DIRECTORS' REPORT

The Directors of Sanlam Universal Funds plc (the "Company") present herewith their audited financial statements for the year ended 31 December 2019.

RESULTS AND BUSINESS ACTIVITIES

Detailed investment reviews are included in the Reports of the Investment Managers on pages 30 to 102. The results of operations are set out in the Statement of Comprehensive Income on pages 103 to 121.

The Directors also draw your attention to the significant events during the year disclosed in Note 22 on page 635.

PRINCIPAL RISKS AND UNCERTAINTIES

The Company is exposed to the risks associated with the financial instruments and markets in which the Funds of the Company invest. The Directors draw your attention to Note 18 on pages 538 to 612 which outlines the financial risks associated with meeting the investment objectives of each of the Funds of the Company. The Directors are not aware of any existing or contingent liability of the Funds that may expose the assets of the Company as a whole. A further comprehensive summary of the risk factors that investors should consider is included in the prospectus of the Company and the offering supplement of each Fund.

DIVIDENDS

The present intention of the Directors is to distribute sufficient surplus net income of specific share classes, currently:

		Distribution
Fund Name	Classes	Frequency
Denker Global Equity Fund	A (GBP) / C (GBP)	Annual
Denker Global Financial Fund	A (GBP) / C (GBP)	Annual

Denker Global Dividend Fund	A (USD) / A (GBP) / B (USD) / C (USD) / I (USD)	Semi-Annual
Sanlam Accel Income Fund	Class A Net Income	Monthly
Satrix Europe (ex UK) Equity Tracker Fund	I (GBP)	Annual
Satrix Emerging Markets Equity Tracker Fund	I (GBP)	Annual
Sanlam Al Global Managed Risk Fund	A2 (GBP) / I (GBP) / N (GBP) / D(GBP) / L2(GBP) / N2 (GBP)	Annual
Sanlam Global High Quality Fund	C Income (GBP) / D Income (USD) / E Income (USD) / I Income (GBP) / G Income (USD)	Semi-Annual
Sanlam US Dividend Fund	Distribution A (GBP) / Distribution A (USD) / Distribution A (EUR) / Distribution H (GBP)	Quarterly
Sanlam Global Value Fund	Distribution A (GBP)	Quarterly
Sanlam Stable Global Fund	Distribution A (GBP)	Quarterly
Sanlam Active UK Fund	C (GBP)	Annual
	I (GBP)	Semi-Annual
Sanlam Multi-Strategy Fund	Income Distribution A (GBP) / Income Distribution	
	B (GBP) / Income Distribution Founder (GBP)	Monthly
Denker Global Emerging Markets Fund	C2 (GBP)	Annual
Absa Africa Equity Fund	A (USD) / A (EUR) / A (GBP)	Semi-Annual
Sanlam Centre Active US Treasury Fund	A (USD) / B (USD) / C(USD) / E(USD)	Monthly
Sanlam Centre Global Listed Infrastructure Fund	C (USD) / C (GBP) / E (USD)	Quarterly
Sanlam Real Assets Fund	A Distribution (GBP) / AH Distribution (GBP) / D Distribution (GBP) / DH Distribution (GBP)	Monthly
Sanlam US Absolute Return Fund	Founder Hedged Income (GBP)	Quarterly

DIVIDENDS (CONTINUED)

For those Funds which distribute annually, dividends (if any) will be declared and paid following the completion of the annual audits for the year ended 31 December in each calendar year. Sanlam Accel Income Fund, Sanlam Multi-Strategy Fund, Sanlam Centre Active US Treasury Fund and Sanlam Real Assets Fund will distribute on a monthly basis and for those Funds that distribute on a semi-annual or quarterly basis, the dates for the distributions will be as stated in the Fund supplement. All dividends will be subject to the discretion of the Directors.

Unless otherwise stated in the Fund Supplement, payment will be made in cash unless the payment is for an amount less than USD100, EUR100 or GBP100 (depending on the functional currency of each Fund) in which case such payment will be automatically reinvested in the purchase of shares of the relevant class, for the account of the relevant shareholder.

The Directors reserve the right to change the dividend policy of the Fund to reflect changes that may occur from time to time in the requirements for qualifying as a reporting Fund for the purposes of United Kingdom taxation.

With reference to the Statement of Comprehensive Income, Shareholders should note that surplus net income was distributed during the course of 2019 as follows: P-Solve Inflation Plus Fund distributed GBP 314,599 (2018: GBP 329,861), Denker Global Equity Fund distributed USD 2,144 (2018: USD 1,090), Denker Global Financial Fund distributed USD 52,852 (2018: USD 76,845), Satrix World Equity Tracker Fund distributed USD 26,566 (2018: USD 15,497), Denker Global Dividend Fund distributed USD 708,422 (2018: USD 627,546), Sanlam Strategic Bond Fund distributed GBP 6,839,563 (2018: GBP 7,191,982), Sanlam Accel Income Fund distributed GBP 649,818 (2018: GBP 807,210), Satrix North America Equity Tracker Fund distributed USD 7,277 (2018: USD 5,895), Satrix UK Equity Tracker Fund distributed GBP 32,879 (2018: GBP 29,462), Satrix Europe (ex UK) Equity Tracker Fund distributed EUR 10,754 (2018: EUR 14,988), Satrix Emerging Market Equity Tracker Fund distributed USD 175,548 (2018: USD 213,645), Sanlam Global High Quality Fund distributed GBP 320,456 (2018: GBP 238,734); Sanlam US Dividend Fund distributed USD 637,425 (2018: USD 765,201); Sanlam Stable Global Fund distributed USD 250 (2018: USD 360); Sanlam Active UK Fund distributed GBP 15,664 (2018: GBP 11,793); Sanlam Multi-Strategy Fund distributed GBP 1,387,631 (2018: GBP 338,936), Denker Global Emerging Markets Fund USD 3,079 (2018: USD Nil), ABSA Africa Equity Fund distributed USD 956,753 (2018: USD 362,555), Sanlam Centre Active US Treasury Fund distributed USD 208,808 (2018: USD 420,428), Sanlam FOUR Enhanced Income Fund distributed GBP Nil (2018: GBP 243,632), Sanlam Centre Global Listed Infrastructure Fund distributed USD 94,132 (2018: 6,279) and Sanlam Real Assets Fund distributed GBP 135,033 (2018: GBP 2,230).

No Funds of the Company made distributions out of capital during the year ended 31 December 2019. During the year ended 2018, Sanlam Active UK Fund made distributions out of capital, distributing an amount of GBP 2,200 out of capital at the end of April 2018. No other Funds of the Company made distributions out of capital during the year ended 31 December 2018.

DIRECTORS

The Directors of the Company during the year were as follows:

Paul Dobbyn (Irish) Thomas Murray (Irish) Haydn Franckeiss (South African) Richard Aslett (British)

Paul Dobbyn is a Director of Sanlam Global Funds Plc and Sanlam Qualifying Investors Funds Plc.

Thomas Murray is a Director of Sanlam Global Funds Plc and Sanlam Qualifying Investors Funds Plc. Thomas Murray is also a Director of Sanlam Asset Management (Ireland) Ltd. ("SAMI").

Haydn Franckeiss is a Director of Sanlam Global Funds Plc and Sanlam Qualifying Investors Funds Plc.

Richard Aslett is the Chief Executive Officer of SAMI. Richard Aslett is also a Director of Sanlam Global Funds Plc, Sanlam Qualifying Investors Funds Plc and SAMI.

DIRECTORS' AND SECRETARY'S INTEREST IN SHARES AND CONTRACTS

At 31 December 2019, Haydn Franckeiss had an interest of 183,154 (2018: 183,154) shares in Denker Global Dividend Fund and 13,537 (2018: Nil) shares in Sanlam Real Assets Fund.

The other Directors who held office on 31 December 2019 had no interest in the shares of the Company or Funds at that date or at any time during the financial year. None of the Directors has a service contract with the Company.

The Manager holds non-participating shares of the Company as explained in the notes to the Financial Statements.

RELATED PARTIES

Disclosures in respect of related parties are contained in Note 11 to the financial statements.

CONNECTED PERSONS

Part 2, Chapter 10 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations") on transactions involving connected persons states that any transactions between a UCITS and a Connected Person must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

A 'Connected Person' is defined as the Management Company or Depositary to a UCITS; and the delegates or sub-delegates of such a Management Company or Depositary (excluding non-group company sub-custodians appointed by a Depositary); and any associated or group company of such a Management Company, Depositary, delegate or sub-delegate. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out above are applied to all transactions with Connected Persons entered into during the year and that all such transactions have complied with these obligations.

SUBSEQUENT EVENTS

Other than as disclosed in Note 22, up to the date of the approval of these financial statements there were no events subsequent to the year end, which, in the opinion of the Directors of the Company, may have had an impact on the financial statements for the year ended 31 December 2019.

ACCOUNTING RECORDS

The measures taken by the Directors to ensure compliance with the Company's obligation to keep proper accounting records are the use of appropriate systems and procedures which are carefully implemented by the Administrator. The accounting records of the Company are kept at 30 Herbert Street, Dublin 2, Ireland.

DIRECTORS' STATEMENT ON RELEVANT AUDIT INFORMATION

Each of the Directors at the date of approval of the Directors' Report confirms that:

- a) So far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditor is unaware; and
- b) The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of section 330 of the Companies Act 2014.

AUDIT COMMITTEE

An audit committee has not been appointed because the Directors are satisfied that the established processes regarding internal control and risk management systems are sufficient to ensure effective oversight of the financial reporting and audit process. The established processes are disclosed in the Corporate Governance Code.

STATEMENT OF DIRECTORS' RESPONSIBILITIES

Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the results of the Company for that year.

In preparing those financial statements, the Directors are required to:

Select suitable accounting policies and then apply them consistently;

- Make judgements and estimates that are reasonable and prudent;
- Follow applicable accounting standards or disclose or explain material departures from them in the financial statements:
- Ensure that financial statements comply with the Memorandum and Articles of Association;
- Provide a fair review of the development and performance of the Company;
- Give a description of principal risks and uncertainties that they may face; and
- Prepare the financial statements on the going concern basis, unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper books of account which disclose with reasonable accuracy, at any time, the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and comply with the Irish Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the CBI UCITS Regulations. They are also responsible for safeguarding the assets of the Company and in fulfilment of this responsibility, they have entrusted the assets of the Company to the Depositary for safekeeping, in accordance with the Memorandum and Articles of Association of the Company. The Directors are responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

COMPLIANCE STATEMENT

The Company is required to include an annual compliance statement in the Directors' report under section 225 of the Companies Act 2014 (the "Act").

