements may cause the value of the Company, individual investments, and any income paid to decrease or increase. The Company may invest in unquoted securities, which may be less liquid and more difficult to value, because they are generally not publicly traded – the lack of an open market may also make it more difficult to establish fair value. Young businesses have a different risk profile to mature blue-chip companies – risks are much more stock-specific, which implies a lower correlation with equity markets and the wider economy. The Company may borrow money to invest in further investments, this is known as gearing. Gearing will increase returns if the value of the investments purchased increase in value by more than the cost of borrowing, or reduce returns if they fail to do so.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Benchmarks:

The Company is not managed with reference to a benchmark.

Important information

Costs

Certain costs associated with your investment in the Company may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

Details of the performance fee model and its computation methodology can be found in the Company's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the Company's performance fee benchmark, which may differ from the benchmark in the Company's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the Company's offering documents and annual report.

General

This factsheet should not be taken as any indication the company held any particular investments at any particular date other than the stated date. Nothing in this factsheet should be construed as advice and is therefore not a recommendation to buy or sell shares. If you are interested in this Company you should contact your usual financial adviser before making any investment decision.
