About the Company

Baillie Gifford Investment Funds II ICVC (Investment Company with Variable Capital) ('the Company') is an umbrella UK Open-Ended Investment Company ('OEIC') under regulation 14 (Authorisation) of the Open-Ended Investment Companies Regulations 2001. An OEIC is a collective investment vehicle in which your funds are pooled with those of other investors and spread across a portfolio of investments, thus reducing risk.

At 31 December 2023 the Company offered six sub-funds, and the range may be varied in the future. Each sub-fund is valued on a daily basis and is subject to different charging structures and subscription limits. All shares are single priced. Details of the sub-funds and the share classes are contained in the Prospectus, along with details of the switching facility available between sub-funds. The Prospectus was last revised on 18 December 2023 and the Instrument of Incorporation was last revised on 31 March 2023. Copies of the Prospectus or Instrument of Incorporation can be obtained from Baillie Gifford & Co Limited, the Authorised Corporate Director ('ACD') by contacting Client Relations.

The Company is registered in England and Wales, registered number IC001040, and the address of its Head Office is 1st Floor, Grimaldi House, 28 St James's Square, London SW1Y 4JH. The operation of the Company is governed by the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') ('the Regulations'), its Instrument of Incorporation and its Prospectus.

The Company's shareholders are not liable for its debts beyond the amount subscribed. Each sub-fund is classed as a UK UCITS retail scheme under COLL.

Any comments expressed in this report should not be taken as a recommendation or advice.

Amendment to the Annual Management Charge

The annual management charge of Class Y Shares increased from 0.25% to 0.50% on the third anniversary of the launch of the Baillie Gifford Health Innovation Fund (being 15 December 2023).

Sub-fund Cross-holdings

At 31 December 2023 none of the shares in the sub-funds were held by any other sub-funds of the Company.

Assessment of Value for the Sub-funds

Under COLL 6.6.20R (1), Baillie Gifford & Co Limited, the ACD of the Company, must conduct an assessment at least annually for each UK authorised sub-fund it manages, of whether the payments out of the sub-funds set out in the prospectus are justified in the context of the overall value delivered to shareholders. This assessment of value must, as a minimum, consider seven criteria, namely: quality of service, performance, authorised fund manager costs, economies of scale, comparable market rates, comparable services and classes of shares. The latest report as at 31 July 2023 is available on the website at www.bailliegifford.com.

Baillie Gifford & Co Limited, the Authorised Corporate Director of the OEIC, is wholly owned by Baillie Gifford & Co. We only provide information about our products and do not provide investment advice.

Statement of Authorised Corporate Director's Responsibilities

The Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') requires the Authorised Corporate Director to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial position of the Company and of its revenue and expenditure and of its net gains and losses on the property of the Company for the period. In preparing the financial statements the Authorised Corporate Director is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to the Financial Statements of UK Authorised Funds issued in 2014;
- follow generally accepted accounting principles and applicable accounting standards, including FRS 102
 "The Financial Reporting Standard applicable in the UK and the Republic of Ireland";
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;

- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation; and
- take reasonable steps for the prevention and detection of fraud and irregularities.

The Authorised Corporate Director is responsible for the management of the Company in accordance with the Instrument of Incorporation, the Prospectus and the Regulations.

The Interim Report and Financial Statements were approved by the Authorised Corporate Director and signed on its behalf by:

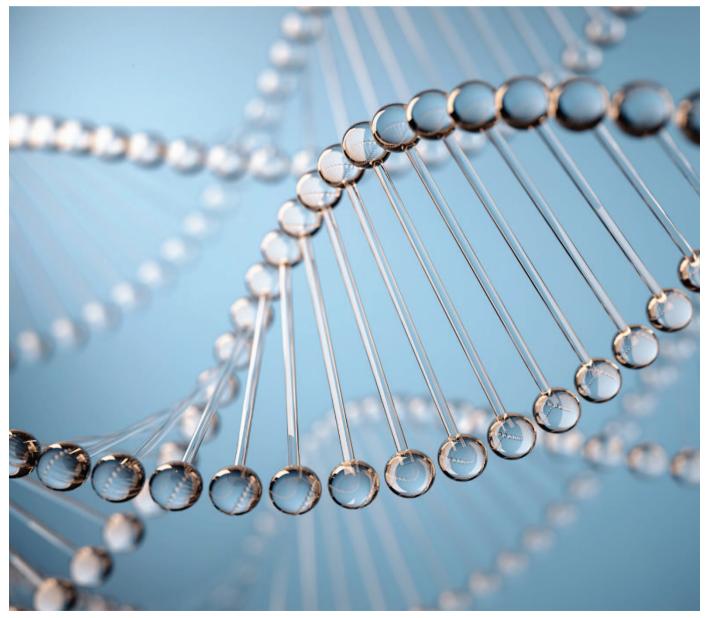

M J C Wylie, Chairman C M Fraser, Director Baillie Gifford & Co Limited 29 February 2024

BAILLIE GIFFORD

Baillie Gifford Health Innovation Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford Health Innovation Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of companies that through bringing innovation to human health, have the potential to deliver substantial improvements to health, lengthen lifespans and reduce healthcare costs. The Fund will invest in companies anywhere in the world and will not be restricted to companies in the healthcare sector as defined by any index. The Fund will be actively managed and will be concentrated typically comprising between 25 and 50 holdings.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically lower rewards, lower risk | | | | Туріс | ally higher h | r rewards, higher risk |
|--|---|---|---|-------|------------------|---------------------------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

As returns are not available for all of the past five years we've used the comparative index in their place to calculate the indicator. The indicator does not take into account the following relevant material risks:

The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

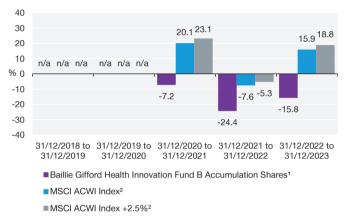

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

Baillie Gifford Health Innovation Fund cont.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.50%. There are not five full years of performance shown as the Fund was launched on 15 December 2020. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI ACWI Index (the 'Index') by at least 2.5% per annum (the 'target return') over rolling five-year periods. For the six months to 31 December 2023, the return on B Accumulation Shares was $-10.7\%^1$ compared to the Index of $7.2\%^2$ and the target return of $8.5\%^2$. We fully appreciate that this is disappointing whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objectives. We look forward to reporting to you on more meaningful performance time periods over the years to come.

Market environment

In the second half of 2023, some positive market sentiment returned, as falling inflation increased optimism that central bank interest rates will be cut in 2024. Despite the sentiment shift, headwinds to healthcare remained, with scarcer capital for biotechnology companies, budget tightening at healthcare systems and post-pandemic cyclical adjustments ongoing. Additionally, the perceived impact of the anti-obesity drugs weighed heavily on the healthcare equipment industry. However, positive economic news and tentative signs of a recovery in the sector boosted stock prices in the final months of 2023.

Performance

Scepticism remains for innovative companies driving a revolution in human health. Whether it be companies creating new types of drugs, novel devices or using technology to deliver efficiencies, we believe the market is discounting their potential. The Fund fell in absolute terms and underperformed the benchmark in the period.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the index return plus the outperformance will not equal the target return. Please see Disclaimer on page 108. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Regardless of short-term sentiment changes, we believe the underlying fundamental strength of the portfolio will be rewarded in share price returns over the long term.

The top contributors to performance over the period were Alk-Abello, Ascendis, and Ionis. Alk-Abello develops immunotherapy drugs to stop allergic reactions. The company's stock price rose on strong European tablet sales in its third-quarter results. Alk-Abello also completed two positive paediatric studies in 2023, in house dust mites and tree pollen, which will help it expand in the US and Canada. With an early-stage trial in peanut allergies due to announce results in 2024, the company has a portfolio that can propel growth over the next decade.