The Directors:

- acknowledge their responsibility for ensuring compliance with the relevant obligations;
- confirm that a "compliance policy statement" has been drawn up setting out the Company's
 policies with regard to compliance with the relevant obligations;
- confirm that appropriate arrangements or structures have been put in place that are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations; and
- confirm that the Directors have reviewed, during the financial year, the effectiveness of the arrangements or structures which have been put in place to secure such material compliance.

CORPORATE GOVERNANCE CODE

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I.83 of 2010) (the "Regulations") require the inclusion of a corporate governance statement in the Director's Report. Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes whose shares are admitted to trading on the Global Exchange Market of Euronext Dublin ("GEM"), the Irish Funds ("IF") has published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investments schemes. This code became effective from 1 January 2012, with a twelve month transitional period. It should be noted that the IF Code reflects existing corporate governance practises imposed on Irish authorised collective investment schemes, as noted above. On 19 December 2012, the Board of Directors voluntarily adopted the IF Code as the Company's corporate governance code.

CORPORATE GOVERNANCE CODE (CONTINUED)

The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practises and procedures for the financial year. The code is available at www.sanlam.ie. In addition to the IF Code, the Company is subject to corporate governance practices imposed by:

- i) The Irish Companies Act 2014, which is available for inspection at the registered office of the Company. It may also be obtained at http://www.irishstatutebook.ie/eli/2014/act/38/enacted/en/html.
- ii) The Articles of Association of the Company which are available for inspection at the registered office of the Company at Beech House, Beech Hill Road, Dublin 4, Ireland and the Companies Registration Office in Ireland.
- iii) The CBI UCITS Regulations and related Guidance Notes of the Central Bank of Ireland which can be obtained from the Central Bank of Ireland website at https://www.centralbank.ie/regulation/industry-market-sectors/funds and are available for inspection at the registered Office of the Company.
- iv) Euronext Dublin through the Global Exchange Market Rules for Investment Funds which can be obtained from Euronext Dublin's website at https://www.ise.ie/Products-Services/Sponsors-and-Advisors/GEM-Rules-for-Investment-Funds.pdf.
- v) SAMI's Programme of Activity, Business Plan and Code of Conduct, which are available for inspection at the registered office of SAMI at Beech House, Beech Hill Road, Dublin 4, Ireland.
- vi) SAMI is also subject to the Corporate Governance Code of the Sanlam Group.

The Board of Directors is responsible for establishing and maintaining internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement and loss. The Board of Directors has delegated this duty to SAMI.

SAMI is authorised and regulated by the Central Bank of Ireland and must comply with the rules imposed by the Central Bank of Ireland. SAMI also monitors and evaluates the external auditor's performance, qualifications and independence. Brown Brothers Harriman Fund Administration Services is appointed as administrator to maintain the books and records of the Company.

The Company has procedures in place to ensure all relevant books of accounts are properly maintained and are readily available, including production of annual and half-yearly financial statements. The annual financial statements of the Company are required to be approved by the Board of Directors of the Company and the annual and half yearly financial statements are required to be filed with the Central Bank of Ireland and Euronext Dublin.

The statutory financial statements are required to be audited by the independent auditors who report annually to the Board on their findings. The Board evaluates and discusses significant accounting and reporting issues as the need arises.

Shareholders' meetings

The convening and conduct of shareholders' meetings are governed by the Articles of Association of the Company and the Companies Acts. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors of the Company are required to convene a general meeting within eighteen months of incorporation and fifteen months of the previous annual general meeting thereafter. Shareholders representing not less than one-tenth of the paid up share capital of the Company may also request to convene a shareholders meeting. Not less than twenty one days' notice of every annual general meeting and any meeting for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting unless the auditors of the Company and all the shareholders entitled to attend and vote agree to shorter notice.

Two members present either in person or by proxy constitutes a quorum at a general meeting provided that the quorum for a general meeting convened to consider any alteration to the class rights of shares is two shareholders holding or representing by proxy at least one third of the issued shares of the relevant Funds or class.

Shareholders' meetings (continued)

Every holder of participating shares or non-participating shares present in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present in person or by proxy is entitled to one vote in respect of each share held by him and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company, or at least two members present in person or by proxy, or any holder or holders of participating shares present in person or by proxy representing at least one-tenth of the shares in issue having the right to vote at such meeting, may demand a poll.

Shareholders may decide to sanction an ordinary resolution or special resolution at a shareholder's meeting. An ordinary resolution of the Company (or of the shareholders of a particular Funds or class) requires a simple majority vote cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company (or of the shareholders of a particular Fund or class) requires a majority vote of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

Composition and Operation of the Board

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors may not be less than two. Currently the Board of Directors of the Company is composed of four Non-Executive Directors, being those listed on page 3 of these financial statements with Paul Dobbyn, Thomas Murray and Richard Aslett being Irish residents. None of the Company's Directors hold directorships with the Depositary. The business of the Company is managed by the Directors, who exercise all such powers of the Company as are not required by the Companies Acts or the Articles of Association to be exercised by the Company in a general meeting. A Director may, and the company secretary of the Company on the requisition of a Director will, at any time summon a meeting of Directors. Questions arising at any meeting of Directors are determined by a majority of votes. In the case of quality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

All key management functions of the Company have been delegated to SAMI. SAMI will manage these in terms of their Programme of Activity and Business Plan. SAMI is approved by the Central Bank of Ireland, and is authorised as a UCITS Management Company and an Alternative Investment Fund Manager.

IMPLICATIONS OF BREXIT

The United Kingdom left the European Union ("EU") at 11pm on 31 January 2020. A transition period is now in place until 31 December 2020. During this transition period, all EU rules and regulations continue to apply to the UK.

Ireland remains a member of the EU. The Company also remains an EU regulated UCITS that can avail of passporting rights under the UCITS Regulations to market and sell shares in the Funds in the EU, subject to complying with the terms of the UCITS Regulations. The Company has appointed UK domiciled and regulated Investment Managers to certain of the Funds of the Company. UCITS funds are permitted to have non-EU investment managers. On 1 February 2019 ESMA confirmed the agreement of no-deal Brexit MoUs with the FCA. One memorandum of understanding ("MoU") is a multilateral MoU between national EU/EEA regulators and the FCA covering exchange of information and the delegation of portfolio management to UK authorised managers. This multilateral MoU will allow arrangements for fund manager delegation of portfolio/investment management to the UK to continue in the event of a no-deal Brexit. Accordingly, the UK domiciled and regulated Investment Managers that have been appointed to Funds of the Company should be in a position to continue to act as investment managers in the event of no deal at the end of the transition period.

Whilst this most significant Brexit risk has been minimised as a result of the multilateral MoU, Brexit may still negatively impact certain of the Funds of the Company as a result of:

- changes in law and tax treatment resulting from Brexit, including as regards any UK investments held by the particular Fund in question; and/or
- the continued market uncertainty regarding the exit process, which could negatively impact the value of investments held by a Fund.

No assurance can be given that such matters will not adversely affect certain Funds of the Company and the relevant Investment Managers' ability to achieve the Funds' respective investment objectives. That said, the memorandum and articles of association and prospectus of the Company contain provisions for certain liquidity management tools to help manage market volatility (e.g. ability to control large redemption requests, temporary suspension, redemption in specie) should the need arise.

COVID-19

A novel coronavirus was first detected in late December 2019 in Wuhan City, Hubei Province, China and is causing an outbreak of respiratory disease in countries around the world. On 11 February 2020, the World Health Organization (the "WHO") named the disease "COVID-19" and on 11 March 2020, the WHO declared a pandemic. Most countries around the world have suffered outbreaks of the disease and are likely to suffer a continued increase in recorded cases. The COVID-19 outbreak has seen a sudden and rapid decline in global economic growth.

There has been extreme volatility and limited liquidity in securities markets and such markets have been subject to governmental intervention. Certain Governments have imposed restrictions on the manufacture of goods and the provision of services in addition to the free movement of persons. This has had a material impact on the activities of businesses, their profitability and their ability to generate positive cash flow. In these market conditions there is a much higher risk of credit defaults and bankruptcies. It's too soon to say when a recovery will come or whether that recovery will be faster or slower than normal, as much will depend on how quickly individual countries are able to contain the virus and reopen for business. As a result, this may have a material impact on the performance of the Funds.

There is a possibility with the severe decline in economic activity and restrictions imposed, of disruption of electricity, other public utilities or network services, as well as system failures at facilities or otherwise affecting businesses which could adversely affect the performance of the Funds. COVID-19 has resulted in employees of the Manager, the Investment Managers and service providers to the Funds to adjust working practices, work remotely for prolonged periods of time or to be potentially absent from work due to illness as a result of the disease which may adversely impact the day to day operations of the Funds.

As at 31 December 2019, the following delisted securities were held by the Company:

- Accident Exchange Group Plc (Denker Global Equity Fund; Denker Global Financial Fund)
- Banco Espirito Santo SA (Satrix Europe (ex-UK) Equity Tracker Fund)
- Hanergy Thin Film Power Group Limited Special Purpose Vehicle (Satrix Emerging Markets Equity Tracker Fund)

As at 31 December 2019, the following thinly traded securities were held by the Company:

• Rolls-Royce Holding Pfd (Satrix World Equity Tracker Fund and Sanlam Global Value Fund)

The fair value of those securities listed above and used in preparing these financial statements may differ significantly from the values that would have been used had those securities had readily available market prices at 31 December 2019. All other investments in 2019 have readily available market prices.

Opinion

We have audited the financial statements of Sanlam Universal Funds Plc ('the Company') for the year end ended 31 December 2019, which comprise the Statement of Comprehensive Income, Statement of Financial Positions, Statement of Change in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows, Portfolio of Investments and notes to the financial statements, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2019 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union;
 and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material
 uncertainties that may cast significant doubt about the Company's ability to continue to
 adopt the going concern basis of accounting for a period of at least twelve months from the
 date when the financial statements are authorised for issue.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Risk	Our response to the risk	Key observations communicated to the Audit Committee
Valuation of financial assets and financial liabilities at fair value through profit or loss We have considered valuation of financial assets and financial liabilities at fair value through profit or loss (with a fair value or USD 4.7 billion (2018: USD 4.5 billion) as a key audit matter as it is a key driver of the Company's performance and net asset value. Investments in financial assets and liabilitues have been included as Level 1, Level 2 and Level 3 securities within Note 7 of the financial statements.	We obtained a listing of all financial assets and financial liabilities at fair value through the profit or loss as at 31 December 2019 and assessed the reasonableness of the valuation approach applied across all financial assets and liabilities, performing the following: Assessed the design and operating effectiveness of the Administrator's controls over valuation of financial assets and liabilities at fair value through profit or loss. For listed and traded secrities, we compared the prices used by the company to value these to independently available market sources	Based on the procedures performed, no issues were noted.

