Fund objective and policy

The Fund aims to achieve capital growth with some income over the long term (at least 5 years). The Fund is actively managed. It is not constrained by its comparator benchmark, the FTSE World North America TR Index, and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Fund seeks to achieve its objective by investing primarily in equities of North American companies. The Fund may be invested, at the investment manager's discretion, in any combination of US and/or Canadian equities at any one time and in any industry sector.

Risk warning

The value of your investments and any income from them can go down as well as up and you may not get back the original amount invested. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
