DEFINITIONS

Pay Date: This is the date on which the fund will pay income to eligible investors.

XD Date: This is the date after which new investors who buy shares in the fund will not be eligible to receive the next income payment.

Historic Yield: The sum of income payments announced in the previous 12 months, divided by the fund price as at the date of the factsheet.

Annual Income Delivered: Sum of all income payments made over the fund's last accounting year. Each income payment is a percentage of the fund price as at the previous XD date, with each accounting year ending on 31 March.

Investors may be subject to tax on income payments they receive.

FUND OBJECTIVE AND POLICY

The Fund's objective is to provide an income, with some potential for capital growth over 5+ years. The Fund has a target annual income of 5% (not guaranteed).

The Fund is actively managed and invests at least 80% in shares in companies listed in the UK, including REITs and other investment trusts. The Fund can invest up to 20% in shares in companies listed in developed markets outside the UK. It may invest in developed markets globally up to: 5% in investment grade bonds; and 10% in cash/cash like instruments. The Fund typically invests directly but can also invest indirectly: up to 10% via other funds; and in property via REITs. Derivative strategies will be used with the aim of enhancing income, but these may reduce the potential for capital growth. They will be used regularly for efficient portfolio management (inc. hedging), and less frequently for investment purposes.

A Sub-Investment Manager has been appointed to actively manage the Fund. When selecting companies, the Sub-IM will focus on quality, momentum and value. Typically it will select shares with attractive dividend prospects, good quality, and momentum. This results in a bias to medium sized companies. The Fund is managed with a Tracking Error (deviation from Benchmark) of up to 6%. The Constraint Benchmark has been selected as it is representative of the Fund's investment policy.

Negative weightings may result from the use of certain financial instruments, including derivatives. Derivatives used to gain or reduce market exposure are shown in the relevant asset class. Derivatives used for risk management (including duration management) are shown alongside cash.

Past performance is not a reliable indicator of future results. The value of investments and revenue from them can fall as well as rise and investors may not get back the amount originally invested. Please note that the value of any foreign investments may be affected by changes in currency exchange rates.

RISK AND REWARD PROFILE

LOWER RISK

HIGHER RISK

Typically lower rewards

Typically higher rewards

Risk and Reward Indicator: The Risk and Reward Indicator table shown above demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money, and the lowest risk and reward indicator does not mean risk free. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The value of your investment is not guaranteed and you may get back less than the original amount you invested. Investors should refer to the most up to date Key Investor Information Document available from our website.