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the Company to be 0.5% (2018: 0.5%) of Net Asset Value. We believe that Net Asset Value is appropriate measure basis since the users of the financial statements may focus more on this than on earnings.

During the course of our audit, we reassessed initial materiality and made no changes to it.

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Company's overall control environment, our judgment was that performance materiality was 75% (2018: 75%) of our planning materiality. We have set performance materiality at this percentage due to our knowledge of the entity and industry, our past history with the entity, the effectiveness of the control environment and our assessment of the risks associated with the engagement.

Reporting threshold

Reporting threshold is an amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Board that we would report to them all uncorrected audit differences in excess of 5% (2018: 5%), as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit report

Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the company. This enables us to form an opinion on the financial statements. We take into account size, risk profile, the organisation of the company and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed. All audit work was performed directly by the audit engagement team.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be

materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report is have been prepared in accordance with the Companies Act 2014.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the Directors' responsibilities statement set on page 12, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's

report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The objectives of our audit, in respect to fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

We obtained an understanding of the legal and regulatory frameworks that are applicable to the company and determined that the most significant is the Companies Act 2014 and the European Communities (Undertaking for collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

We understood how Sanlam Universal Funds Plc is complying with those frameworks by updating our understanding of the adequate system of internal control in place. We also considered the existence of independence service providers, proper segregation of duties and the regulated environment in which the Company operates, which may reduce opportunities for fraud to take place.

We assessed the susceptibility of the company's financial statements to material misstatement, including how fraud might occur by management override of controls.

Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved inquiries to those charged with governance into possible instances of non-compliance with laws and regulations. A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

Other matters which we are required to address

We were appointed by the Directors in 2007 to audit the financial statements for the year ended 31 December 2006 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 14 years.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the company and we remain independent of the company in conducting our audit.

Our audit opinion is consistent with the additional report to the audit committee.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report,

for and on behalf of

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

Report of the Depositary to the Shareholders

We have enquired into the conduct of Sanlam Universal Funds plc (the "Company") for the period 1 January to 31 December, 2019, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

- in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

ECONOMIC & MARKET REVIEW

for the year ended 31 December 2019

While the last quarter of 2018 proved to be very challenging for markets, the first quarter of 2019 saw a remarkable recovery in market levels, primarily in the equity market. This was largely driven by the US Federal Reserve's rapid change in stance from December to early January. This change in direction for US interest rates encouraged markets that central banks were prepared to keep policy flexible, if not accommodative, for the foreseeable future. Central bankers have been able to do this in light of the lack of inflationary pressures, which have been broadly absent since the Global Financial Crisis. Additionally, the People's Bank of China, already started to loosen monetary conditions, and there were early signs that this was beginning to have a stimulative impact on Chinese economic conditions, which global investors took positively. While the US-China trade talks continued, the quarter also saw increasing confidence that these would be resolved relatively swiftly and satisfactorily.

Elsewhere, economic conditions in the euro-zone were also difficult, with even Germany struggling in particular segments, especially car manufacturing. As a result, the European Central Bank signalled a willingness to loosen policy further, in an effort to stimulate the region's economy. In the UK, Brexit continued to dominate, and while the UK was originally scheduled to have left the European Union, the stalemate within the British Parliament led to at least one delay, and potentially further delays, much to the frustration of those in the British electorate who voted to leave back in June 2016. This caused the Bank of England to keep interest rates on hold in light of the Brexit uncertainty. In summary, the quarter saw a turning point in central banks likely path for interest rates and this comforted market participants who even started to anticipate that the US economy may have already seen interest rates peak for the first quarter.

While equity markets experienced one of their weakest quarters in Q4, 2018, since the Global Financial Crisis, Q1, 2019 saw equity markets produce their best quarter since Q3, 2010, and it was the best first quarter since Q1, 1998. For the quarter, equity markets as measured by the MSCI World Index rose by 12.48%. The majority of this return was delivered in January, when markets rose by 7.78%, but February and March both saw equity markets make progress with returns of 3.01% and 1.31% respectively. While one can point to the declining rate of return, a 1% monthly return remains a healthy rate. Across the regions, markets all made strong progress, with North American equities leading the way and rising by 13.82%. This was followed by the Pacific excluding Japan region, which gained 12.24%, while Europe and more so Japan, were the laggards returning 10.84% and 6.66% respectively – although all are notable moves. Emerging Markets also made substantial progress rising 9.91%, and hence under-performed Developed Markets, although this was really a function of February and March, as in January Emerging Markets delivered a return just shy of 9%, and thus out-performed Developed Markets for that month.

At a sector level, all eleven Global Industry Classification System (GICS) sectors delivered positive returns, and all but two delivered double-digit returns. The two main laggards were the Health Care and Financials sectors, which returned 8.14% and 8.41% respectively. Utilities managed to creep into double-digit returns with a gain of 10.02%. In contrast, the major winner for the quarter, having been one of the main losers of the fourth quarter, was Information Technology which rose 19.57%. Real Estate was perhaps the surprising second-best performer for the quarter, rising 16.15% – this sector benefitted from the change to the path of global interest rates, as a more interest rate sensitive sector. Energy was also one of the major rebound plays from the fourth quarter and rose 14.44%. Industrials were the fourth best sector for the quarter. They rose 14.39% and were the only other sector to outperform the wider market during Q1 2019.

¹ All performance numbers are in US dollars unless stated otherwise.

for the year ended 31 December 2019

With investors apparently risk-on for the quarter, one may have expected that global bonds would have produced negative returns for the first quarter. However, unlike the equity market, the bond market remained concerned about the outlook for global growth, and with interest rates appearing to be on hold more or less globally, and potentially loosening in some places, global bond markets made positive progress during the quarter, as yield levels fell. For the quarter, global bond markets, returned 2.20%, as measured by the Bloomberg Barclays Capital Global Aggregate Bond Index. Like equities, the major gains came in January, although unlike equities, bonds declined during February but rebounded in March – the monthly returns, respectively for the quarter, were 1.52%, -0.58% and 1.25%. However, despite the good returns for the quarter, the global bond market was still down -0.38% for the quarter, while equities remained in positive territory having risen 4%.

The global corporate bond market, spurred on by investor sentiment but also by the interest rate outlook, unsurprisingly delivered superior returns to the broader global bond market. Global corporate bonds returned 4.15% for Q1, 2019, as measured by the Bloomberg Barclays Global Aggregate Corporate Index. In contrast to the wider bond market, they managed to achieve positive returns for all three months of the quarter, but it was again January seeing the major gains, when they rose 2.29%. Meanwhile February saw a modest rise of 0.19%, and in March markets moved up 1.63%. The global corporate bond market produced a positive return of 1.28% over the 12 months to end of March 2019.

Following the strong rebound in the first quarter of 2019, one might have expected the second quarter to have been significantly more muted. However, with the change in tone from the US Federal Reserve shifting from not just pausing on raising interest rates, but during the quarter increasingly signalling that the next move in US interest rates would be a cut, the quarter turned out to be a good one for risk assets. Hence, markets broadly were able to make progress during the second quarter. This was despite ongoing concerns with the US trade negotiations with China primarily, which continued to be a concern for investors, and remained unresolved.

The US Federal Reserve's move towards an interest rate cut was largely predicated on softening economic data within the US, although the data, manufacturing aside, had not yet reached levels associated with recession. The data presented enough concerns about the extent of the slowdown that the Federal Reserve had seen an increasing need to implement a cut, although did not do so during the quarter. The slowdown was not just evident within the US, but globally, and so the European Central Bank and others started to signal looser monetary policy in different forms, while the Chinese central bank had already started to provide stimulus. This led to a decline in global sovereign yields and in turn this helped support the equity market. Other issues during the quarter remained the UK's unresolved Brexit plan, while the European elections saw the centre parties lose some control, which signalled the potential for less decisive government at the overall European level. On the geopolitical front, North Korea seemed set on working with the US to some kind of resolution, while Iran was the greater irritant during the quarter with increasing tension in the Gulf region.

With the constructive backdrop, equity markets made progress during the quarter, rising 4.00%, as measured by the MSCI World Index. This return needs to be viewed in the context of the first quarter of the year, meaning global equity markets were up nearly 17% year-to-date. The quarter itself exhibited a significantly different picture when viewed in more detail. April saw equities rise by 3.55%, but in May there were significant concerns around the economic outlook, which led to a sell-off of -5.77%. However, with the resultant tone from central bankers increasingly dovish, June, somewhat amazingly, saw all the May losses recouped as the market rose 6.59%. Thus, the quarter itself had its fair share of volatility. At a regional level the MSCI Pacific ex Japan area delivered the strongest returns, while North America slightly lagged Europe, but both outperformed the global market, which was materially held back by the weak Japanese market which only rose 1.02%. Emerging Markets also lagged the wider market due to the trade concerns and potential US dollar strength, resulting in a gain of only 0.61% for the quarter.

for the year ended 31 December 2019

On a sector basis, ten of the eleven global sectors produced positive returns. The exception was the Energy sector which declined -1.56% and was clearly the weakest sector for the quarter. Health Care was the next weakest sector, but still managed a respectable increase of 1.50%, while the other defensive sectors, such as Real Estate, Utilities and Consumer Staples all under-performed the wider market. Communication Services was also the weakest sector that did manage to out-perform the wider market with a gain of 4.44%. The best performing sector for the quarter was the Financials sector, which rose 6.16%, though this was closely followed by Information Technology that gained 5.87%. The Consumer Discretionary sector also managed to rise more than 5%, while Materials and Industrials delivered near identical returns are circa 4.75%. These return patterns clearly indicate the risk-on nature of the quarter with the more cyclical sectors out-performing their more defensive counterparts.

Global bond markets had a strong second quarter and their strongest since the first quarter of 2016. This was driven by the fall in global yield levels, but with spread levels also tightening the rally in bonds was not solely linked to the decline in global yields. Using the US 10-year Treasury bond as a guide, April saw the yield level remain fairly stable around 2.5%, but in May this declined persistently to almost 2.1% by the end of the month. Then in June the rate of decline eased significantly, only temporarily breaking below 2% during June. While the start point and end point for many global government bonds differed significantly to the US Treasury, the direction and magnitude of changes were broadly equivalent. As a result, the Bloomberg Barclays Global Aggregate Bond Index delivered 3.29% for the second quarter. April saw a return of -0.30%, while in May global bond markets moved up 1.35% and this accelerated in June as markets moved up 2.22%.

In the global corporate bond space, with the combination of lower yield and a risk on environment, it was unsurprising that the Bloomberg Barclays Global Aggregate Corporate Index outperformed the wider market for the quarter with a return of 3.93%. The pattern of returns was somewhat different with positive returns in each month of the second quarter. April saw the corporate market gain 0.46%, while in May it failed to keep up with the wider bond market in a risk off environment with a return of 0.68%. Then in June it benefitted from both tailwinds i.e. declining yields and risk on, to gain 2.75% – its best month since March 2016.