Ascendis is a drug developer whose primary technology, 'TransCon', enables the more controlled release of a drug in the body. The company had a strong end to 2023, buoyed by improving capital markets activity and clear clinical and commercial progress. Its first drug, Skytrofa, for human growth hormone deficiency, is increasing sales, and after positive trials in hypoparathyroidism and achondroplasia, the company is well-positioned heading into 2024.

Ionis was another contributor to performance in the last six months of 2023. It specialises in producing antisense drugs that selectively silence genes in the body. The broad applicability of this approach is evident in its extensive pipeline of over 40 drugs. Its drug, Wainua, was approved for the nerve condition amyloidosis polyneuropathy in December in the US. It announced several other positive trial results, including in familial chylomicronaemia, a debilitating genetic condition.

The top detractors from performance were ShockWave, Genmab, and Exact Sciences. Shockwave has developed an intravascular lithotripsy (IVL) device which uses pressurised sound waves to remove calcified plaques in veins and arteries. It underperformed despite continued operational progress. Its full-year 2023 guidance is for revenue growth of 48% and operating margins to expand to 20%. However, after an article alleged certain medical procedures were being overutilised in the US, some insurers have made it harder to pre-authorise their procedure. We believe this is a temporary obstacle, and back the company's track record of execution.

Genmab had a weak end to 2023, as its blood cancer drug, Darzalex, underperformed sales expectations and its lung cancer drug, Rybrevant, succeeded in a trial, but the results were not as strong as hoped compared to the existing standard of care. However, we believe Genmab's antibody expertise, existing partnerships and broad pipeline have set a strong foundation for future success.

Exact Sciences, the developer of tests to diagnose and inform cancer treatment, continued to execute well despite a sell-off in the third quarter. Its core product, Cologuard, is the leading non-invasive test for colorectal cancer (CRC) and is growing sales at over 20%. With its CRC blood test in trials and its minimal residual disease test, which assesses if cancer has returned, launching imminently, we see several positive developments in 2024 as the company moves closer to profitability.

Notable transactions

We decided to sell Oscar Health in September. The company's vision was to disrupt the US health insurance industry through the use of technology, which would empower patients and carers to find the best treatment at the lowest cost. However, the difficult environment impacted the company's ability to reach the scale required to be successful and decreased its upside. We sold to use the proceeds for companies we have higher conviction in.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

³On 16 December 2023, following the ending of an initial discount period, the annual management charge for Y class shares increased to 0.50%. As a result, as at 31 December 2023 the ACD considered 0.56% to be a more indicative rate for ongoing charges for Class Y Shares.

⁴As at 30 June 2021 the ACD considered 0.55% to be a more indicative rate for ongoing charges for Class B Shares.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

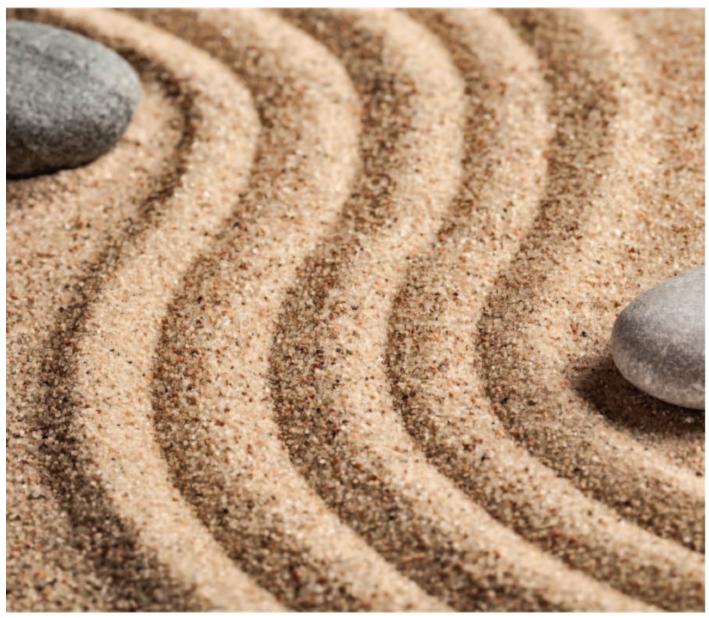

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 June 2023 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Japanese Income Growth Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford Japanese Income Growth Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in Sterling, by at least 1% per annum over rolling five-year periods through a combination of income and capital growth whilst maintaining a yield higher than the TOPIX.

Investment Policy

The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector. Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically lower rewards, lower risk | | | | Туріс | ally higher h | r rewards, higher risk |
|--|---|---|---|-------|------------------|---------------------------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

The manager can charge some, or all, expenses to the Fund's capital, reducing its value. This amount can vary from year to year.

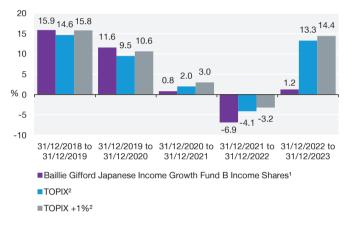

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

With effect from 1 September 2023 the ACD has, for distribution purposes, the facility to charge some or all expenses to capital. Prior to this only some or all of the annual management charge could be allocated to capital. For year to 30 June 2023 100% of the annual management charge was allocated to capital. This will reduce the capital value of the Fund. This number may vary from year to year. The figure for the current financial period has not yet been determined.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the annual management charge of 0.60%. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past performance

The investment objective of the Fund is to outperform (after deduction of costs) the TOPIX (the 'Index') by at least 1% per annum (the 'target return') over rolling five-vear periods through a combination of income and capital growth whilst maintaining a portfolio yield higher than the TOPIX. For the six months to 31 December 2023 the return on B Income Shares was 1.6%¹ compared to the return on the Index of $6.9\%^2$ and the target return of $7.4\%^2$. The yield on the portfolio was $2.7\%^3$ compared to the yield on the Index of $2.5\%^3$. We fully appreciate that this is disappointing whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objectives. Over that period, the annualised return on B Income Shares was 4.2% compared to the Index of $6.8\%^2$ and the target return of

 $7.9\%^2$. It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market environment

2023 was mostly dominated by rising prices, prospects of a tighter monetary policy and a weak currency. Towards the end of 2023, we saw welcoming signs of these trends reversing; although there was little change to domestic monetary policy, the Fed's dovish pivot resulted in greater risk appetite into year-end. Banks sold off as investors shifted towards growth, such as internet names like GMO Internet, which had been shunned for most of the year.

We continue to examine the fundamentals of our holdings and the strength of our investment theses. In aggregate, we remain confident of the longer-term structural trends that underpin the Fund.

¹Source: FE, 10am dealing prices, income reinvested.²Source: Revolution and TOPIX, total return in sterling terms. The target return outperformance is compounded daily therefore the index return plus the outperformance will not equal the target return. Please see Disclaimer on page 108. ³Source: Style Analytics and Tokyo Stock Exchange, forecast dividend yield, reweighted to 100% to exclude stocks without yield data. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

During the six-month period, the Fund delivered a positive return but underperformed the Index and target return. We remain encouraged that most companies in the Fund are performing well operationally, as this will be the dominant influence on long-term returns.

Among the top contributors to performance were Benefit One, Infomart and SBI Holdings.

Benefit One is a fringe benefits platform for employees. We initiated a new position in October on the assumption that it was attractively valued for a very cash-generative business with an excellent competitive position. However, the company's appeal has not gone unnoticed as two firms, M3 and Dai-Ichi Life, have since made tender offers to acquire a majority of Benefit One shares. After a significant rerating, and rumours that one of the bidders may take the company private, we decided to lock in a profit and sell the position.

