Company Information

Company Information

BMO Fund Management Limited, the Authorised Corporate Director (ACD) of the Open-Ended Investment Company (OEIC), is the sole director. The ACD has appointed BMO Asset Management Limited as the Investment Manager to the individual sub-funds of the OEIC.

BMO Investment Funds (UK) ICVC V (the 'Company') is an investment company with variable capital under the Open-Ended Investment Company Regulations 2001 (SI2001/1228). The Company is an umbrella company with 3 individual sub-funds, and each of the sub-funds is a UCITS scheme.

Financial Statements

These financial statements are for the period 1 June 2021 to 30 November 2021.

Shareholders

Shares of the Company have no par value and the share capital of the Company will at all times equal the sum of the net asset value of each of the sub-funds. Shareholders are not liable for the debts of the Company. The assets of each sub-fund are treated as separate from those of every other sub-fund and are invested in accordance with the investment objectives and policy of that sub-fund.

Each sub-fund is a segregated portfolio of assets and, accordingly, the assets of a sub-fund belong exclusively to that sub-fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company or any other sub-fund and shall not be available for any such purpose.

The Company adopted segregated liability status for sub-funds on 8 June 2012. From that date the assets of one sub-fund may not be used to satisfy the obligations of another sub-fund.

While the provisions of the OEIC Regulations provide for segregated liability between sub-funds, the concept of segregated liability is relatively new. Accordingly, where claims are brought by local creditors in foreign courts or under foreign law contracts, it is not yet known how those foreign courts will react to regulations 11A and 11B of the OEIC Regulations.

Instrument of Incorporation and Prospectus

The Company was incorporated and authorised by the Financial Conduct Authority on 8 August 2001 under registered number IC118.

As at 30 November 2021 the OEIC comprised the following sub-funds:

BMO Responsible Global Equity Fund

BMO Responsible UK Equity Fund

BMO Responsible UK Income Fund

Additional sub-funds may be added at the ACD's discretion.

The investment objectives, investment policies and investment activity reports, for each sub-fund are included in the financial statements for that sub-fund.

Copies of the current prospectus, the latest annual report and any subsequent reports are available from the Administrator.

Other Information

The BMO Responsible Global Equity Fund, BMO Responsible UK Equity Fund and BMO Responsible UK Income Fund offer both accumulation and income shares.

The Operating charges figure for each share class can be found in the sub-fund's Comparative Tables.

There were no cross holdings between sub-funds in BMO Investment Funds (UK) ICVC V as at 30 November 2021.

Following the announcement on 12 April 2021 regarding Ameriprise Financial's proposed acquisition of BMO's EMEA Asset Management business, including BMO GAM Asia Limited (BMO GAM (EMEA)), Columbia Threadneedle confirmed that this acquisition completed on 8 November 2021. BMO GAM (EMEA) is now part of Columbia Threadneedle Investments, the global asset management business of Ameriprise Financial.

Certification of Financial Statements by Directors of the Authorised Corporate Director

This report contains the information required by the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued in May 2014, the Open-Ended Investment Companies Regulations 2001 and the Collective Investment Schemes sourcebook, in the case of interim financial statements and was approved for publication on 25 January 2022.

Responsible Principles

Introduction

Responsible is the name of a range of socially responsible investment funds provided by the BMO Group. These funds are invested in company shares and bonds to provide capital growth and income for customers. Published policy is outlined on the www.bmogam.com website, which states positive and negative criteria but without these specificities.

Philosophy

Our Responsible product range offers customers a way to invest in shares and bonds of companies that adhere to certain values and standards, and are managed to provide capital growth and income. We do this by applying ethical and environmental, social and governance (ESG) principles to the selection of investments, having a robust approach to portfolio construction and management, and using our influence as shareholders to encourage more ethically, socially responsible and environmentally sustainable behaviour by companies. The philosophy for these products is based on three pillars:

Invest in companies that demonstrate responsible business practices, and support those whose activities make a positive contribution to society and the environment;

Avoid investments in companies with activities that harm society or the environment; and

Improve: use our influence as an investor to encourage companies in their efforts to improve their management of ethical and ESG issues through engagement and voting.

Our investors are increasingly asking us about how they can better understand the positive impact the strategies are having. In response, we now publish annual ESG profile and impact reports for our Global and Global Emerging Market Strategies to share more information with our customers on the ESG performance of the underlying holdings.

