**Past performance is not an indicator or a guarantee of future performance.** The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details are in the fund's base currency, include the reinvested dividends net of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Fund performance is based on the mid price of the Rensburg UK Mid Cap Growth Trust from its launch on 12/07/1999 to 30/09/2011 and the net asset value of the Franklin UK Mid Cap Fund A(inc) shares thereafter.

Please refer to the "How We Measure Performance" section for more details about the benchmark.

**How We Measure Performance**

We measure performance and price shares in the Fund in British pounds (GBP).

The FTSE 250 (ex-Investment Trusts) Index is the Fund's performance target and constrains the Fund's investment universe. It is widely available and reflects the performance of medium-sized companies.

The Fund's performance may also be compared against the Investment Association UK All Companies sector average, which reflects the performance of the Fund's competitors.

**What Are the Key Risks?**

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: liquidity risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Factors" section of the Fund in the current prospectus of Franklin Templeton Funds.

**Important Information**

**Top Ten Holdings:** These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

**Ongoing Charges:** The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Performance attribution is calculated in the base currency of the fund.