Infomart, an online food ordering platform for restaurants has started to recover following the reopening of the hospitality industry and influx of visitors to Japan. Sales are growing at 20% year-over-year, driven by strong momentum from its invoice software service, reflecting an increase in paid users. Infomart provides much needed efficiency to an industry beset by staff shortages and rising wages. We expect further growth through margin expansion, as it uses its dominant market position to raise prices now that the industry shows strong growth.

SBI Holdings, Japan's leading online broker, has been buoyed by the broader market enthusiasm for financials this year. It reported record-high revenue, an increase of 28% year-over-year, boosted by the Financial Services Business. SBI are the first in Japan to offer commission-free online trading of domestic stocks from the end of September 2023. Since the announcement, it has experienced a surge in account openings for NISA tax-exempt accounts and transfers from other platforms, which the government hopes will encourage the cash-rich populace that holds 55% of their assets in cash to invest more in financial assets. Among the bottom detractors from performance were Shiseido, Pola Orbis, and FANUC, who all saw Chinese exposure as a common area of weakness.

Shiseido, the beauty and cosmetics company, continues to struggle due to weaker demand from Chinese consumers post Covid-19. Despite Japan seeing an influx of foreign visitors, the recovery in the number of visitors from mainland China has been much slower and is still 65% below October 2019 figures. This was reflected in Shiseido's recent results, which reported a decline in sales. Concerns over the Fukushima water release also decreased consumer demand for Japanese products. We view these challenges as short-term and believe Shiseido is well-positioned to benefit from structural trends, such as Asia's rising middle-class wealth.

Pola Orbis, the beauty and cosmetics company, has faced the same struggles as Shiseido. Its share price was down despite releasing solid results, with operating profit up 55% for the first nine months of 2023 (albeit from a low Covid-19 induced base). This was primarily thanks to strong sales of its Orbis brand and a recovery emerging in department store sales.

FANUC, the global industrial automation company, has suffered from the cautious economic outlook of China, which is one of its core markets. The global semiconductor shortage has also led to a decline in the production of autos and other electronic devices, further impacting demand. This is the nature of a cyclical business like FANUC. However, in the long term it is well-placed to benefit from Japan's labour shortage, which will help drive demand for robotics.

Notable transactions

We took a position in Olympus, a world leader in the manufacture of endoscopes for gastrointestinal and other surgical procedures. Endoscopy continues to expand by developing new markets, both geographical and procedural, meaning that there remains a sizeable opportunity for future growth and profit margin expansion.

Investment Report cont.

This was funded from the complete sale of three companies: Toyota Tsusho, the trading company that has benefited from high commodity prices; Makita, a manufacturer of power tools that was adversely impacted by supply issues and inventory build-up during Covid-19 and Sompo, one of the largest non-life insurers in Japan that has performed strongly over the past year, affecting our assessment of further upside from here.

As mentioned, Benefit One was bought and sold for the Fund during the period. The sale was driven by material changes to the investment case due to two tender offers to acquire stakes in the company. During our short holding, the share price was close to doubling.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

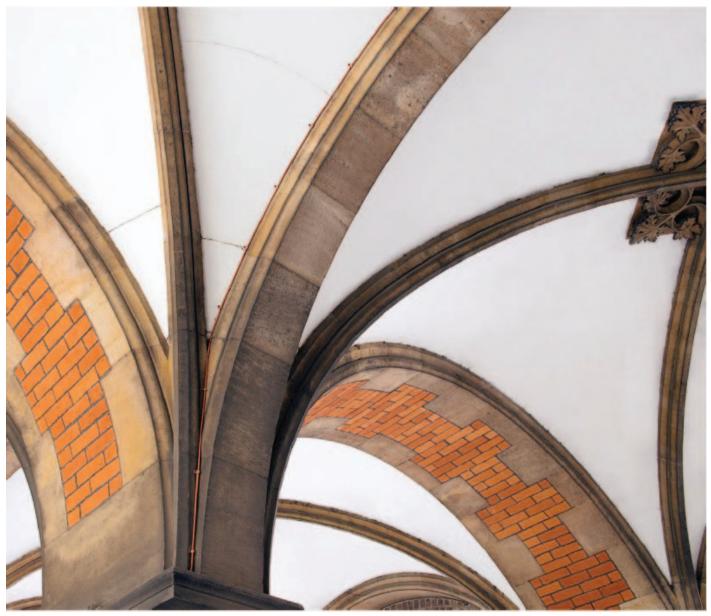

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 June 2023 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Sterling Aggregate Bond Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford Sterling Aggregate Bond Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) an index comprising 50% of the FTSE Actuaries UK Conventional Gilts All Stocks Index and 50% of the ICE BofA Sterling Non-Gilt Index by 0.65% per annum over rolling three-year periods.

Investment Policy

The Fund will invest at least 80% in a diversified portfolio of (1) UK government bonds and (2) investment grade bonds issued by corporate issuers, public bodies and supranationals. The Fund may also invest in other developed and emerging market government bonds and sub-investment grade bonds. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be actively managed and is not constrained by the index.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically lower rewards, lower risk | | | | Typically higher rewards, higher risk | | | |
|--|---|---|---|--|---|---|--|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in government and corporate bonds. The indicator does not take into account the following relevant material risks:

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

The manager can charge some, or all, expenses to the Fund's capital, reducing its value. This amount can vary from year to year.

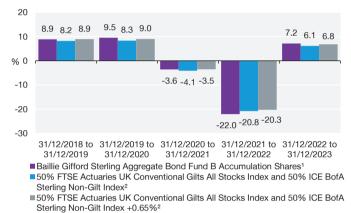

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes the ACD has the facility to allocate some or all expenses to capital. For the year to 30 June 2023 100% of expenses were allocated to capital. This will reduce the capital value of the Fund. This number may vary from year to year. The figure for the current financial period has not yet been determined.

Investment Report

Past Performance

Past performance

The investment objective of the Fund is to outperform (after deduction of costs) an index comprising 50% of the FTSE Actuaries UK Conventional Gilts All Stocks Index and 50% of the ICE BofA Sterling Non-Gilt Index (the 'Index') by at least 0.65% per annum (the 'target return') over rolling three-year periods. For the six months to 31 December 2023 the return on B Accumulation Shares was $9.2\%^1$ compared to the Index of $8.6\%^2$ and the target return of $9.0\%^2$. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objectives. Over that period, the annualised return on B Accumulation Shares was -7.0%¹ compared to the Index of $-7.0\%^2$ and the target return of $-6.3\%^2$.

Market environment

Markets spent much of 2023 grappling with concerns inflation was remaining stubbornly high, and fears that higher interest rates set to combat inflation would lead to a recession. Towards the end of the year, however, what was thought the least plausible scenario gained the most prominence – a 'soft landing' where inflation falls quickly and growth remains resilient. Markets now price several interest rate cuts in 2024 and bond yields fell (prices rose) as a result. There is scope for asset prices to disappoint if central banks do not follow this path.

Although economic growth in the US remains relatively strong, the rest of the world has slowed. Core European markets are moribund, with high energy prices continuing to bite along with decreased demand from overseas, particularly from China. Chinese authorities are adding stimulatory measures but there has been limited visible improvement in either the real economy or financial markets. This is largely because of the issues in their real estate sector, which is a large component of China's economy. Other emerging markets in Central

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and FTSE and ICE, total return in sterling terms. The target return outperformance is compounded daily therefore the index return plus the outperformance will not equal the target return. Please see Disclaimer on page 108. You should be aware that past performance is not a guide to future performance.

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.35%. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Europe and Latin America continued to cut interest rates towards the end of the year. Their pre-emptive response to rising inflation in 2021 has been largely successful in reducing inflation sooner than in developed markets.

