ESG information

ESG approach - Integrated

ESG Integration is the systematic inclusion of financially material ESG factors, alongside other relevant factors, in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG integration does not by itself change this product's investment objective, exclude specific types of companies or constrain its investable universe. This product is not designed for investors who are looking for a product that meets specific ESG goals or wish to screen out particular types of companies or investments, other than those required by any applicable law such as companies involved in the manufacture, production or supply of cluster munitions. ESG integration does not imply that the Fund is marketed or authorised as an ESG product in any jurisdiction where such authorisation is required.

Performance information

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees.

Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

Prior to 01/12/21 the benchmark was ICE 1 month GBP LIBOR.

Holdings information

Risk is the ex-ante standard deviation shown as a proportion of the total grouping ie: theme, region and asset class.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

Square Mile Research rating as at 31 May 2025.

A Square Mile Fund Rating denotes a fund that is truly "best in class". Put simply, a Square Mile Fund Rating is only given to a fund that we are prepared to recommend to our clients. Fund managers do not pay for our ratings; they cannot be purchased and are only achieved by the "best-in-class" funds.

The funds we recommend are each assigned a rating – A, AA, AAA or R – reflecting Square Mile's conviction in each fund's ability to deliver on expectations. These simple ratings are the result of exhaustive and detailed qualitative research, backed up by quantitative analysis. "AAA" represents the very highest level of conviction in a fund and its manager, and is a practical demonstration of our belief in the long-term consistent delivery of the fund's objectives.

Our team of investment research analysts also works to identify newer or untested funds or managers that have real potential to deliver their stated objectives. In these circumstances, we are not in a position to award a full fund rating, and therefore these funds are assigned a "Positive Prospects" rating. Over time, if these managers deliver to our expectations and achieve their expected outcome, we

would expect them to progress to A, AA, AAA or R ratings. Not widely used.
DT risk profile as at 31 May 2025.

DT risk-profile ratings range from 1 to 10, with 1 being the least volatile fund and 10 the most.