Overview

We provide a range of investment strategies for the diverse demands of investors. This has evolved over time to include a mix of asset classes and geographic coverage. Our dedicated Responsible Investment (RI) team of 24 is involved in analysing each company proposed for this fund range. In addition, we have an independent Responsible Investment Advisory Council (RIAC) that works with the RI team to provide input on key ESG trends and engagement priorities. BMO Global Asset Management's range of Responsible strategies includes:

Global strategies

- BMO Responsible Global Equity Fund

UK strategies

- BMO Responsible UK Equity Fund
- BMO Responsible UK Income Fund
- BMO Responsible Sterling Corporate Bond Fund

Emerging Market strategies

- BMO Responsible Asian Equity Fund
- BMO Responsible China A-Shares Equity Fund
- BMO Responsible Global Emerging Markets Equity Fund

European strategies

- BMO Responsible Euro Corporate Bond Fund

Responsible Principles

(continued)

Screening criteria

Our in-house Responsible Investment team conducts in-depth research into every company considered for the Responsible strategies. We have product-based criteria and conduct-based criteria in order for us to thoroughly assess whether companies should be held in the Responsible range. The RI team also draws on an independent Responsible Investment Advisory Council, a group of experts who are leaders in their fields, bringing international experience across responsible investment, environmental, social and ethical issues. The Council is presided over by Justin Welby, Archbishop of Canterbury, and chaired by Howard Pearce, a leading figure in the responsible investment world.

a) Product-based exclusions

We review whether companies are involved in providing activities and services that are deemed to be negative from an ethical or sustainability perspective. Many of the products and services excluded are in line with traditional 'sin stocks'. Below is a summary of our product-based criteria.

Product-based Criteria

- Alcohol
- Deforestation
- Electricity generation
- Fossil fuels
- Fur
- Gambling
- Genetic Modification (GM)
- High interest rate lending
- Nuclear energy
- Pornography, harmful and violent materials
- Tobacco
- Toxic chemicals
- Transport
- Weapons

b) Conduct-based exclusions

In addition to the above criteria, the strategies will exclude companies that fail to address the key ethical, environmental and social impacts of their operations. Below is a summary of our conduct-based criteria.

Conduct-based Criteria

- Social
 - Animal testing and welfare
 - Human rights
 - Labour standards
 - Product safety
 - Responsible sales and marketing
- Governance
 - Bribery and corruption
 - Compliance and ethics
- Environment
 - Biodiversity loss
 - Climate change
 - Waste management
 - Water consumption

Notes to the Financial Statements applicable to all sub-funds

Accounting Policies

The interim financial statements for each sub-fund have been prepared on the same basis as the audited financial statements for the year ended 31 May 2021. They are in accordance with the historical cost basis, as modified by the revaluation of investments, and the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Management Association (IMA) in May 2014 (the IMA SORP 2014), and United Kingdom Generally Accepted Accounting Practice.

Authorised Corporate Director's Investment Report

for the period 1 June 2021 to 30 November 2021 (unaudited)

Fund Objective

The Fund aims to achieve long term capital growth.

The Fund invests only in assets which meet the Fund's predefined ethical screening criteria.

The Fund invests primarily in equities of companies which may be located anywhere in the world, be of any market capitalisation and be in any industry sector (subject always to the ethical screening).

To the extent that the Fund is not fully invested in equities, the Fund may also invest in other transferable securities, other collective investment schemes, money market instruments, warrants, cash and near cash.

The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 8 November 2021. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Jamie Jenkins
Fund size £1,480.7 million
Launch date 13 October 1987

Manager's Review

Global equity markets rose over the six-month period. Stocks found support from the rollout of Covid-19 vaccines along with continued accommodative monetary policy and fiscal support. Global government bond yields rose modestly over the period. In July, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of its target where price pressures are deemed transitory. In November, the Federal Reserve said it would begin to taper its quantitative easing programme.

During the period we initiated a position in UK exchange operator, LSE Group, where share price weakness provided an opportunity to upgrade our exchanges exposure given its strong sustainable finance agenda. We sold our position in Japan Exchange Group as we refocused our exchanges positions. The residual holding of US insurer, Jackson Financial, which we had received from a spinoff from Prudential, was also sold. Our portfolio positioning retains its bias towards higher quality, sustainable growth companies that can prosper in spite of market volatility. We continue with our strategy of looking to add to positions in high quality sustainable companies where the market allows us to add at more attractive levels. Where appropriate, we have most recently been introducing stocks or adding to some of our holdings that have not seen strong share price performance as the market has rallied, particularly stocks that we feel may benefit from some sector rotation. We have continued to trim holdings that we see as being either of lower quality than the names we are replacing them with or where we think that the share price strength has made the valuation less appealing as we feel some minor multiple compression could be seen in the short-term.