Performance

Sterling bonds performed well during the period, posting strong returns on positive sentiment towards credit risk combined with falling government yields. The Fund exceeded its target return over the six-month period. Corporate bonds performed well relative to government bonds as the growth and inflation outlook became more sanguine. Exposure to the banking sector was a notable part of this, with higher-yielding subordinated bonds helping. Government bond positioning also made a positive contribution where, by and large, the Fund was positioned correctly to benefit from rising yields in developed markets earlier in the period and subsequently capture some of the rally which followed. The Fund has also been positioned for select emerging markets to outperform.

Over 12 months the Fund has outperformed¹ for similar reasons while over three years the return is in line with the index. Asset allocation between corporate and government bonds has made a positive contribution, and the Fund has been positioned to benefit from rising government yields during much of the period. Currency positioning offset some of these gains.

Positioning

Our central view is that inflation may prove stickier than expected and core government bond yields may retrace some of their recent gains. The Fund has a small underweight position in developed markets – largely expressed through UK, US and Japanese markets, with overweights to Australia and Europe partially offsetting these. The position in Japan was opened towards the end of the period as global yields rallied, giving us more confidence in the view that inflation in Japan is too high to justify ongoing yield curve controls. The Fund retains an overweight to emerging market bonds but we have reduced this further as yields have fallen, trimming Brazil and South Africa and initiating an underweight in Chile where we think interest rates cuts will not be aggressive as the market expects.

Our broad view of corporate bond markets remains unchanged: valuations have steadily risen and we do not believe they fully reflect the risk that tighter financial conditions will bite at some point. At the margin we have continued to trim risk, expecting better valuations to add back in future. However, we do acknowledge that the current benign backdrop could continue in the short term and have been careful to maintain the yield of the Fund a little higher than its benchmark. Our primary strategy has been to reduce exposure to longer-dated bonds which would be more volatile in a sell-off and add to shorter-dated but high-yielding bonds to help drive returns in the near term.

One such purchase during recent months was Ford Motor Co bonds which mature in 2025. Ford has been on an improving trajectory following the challenging Covid-19 years, which pressured its profits and cash flows. Consolidating its internal combustion engine-powered vehicle range has reduced costs and allowed profits to begin a strong recovery. These profits are being applied to make significant investments in electric vehicle production, future-proofing Ford's business. These short-dated bonds offered an appealing yield for this business profile. We also added a number of short-dated bank bonds from issuers including Barclays, Bank of America, JP Morgan, Natwest and Santander.

Baillie Gifford & Co, 10 January 2024

¹For the year to 31 December 2023 the return on B Accumulation Shares was 7.2% compared to the Index of 6.1% and the target return of 6.8%. Source: FE, 10am dealing prices, income accumulated. Revolution and FTSE and ICE, total return in sterling terms. You should be aware that past performance is not a guide to future performance.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

³As at 30 June 2021 the ACD considered 0.37% to be a more indicative rate for the ongoing charges figure for Class B Shares.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 June 2023 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Sustainable Growth Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford Sustainable Growth Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of companies anywhere in the world and of any size and in any sector which, in the investment manager's opinion, demonstrate long-term Sustainable Growth prospects. The investment manager defines "Sustainable Growth" as the potential a company has to (i) deliver enduring growth, being a decade or more of profitable growth, and (ii) make a difference to society by, for example, producing products or services which have a clear positive influence, or promoting business practices that help shape industry standards and inspire wider change. The investment manager applies a proprietary qualitative investment process to assess companies' Sustainable Growth prospects. The Fund applies a revenue-based screen that excludes companies with a defined level of activity in certain sectors, details of which are disclosed in the Prospectus. Companies the Fund directly invests in will be selected following a norms-based evaluation. The Fund will comply with the Investment Advisor's policy on assessing breaches of the United Nations Global Compact as outlined in its ESG Principles and Guidelines document. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically lower rewards, lower risk | | | | Туріс | ally higher h | r rewards, higher risk |
|--|---|---|---|-------|------------------|---------------------------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

The Fund's ESG investment policy limits the type of companies it can hold. The Fund may have different returns from funds with no such restrictions.

The limitations of third party data, which may be backward looking or estimated, may impact on the Funds ability to achieve any non-financial considerations.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Baillie Gifford Sustainable Growth Fund cont.

Adoption of Net Zero Asset Managers initiative

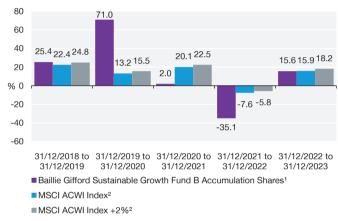

Baillie Gifford & Co, the Fund's Investment Manager, has joined the Net Zero Asset Managers initiative (NZAM), as part of the Investment Manager's commitment to support the goal of net zero greenhouse gas emissions by 2050, in line with global efforts to limit warming to 1.5° C.

This commitment includes supporting investing aligned with net zero emissions by 2050 or sooner, and the Fund has been managed in line with and counted towards the Investment Manager's net zero commitment.

As a long-term investor, the Investment Manager's investment process takes into account the long-term prospects (including long-term sustainability) of an investment. Consideration of climate-related factors, including NZAM commitments, and the impact of these on a company's competitive positioning form an integral part of this process.

Investment Report

Past Performance

Past performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI ACWI Index (the 'Index') by at least 2% per annum (the 'target return') over rolling five-year periods. For the six months to 31 December 2023 the return on B Accumulation Shares was $5.8\%^1$ compared to the Index of $7.2\%^2$ and the target return of $8.3\%^2$. We fully appreciate that this is disappointing whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objectives. Over that period, the annualised return on B Accumulation Shares was 10.4%¹ compared to the Index of $12.3\%^2$ and the target return of $14.5\%^2$. It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.50%. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Market environment

Global stock markets made a strong comeback in 2023, recovering the loss sustained in 2022. Breakthroughs in artificial intelligence earlier in the year restored a sense of optimism, and the widely forecast recession failed to materialise. Meanwhile, inflationary pressures subsided, and the Fed's rate tightening cycle was put on hold. In the latter part of the year, the market looked forward to pricing-in interest rate cuts in 2024, rather than increases.

Over the period, the MSCI ACWI index returned 7.2%, while the Fund returned 5.8%. The headline number masked an unusually narrow market recovery, whereby a handful of the largest technology-led firms (now referred to as the 'Magnificent Seven') accounted for much of the market's rise.

Performance

Looking beyond sentiment-driven gyrations, strong company results contributed to the positive relative performance of the Fund, with many reporting strong earnings and revenue results for the period.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the index return plus the outperformance will not equal the target return. Please see Disclaimer on page 108. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Top contributors include two disruptive companies, MercadoLibre and Workday. The Latin-American ecommerce, fintech, and logistics company, MercadoLibre, continues to see growth across all parts of its business, expanding margins and generating strong profits. Annual revenues over the last five years have grown at a compound annual growth rate of 50 per cent, with double and triple-digit growth in gross merchandise volume driving most of this across its main marketplaces of Brazil, Mexico, and Argentina. Despite serving more than 135 million individual users over the first half of the year, this still only represents one-fifth of the total population of the marketplaces in which it operates. We believe that due to its first-mover advantage. ever-improving logistics network, and penetration in its payments arm, MercadoLibre can continue to expand its customer-base and maintain an established position as the platform of choice for many.

Similarly, human capital management platform Workday's results exceeded analyst expectations, reporting a revenue increase of 17% year-over-year, and strong growth in subscription revenues. It partners with customers to promote fairer, more inclusive working practices, for example in the realm of diversity and inclusion.

On the other hand, Danish freight-forwarding and logistics giant, DSV, has faced a more challenging period. As well as concerns surrounding economic weakness – dampening demand for air and sea freight – it has also faced challenges brought by its 2019 acquisition of handling company, Panalpina. Higher-than-expected costs and integration delays have impacted investor confidence. Despite these challenges, DSV remains a major player in the global logistics industry with a strong track record. It continues to use this scale to help reduce the carbon intensity of its customers' logistics networks, with a significant influence on both customers and shippers.