As the first half of 2019 saw markets make good progress, it was always going to be a challenge for the third quarter to continue at the same pace. The duration of the economic cycle clearly played a role in investors' expectations for the future, and this was coupled with an identifiable slowdown in global economic activity. The US – China 'trade war' escalated during the third quarter, to such an extent that markets were relieved when, in early September, the two sides agreed to recommence trade talks. However, the preceding tensions and uncertainty plagued markets over the third quarter. At a fundamental level, even more concerning was the clearly identifiable slowdown in global economic growth, which appeared to be materially impacting the USA, although not pulling the entire economy to recessionary levels. The trade dispute was clearly a factor in this, but the broader slowdown in China also played its part.

In response to the economic slowdown, the US Federal Reserve implemented two interest rate cuts during the third quarter. These were seen as pre-emptive moves to prevent any further material deterioration and to boost confidence. In Europe, the European Central Bank also paved the way during the quarter for the announcement of a range of monetary easing measures in September, including a formal interest rate cut. These moves in the front-end of the bond curves helped support longer-dated moves across the curves and so the quarter generally saw a move down in developed market sovereign bond yields. Elsewhere, Brexit remained unresolved. Volatility picked up during the quarter, especially during August, but did not reach levels outside the current normal bounds. On the geopolitical front the attacks on Saudi oil facilities in September led to a spike in the oil price, but this quickly reversed within a few days.

for the year ended 31 December 2019

Despite the clear macro challenges, equity markets moved higher during the quarter, posting a gain of 0.53% for the period, as measured by the MSCI World Index. This clearly masked the intra-quarter volatility, which saw equity markets gain 0.50% in July, but then fall back by -2.05% in August, only to recover 2.13% in September – a bumpy ride. At a regional level there was clear differentiation during the quarter in US dollar terms. Japan led the way rising 3.13%, while North America gained 1.36%, thus also outperforming the wider market. However, Europe declined -1.80%, but it was the Pacific excluding Japan region that took the major fall, decreasing -5.20% for the period – the protests in Hong Kong being a significant factor. More broadly, Emerging Markets declined by -4.25% for the quarter and hence lagged their developed market counterparts by almost 12% year to date.

Turning to global sectors, it was clearly evident that it was a defensively led rally that helped markets to progress for the quarter. Utilities were the best performing sector rising 6.45%, followed closely by Real Estate gaining 6.22%. Consumer Staples was then the next best sector returning 4.01%. However, then there was another step down to Information Technology and Communication Services, which delivered 2.26% and 1.36% respectively. Together, these were the sectors that out-performed the broader market. In sharp contrast the Energy sector fell -5.78%, while Materials were down -3.26%. Health Care, somewhat surprisingly, was the next weakest sector declining -1.25%, though Industrials also posted a decline of -0.68%. Consumer Discretionary and Financials both manage to generate positive absolute returns of 0.26% and 0.28% respectively, although both under-performed the wider market.

Like equity markets the strong performance of bond markets year-to-date looked unsustainable, but bond markets, as measured by the Bloomberg Barclays Global Aggregate Index did post a positive return of 0.71% for the 3rd quarter. This was driven by the overall downward movement in sovereign yields. July saw bond markets decline by -0.28%, while August saw a strong return of 2.03%, in a month that was clearly risk-off. Then September witnessed many of those returns being eroded as bond markets declined -1.02% for the month. The US 10-year Treasury started the quarter with a yield just above 2%, but this fell below 1.50% during August, before recovering above 1.80% in September, before falling again in the second half of September to end the quarter in the 1.60% to 1.70% range.

Within the global corporate bond space, the continuation of lower yields and reasonable, but slowing, economic picture enable global corporates to out-perform the wider bond market. For the quarter, the Bloomberg Barclays Global Aggregate Corporate Bond Index rose 1.21%. Unlike the wider market it just managed to produce a positive return in July, but like the broader market saw most of its gains in August, before pulling-back somewhat in September.

Following a relatively quiet level of equity market direction in the middle part of 2019, the fourth quarter saw equity markets post a strong final quarter to the year. This was driven by easing global economic slowdown fears and improving expectations of the outlook for the global economy and market into 2020. That being said 2019 clearly seen some areas of economic weakness particularly in manufacturing, while services were more resilient, but have still seen some slowing. The market took an optimistic view during the fourth quarter, but there was a need for economic fundamentals to come through to support this, both at the global GDP level and also through individual company results. The actions of central banks were the key turning point of 2019, with the move away from further tightening to additional easing. The fourth quarter saw the ECB recommencing quantitative easing, while the US Federal Reserve delivered a further 0.25% interest rate cut, bringing the total cuts for 2019 as a whole to 0.75%. This comforted markets and helped build positive future expectations.

for the year ended 31 December 2019

The concern with the market rally during the fourth quarter was that it had been driven by earnings multiple expansion rather than by achieved earnings. The quarter was also helped by gentle progress on resolution of the US – China trade deal dispute. This helped markets to perceive that the macroeconomic risks had been reduced, and again led to improved expectations. Within Europe, the UK held a December general election and the outcome was a vote for capitalism as the UK Conservative party won a convincing majority. The outcome of this is that the UK left the European Union at the end of January 2020. The future path for the UK's relationship with the European Union is still to be determined during 2020 and beyond, but in the short-term post January 2020 the transitional period has kicked in.

For the fourth quarter, global equity markets rose 8.56%, as measured by the MSCI World Index. While this was not the strongest quarter of 2019 it was a significant increase in the returns seen in Q2 and Q3. The guarter was also characterised by strong monthly returns in each month of the guarter, with those returns being 2.54%, 2.79% and 3.00% for October, November and December respectively. The slight increase in absolute returns also hinted at the improving expectations from market participants during the quarter. As a consequence, the MSCI World Index rose 27.67% for 2019, which made 2019 the best year for equity markets since 2009. This said the returns for 2019 need to be viewed in the context of the pull back in Q4, 2018. Adjusting for this, equity markets only rose 10.54% for the fifteenmonth period, which on an annual basis is equivalent to 8.30%. At a regional level, in US dollar terms, the best performing developed market was Europe for the quarter with a gain of 8.84%, though this was closely followed by North America at 8.76%. Japan was a slight laggard with a return of 7.64%, while the developed Pacific excluding Japan region was clearly off the pace, but still produced a decent return of 5.78% for the quarter. In contrast to recent periods, Emerging Markets produced a return of 11.84%, which indicated a clear out-performance to developed markets. For 2019 as a whole North America was the best performing region with a return of 30.70%, while the Pacific excluding Japan and Emerging Markets regions were the weakest with returns of 18.36% and 18.42% respectively.

On a global sector basis, the quarter saw almost all sectors produce a positive absolute return, although the Real Estate sector was the weakest and produced a -0.01% return for the period. The next weakest sector was the Utilities sector gaining 2.05%, while Consumer Staples rose 2.58%, and then it was Energy with a return of 4.99%. The best returning sector for the quarter was Information Technology rising 13.98%. This was closely followed by Health Care's 13.70% return. However, then there was a gap to Financials which produced 8.76%, while Materials was the only other sector to out-perform the broader market with a return of 8.65%. For 2019 as a whole the best performing sector was Information Technology which rose 47.55%, while the worst performing sector was Energy gaining only 11.45%.

Global bond markets had a sound last quarter of 2019, posting a return of 0.49%, as measured by the Bloomberg Barclays Global Aggregate Index. During the quarter global bond markets rallied in October rising 0.67%, only to give this all this back during November with a decline of -0.76%. It was then December with a rise of 0.58% that effectively accounted for the quarterly return. In contrast to equity markets most of the return for bond markets occurred in the first half of 2019, while the second half of the year only saw a gain of just over 1%. The quarter saw global treasury yields back-up slightly over the course of the quarter. For example, after a slight rally in yields, the US 10-year treasury reached 1.53% in early October, but pulled back quickly and into the 1.90% to 1.95% range in early November. From there the 10-year treasury saw some yield reduction, but essentially it was range bound in the 1.70% to 1.93% band for the remainder of the quarter.

In the non-sovereign segments of the bond market, the quarter was a reasonable one with the Bloomberg Barclays Global Aggregate Corporate Index rising by 1.79%, to produce an overall return of 11.51% for 2019. Again, this was mainly driven by returns in the first half of 2019. The Global high yield market, as measured by the Bloomberg Barclays Global High Yield index returned 3.50% for the quarter, and 12.56% for 2019 as a whole. This indicates the risk-on nature of the fourth quarter as a whole.

for the year ended 31 December 2019

Q1 2020 and Coronavirus (COVID-19)

The spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the crisis has been as rapid as it has been unprecedented.

Equity markets remained surprisingly unphased in the early stages of the crisis, despite China placing itself in lockdown and supply chains coming to an abrupt halt. But when the epicentre of the virus moved to Europe, the landscape changed, and this was quickly exacerbated by news that Saudi Arabia had instigated an oil price war. Normally we talk about concerns of an economic slowdown, but suddenly we were talking about a global economic shutdown – something none of us have experienced in our lifetime.

We are now entering a time of patience. Markets are forward-looking and have adjusted rapidly over the last few weeks but it will still take time to fully factor in the significant economic and business impacts of this period. Companies are unlikely to be announcing significant news in the coming weeks as those that have shut down remain closed for business and those still standing continue to muddle through. The ubiquitous question within and beyond the world of finance, is when we will get through to the other side of this pandemic. Without a crystal ball, determining the answer to this question is mere speculation.

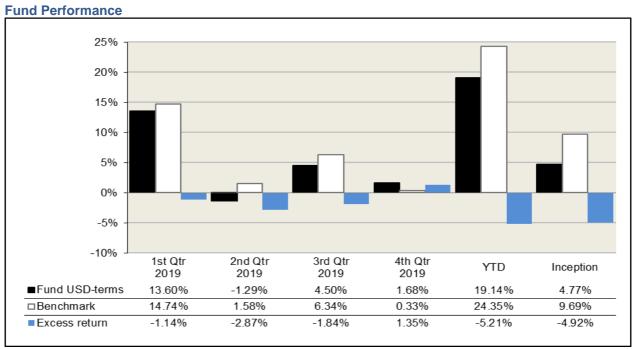

In the short term however, markets are showing signs of settling as we enter the new normal of subdued economic activity. Social distancing measures, including swathes of the population staying inside and working from home, looks set to persist in the near-term. Market prices have by-and-large reflected that and for the moment at least show a degree of stabilisation; despite remaining elevated, volatility continues to moderate.

