

Schroder International Selection Fund Emerging Markets Debt Absolute Return

C Income GBP Hedged | Data as at 31.07.2023

Fund objectives and investment policy

The fund aims to provide an absolute return of capital growth and income after fees have been deducted by investing in bonds in emerging markets. Absolute return means the fund seeks to provide a positive return over a 12 month period in all market conditions, but this cannot be guaranteed and your capital is at risk.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).

The fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Schroder International Selection Fund Emerging Markets Debt Absolute Return

C Income GBP Hedged | Data as at 31.07.2023

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Bond Connect risk: The fund may be investing in the China Interbank Bond Market via the Bond Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Capital risk / distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Currency risk / hedged share class: The currency hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Issuer risk: The fund is permitted to invest more than 35% of its scheme property in transferable securities and money market instruments issued or guaranteed by an EEA State / governments of the following country: United States of America.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Synthetic risk & reward indicator (SRII)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Risk statistics & financial ratios

	Fund
Annual volatility (%) (3y)	7.6
Effective duration (years)	3.9
Current yield (%)	7.3
Yield to maturity	7.5

Source: Morningstar. The above ratios are based on bid to bid price based performance data of the unhedged equivalent share class.

Schroder International Selection Fund Emerging Markets Debt Absolute Return

C Income GBP Hedged | Data as at 31.07.2023

No capital guarantee risk: Positive returns are not guaranteed and no form of capital protection applies

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Currency risk / hedged shareclass: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

C Income GBP Hedged | Data as at 31.07.2023

Proprietary Sustainability Metrics %

Overall Impact

Data as at 31.07.2023

The sustainability scores of the fund and the benchmark are shown. The benchmark is the 50% JPM GBI-EM Diversified Index 50% JPM EMBI Diversified Index.

The Schroders Impact score is based on Schroders' proprietary tool, SustainEx™. SustainEx™ provides an estimate of the potential societal or environmental impact that may be created by the companies and other issuers in which the fund is invested. The result is expressed as a notional percentage (positive or negative) of sales of the relevant underlying companies and other issuers. For example, a SustainEx™ score of +2% would mean a company contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales.

We calculate SustainEx™ scores for companies and other issuers in the fund to arrive at the total fund score.

The "Overall Impact" shown is a measure of the fund's estimated impact compared to that of its benchmark, in each case calculated as a relative notional percentage as described above.

The "Impact on People" and "Impact on Planet" measure the fund's estimated underlying benefits and harms, as compared to its benchmark, in each case calculated as a relative notional percentage as described above.

Climate dashboard

Carbon Metrics

● Fund ● Benchmark

Energy Exposure

● Fund ● Benchmark

Source: MSCI. The graphs above include the Weighted Average Carbon Intensity (WACI), carbon footprint and energy exposure of the fund and its benchmark, where applicable. WACI and carbon footprint are based on Scope 1, 2 and 3 emissions. WACI measures the carbon-intensity of the portfolio by assessing the ratio of emissions to revenue generated from underlying investee companies. Carbon footprint normalises the total carbon emissions of the portfolio to its market value. When calculating carbon metrics, Schroders will exclude neutral assets (such as cash) and other non-eligible assets. This means that Schroders aggregates company-level GHG emissions based on the portfolio's eligible assets only (which are listed equity and credit holdings, where applicable). The energy exposure metrics are calculated based on the revenue generated from these activities by the underlying investee companies and weighted by the fund's holdings. Fund exposure to 'Coal' represents Thermal Coal mining and reflects investments in companies whose coal-related revenues are below the accepted threshold. Please refer to the fund sustainability disclosures for more details on exclusions. All metrics use reported company data. Where data may not be available, then MSCI may use estimates. The fund's sustainability benchmark is the 50% JPM GBI-EM Diversified Index 50% JPM EMBI Diversified Index.

Adverse Impacts

The table below shows some adverse impacts of this fund and its benchmark, where applicable. The indicators referred to below aim to show the negative effects that investment decisions, made in respect of the fund's portfolio, have on certain sustainability factors, such as environmental, social and employee matters. We also identify the coverage, which refers to the percentage of indicator data available at month-end for the underlying holdings of the fund and the benchmark, where applicable.

Category	Indicator	Description	Units	Fund	Benchmark
People	UNGC and OECD principle policies	Share of investment in companies without policies to monitor compliance with UNGC and OECD principles	Ratio (%)	53.6% Coverage*: 83.9%	32.8% Coverage*: 49.0%
	Board Gender Diversity	Average ratio of female to male board members in investee companies	Ratio (%)	44.6% Coverage*: 39.2%	32.6% Coverage*: 44.3%
	UNGC and OECD principle violators	Share of investments in companies that have been involved in violations of UNGC and OECD principles	Ratio (%)	0.0% Coverage*: 83.9%	10.2% Coverage*: 49.0%
Planet	Non-renewable energy exposure	Share of non-renewable energy consumption and production	Ratio (%)	98.1% Coverage*: 20.1%	77.2% Coverage*: 40.0%
	Exposure to companies without carbon emissions reduction initiatives	Investing in companies without carbon emission reduction initiatives aligned with the Paris Agreement	Ratio (%)	71.4% Coverage*: 83.9%	39.0% Coverage*: 45.0%

