Past performance is not an indicator or a guarantee of future performance. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details are in the fund's base currency, include the reinvested dividends net of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Fund performance data is based on the mid price of the Rensburg UK Select Growth Trust from its launch on 28/09/2001 to 17/10/2011 and the net asset value of the Franklin UK Opportunities Fund A(inc) shares thereafter.

Please refer to the "How We Measure Performance" section for more details about the benchmark.

The W (inc) GBP share class launched on 04.09.2015. Performance data prior to that date is for the A (inc) GBP share class launched on 28.09.2001 which has higher annual charges.

How We Measure Performance

We measure performance and price shares in the Fund in British pounds (GBP).

- We measure performance against the Fund's performance target, the FTSE All-Share Index, as it is widely available and reflects investments in the UK stock market.
- The Fund's performance can also be compared against the Investment Association UK All Companies sector average, which reflects the performance of the Fund's competitors.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in equity securities of UK companies of any size or industry sector and may also invest in European securities on an ancillary basis, with the objective of seeking growth over the medium to long term. Such securities have historically been subject to price movements, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: liquidity risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Factors" section of the Fund in the current prospectus of Franklin Templeton Funds.

Glossary

Historical 3 Yr EPS Growth: A measure of the growth of earnings per share over a trailing 3 year period. For a portfolio, the value represents a weighted average of the stocks it holds.

Historical 3 Yr Sales Growth: The rate at which sales have increased for the fund's underlying holdings over the last three years.

Price to Earnings (12-mo Forward): A measure of the price to earnings ratio for a stock using the forecasted earnings for the next 12 months. For a portfolio, the value represents a weighted average of the stocks it holds.

Return on Equity: A measure of a corporation's profitability that reveals how much profit a company generates with the money shareholders have invested. For a portfolio, the value represents a weighted average of the stocks it holds.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