Another detractor from performance is Asian-insurer Prudential. After suffering share price weakness over the last couple of years due to extended lockdowns in China – impacting new business sales – the company continued to experience negative sentiment as a result of the challenges in Chinese economic growth over the year. In spite of these headwinds, we believe there to be a positive outlook for the company. It recently sold off its US and UK insurance arms, evidencing its commitment to the faster-growing market in Asia. We have also been encouraged by the new CEO who has displayed a clear focus and strategic direction for the company, with emphasis on cross-market efficiencies. And finally, we are drawn to its differentiated approach to the healthcare market in China, partnering with healthcare providers and therefore benefiting from an asset-light approach.

Notable transactions

The Fund has been through a period of change over the last 18 months following the creation of a centralised team, and enhancements made to the process and philosophy reflecting both our clients, and our own, increasing expectations on what constitutes a sustainable fund. As such, the Fund experienced higher turnover earlier in 2023 which has since fallen back to more normal levels.

One area we continued to take advantage of was finding new opportunities at compelling valuations. An example of this is new buy, MSA Safety. It is a purposeful company that exists to protect workers in the most hazardous environments with its flagship product being the V-Gard hard hat – a product that dominates the industry, selling over 10 million units per year. Despite having over a 100-year long heritage, it remains innovative. Over a third of sales are from products launched in the last five years, including breathing apparatus designed for the London Fire Brigade. More recently, it has been adding connectivity to its products which will improve safety, as well as margins.

In order to Fund this purchase, we sold a handful of lower conviction holdings where we had questions about resilience. UK companies, Ocado and ITM Power were two of these – both of which had negative earnings and free cashflow, making the chances of thriving through uncertain macro-environments more challenging.

Investment Report cont.

ESG

For further details of how the Fund invests in companies that are sustainable in both senses of the word, in the investment manager's opinion, please refer to the Sustainable Growth Sustainability Report 2023, which is available on the website www.bailliegifford.com. This publication aims to show clearly how the Fund's holdings are making a difference for society and; addressing the challenges of people, the planet, and prosperity. It is a comprehensive review of our engagement activities and progress towards our net zero commitment. It also details our sustainability hypothesis for every holding in the Fund.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Baillie Gifford Sustainable Income Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford Sustainable Income Fund

Investment Objective

The Fund aims to produce monthly income, whilst seeking to maintain the value of that income and of capital in line with inflation (UK CPI) over five-year periods.

Investment Policy

The Fund will gain exposure to a wide range of asset classes in any country or sector, subject to exclusion's identified by the Investment Manager's sustainable investment process. At any one time, the Fund may be invested in any one or more of the following: shares, bonds, money market instruments, deposits, and cash. This exposure may be achieved directly or indirectly through collective investment schemes. The Fund may also invest indirectly in property, infrastructure, commodities and loans. The purpose of the sustainable investment process, which is applied to all assets except cash and cash-like instruments, is to ensure that the Fund invests in a way which is, in the Investment Manager's opinion, compatible with a sustainable economy. The Fund applies a revenue-based screen that excludes companies with a defined level of activity in certain sectors, details of which are disclosed in the Prospectus. The Fund will comply with the Investment Advisor's policy on assessing breaches of the United Nations Global Compact as outlined in its ESG Principles and Guidelines document. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be exposed to foreign currencies and the Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically lower rewards, lower risk | | | Typically higher rewards, higher risk | | | | |
|--|---|---|--|---|---|---|--|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in a range of assets.

The indicator does not take into account the following relevant material risks:

The Fund aims to maintain capital value in line with inflation. Neither this nor positive returns are guaranteed.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

The manager can charge some, or all, expenses to the Fund's capital, reducing its value. This amount can vary from year to year.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Baillie Gifford Sustainable Income Fund cont.

Fees Allocated to Capital

For distribution purposes the ACD has the facility to allocate some or all expenses to capital. For the year to 30 June 2023 100% of expenses were allocated to capital. This will reduce the capital value of the Fund. This number may vary from year to year. The figure for the current financial period has not yet been determined.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the annual management charge of 0.50%. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past performance

The investment objective of the Fund is to produce monthly income, whilst seeking to maintain the value of that income and of capital in line with inflation (UK Consumer Price Index) over five-year periods. For the six months to 31 December 2023 the capital return on B Income Shares was 2.9%³ compared to the rise in UK Consumer Price Index (UK CPI) of 0.5%². The Fund paid a monthly stream of income totalling 1.93 pence per share. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objective. Over that period, the capital return on B Income Shares was $6.4\%^1$ compared to the rise in UK CPI of $4.3\%^2$. The Fund paid a monthly stream of income totalling 20.01 pence per share.

Market environment

While the market outcomes in the last two quarters of 2023 could not have been more different from each other, they had one thing in common: high correlation of performance across asset classes driven by changing assessment of whether central banks can walk the tightrope between bringing inflation under control and keeping the economy going.

In the third quarter, the prevailing market narrative was that robust growth in the US would lead to interest rates staying higher for longer. This led to weakness in most bond markets, with US 10-year bond yields rising to their highest level since 2007. From late October, the story morphed into 'immaculate disinflation' as we saw inflation rates fall without a dramatic growth slowdown. Several benign inflation data releases in the US and Europe prompted this shift in opinion among central bankers and investors towards a view that inflation is indeed falling towards target levels quickly.

Investment Report cont.

This led to a relief rally in sovereign and corporate bond markets, as the market priced in multiple interest rate cuts in 2024. Risk assets were well supported by the powerful combination of lower bond yields and a reduced probability of recession.

In conclusion, recent events have been fundamentally positive for financial markets, with growing evidence that inflation is under control in developed and emerging markets. However, markets are now pricing in rapid interest rate cuts in 2024, and there is scope for asset prices to disappoint if central banks do not proceed down this path.

Performance

The Fund delivered a positive performance over this volatile period, spread well across asset classes. This was especially true for global equities and property, as both benefited from lower interest rate expectations and a better outlook for the health of the economy. Within equities, it was therefore the more cyclical industrial names that performed particularly well: a Swedish industrial machinery manufacturer, Atlas Copco, a French company specialising in digital automation and energy management, Schneider Electric and the largest fastener distributor in North America, Fastenal.

The income paid by the Fund in 2023 experienced healthy growth of 4.4% compared to 2022, which was ahead of the latest UK inflation data of $3.9\%^1$ in the 12 months to December 2023.

Notable transactions

Following the stock market rally in the first half of 2023, we believed that equities were getting quite fully valued as we entered the third quarter. While we were optimistic about the operational performance and dividend growth of companies we invest in, we felt that valuations had caught up with fundamentals and reduced allocation to the asset class closer to the long-term target. Similarly, local currency emerging market bonds rallied sharply this year and the difference in yield compared to developed market government bonds has narrowed significantly. With increased concerns over the global outlook, we increased the holding in UK T Bills that offer appealing yields and allow us to retain some "dry powder". During the period, we added to the Fund's allocation in property and infrastructure. Both asset classes struggled this year and we saw it as an opportunity to add to the Fund's holdings in companies with good dividend growth prospects at a cheaper valuation.

Within the equity portfolio, we bought shares of Home Depot, the US home improvement retailer. We believe that their strategy to build up services to large professional clients will support a long-term growth in revenues and the dividend and we took advantage of a recent price correction. We acknowledged that the company has room for improvement on sustainability and we plan to engage on timber sourcing.

