

Legal & General Mixed Investment 0-35% Fund

Unit Trust (UK UCITS compliant) R-Class GBP

Base currency: GBP

Domicile: UK

FUND AIM

The objective of the Fund is to provide growth. The Fund aims to achieve capital growth in excess of the Bank of England base interest rate per annum, the "Benchmark", before deduction of any charges over rolling three year periods. There is no guarantee that the manager will outperform the Benchmark in any period and capital invested in the Fund is at risk.

FUND RANGE

This fund sits within the L&G Mixed Investment Fund Range. The range aims to meet either growth or income client needs, with a choice of higher and lower risk options and with clearly defined equity exposure boundaries.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth through exposure to a diverse portfolio of investments.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

Performance for the R Acc unit class in GBP, launched on 25 September 2009. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. The performance comparator is provided to give context to the performance. The Mixed Investment 0-35% Fund aims to achieve an attractive balance between risk and return, and does not aim to closely track the IA sector as a benchmark.

Past performance is not a guide to the future.

FUND SNAPSHOT

- **What does it invest in?** Invests primarily in funds, with between 0% and 35% underlying exposure to company shares and the remainder in bonds and other investments including property.
- **How does it invest?** Actively managed, with no more than 35% exposure to company shares and at least 45% to bonds and money market instruments with an investment grade (lower risk) credit rating.

PORTFOLIO BREAKDOWN

FUND MANAGERS

The fund managers have responsibility for managing the mixed-investment fund range. They are part of the Multi-Asset Funds (MAF) team in LGIM. This team focuses on designing and managing multi-asset funds that are tailored to match the specific objectives of various client types. The team sits within a wider Asset Allocation team which combines both depth of experience with a broad range of expertise from different fields, including fund management, investment consulting and risk management roles.

The fund is in category 4 because the mix of different asset types in which the fund invests has a balancing effect on the rate at which the fund share price moves up and down.

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- By investing in other funds this fund indirectly holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
