Fund objective and strategy

SICVMEF is an actively managed open ended daily dealing UCITS V Luxembourg registered fund. The Fund seeks to maximise capital appreciation by investing primarily in Middle Eastern equity markets and equity related securities across the market capitalisation spectrum. The structured investment process is primarily bottom up and fundamentally driven with top down analysis an additional source of performance and risk control. The result is a high conviction stock fund of best ideas. While the Fund references the benchmark for performance comparison, it can differ from the benchmark's composition and also hold assets which are not part of the benchmark.

Risk Warning: Investors should consider certain risk factors peculiar to investing in Emerging Markets, before taking any investment decision. Emerging Markets (EM) carry risks as well as rewards. These require consideration of matters not usually associated with investing in securities of issuers or financial derivative instruments linked to securities of issuers in the Developed Markets. The economic and political conditions differ from those in Developed Markets, and may offer less social, political and economic stability. EM may be more volatile than more mature markets. The value of your investment could go down as well as up. In extreme circumstances, this could result in a total loss of your investment. EM may suffer from liquidity problems; changes in rates of exchange between currencies may cause the value of your investment to decrease or increase; operational risks of investing are higher than in more developed markets. For a full description of these and further risks, you should refer to the latest Prospectus.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-year, 5-year, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating or 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar Rating is for the share class specified only; ratings for the other share classes will vary.

*Month in arrear as of 30.04.2025, the Ashmore SICAV Middle East Equity Fund (SICAV MEF) USD Inst in the Africa & Middle East Equity category received a rating of 4 stars among 57 funds for the 3-year period and 4 stars among 55 funds for the 5-year period and 4 stars among 44 funds for the 10-year period, based on risk-adjusted returns. **Past performance is no guarantee of future results.**