Within the property portfolio, we bought shares of Montea, a Belgium based owner and operator of logistics assets. Montea is the "smaller brother" of another holding in the Fund, Warehouses De Pauw (WDP). Like WDP, Montea also owns enviable assets in a very tight logistics market and has best-in-class environmental credentials, helping to future-proof their portfolio. In a tough market for property companies, Montea shares were trading at discount compared to WDP so we took advantage of the dislocation to establish a position for the Fund.

Overall, we still retain a fairly neutral asset allocation, with a small overweight in cash and underweight in infrastructure. We believe that most of the outperformance potential in the Fund comes from bottom-up stock selection. And we are excited about the prospects of the underlying investments to thrive in the years ahead and deliver good operational performance, coupled with a growing income.

Baillie Gifford & Co, 10 January 2024

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

³In November 2023, following the FCA's statement regarding communications related to PRIIPs and UCITS, the Investment Association amended its Guidance on Disclosure of Fund Charges and Costs, removing the requirement to include indirect costs associated with holding closed-ended investment funds from Ongoing Charges figures. Consequently, these costs are no longer included in the Ongoing Charges figures to 31 December 2023. Had the indirect costs associated with holding closed-ended investment funds been included, the Ongoing Charges figure would have been 0.09% higher.

⁴In July 2020, the Investment Association issued Guidance on Disclosure of Fund Charges and Costs effective from 30 June 2022 which updated the Ongoing Charges disclosure requirements to include indirect costs associated with funds' holdings of closed-ended investment funds. This resulted in an increase of 0.07% in the Ongoing Charges figures disclosed as at 30 June 2023.

⁵As at 30 June 2022, the ongoing charges figure does not reflect the change in methodology referred to in Footnote 4 above. For comparison, the equivalent ongoing charge as at 30 June 2022 for indirect fees associated with holding closed-ended investment funds is 0.16%.

⁶As at 30 June 2021 the ACD considered 0.56% to be a more indicative rate for the ongoing charges figure for Class B Shares.

⁷As at 31 December 2023 the ACD considered 0.30% to be a more indicative rate for the ongoing charges figure for Class H Shares.

⁸As at 30 June 2021 the ACD considered 0.31% to be a more indicative rate for the ongoing charges figure for Class H Shares.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

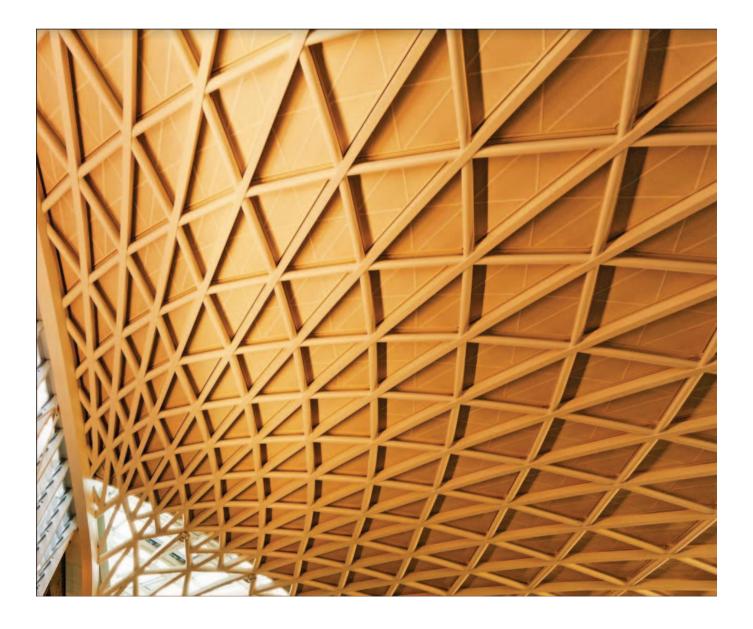

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 June 2023 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford UK Equity Core Fund

a sub-fund of Baillie Gifford Investment Funds II ICVC

Interim Report & Financial Statements (Unaudited) for the six months ended 31 December 2023

Baillie Gifford UK Equity Core Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the FTSE All-Share Index by at least 1% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 80% directly or indirectly in shares of UK companies of any size and in any sector. The indirect investment will be through collective investment schemes. UK companies are companies which are incorporated, domiciled or conduct a significant portion of their business in the UK. The Fund may also invest in companies which are listed, traded or quoted in the UK. Companies the Fund directly invests in will be selected following a norms-based evaluation. The Fund will comply with the Investment Advisor's policy on assessing breaches of the United Nations Global Compact as outlined in its ESG Principles and Guidelines document. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

| Typically I lower risk | ower rewa | rds, | Typically higher reward higher ri | | r rewards, igher risk | |
|---------------------------|-----------|------|--------------------------------------|---|--------------------------|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares. The indicator does not take into account the following relevant material risks:

The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

The Fund's ESG investment policy limits the type of companies it can hold. The Fund may have different returns from funds with no such restrictions.

The limitations of third party data, which may be backward looking or estimated, may impact on the Funds ability to achieve any non-financial considerations.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Baillie Gifford UK Equity Core Fund cont.

Adoption of Net Zero Asset Managers initiative

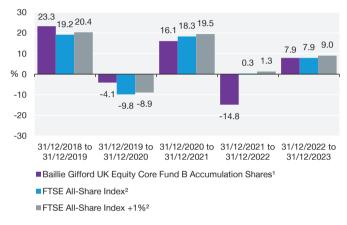

Baillie Gifford & Co, the Fund's Investment Manager, has joined the Net Zero Asset Managers initiative (NZAM), as part of the Investment Manager's commitment to support the goal of net zero greenhouse gas emissions by 2050, in line with global efforts to limit warming to 1.5° C.

This commitment includes supporting investing aligned with net zero emissions by 2050 or sooner, and the Fund has been managed in line with and counted towards the Investment Manager's net zero commitment.

As a long-term investor, the Investment Manager's investment process takes into account the long-term prospects (including long-term sustainability) of an investment. Consideration of climate-related factors, including NZAM commitments, and the impact of these on a company's competitive positioning form an integral part of this process.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.42%. Performance figures for the other share class in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past performance

The investment objective of the Fund is to outperform (after deduction of costs) the FTSE All-Share Index (the 'Index') by at least 1% per annum (the 'target return') over rolling five-year periods. For the six months to 31 December 2023, the return on B Accumulation Shares was $4.6\%^1$ compared to the Index of $5.2\%^2$ and the target return of $5.7\%^2$. We fully appreciate that this is disappointing whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. We believe that short term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance, a period in line with the Fund's objectives. Over that period, the annualised return on B Accumulation Shares was 4.8%¹ compared to the Index of $6.6\%^2$ and the target return of $7.7\%^2$. It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market environment

Macroeconomic events continued to drive volatility in the UK equity market. However, the year ended with a stock market rally as UK inflation fell to 3.9%³, its lowest level in over two years. A drop in fuel costs helped to drive the significant fall in inflation at the end of the year and raised hopes that the Bank of England might start to ease interest rates as early as next spring.

Performance

During the very short six-month period, the Fund delivered a positive return but underperformed the index and target. We remain encouraged by the fact that the majority of companies held in the Fund are performing well operationally as we believe this will be the dominant influence on long-term returns.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and FTSE, total return. The target return outperformance is compounded daily therefore the index return plus the outperformance will not equal the target return. Please see Disclaimer on page 108. You should be aware that past performance is not a guide to future performance. ³Source: Revolution and the Office for National Statistics.

Investment Report cont.

Your holdings in Marks & Spencer, Howden Joinery and Auto Trader were all notable contributors to six-month performance. In addition, having no exposure to large index constituents, British American Tobacco, Anglo American and Glencore, supported relative returns.

With regards to Marks & Spencer, the high-street retailer reported an encouraging half-year trading update in November, with revenues growing c11% year-over-year. Encouragingly, the management team's cost reduction programme also resulted in over £100 million of cost savings in the past six months, enabling the business to translate strong sales into significant profit growth. Sales have been supported by the company's investment in its store rotation and renewal programme, which has been helping attract new customers and increase its market share in both its Food and Home & Clothing divisions.

