**AXA Investment** Managers (AXA IM) is a dedicated investment manager within the AXA Group, a world leader in financial protection and wealth management. Our aim is to develop close relationships with our customers and to provide them with outstanding investment

# solutions backed up with exceptional customer service.

As a 'multi-expert' investment manager, we aim to offer investment expertise across a broad range of asset classes that few of our competitors can match, but we focus on specific areas within each asset class where we can add real value for our clients.

Our total funds under management now exceed £656 billion (source: AXA IM as at 30 November 2017).

## Investment objective and policy

The aim of this Fund is to achieve income with some prospects for capital growth over the long-term.

The Fund invests in shares of quoted large and medium-sized UK companies, bonds issued by the UK government (gilts), including index-linked gilts, and cash. The Fund's typical asset mix ranges between 50-60% of its Net Asset Value invested in shares, with the remainder being invested mostly in gilts and cash. The ACD selects shares in companies based upon their prospects for future growth in dividend payments following an in depth analysis of the quality of their business model, financial status, and corporate governance arrangements. Investments in gilts are diversified across a range of maturities.

The Fund may also invest at the ACD's discretion in other transferable securities, cash, deposits, units in collective investment schemes and money market instruments. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. Use may be made of borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority rules.

### **Review**

Over the six month period to 30 November 2017, UK equities and index-linked government bonds have generated negative returns. The FTSE All Share Index fell 0.2% on a total return basis (including dividends). Breaking down the performance on a market capitalisation basis, the large cap FTSE 100 Index was down -0.67%, the mid-cap FTSE 250 Index rose +1.24% and the FTSE Small Cap (exinvestment companies) was up +1.33%. Index-linked gilt returns were also negative with the FTSE UK Gilts Index-Linked (All) Index falling -2.2%. UK base interest rates were increased in November 2017 to 0.5%, the first interest rate rise in more than a decade. The trailing 12 month rate of inflation was 4.0% on the Retail Price Index (RPI) measure and 3.0% on the Consumer Price Index (CPI) in November.

Given the perilous stand-off between the leaders of the United States and North Korea, rising US interest rates, confirmation that the US Federal Reserve's (Fed) stretched balance sheet will begin to be reduced, difficult Brexit negotiations and further despicable acts of terrorism, global equity markets have held up remarkably well. The global economy has continued to make steady progress helped both by momentum in the US economy and China. Brexit negotiations continue to dominate the UK economy with the IMF (International Monetary Fund) reminding us in June of the potentially negative implications of Britain's decision to leave Europe when it downgraded forecasts for UK GDP for 2017 to 1.7% from 2.0%. While UK unemployment fell to a 42-year low over the summer, the outlook for the UK consumer appears fragile. The effect of a weakened currency has fed through to inflation with both CPI and RPI measures ticking up through the year. We view these moves as transitory and expect the momentum to slow and reverse as we move into 2018. Sterling has strengthened against the US dollar (+9.5% YTD) and Japanese yen (+5.1%), but continues to be weak against the euro (-3.1% YTD).

After years of monetary easing the US Federal Reserve has made further progress 'normalising' interest rates, pushing the 10-year treasury yield as high as 2.6% during 2017. The Fed left the Fed Funds Rate (FFR) unchanged at 1.00-1.25% in October but announced that it would "initiate the balance sheet normalisation program". This was in line with parameters already proposed and will see \$6 billion of US treasury bonds and \$4 billion of MBS (Mortgage-Backed Securities) come off their balance sheet each month in Q4 2017. Expectations are for the Fed to increase interest rates again in December, with all but four members seeing the FFR at 1.25-1.50% or above by year-end.

In Europe, the strength of stock markets has been helped by companies posting positive earnings revisions, a pick-up in global leading economic indicators and the on-going supportive monetary policy backdrop. While September saw Angela Merkel win a historic fourth term in Germany's federal elections, the decline of the Christian democrat parties' (CDU/CSU) share of the overall vote has complicated coalition talks, with a final agreement unlikely for some time. France's new President Emmanuel Macron has seen his initial labour reforms treated positively by investors.

The oil price has been strong, helped by surprisingly strong global demand. This has had a positive impact on the oil-heavy FTSE All Share Index with both BP and Royal Dutch Shell announcing improved

financial positions and reiterating their dividend paying ability.