There's no question that the last few weeks have been some of the worst in the history of global markets, and almost everyone in every country will feel the effects of this crash in one way or another. But temporary losses are part of investing, and the best thing one can do at this juncture is to avoid making rash decisions in the coming weeks.

BRIDGE GLOBAL PROPERTY INCOME FUND

Investment Objective

The Bridge Global Property Income Fund (the "Fund") aims to provide investors with a high level of current income, as well as long-term income and capital growth, by investing primarily in a global range of transferable securities of real estate companies and real estate related companies, or in companies which own significant real estate assets at the time of investment or in Real Estate Investment Trusts ("REITS") including publicly traded closed-ended real estate funds listed or traded on a regulated stock exchange or market.

Note: The Fund is benchmarked against the GPR 250 REIT Index. Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

During 2019 the headwinds were strong across the global landscape, including a weak global economy, anaemic manufacturing output, flat to negative corporate earnings and US yield curve inversion. The ongoing trade war between the US and China, together with elevated geopolitical risks also increased the medium-term recession risk during 2019.

The year was also characterised by increased social and political unrest. In September, Saudi Arabia's oil and refining facilities were attacked, leading to a spike in global oil prices. Anti-government demonstrations were commonplace across the globe, with citizens protesting various forms of taxation, human rights and corruption. The protests in Hong Kong gained the most coverage.

The US Federal Reserve ended 2018 with fairly hawkish commentary, which saw equity markets decline significantly in Q4'18. In January, they did a complete U-turn and noted that they were reviewing their balance sheet reduction programme. In the following months, due to weakening economic data, the Fed cut US interest rates by 25bps on three occasions. During December, the US House of Representatives impeached President Trump, but US equity markets continued to hit new highs.

Despite all the headwinds, US equities delivered their best year since 2013, driven by a resilient consumer and a dovish US Federal Reserve (lower interest rates). The S&P 500 index produced a total return of +31.5% for 2019, after strong returns from three sectors technology (+48.0%), communications (+30.9%) and financials (+29.2%). The MSCI World Index (USD) produced a similar total return of +27.7%. Global listed property prices also rose significantly in 2019, on the back of lower interest rates and falling long bond yields. The GPR 250 REIT delivered a total return of 24.3%.

The Fund delivered a return of +19.14% for the year, underperforming its benchmark by 5.21%. Most of the underperformance over the year can be attributed to the Fund's allocation to retail REITs, which underperformed the broader market in 2019, as well as service fees and dividend withholdings tax. Neither of the last two are adjusted for when comparing the Fund's performance to the benchmark.

BRIDGE GLOBAL PROPERTY INCOME FUND (CONTINUED)

Fund Outlook

The fourth quarter of 2019 ended with a more positive bias as the United States and China agreed the first phase of a trade deal and in the United Kingdom, Prime Minister Boris Johnson's Conservative Party won a landslide in the general election, paving the way for the UK to exit the European Union on 31 January 2020. The global political uncertainty that undermined business confidence and investment throughout most of 2019 gave way to a more optimistic outlook for 2020. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed that investment outlook.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. At present it's too early to call the bottom. The market is digesting the impact of the COVID-19 virus on the economy against the huge global stimulus announced by governments around the world and the outcome will ultimately effect the depth and the duration of the coming recession. We are mindful that events like these do not last forever and as investors we should be looking for entry points and buying opportunities.

Although the first quarter was bruising, the Fund continues to favour investments in high quality Real Estate Investment Trusts (REITs) and is well diversified both geographically and by property-type.

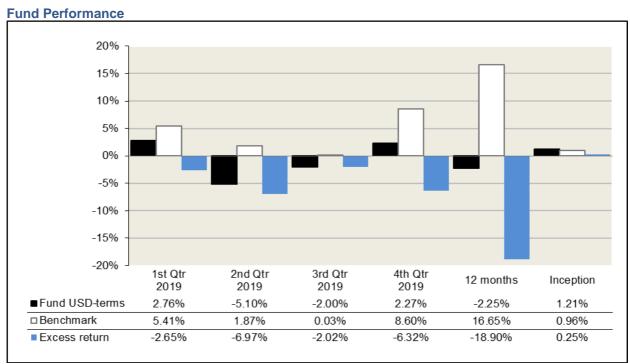

Investment Manager

Bridge Fund Managers (Pty) Limited

SANLAM AFRICAN FRONTIER MARKETS FUND

Investment Objective

The investment objective of the Sanlam African Frontier Markets Fund (the "Fund") is to achieve long-term capital growth by investing in listed African equities (ex-South Africa) that offer above average growth potential.

Note: The Fund's benchmark is the MSCI EFM Africa ex ZA Daily Net TR Index (MSEIAZUN). Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Sanlam African Frontier Markets Fund was down 2.25% in 2019, significantly behind the benchmark that was up 16.65%. Over 3 years the Fund is up 7.82%, annualised, while the benchmark is up 7.40%. The Fund's performance for 2019 has been disappointing as our investments in Zimbabwe have detracted from performance.

In March 2019, the Zimbabwean government banned the use of USD and other currencies and introduced a new local currency (ZWL) as the only legal tender in the country. The macroeconomic environment in Zimbabwe deteriorated significantly post the introduction of the local currency (ZWL), with inflation accelerating to around 400% and consequently the FX rate weakened sharply.

The initial ZWL exchange rate was pegged at around ZWL2.5/USD but that rapidly weakened to close the year at ZWL16.8/USD. There is still no USD liquidity on the interbank market. The parallel market exchange rates continue to trade at much weaker levels compared to the official rate. The Old Mutual Implied Exchange Rate, which we use as the basis to value our Zimbabwe investments, closed the year at ZWL26/USD compared to ZWL5/USD at the start of 2019.

At the beginning of the year, our Fund had 8.5% invested in Zimbabwean equities which has reduced to 3.0%. Furthermore, our cash balances in Zimbabwe lost value as the exchange rate weakened. At present we continue to value our investments using the Old Mutual Implied Exchange Rate as the basis.

In addition to Zimbabwe, our underweight position in Commercial International Bank (COMI), which makes up 20% of the benchmark, detracted from performance materially versus the benchmark as the share price rallied 58%. Similarly, the top 5 stocks in the benchmark have a total weight of 51%. But our underweight position across all 5 stocks hurt performance as they rallied by between 7%-45% in 2019. A stand-out example is Safaricom which comprises 9.5% of the index—Safaricom's share price went up by 42% during 2019 however due to concentration limits, our Fund was underweight.

SANLAM AFRICAN FRONTIER MARKETS FUND(CONTINUED)

Fund Performance (continued)

The Zimbabwean trade has been a painful one for the last twelve months. We don't know when and how things may resolve there, but we know we hold high quality businesses, acquired on reasonable prices. It is important to note that the drop in value of our Zim investments is not due to poor financial/operational performance. All three businesses that we are invested in Zim operate in attractive industries/sectors in which they totally dominate with market shares of >90%. These companies are well run, and are entrenching their dominant positions against a backdrop of very difficult economic circumstances. Most of these businesses now trade at more than 50%-60% discount in US dollars relative to their history and normal trading levels. We still believe that value will be realised in these holdings at some point - we just can't tell when.

The current Monetary/FX policy in Zimbabwe is likely to get a resolution soon as we have already noticed that some businesses are now being allowed to price their products/services in US dollars. This is one of the first signs that the government is starting to realise that the new currency is not working as expected. We are likely to realise more value in our investments if Zimbabwe goes back to using US dollars or move to another stable currency (CNY or ZAR). It is worth noting that Zim is now only 3% of our fund, so further underperformance of the same magnitude as we have seen in 2019 is very unlikely.

Egypt's macroeconomic performance continues to strengthen as it builds on the gains delivered by the reform programme since 2016. Egypt's positive inflation outlook should see more interest rate cuts in 2020 that will feed into lower debt servicing costs for the government.

Nigeria's economic growth has been disappointing in the past year as the economy grew by less than 2.5%. The Naira (NGN) looks overvalued as the currency has not weakened despite inflation picking up. Nigeria's current account balance is worsening, and the FX reserves are declining. The currency might be under pressure if some of these metrics worsen.

Fund Outlook

Overall we have not made significant changes to our portfolio holdings compared to last year. Due to FX shortages in Zimbabwe, the portfolio holdings there also have not changed. No new money is invested and whenever we receive investment inflows into the Fund, we dilute downwards our Zimbabwe exposure.

The benchmark is becoming more concentrated - a few stocks now constitute a large part of the index. The top 5 stocks in the benchmark now make up 53% of the index. We will continue to diversify our portfolio somewhat away from this very heavy concentration. For example in Egypt we are holding two smaller banks that are not part of the benchmark as a way of minimizing our underweight in Commercial International Bank.

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook for 2020. For the 3 month period to 31 March, the Fund dropped -28.32% versus a fall of -27.68% for the benchmark.

We have already seen governments and central banks across Africa taking serious steps to fight the economic impact. If the spread of the virus is contained in relatively short order, a credible recovery is possible.

The portfolio is trading on low valuation multiples, holding some high quality businesses and we believe these investments offer huge potential upside.

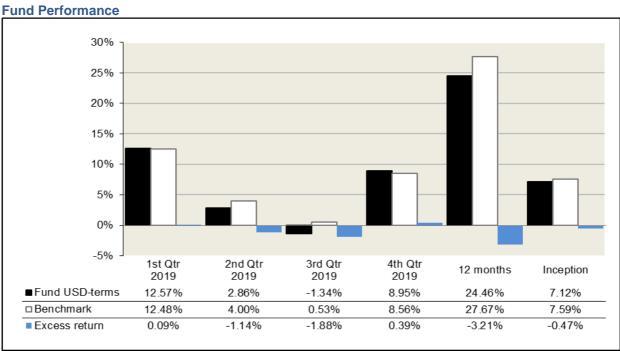

Investment Manager

Sanlam Investment Management (Pty) Limited

DENKER GLOBAL EQUITY FUND

Investment Objective

The investment objective of the Denker Global Equity Fund (the "Fund") is to provide above average long-term capital growth by investing primarily in global equities which the Investment Manager has identified as being undervalued and as offering above average growth potential.

Note: The Fund's benchmark is the MSCI Daily Total Return Net World USD Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

Among the Fund's top six contributors to returns in 2019, four were tech-related businesses: ASML, Microsoft, KLA Corp and Alibaba. Non-tech related wins came from US homebuilder NVR, mortgage insurer Essent, and the equipment leasing company Ashtead. Detractors were Royal Dutch Shell (which gained only 7% in a surging equity market), TUI (which stumbled in the wake of a disrupted travel market and the 737 Max fiasco), and Imperial Brands (which fell 10% for the year in response to fears around vaping-related legislation in the US and falling cigarette demand globally).