Elsewhere, the online car marketplace, Auto Trader, delivered a strong six-month trading update towards the end of the year as it attracted a record number of buyers to its platform. The company's Average Revenue Per Retailer (ARPR) grew by 12% as customers continued to adopt its additional products and services. It also made good progress in scaling its Deal Builder product which allows car buyers to value their part-exchange, apply for finance and reserve their car online. At the end of September, Auto Trader had 500 retailers trialling the service (up from 50 in March) and consumer feedback has been positive. This is encouraging as we expect the continued roll-out of this product to help expand its addressable market over the long term.

In terms of detractors, the share price of St. James's Place (SJP) fell as the company provided details of a meaningful change to its charging structure which is expected to come into effect in the second half of 2025. In summary, the drop in initial charges for Investment Bonds and Pension clients will benefit clients but will have an immediate hit to cash profits in the early years, hence the disappointing share price reaction. However, cash profits from 2026 are expected to grow strongly. In addition, over the longer term, we think the increased transparency and simplification of the fee structures should create a more attractive customer proposition. We will continue to monitor how the regulatory backdrop impacts SJP's clients and prospective clients through our ongoing engagement with the incoming CEO, Mark Fitzpatrick, who we met in November.

Notable transactions

Portfolio turnover remained low, in line with our long-term investment time horizon. However, competition for capital was high and towards the end of the year we made the decision to sell out of the life sciences company, Abcam, the recruitment firm, FDM and the fund manager, Schroders. We used some of the proceeds to take new positions in the IT consultant, Kainos and value-add distribution group, Diploma. Also having carefully reviewed our existing holdings, we decided to add to a number of long-standing positions, including Auto Trader, Legal & General and Renishaw. The overriding rationale was clear: the stock market's volatility and indifference to the long-term attractions of growth businesses in a high-interest rate environment threw up some valuation anomalies of stocks within the portfolio and also of some businesses that we have been monitoring for some time. We therefore decided to fund these transactions from companies that we had lower levels of conviction in.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 June 2023 and are described in those annual financial statements.

General Information

Dilution Adjustment

A sub-fund suffers dilution (reduction) in the value of the Scheme Property attributable to it because the actual costs of buying or selling investments for the sub-fund deviate from the mid-market values generally used in calculating the price of shares in the sub-fund. Such deviation may occur as a result of the costs (which may include dealing charges and taxes) incurred in dealing in such investments and of any spread between the buying and selling prices of such investments. It is not possible to predict accurately whether dilution is likely to occur.

The COLL Rules allow the cost of dilution to be (1) met directly from the Scheme Property attributable to the sub-fund or (2) addressed by the imposition on investors of a dilution levy on the issue by the Company, subscriptions facilitated by the ACD, cancellation by the Company or redemption by the ACD of shares in the sub-fund or (3) dealt with by means of a dilution adjustment, which is the policy which has been adopted by the ACD in relation to the sub-funds of the Company. With a view to mitigating the effects of dilution, the ACD therefore reserves the right, at its sole discretion, to make a dilution adjustment in the calculation of the dealing price, and thereby swing the dealing price, of shares in any sub-fund of the Company if in its opinion the existing shareholders (for net purchases of shares) or remaining shareholders (for net redemptions of shares) might otherwise be adversely affected. By 'purchases' of shares we mean issues by the Company and subscriptions facilitated by the ACD and by 'redemptions' of shares we mean cancellations by the Company and redemptions by the ACD.

The COLL Rules acknowledge that the need to make a dilution adjustment may depend on the volume of purchases of shares or redemptions of shares. Accordingly, the ACD reserves the right at its sole discretion to impose a dilution adjustment in the following circumstances:

- (a) If the sub-fund is experiencing steady decline (net outflow of investment).
- (b) If the sub-fund is experiencing steady growth (net inflow of investment).

- (c) If the sub-fund is experiencing large levels of net purchases or net redemptions relative to its size.
- (d) Where the sub-fund experiences net purchases or net redemptions on any Dealing Day exceeding a particular value or a particular percentage of the value of the sub-fund.
- (e) In any other circumstances where the ACD believes it will be in the interests of shareholders to make a dilution adjustment.

The ACD is currently of the opinion that it is in the best interests of shareholders in the Company to make a dilution adjustment whenever dealings in the shares of any sub-fund result in shares in that sub-fund being issued or cancelled by the Company. The ACD believes that this policy should result in no significant dilution occurring. The adjustment will take account of any spread between the buying and selling prices of the relevant sub-fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments, as the case may be.

The level of the dilution adjustment is set by the ACD based on prevailing market conditions. Where liquidity is restricted and trading in size in the portfolio's investments results in significant movement in the prices of these investments the ACD may adjust the level of the dilution adjustment to protect the interests of the ongoing investors in a sub-fund. The ACD has thresholds for the sub-funds for daily net inflows or outflows of cash into or out of the sub-funds. Above these thresholds, which vary by sub-fund and according to market conditions, the ACD will increase the dilution adjustment to reflect the increased dealing costs incurred by the sub-funds as a result of larger inflows and outflows. A consequence of this policy is, however, that smaller transactions made on any day that the relevant threshold is exceeded will also trade at the price incorporating the higher adjustment and this may lead to increased dealing costs. Whether an adjustment may be necessary will depend upon the net movement into or out of a sub-fund on any given day and on the underlying market conditions on that day and it is therefore not possible to predict when an adjustment may be made.

Dilution Adjustment cont.

On any Dealing Day when the Company neither issues nor cancels shares in a sub-fund the price of shares in that sub-fund will not contain any dilution adjustment.

This policy to swing the dealing price will be subject to regular review and may change. The ACD's decision on whether or not to make a dilution adjustment, and on what level of adjustment to make in particular circumstances or generally, will not prevent it from making a different decision in similar circumstances in the future.

Where a dilution adjustment is applied, it will increase the dealing price when there are net inflows into the relevant sub-fund and decrease the dealing price when there are net outflows. The dealing price of each class of share in a sub-fund will be calculated separately but any dilution adjustment will in percentage terms affect the dealing price of shares of each class identically.

On the occasions when no dilution adjustment is made there may be an adverse impact on the value of the Scheme Property attributable to the relevant sub-fund.

Stamp Duty Reserve Tax (SDRT)

Generally, there will be no charge to SDRT when shareholders surrender or redeem shares. However, where the redemption is satisfied by a non-pro rata in specie redemption, then a charge of SDRT may apply.

Taxation Reporting

In order to fulfil its legal obligations, the ACD is required to collect and report certain information about shareholders (and in some circumstances the shareholder's controlling persons), including their identity, tax residency, tax status and financial information relating to their shareholding. Shareholders must provide the ACD with any information required to meet these obligations, and may also be asked to provide self-certifications and tax reference numbers or the equivalent. The ACD reserves the right to refuse an application for shares or a transfer of shares until it receives a declaration as to the shareholder's tax residency or status in the form prescribed by the ACD.

The ACD is also required to provide to HMRC certain information regarding shareholders, payments made to shareholders and proceeds arising on the disposal of shares, and HMRC may pass such information on to the tax authorities of another jurisdiction.

Share Classes

The net asset value of each sub-fund, net asset value per share and the number of shares in each class are shown in the Fund Information sections of the relevant sub-fund. In each sub-fund all share classes have the same rights on winding up.

Where Class C Shares are available, they are only available to persons to whom an associate of the ACD provides services under an investment management agreement or who has a separate fee arrangement with the ACD or one of its associates.

Class H Shares are only available to persons who have, or whose agent or associate has a separate agreement in place with the ACD or one of its associates.