While global equity markets have continued to grind higher, under the surface, inflationary fears coupled with supply chain disruptions driven by commodity prices and a mix of component and labour shortages, continued to pose challenges for investors. In addition, concerns over tightening financial conditions, as suggested by the US Federal Reserve, and uncertainty from the Omicron variant impact on growth and demand, resulted in markets succumbing to selling pressure. Overall, we continue to see strong corporate balance sheets with demand across multiple industries remaining quite buoyant whilst supply chain disruptions look to be over their worst, albeit still challenging. Against this backdrop, we remain constructive that equity markets can continue to post gains. We retain our focus on companies with higher earnings visibility, as we feel superior pricing power or cost management will be better rewarded, whilst avoiding over-paying for open-ended growth stories that could see profit margins (and valuations) under pressure.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 June 2021 to 30 November 2021 (unaudited)

Performance Summary

The BMO Responsible Global Equity Fund returned 11.5% over the six-month period. By comparison, the MSCI World Index returned 12.9%. All figures are net of fees, in sterling terms and on a total return basis.

The portfolio underperformed the benchmark. In terms of stock selection the largest detractor was from not holding Microsoft in the portfolio due to it not meeting our responsible investing criteria. In terms of holdings, the worst performer was Prudential, where the emergence of Omicron hit key Asian markets hard, coming on the heels of the problems caused by the impact of the Delta variant. We also saw underperformance from Mastercard after reports of an antitrust probe at its peer Visa prompted a sell-off. On the positive side we saw good results drive outperformance from Thermo Fisher Scientific and Accenture, with the latter also making further positive acquisitions. There was also a strong contribution from the holding of Apple, which benefited from the strength of mega-cap technology stocks focusing attention on its growth and value attractions and metaverse potential.

Authorised Corporate Director's Investment Report

for the period 1 June 2021 to 30 November 2021 (unaudited)

Fund Objective

The Fund aims to achieve long-term capital growth with some income.

The Fund invests only in assets which meet the Fund's predefined ethical screening criteria.

The Fund invests primarily in equities of UK companies. These are companies in any economic sector and of any market capitalisation that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK.

To the extent that the Fund is not fully invested in equities, the Fund may also invest in other transferable securities (including, from time to time at the investment manager's discretion equities of non-UK companies), collective investment schemes, money market instruments, deposits, warrants, cash and near cash.

The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 8 November 2021. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Catherine Stanley
Fund size £540.0 million
Launch date 1 June 1984

Manager's Review

The UK equity market was ahead over the six-month period. Official data showed the UK economy grew by 1.3% in the third quarter, down from 5.5% in the previous quarter, as higher coronavirus case levels together with labour and materials shortages weighed. The UK's composite Purchasing Manager's Index softened moderately in November versus the prior month, though remained firmly in expansion territory. With the emergence of the Omicron Covid-19 variant in November, the UK government reintroduced mask wearing in shops and on public transport as well as tightening rules on international travel. Along with the Omicron variant, stocks were also held back by continuing worries over rising global price levels. UK inflation leapt to 4.2% in October versus 3.1% in the prior month, reaching its highest level in a decade against increasing housing and energy costs. The Bank of England's chief economist warned UK headline inflation would likely rise to around 5% by early 2022.

New additions to the portfolio included Close Brothers, the UK based merchant banking group focussing on specialist niches. The group boosts a pristine underwriting record, strong risk management in securities trading, good customer service and is very well capitalised. Shares should rerate as credit performance sustains through the cycle (in line with history) and investments bear fruit. We also initiated an underweight position in Reckitt, after it was re-assigned as acceptable. The company has a strong collection of brands in defensive areas. Sales included HSBC after it was designated as unacceptable. We also disposed of the holding of Avast after it became the latest beneficiary of the elevated merger and acquisition activity level in the UK SMID space, with a premium bid from competitor Norton positively contributing to Fund performance.

Whilst we are constructive on the prospects for the UK generally, the narrative is changing near term. Global economic growth is slowing, supply-chain bottlenecks coupled with robust consumer demand are driving inflation expectations higher, government policy is becoming less accommodative, and we face the uncertainty of another autumn/winter with Covid-19. Despite corporates printing strong second-quarter results, typically meeting or exceeding expectations and maintaining or upgrading guidance, market expectations indicate that there is some risk to the downside. Nonetheless, growth expectations are encouraging into 2022 and beyond, business confidence is high despite the threat of inflation, and consumer confidence remains above pre-coronavirus levels with household balance sheets in excellent shape. We are steadfast in our approach, investing in established businesses with demonstrable track records of value creation irrespective of the prevailing economic conditions.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 June 2021 to 30 November 2021 (unaudited)

Performance Summary

The BMO Responsible UK Equity Growth Fund returned 3.7% over the six-month period. By comparison, the FTSE All Share Index returned 1.9%. All figures are net of fees, in sterling terms and on a total return basis

The portfolio outperformed the benchmark. Responsible factors had an overall negative impact on performance. Two of the Fund's four largest negative contributors were from stocks not in our responsible universe, including Royal Dutch Shell, as energy prices rose sharply. In terms of portfolio holdings, the largest detractor was Tyman, which weakened on concerns over labour and materials shortages. Positive drivers of outperformance included Next Fifteen Communications and Watches of Switzerland Group, which both announced strong results, the latter seeing a material improvement in product supply. We also saw Rentokil increase their medium-term organic revenue target following increased demand in their hygiene services division. Rio Tinto, a large index position which is excluded by our responsible criteria due to its mining operations, proved to be positive contributor.