Almost all the challenges faced by the Fund in 2019 played out in the IT sector. While most of the best six performers for the year were tech-related business, this is also the sector where we lost out most. The Fund enjoyed only a small portion of the 88% price surge in Apple, which again became the world's biggest business by market capitalisation. We were early sellers, not convinced that the fast-growing services businesses inside Apple could offset the large and stagnant iPhone business. Clearly, the market thought otherwise, re-rating the company from a 12x price to earnings ratio in early 2019 to 22x by the end of the year. Another headwind for the Fund was Micro Focus, which fell by 14% during the year.

DENKER GLOBAL EQUITY FUND (CONTINUED)

Fund Outlook

The Fund endeavours to control risk in a rational manner by dampening hard-to-predict factor exposures and focussing its risk budget on proven bottom-up stock picking.

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook.

What we are witnessing is a proper market crash – most of which has happened in the space of just a month! It is extremely difficult to predict the timing and full extent of the outcome of the current crisis however we expect good quality companies with relatively strong balance sheets, good moats (competitive advantages) and sound management to recover well. These companies are now trading at significant discounts to their intrinsic value. This presents opportunities to add to the quality of the portfolio while increasing the potential for long-term returns.

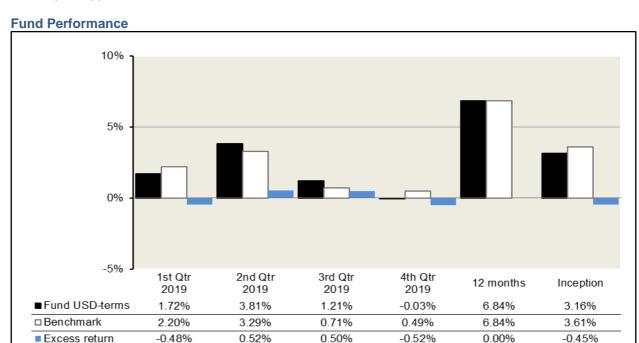

Investment Manager

Denker Capital (Pty) Limited

SANLAM GLOBAL BOND FUND

Investment Objective

The Sanlam Global Bond Fund (the "Fund") aims to provide income with the possibility of long-term growth from capital appreciation.

Note: The Fund's benchmark is the Barclays Capital Global Aggregate Bond Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

For the year ended 31 December 2019, the Fund performed exactly in line with the benchmark, the Bloomberg Barclays Global Aggregate Index, gaining 6.84% in absolute terms after three out of the four quarters saw positive gains for the Fund. The strongest quarter in both absolute and relative terms came in Q2 where the Fund posted an absolute gain of 3.81% to outperform the benchmark by +0.52%. Similarly, in Q3, the Fund outperformed again by 50 basis points. Performance, however, was given back in both the first and final quarters of the year, whereby the Fund underperformed by -0.48% and -0.52% respectively. Since inception on an annualised basis, the Fund and the benchmark have returned 3.16% and 3.61% respectively, and hence the Fund is behind by -0.45%.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented. The sudden stop to economic activity has seen companies rush to identify and secure their liquid assets.

The Fund's benchmark dropped by -0.33% in the first quarter with the Fund falling -0.10%.

SANLAM GLOBAL BOND FUND

Fund Outlook (continued)

Governments action to date has been to mitigate the damage to household and corporate balance sheets. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households. As a result, it may be some time before we know the true cost to business and the overall economy and we can expect continued volatility for the foreseeable future as a result.

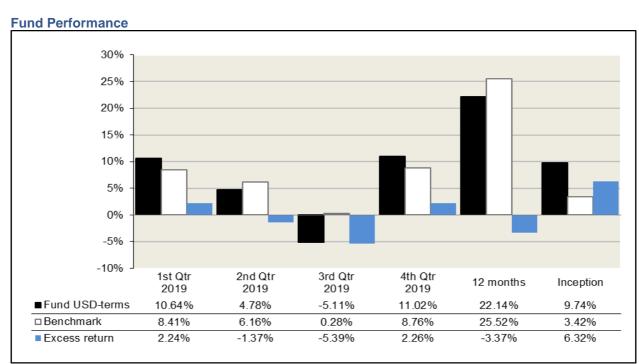

Investment Manager

Cameron Hume Limited

DENKER GLOBAL FINANCIAL FUND

Investment Objective

The investment objective of the Denker Global Financial Fund (the "Fund") is to achieve steady growth in the US Dollar value of investments primarily through global investment in securities of companies of which the principle operations specifically focus on, and derive benefit from or pertain to, the provision of banking, insurance and other financial services.

Note: The Fund's benchmark is the MSCI World Financials Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

It was mainly the factors that detracted from performance during the first three quarters of 2019 that turned in our favour in the fourth quarter. These were investments outside the US (UK, Europe and emerging markets) and in smaller companies. Market sentiment towards smaller companies (or value) seemed to improve and the fund's investments in TCS, LIC, Bank of Georgia, Regional Bank (Mexico) and Sparebanken Nord (all outside the US) gained strongly.

Throughout 2019 (and in fact over the past decade) investors preferred the certainty of the US based on the higher US growth and interest rates. However, this changed in the fourth quarter of last year, triggering the fund's outperformance. During the last quarter, the US dollar weakened by about 4%, UK financials gained approximately 17% after the UK electorate handed Boris Johnson a decisive majority, and India, Mexico and Russia all strengthened (for different reasons).

The re-rating of the 'off-the-beaten-track' smaller and mid cap companies is good news. The fund is invested in several smaller and mid cap financials that are using technology to their advantage to gain market share and that, despite delivering attractive shareholder value growth, have been ignored.

DENKER GLOBAL FINANCIAL FUND (CONTINUED)

Fund Performance (continued)

Our exposure to various geographies remained mostly the same in 2019, but we made a few large individual additions:

- During 2019, LIC Housing Finance in India was significantly de-rated due to the liquidity and confidence
 crisis in India. However, our meeting with management in November confirmed that the company is
 unaffected and gave us the confidence to increase our holding significantly. Investors have already
 benefitted from this and the share price could double again over the next two to three years.
- We also increased our investment in ING in the Netherlands and invested in both Swedbank and ABN-Amro. All three banks were subject to investigations regarding system weaknesses that allowed client money laundering. Again, management visits confirmed our research that the market is overreacting to a once-off fine and the possible costs of systems upgrades. With share prices down by between 20% and 30%, we viewed these as superb investing opportunities. European financials in general are undervalued, but these three stocks are now particularly cheap.

Our top 10 retained large exposure to the US. Citigroup, AIG, and Essent (a smaller US mortgage insurer) all still have significant re-rating potential.

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook.

At the initial outbreak of the virus we had very little by way of investment in China (and nothing in Italy). The small indirect investment we did have in China (Prudential) was reduced. Fearful market reactions pushed the valuations of several of our portfolio holdings down significantly – well below levels that we believe reflect the reality of the coming years. We have used this opportunity to add to our positions with the strongest balance sheets.

We have increased the quality of the portfolio further by increasing our investment in the property and casualty insurance sector. This sector could benefit from the increased demand for pandemic cover and event cancellations.

The Fund has held up well but, as can be expected, took a knock in March as the market started selling smaller cap, higher growth financials. In is our view that these should bounce right back as the shutdowns are reversed.

The Fund's current cash position is at a minimum (well below historical levels), reflecting the level of attractive valuations and long-term upside we see.

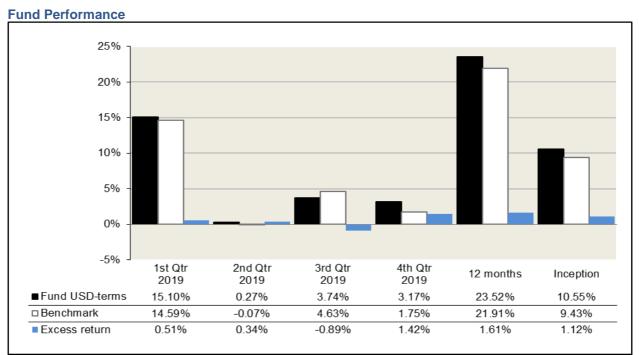

Investment Manager

Denker Capital (Pty) Limited

SANLAM GLOBAL PROPERTY FUND

Investment Objective

The Sanlam Global Property Fund (the "Fund") aims to provide long-term capital growth.

Note: The Fund's benchmark is the FTSE EPRA/NAREIT Developed Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

In the face of a strong rally in global listed property, the Fund had a good year to outperform the benchmark (FTSE EPRA/NAREIT Developed Index) by +1.61%, having posted an absolute gain of 23.52%. The absolute return for the year was driven firstly by four quarters of positive absolute performance, but predominantly by the first quarter where the Fund advanced 15.10%, outperforming the benchmark by +0.51% as well as outperforming global equity markets for the quarter. The Fund's strongest relative quarter came in Q4 where the Fund beat the benchmark by +1.42%. Conversely, some performance was given back in Q3 (-0.89%), with the Fund gaining 3.74% in absolute terms. On an annualised basis, the Fund has outperformed the benchmark by +1.12% since inception, having gained 10.55% in absolute terms.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The Fund and its benchmark fell 28.50% and 28.53% respectively during the first quarter of 2020. From its peak on 14 February through to 23 March, the index fell over 43%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. No sector was spared in the global sell-off.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

SANLAM GLOBAL PROPERTY FUND (CONTINUED)

Fund Outlook (continued)

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Given the scale of the current crisis, we are likely to experience further volatility in share prices until we get clarity on the duration of lockdowns and companies will likely remain focused on capital preservation.

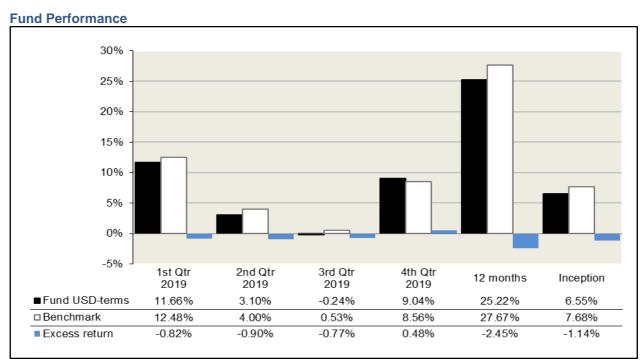

Investment Manager

AllianceBernstein Limited

SANLAM WORLD EQUITY FUND

Investment Objective

The Sanlam World Equity Fund (the "Fund") aims to provide above average long-term capital growth by investing primarily in global equities.