Class J Shares are only available to persons who have, or whose agent or associate has, a separate agreement, governing aggregate investment flows and marketing activity, in place with the ACD or one of its associate.

Class P Shares are available to persons who: (i) are considered by the ACD to be institutional pension platforms and who have a relevant agreement with the ACD or an associate of the ACD; or (ii) are otherwise considered appropriate by the ACD at its sole discretion.

Class W Shares are only available to persons who have, or whose agent has, a separate fee arrangement with the ACD or one of its associates in relation to the relevant Class W Shares.

Share Classes cont.

Class Y Shares of Baillie Gifford Sustainable Growth Fund are only available to former unitholders of Phoenix Global Growth Fund which merged into Baillie Gifford Sustainable Growth Fund on 5 December 2015 via a scheme of arrangement or such other persons as the ACD may permit as its sole discretion.

Class Y Shares of Baillie Gifford Health Innovation Fund are only available to persons who: (i) have an agreement with the ACD or one of its associates; and (ii) make their initial investment in the sub-fund within the first six months of the sub-fund's launch (being 15 December 2020).

The minimum lump sum investment amounts are shown in the table on page 110.

Equalisation

The Company will operate grouping for equalisation. Each class of shares will operate its own equalisation account. Shares suscribed for during a distribution period are called Group 2 shares. Shares subscribed for during any previous distribution period are called Group 1 shares. Group 2 shares contain in their subscription price an amount called equalisation which represents a proportion of the net income of the sub-fund that has accrued up to the date of subscription. The amount of equalisation is averaged across all the shareholders of Group 2 shares and is refunded to them as part of their first distribution and is treated as a return of capital for tax purposes. Being capital it is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

An 'income equalisation-like' mechanism will be operated by the ACD for conversions. The ACD will ensure that the mechanism is operated to ensure fair treatment of those converting their shares and other shareholders in the affected classes.

Fund Charges and Costs

For further details on the costs associated with investing in the sub-funds of the ICVC, please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Conflicts of Interest

From time to time, there may be situations that give rise to a material interest or conflict of interest. Such interests can arise between the interests of the ACD, the Investment Adviser, other persons associated with them and the interests of the sub-funds and their shareholders. A material interest or a conflict of interest can also arise between the interests of different shareholders. In such circumstances the ACD will put in place effective organisational and administrative arrangements to manage and monitor the material interest or conflict of interest in a way that ensures shareholders are treated fairly, or where it is impractical to manage the conflict, it will be disclosed.

The ACD, the Investment Adviser and other persons associated with them may, from time to time, act as authorised corporate directors, investment managers or advisers to other persons, companies or funds which follow similar investment objectives to the sub-funds. It is therefore possible that the ACD and/or the Investment Adviser may in the course of their business have potential conflicts of interest with the Company or a particular sub-fund. Each of the ACD and the Investment Adviser will, however, have regard in such event to, amongst other things, its obligation to act in the best interests of the Company so far as practicable, having regard to its obligations to other clients, when undertaking any investment where potential conflicts of interest may arise. The Depositary may, from time to time, act as the depositary or trustee of other companies or funds.

Conflicts of Interest cont.

Full details of the ACD's conflicts of interest policy can be inspected at the offices of the ACD at Calton Square, 1 Greenside Row, Edinburgh, EH1 3AN during normal business hours.

relating to the TOPIX Marks. JPX shall not be liable for the miscalculation, incorrect publication, delayed or interrupted publication of the TOPIX Index Value.

Taskforce on Climate-related Financial Disclosures

Following the adoption of the Taskforce on Climate-related Financial Disclosures' ('TCFD') recommendations into the FCA's ESG sourcebook, Baillie Gifford & Co Limited is required to publish its 'TCFD entity report' by 30 June each year, detailing how in its role as ACD it takes climate-related matters into account in managing investments on behalf of clients and consumers. The regulations also require the ACD to prepare a TCFD product report for each sub-fund on how climate-related matters are taken into account within the sub-fund, including a core set of climate-related metrics. The reports must be made available on the ACD's website and a clear and prominent signpost to the product report for each authorised sub-fund must be included within each set of annual and interim financial statements. The latest product reports covering the period to 31 December 2022 are available in the website via this link:Literature/Individual Investors/Baillie Gifford

Minimum Lump Sum Investment Amounts and Annual Management Charge

| | Class B ¹ | Class C | Class H | Class J | Class P | Class W | Class Y |

| Baillie Gifford Sterling Aggregate Bond Fund | 0.35% | Nil | n/a | n/a | n/a | n/a | n/a |
| Baillie Gifford Sustainable Growth Fund | 0.50% | Nil | n/a | 0.35% | n/a | n/a | Note4 |
| Baillie Gifford Sustainable Income Fund | 0.50% | Nil | 0.25% | 0.35% | 0.35% | n/a | n/a |
| Baillie Gifford UK Equity Core Fund | 0.42% | Nil | n/a | n/a | n/a | n/a | n/a |

¹The minimum initial investment and minimum holding do not apply to persons who, as at 29 February 2022, had or continue to have a direct holding in the range of funds managed by the ACD. For such persons, the applicable minimum initial investment is £1,000 and the minimum holding is £1,000.

²Where the combined net asset value of the relevant Class W Shares (accumulation and income) is equal to or greater than £100 million, the following fee scale will be applied to the whole of the net asset value of the relevant Class W Shares:

- 0.60% on the first £30 million;

- 0.50% on the next £20 million; and

- 0.40% thereafter.

Where the combined net asset value of the relevant Class W Shares (accumulation and income) is less than £100 million a rate of 0.60% shall be applied to the whole of the net asset value of the relevant Class W Shares.

³The annual management charge for Class Y Shares increased to 0.5% on the third anniversary of the launch of the Baillie Gifford Health Innovation Fund on 16 December 2023.

⁴The following fee scale will be applied to the whole of the net asset value of the Y accumulation shares: 0.50% on the first £60 million and 0.35% thereafter.

Active Share

Active Share is a measure of how actively managed a sub-fund is and is calculated by taking 100 minus the % of the sub-fund that overlaps with the comparative index. The Active Share as at the period end and the comparative index, for sub-funds which invest primarily in equities, is shown in the table below. The Active Share has been shown against this index to highlight the active management style against what is deemed to be the most relevant index for each sub-fund.

| Sub-fund | Active Share | Comparative Index |
|---|--------------|----------------------|
| Baillie Gifford Health Innovation Fund | 100% | MSCI ACWI Index |
| Baillie Gifford Japanese Income Growth Fund | 85% | TOPIX |
| Baillie Gifford Sustainable Growth Fund | 90% | MSCI ACWI Index |
| Baillie Gifford UK Equity Core Fund | 74% | FTSE All-Share Index |

Active Share has not been shown for sub-funds with holdings in bonds as other factors, such as the economic exposure of a holding in a bond, are not taken in to consideration. As a result, Active Share does not give as clear an indication for these sub-funds of the magnitude of the difference between sub-fund and the comparative index.

Portfolio Turnover Ratio

Portfolio Turnover Ratio is a measure of portfolio change or trading activity in a Fund. It is calculated as the minimum of purchases and sales in a month, divided by the average market value of the Fund. The annual turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.

| Sub-fund | Portfolio |
|---|-----------|
| | Turnover |
| | Ratio |
| Baillie Gifford Health Innovation Fund | 7% |
| Baillie Gifford Japanese Income Growth Fund | 6% |
| Baillie Gifford Sustainable Growth Fund | 28% |
| Baillie Gifford UK Equity Core Fund | 5% |

In addition, Portfolio Turnover Ratio has not been disclosed for Baillie Sterling Aggregate Bond Fund and Baillie Gifford Sustainable Income Fund because the ACD does not consider it an appropriate measure for fixed income funds.