At a sector level mining has been the best performing area of the UK stock market in 2017. The commodity complex has performed more strongly than had been expected at the start of the year, helped by the on-going momentum in the Chinese economy. It was unsurprising that China reported an impressive annual GDP growth rate of 6.8% during the 19th national congress of the Communist Party - a major event which will further strengthen President Xi Jinping's powerbase. With plans for economic expansion including enormous projects like the One Belt One Road initiate (the single largest economic policy ever conceived, covering 65% of the world's population, one third of the world's GDP and c25% of all the world's trade) demand for commodities is seen as being firmly underpinned.

The income backdrop in the UK has remained supportive for UK investors with 2017 proving to be another good year for dividend growth. According to the Capita Dividend Monitor, between July and September 2017 UK dividend payments reached £28.5bn representing an increase of 14.3% year-on-year. This total was boosted by special dividend payments which were up 40% during the quarter. Looking ahead the prospective yield on the FTSE All Share Index is an attractive 3.7%, with further dividend growth being forecast for 2018.

## Outlook

Central bank policy continues to evolve and is being led by the US Federal Reserve. Maintaining investor confidence through this process will be challenging and could cause periods of significant volatility. While interest rates have started to rise from historically low levels the appealing return that equities offer versus other asset classes remains compelling. Corporate profitability has been robust and Merger and acquisition (M&A) activity underpins interest in the extended bull market that equities have enjoyed since the global financial crisis. Valuation remains a key risk for equity markets having traded at historically elevated levels for some time.

### **Risk and reward profile**

By investing in a fund which can invest up to 60% in equities you are likely to be looking for an investment which has lower risk than a pure equity based fund but you are prepared to accept some risk for potential reward. You are willing to accept that your investment will fall and rise in value and that you could get back less than you invest. Typically, you would prefer an investment with less risk than that of a fund which invests predominantly in equities or overseas.

Lower risk Higher							k
Potentially low	er reward				Potential	▶ ly higher reward	►
1         2         3         4         5         6         7							

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

#### Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which are subject to some level of variation which may result in gains or losses.

#### **Additional risks**

Inflation Linked Bond Risk: unlike other bonds, an inflation protected security (such as index linked gilts) reduces the negative effect of inflation on its real value. The market value of such securities will be affected both by the market's perception of future movements in interest rates and the future rate of inflation. Therefore the market value of such securities (and the value of the Fund) may not move in line with inflation rates in the short to medium term.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Copies of the latest Report and Accounts (long form) and Prospectus are available free of charge from the administration office: PO Box 10908, Chelmsford, CM99 2UT.

## **ADDITIONAL INFORMATION**

#### **Report and accounts**

The purpose of sending this Short Report for the Fund is to give you a summary of how the Fund has performed during the accounting period in accordance with the Collective Investment Schemes Sourcebook (COLL) rules. If you would like any additional information about the Fund you can request a free of charge copy of the more detailed long form accounts for the Fund. For a copy of this, please contact our dedicated customer services team on 0345 777 5511.

#### **UCITS V Directive**

The UCITS V Directive was implemented into national law on the 18 March 2016. The Directive aims to increase the level of protection already offered to investors in UCITS and to improve investor confidence in UCITS. It aims to do so by enhancing the rules on the responsibilities of depositaries, including a strict liability regime making the depositary liable for the avoidable loss of a financial instrument held in custody and by introducing remuneration policy requirements for UCITS fund managers.

#### **AXA IM Coal Policy**

Effective 30 June 2017, AXA Investment Managers has implemented a policy to divest from companies that derive more than 50% of their revenues from coalrelated activities, specifically mining and electric utilities companies. Should you require further information on this matter please contact AXA Investment Managers UK Ltd.

The value of investments and the income from them can fluctuate and investors may not get back the amount originally invested. Past performance is not a guide to future performance. Issued by AXA Investment Managers UK Ltd registered in England No. 01431068. The registered office address is 7 Newgate Street, London EC1A 7NX. AXA Investment Managers UK Ltd (119368) is authorised and regulated by the Financial Conduct Authority under the account shown. A member of the IA. Telephone calls may be recorded or monitored for quality assurance purposes.