Note: The Fund's benchmark is the MSCI World Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

With the Fund undergoing a restructure in May, the performance for the year was essentially split into two parts. In the first half of the year, and under the previous multiple regional strategies exposure, the Fund underperformed by -0.82% and -0.90% in quarters one and two respectively – to note the final month of Q2 was driven by the performance of the new Global High-Quality strategy manager who was introduced into the Fund in June. The Fund subsequently saw an initial period of disappointing performance following the introduction of the new team, underperforming by -0.77% in Q3. Some performance was, however, recouped in the final quarter of the year, with the Fund outperforming the benchmark by +0.48% to end 2019 -2.45% behind. Since inception on an annualised basis, the Fund lags its benchmark by -1.14%, having climbed 6.55% in absolute terms.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI World Index dropped by -21.05% in the first quarter. From its peak on 21 February through to 23 March, the index fell over 33.1%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. Emerging-market stocks fell by 19.1%. In China, however, signs of success in containing the virus helped reduce losses to 8.1%. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

SANLAM WORLD EQUITY FUND (CONTINUED)

Fund Outlook (continued)

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Given the scale of the current crisis, we may not have reached the trough in global equity markets yet. But eventually, a rebound will come.

SATRIX WORLD EQUITY TRACKER FUND

Investment Objective

The investment objective of the Satrix World Equity Tracker Fund (the "Fund") is to provide capital growth equivalent to that gained from investment in world equity markets.

Note: The Fund's benchmark is the MSCI World Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund performed fairly well in terms of tracking the MSCI World Index in 2019. The Fund and the benchmark returned 27.48% and 27.67% respectively, and hence the Fund deviated by -0.19% for the year. The largest deviations came in the first and final quarters, as equity markets saw their strongest gains (12.48% and 8.56% respectively), where the Fund deviated from the benchmark by -0.10% and -0.13% respectively. Immaterial deviations were seen in both Q2 and Q3. The Fund now deviates from its benchmark by -0.33% since inception and on an annualised basis.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI World Index dropped by -21.05% in the first quarter of 2020. Sanlam Investment Management (Pty) Limited

SIIP INDIA OPPORTUNITIES FUND

Investment Objective

The investment objective of the SIIP India Opportunities Fund (the "Fund") is to provide long-term capital arowth.

Fund Performance

Note: The Fund's benchmark is the Bombay Stock Exchange 500 Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund had a strong year in 2019 in terms of outperforming its benchmark, the Bombay Stock Exchange (BSE) 500 Index. The Fund beat this benchmark by +7.79% on the year, having gained 13.18% in absolute terms. The market rally was driven predominantly by larger cap names in the market, and hence the MSCI India index performed slightly better, but the Fund still ended comfortably ahead of the MSCI benchmark (+5.61%) for the year. The relative outperformance was a result of four consecutive quarters of outperformance against the BSE500, the strongest of which came in Q3 when the markets sold off slightly - the Fund protected against this sell-off to outperform by +3.60%. The Fund's strongest absolute quarter came in Q1, where the Fund gained 7.51% to outperform the benchmark by +1.43%. Since inception, the Fund and the benchmark have gained 3.41% and 2.95% annualised respectively.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

SIIP INDIA OPPORTUNITIES FUND (CONTINUED)

Fund Outlook (continued)

From an Indian equities perspective, a sharp moderation in global crude oil prices, reports of a spike in COVID-19 cases within the country, the strain on the banking sector and growing worries about a global economic recession has led to bearish momentum in the domestic stock market, with the benchmark falling 33.16% for Q1 2020 (with the Fund down 30.12% over the same period). The lockdowns accompanying COVID-19 and the expected contraction in global output in 2020 weigh heavily on the growth outlook for India. The actual out turn will depend upon the speed with which the outbreak is contained and economic activity returns to normalcy.

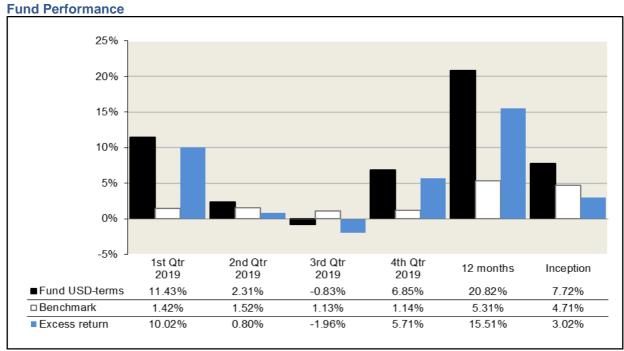

Investment Manager

Sanlam Investment Management (Pty) Limited

DENKER GLOBAL DIVIDEND FUND

Investment Objective

The investment objective of the Denker Global Dividend Fund (the "Fund") is to provide a regular income stream for investors with the potential for capital growth. It aims to provide a regular income which will be in line with the annual average dividend yield of the MSCI World High Dividend Yield NTR Index as well as provide capital growth exceeding inflation.

Note: The Fund's benchmark is a composite index, being the yield of the MSCI World High Dividend Yield NTR Index and the US CPI. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

When compared to the MSCI World High Dividend Yield Index the largest contributions to the Fund's relative performance were its holdings in JP Morgan Chase, Taylor Wimpey, Legal & General and Lockheed Martin, as well as the fact that we did not own Pfizer.

We made several good share selection calls, as shown by the Fund's performance relative to both the MSCI World Index and the MSCI World High Yield Index. The best of these were Lockheed Martin, Taylor Wimpey, Legal & General, JP Morgan Chase, Procter & Gamble, Samsung Electronics and Roche.

The biggest mistakes were the extent of the Fund's underweight positioning in relation to the US market, which once again outperformed all other developed markets. We also had an overweight position relative to the apparently cheaper European and UK equity markets, which lagged the US market.

The Fund's targeting of high dividend yielding shares in accordance with its mandate precluded it from holding any of the high-flying FAANGS stocks (Facebook, Apple, Amazon, Netflix and Google). These stocks continued to deliver significant outperformance and were a major reason for the US market's outperformance.

While the 27.7% return earned by the MSCI World Index during 2019 appears very attractive, one should keep in mind that the year started from a low base, created by the significant correction experienced in December 2018. On an annualised basis, the Index was up a much more credible 7.96% per year for the two-year period ended 31 December 2019.

DENKER GLOBAL DIVIDEND FUND (CONTINUED)

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook.

While no sector was spared in the global sell-off, energy stocks and financials were hardest hit. Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

There are many potential scenarios regarding when and how the pandemic will end. However, there will only be one real outcome, which, from where we sit today, is impossible to predict. Therefore, we prepare as much as possible by identifying different outcomes and diversifying our portfolios accordingly. We are very cautious to make changes to the portfolio that increases risk or the likely distribution of future outcomes. In an ideal world we would like to increase the prospective returns without increasing risk, but the reality is that returns can only be earned when one takes some risk. The increased volatility of share prices has created several opportunities and we will make changes to the Fund to improve the risk/reward trade-offs.

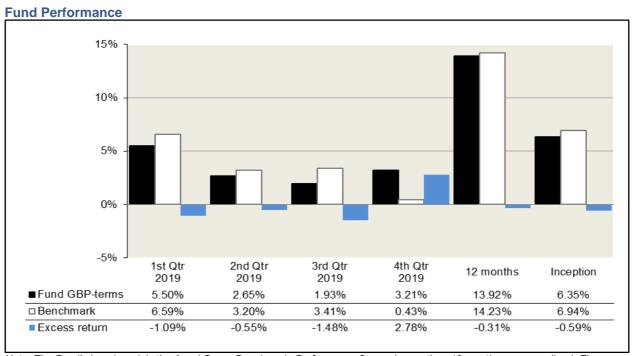

Investment Manager

Denker Capital (Pty) Limited

SANLAM ACCEL INCOME FUND

Investment Objective

The investment objective of the Sanlam Accel Income Fund (the "Fund") is to provide income to investors and capital growth over the long-term.

Note: The Fund's benchmark is the Accel Green Benchmark. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund delivered a total return of 13.9% for 2019, marginally underperforming its strategic benchmark, which returned 14.2%. The income return remained broadly consistent at just below 4% for the year. Within equities, UK small cap stocks performed the best, with Unicorn UK Income and Chelverton UK Equity Income rising 31.7% and 24.6%, respectively. The two 'enhanced' income funds also delivered positive returns, with Fidelity Enhanced Income up 18.8% but Schroder Income Maximiser, somewhat disappointingly, only gaining 9.3%, the worst out of all the equity holdings. Outside of the UK, performance from the global equity managers were decent, with Artemis Global Income gaining 23%, Lazard Global Equity Income 18.8% and Veritas Global Equity Income up 18.4%. Sanlam US Dividend and Guinness Asian Equity Income rose 15.7% and 14.7%, respectively. Within fixed income, Man GLG Strategic Bond was the best performer with a return of 11.8%. Fidelity Sterling Corporate Bond and JPM Sterling Corporate Bond also delivered satisfactory returns, rising 10.1% and 9.4%, respectively. The remaining Strategic Bonds delivered high single digits returns. Having delivered a return of nearly 14% for the year up to the start of October, Vanguard UK Government Bond Index fell back sharply as yields rose, to deliver a return for the year of 7.5%.

SANLAM ACCEL INCOME FUND (CONTINUED)

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The Fund has fallen -16.53% over the first quarter of 2020. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Given the scale of the current crisis, we may not have reached the trough in global equity markets yet and it may be some time before we know the true cost to business and the overall economy. One thing is certain, we can expect continued volatility for the foreseeable future as a result. But eventually, a rebound will come.

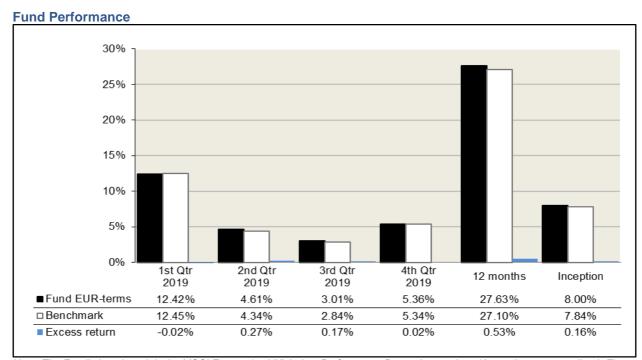

Investment Manager

Sanlam Investments UK Limited

SATRIX EUROPE (EX-UK) EQUITY TRACKER FUND

Investment Objective

The investment objective of the Satrix Europe (ex-UK) Equity Tracker Fund (the "Fund") is to provide capital growth equivalent to that gained from investment in the European equity markets, excluding the UK, by tracking the performance of the MSCI Europe (ex UK) Index.