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

The Benchmark performance is shown in the base currency of the fund. To enable comparison between the performance of this Hedged share class and the Benchmark, and to show the effect of the currency hedge, the equivalent unhedged base currency share class performance is also shown. The equivalent unhedged share class and benchmark will be blank if the inception date is different to the hedged share class inception date. Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund's performance should be assessed against its objective of providing a positive return over a 12-month period in all market conditions. The target benchmark has been selected because the target return of the fund is to deliver the return of that benchmark as stated in the investment objective. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. This fund aims to achieve an absolute return and is therefore not managed to a specific benchmark.

Benchmarks:

Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

With effect from 01.06.2008 Schroder ISF Emerging Markets Debt changed its name to Schroder ISF Emerging Markets Debt Absolute Return.

C Income GBP Hedged | Data as at 31.07.2023

Source and ratings information

Source of all performance data, unless otherwise stated: Morningstar, bid to bid, net income reinvested, net of fees.

Impact scores: These are generated using Schroders' proprietary tool SustainEx™. SustainEx™ provides an estimate of the potential "impact" that an issuer may create in terms of net social and environmental "costs" or "benefits" of that issuer. It does this by using certain metrics with respect to that issuer, and quantifying them positively (for example by paying 'fair wages') and negatively (for example the carbon an issuer emits) to produce an aggregate notional measure of the relevant underlying issuer's social and environmental "costs", "externalities" or "impacts". SustainEx™ utilises and is reliant on third party data (including third party estimates) as well as Schroders' own modelling assumptions, and the outcome may differ from other sustainability tools and measures.

Where SustainEx™ relies on data and estimates produced by third parties, Schroders seeks to ensure that such data and estimates are accurate, but Schroders cannot and does not warrant the accuracy, completeness and adequacy of such third party data and estimates. Like any model, SustainEx™ will evolve and develop over time as Schroders continues to assess, refine and add to the metrics and their relative contributions. Generating SustainEx™ scores involves an element of judgment and subjectivity across the different metrics chosen by Schroders, and accordingly Schroders does not accept any liability arising from any inaccuracy or omission in, or the use of or reliance on, SustainEx™ scores. As the model evolves, changes made to how metrics are applied may result in changes to the SustainEx™ score of any issuer and ultimately the overall fund/portfolio score. At the same time, of course, the issuer's SustainEx performance might improve or deteriorate.

The SustainEx scores show month-end data. Where a fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system, this means that the fund's weighted average score in SustainEx over the previous six month period will be higher than the benchmark's score in SustainEx over the same period, based on month-end data. Where a fund maintains a positive absolute sustainability score based on the investment manager's rating system, this means that the fund's weighted average score in SustainEx over the previous six month period will be higher than zero over the same period based on month-end data and any comparison to its benchmark's score is shown here for information and illustrative purposes only. Where a fund has different sustainability criteria, the fund's weighted average score in SustainEx compared to its benchmark's score is shown here for information and illustrative purposes only.

Schroders' Proprietary tools: including SustainEx, may not cover all of the fund's holdings from time to time, in which case Schroders may use a range of alternative methods to assess the relevant holding. In addition, certain types of assets (such as cash and certain equivalent securities) are treated as neutral and are therefore not considered by our proprietary tools. Other types of assets such as equity indices and index derivatives may not be considered by our proprietary tools and in such case would be excluded from a product's sustainability score.

Aggregated SustainEx metric definitions are: Carbon emissions: Environmental and societal cost of carbon emissions (scope 1,2 and 3). Water consumption: Environmental and societal cost of companies' and countries' freshwater withdrawal. Assigned based on reported water usage. Avoided carbon emissions: Environmental and societal benefits of activities and technologies that enable system-wide reductions in carbon emissions, including companies' products and services and country investments in clean energy. Fair pay: Societal benefits or costs of companies over- or under-paying staff relative to local living wages (for regions in which they operate). Alcohol: Societal cost of alcohol consumption (assigned to alcohol producers). Tobacco: Societal cost of smoking (assigned to tobacco producers).

Energy exposure definitions are: Coal exposure: Measures the weight of the portfolio exposed to companies deriving revenue from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It excludes: revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading. Tar sands exposure: Measures the weight of the portfolio exposed to companies deriving revenue from oil sands extraction for a set of companies that own oil sands reserves and disclose evidence of deriving revenue from oil sands extraction. This factor does not include revenue from non-extraction activities (e.g. exploration, surveying, processing, refining); ownership of oil sands reserves with no associated extraction revenues; revenue from intra-company sales.

*Coverage, which refers to the percentage of indicator data available at month-end for the underlying holdings of the fund and the benchmark, where applicable.

MSCI ESG Research rating: Produced by MSCI ESG Research as of the "reporting date". MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 31,000 multi-asset class mutual funds and ETFs globally.