BMO Fund Management Limited 17 January 2022

Authorised Corporate Director's Investment Report

for the period 1 June 2021 to 30 November 2021 (unaudited)

Fund Objective

The Fund aims to achieve income with capital growth.

The Fund invests only in assets which meet the Fund's predefined ethical screening criteria.

The Fund invests primarily in equities of UK companies. These are companies in any economic sector and of any market capitalisation that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK.

The Fund may also invest in investment grade, Sterling denominated corporate bonds.

To the extent that the Fund is not fully invested in equities or corporate bonds, the Fund may also invest in other transferable securities (including, from time to time at the investment manager's discretion equities of non-UK companies), collective investment schemes, money market instruments, deposits, warrants, cash and near cash.

The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 5, published on 8 November 2021. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Catherine Stanley
Fund size £437.7 million
Launch date 13 October 1987

Manager's Review

The UK equity market was ahead over the six-month period. Official data showed the UK economy grew by 1.3% in the third quarter, down from 5.5% in the previous quarter, as higher coronavirus case levels together with labour and materials shortages weighed. The UK's composite Purchasing Manager's Index softened moderately in November versus the prior month, though remained firmly in expansion territory. With the emergence of the Omicron Covid-19 variant in November, the UK government reintroduced mask wearing in shops and on public transport as well as tightening rules on international travel. Along with the Omicron variant, stocks were also held back by continuing worries over rising global price levels. UK inflation leapt to 4.2% in October versus 3.1% in the prior month, reaching its highest level in a decade against increasing housing and energy costs. The Bank of England's chief economist warned UK headline inflation would likely rise to around 5% by early 2022.

New additions to the portfolio included Paragon, a conservatively run specialist lender. We believe growth should come from market share gains on the back of the ongoing shift of property from amateur to professional landlords and a deliberate strategy to expand the commercial business. Its underwriting record is very strong, and the company is very well capitalised and offers an attractive dividend yield. A holding in DWF, the legal services business, was also purchased, as we see evidence of recovery after management change, with income and growth potential. We also initiated an underweight position in Reckitt, after it was re-assigned as acceptable. The company has a strong collection of brands in defensive areas. Sales included HSBC after it was designated as unacceptable. We also disposed of the holding of Avast after it became the latest beneficiary of the elevated merger and acquisition activity level in the UK SMID space, with a premium bid from competitor Norton positively contributing to Fund performance.

Whilst we are constructive on the prospects for the UK generally, the narrative is changing near term. Global economic growth is slowing, supply-chain bottlenecks coupled with robust consumer demand are driving inflation expectations higher, government policy is becoming less accommodative, and we face the uncertainty of another autumn/winter with Covid-19. Despite corporates printing strong second-quarter results, typically meeting or exceeding expectations and maintaining or upgrading guidance, market expectations indicate that there is some risk to the downside. Nonetheless, growth expectations are encouraging into 2022 and beyond, business confidence is high despite the threat of inflation, and consumer confidence remains above pre-coronavirus levels with household balance sheets in excellent shape. We are steadfast in our approach, investing in established businesses with demonstrable track records of value creation irrespective of the prevailing economic conditions.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 June 2021 to 30 November 2021 (unaudited)

Performance Summary

The BMO Responsible UK Income Fund returned 0.8% over the six-month period. By comparison, the FTSE All Share Index returned 1.9%. All figures are net of fees, in sterling terms and on a total return basis.

The portfolio underperformed the benchmark. Responsible factors had an overall negative impact on performance. Three of the Fund's seven largest negative contributors were from stocks not in our responsible universe, including Royal Dutch Shell as energy prices rose sharply. In terms of portfolio holdings, the largest detractor was Tyman, which weakened on concerns over labour and materials shortages. Positive contributors included Sirius Real Estate, a leading owner and operator of commercial property, performed strongly following resilience in the German property market. Their shares moved to higher premium to book value on optimism over further yield compression. Rio Tinto, a large index position which is excluded by our responsible criteria due to its mining operations, proved to be positive contributor.

BMO Fund Management Limited 17 January 2022
