Key Risks

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The Fund invests in small and mid-capitalisation companies, which potentially involves greater risks compared to investing in large capitalisation companies. The shares may have less liquidity and could experience more price swings (or volatility) which could adversely affect the value of your investment. The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
