MANAGED EQUITY FUND - RETAIL ACC GBP

ISIN: GB0001448892
 Share Class Price: 2.4630
 Historic Yield: 0.2%
 Ongoing Charges (OCF): 1.39% (as at 15/11/20)
 ISA: Yes
 Performance Fee: No

The ongoing charges figure (OCF) is usually based on the last year's expenses and may vary from year to year. It includes charges such as the fund's annual management charge, registration fee, custody fees and distribution cost but excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). For a more detailed breakdown please visit www.columbiathreadneedle.com/fees. In some cases, the ongoing charges figure may be based on an estimate of future charges, either because the share/unit class is relatively new and has an insufficient track record to be calculated exactly, or if historic figures are unlikely to accurately reflect future ongoing costs.

Please see table of Share Classes available.

**Risks**

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- As the Fund is dual priced, there is a price to buy units and a different price to sell them. The price at which you deal may change depending on whether the Fund is experiencing inflows or outflows of cash, and any change will mean an increase or decrease in the price at which you deal.

Opportunities

- Provides exposure to key equity markets around the world within a relatively aggressive fund.
- Benefits from access to the range of our funds from which the managers construct the portfolio.
- Access to a focused portfolio of specialist funds from our range, aiming to generate above average capital growth.
- Greater diversification than traditional investment funds as it can access a range of regional investment strategies all managed by us.
- Benefits from our extensive multi-asset management experience that dates back to the inception of the business in 1994.
- Highly experienced asset allocation team that has expertise across all major asset classes.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

Fund Objective & Policy

The Fund aims to achieve long term capital growth. It looks to outperform a composite index over rolling 3-year periods, after the deduction of charges. This composite index comprises:

- 60% MSCI ACWI ex UK Index
- 25% FTSE All-Share Index
- 7% Bloomberg Barclays Global Aggregate ex GBP (GBP Hedged) Index
- 3% Bloomberg Barclays Sterling Aggregate Index
- 5% Sterling Overnight Index Average (SONIA)

The Fund is actively managed, and invests at least 80% of its assets in other funds.

The Fund usually invests in other Threadneedle funds, however, funds managed by companies outside the Threadneedle group may also be held, when this is considered appropriate. These funds may invest worldwide.

The Fund focuses on investment in funds providing exposure to equities (company shares), with only limited exposure taken to bonds (including corporate and government bonds).

The balance of the exposure to these different asset types may vary over time, however, equity exposure usually exceeds two-thirds of the Fund's value, under normal market conditions.

The Fund may also hold money market instruments, deposits, cash, and near cash.

Derivatives may be used with the aim of reducing risk or managing the Fund more efficiently, and up to 20% of the value of the Fund may be invested in funds that use derivatives for investment purposes. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

The composite index is representative of the Fund's investment exposure, and provides a suitably weighted target benchmark of global equities (excluding the UK), UK equities, investment grade bonds (hedged to sterling), investment grade sterling-denominated bonds, and cash, against which Fund performance will be evaluated over time.

Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges).