Note: The Fund's benchmark is the MSCI Europe (ex UK) Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund deviated to the upside in 2019 against its benchmark, the MSCI Europe ex UK Index. Over the course of the year the Fund gained 27.63% in absolute terms, deviating from the benchmark by +0.53%. The strong absolute return for the Fund on the year was founded on four consecutive quarters of positive absolute performance, the strongest of which came in Q1 (12.42%) as the market rebounded from its Q4 2018 lows. In this quarter the Fund ended within two basis points of the benchmark, while larger deviations of +0.27% and +0.17% were seen in quarters two and three respectively. Since inception, the Fund has gained 8.00% on an annualised basis whilst deviating by only +0.16% from the benchmark.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI Europe ex UK Index dropped by -20.98% in the first quarter of 2020 with the Fund falling 19.91%. From its peak on 19 February through to 18 March, the index fell over 34%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

SATRIX EUROPE (EX-UK) EQUITY TRACKER FUND (CONTINUED)

Fund Outlook (continued)

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Investment Manager

Sanlam Investment Management (Pty) Limited

SATRIX EMERGING MARKETS EQUITY TRACKER FUND

Investment Objective

The investment objective of the Satrix Emerging Markets Equity Tracker Fund (the "Fund") is to provide capital growth equivalent to that gained from investment in the emerging equity markets by tracking the performance of the MSCI Emerging Markets Index.

Fund Performance

Note: The Fund's benchmark is the MSCI Emerging Markets Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

Considering the difficulties in tracking an emerging market index, the Fund performed fairly well as measured against the MSCI Emerging Markets Index. Over 2019 the Fund gained 18.00% in absolute terms, deviating from the benchmark by 44 basis points to the downside. The bulk of this deviation came in the first quarter of the year where the Fund deviated by -0.28% as the market rebounded from Q4 lows. Absolute returns were also strong in the final quarter of the year amid an easing in geopolitical tensions surrounding the trade war – the Fund gained 11.78% to deviate from the benchmark by -0.05%. Deviations of +0.08% and -0.15% were seen in Q2 and Q3 respectively. Since inception, the Fund and the benchmark have returned 3.39% and 3.76% annualised respectively.

Fund Outlook

With 2019 being a very good year for risk assets, there was a danger that 2020 would turn out to be a year where investors would extrapolate 2019 forward, while at the other extreme there was a risk that markets would pull back given the extent of their move upwards in 2019. We initially held the view that the most likely outcome for markets in 2020 would sit somewhere between these two extreme views, with, in our view, a slightly constructive bias. Emerging markets demonstrated over the course of 2019 their tendency to move in lockstep with political and economic developments both in the developed and emerging world. As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020, including that for emerging markets. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI Emerging Markets Index dropped by -23.60% in the first quarter of 2020 with the Fund falling -23.50%. From its peak on 12 February through to 23 March, the index fell over 31%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

SATRIX EMERGING MARKETS EQUITY TRACKER FUND (CONTINUED)

Fund Outlook (continued)

Emerging markets face several key risks, any one of which could lead to more volatility:

- Investors could flee, reversing the \$310 billion in inflows the asset class enjoyed in 2018.
- Global supply chains could collapse, leading to continued and more widespread trade uncertainty than that caused by the US-China trade war.
- The oil shock could continue for an extended period of time, putting a heavy fiscal strain on commodity exporters.
- Sharp currency depreciation could begin to weigh on countries with large amounts of debt denominated in US dollars.
- The virus could prove difficult to control and strain healthcare systems in some or all emerging market countries, potentially leading to political consequences for incumbent governments.

We have already seen governments and central banks in emerging markets taking serious steps to fight the economic impact. If the spread of the virus is contained in relatively short order, a credible recovery is possible.

Investment Manager

Sanlam Investment Management (Pty) Limited

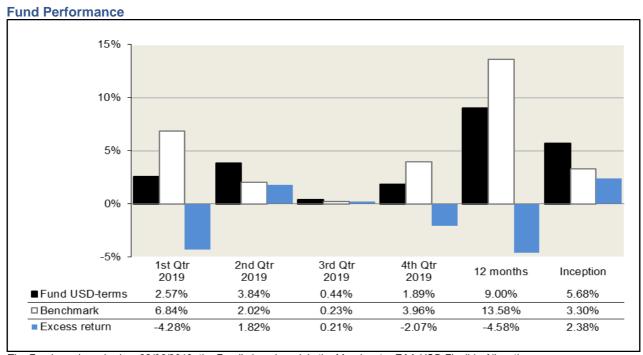

SANLAM AI GLOBAL MANAGED RISK FUND

Investment Objective

The investment objective of the Sanlam Al Global Managed Risk Fund (the "Fund") is to provide long term capital growth through exposure to world equity markets. The Fund was previously known as Sanlam Managed Risk Fund but changed its name in November 2019.

The Fund seeks to achieve its investment objective by investing in the shares of the Satrix World Equity Tracker Fund (the "Master Fund") a sub-fund of the Company. The Fund will invest no less than 85% of its Net Asset Value in the shares of the Master Fund.

The Fund also utilises an Artificial Intelligence ("AI") supported risk management strategy designed to minimise capital loss and time in loss. Time in loss is a measurement of risk and refers to the period of time from the start of a drawdown in the Fund's Net Asset Value ("NAV") to the point by which the NAV has recovered and exceeds the previous peak NAV. This AI supported risk overlay is implemented by the Investment Manager, through the use of financial derivative instruments to adjust the net equity exposure of the Fund to the global equities underlying the Master Fund depending on the prevailing market conditions. Although this strategy intends to minimise market risk it does mean that in rising markets the Fund will not rise to the same degree as the Master Fund as the Fund will always carry some degree of effective short exposure.

The Fund was launched on 28/06/2013, the Fund's benchmark is the Morningstar EAA USD Flexible Allocation. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

In 2019, the Fund produced a positive return of 9.00%, whilst its comparative benchmark had a return of 13.58%, a relative underperformance of -4.58%.

Despite the year's volatility on trade concerns and uncertainty about the future trajectory of interest rates and the global economy, markets were strong across the board in 2019.

The Fund kept up with major market movements and avoided the deeper losses in May and August. The reason for this is that the AI technology deployed continuously learns from new data, autonomously adapting and adjusting to signals as markets evolve.

Since inception, the Fund's volatility is 25% lower than an investment in the underlying index tracker Master Fund and the maximum drawdown is also lower by 13%.

The Fund ended the year with AUM of USD93.3M.

SANLAM MANAGED RISK FUND (CONTINUED)

Fund Outlook

The Fund's effective exposure to the Master Fund is a function of the Fund's risk management strategy which utilises signals from an Artificial Intelligence (AI) investment engine. The signals are driven by market data are a function of market conditions.

As noted in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity during Q1 2020 has materially changed the investment outlook.

The Master Fund tracks the performance of the MSCI World Index which fell by -21.05% in the first quarter of 2020. For the same period, the Fund was down -11.95%.

The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented. It's too soon to predict when a recovery will come and whether that recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Given the scale of the current crisis, we may not have reached the trough in global equity markets yet. But eventually, a rebound will come.

Through use of its AI supported risk management strategy, it is anticipated that over the long-term the Fund will "smoothen" the investment journey for shareholders, particularly in these volatile times, and provide better risk-adjusted returns over a market cycle.

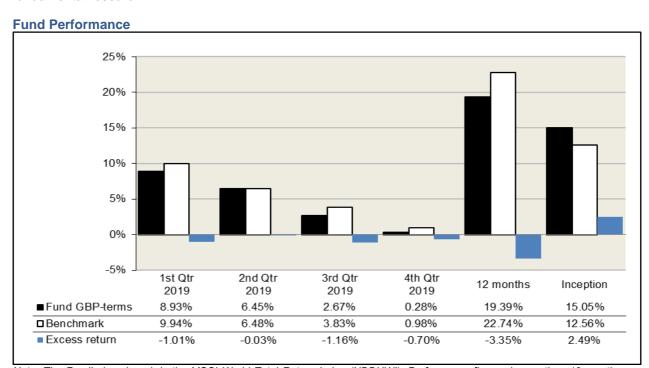

Investment Managers

Sanlam Investment Management (Pty) Ltd

SANLAM GLOBAL HIGH QUALITY FUND

Investment Objective

The investment objective of the Sanlam Global High Quality Fund (the "Fund") is to produce compounded total returns in excess of the MSCI World index over the medium to long-term, through a concentrated portfolio of high quality stocks, using our proprietary quantitative screening process combined with rigorous fundamental research.

Note: The Fund's benchmark is the MSCI World Total Return Index (NDDUWI). Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund has outperformed the market since inception with the net asset value increasing on an annualised basis by 15.05% (in GBP terms) compared to a gain of 12.56% for the comparative benchmark, the MSCI World Total Return Index. During 2019, the Fund underperformed the benchmark in GBP terms by -3.35%.

2019 was a year where it was easy to worry about macro concerns including Brexit, trade wars and slowing global growth. Yet markets rallied by 22.7 % in GBP terms and 27.7% in US\$ terms over the year, again led by the US market which returned 31.5% in US\$ on a total return basis making 2019 a stellar year for equities.

In 2019 we made a number of changes to positions in the portfolio. During Q1 we initiated a position in Bayer and exited our positions in Yum China, Moodys and Waters. In Q2, we initiated a position in Intercontinental Hotels Group, exciting NetEase. In the final quarter, we bought two new positions, ABI Inbev and General Dynamics whilst we exited our position in PepsiCo.

SANLAM GLOBAL HIGH QUALITY FUND (CONTINUED)

Fund Outlook

Just a few months into the year, 2020 has been dominated by the outbreak of the coronavirus pandemic. This event has evolved into an event the likes of which investors have not had to deal with before. With the level of globalisation and inter-connectivity of financial markets it has left investors an extreme lack of visibility on how to model and analyse asset prices .

The MSCI fell 15.54% in Sterling for the quarter which somewhat understates the extent of the pullback due to Sterling weakness. The speed and velocity of the sell off has been spectacular. Many shares have seen retracements of more than 30% in a few weeks. This was after markets had enjoyed a buoyant start to the year up until mid February.

As the virus outbreak continues to accelerate, revenues and cash flows are being meaningfully impacted and investors are coming to grips with the potential ramifications. The ability of some firms to service debt payments in addition to paying fixed costs like rent and staff wages is compromised when revenues fall. Investors are analysing and reassessing the impact on growth, appropriate valuations, and the impact on corporate balance sheets. Hence we are reminded again at times such as these why we always spend so much of our time on Balance Sheet strength in our assessment of companies.

On the positive side Central Banks and Treasury Departments around the world have been extremely quick and aggressive in how they have responded to this event. The size and scale of the stimulatory measures has been profound. Many of these actions are due to lessons well learnt by many in 2008. This should provide some stability to the initial impact of the massive drop-off in demand we will see in Q2. What is less clear is if we will be able to then grow off this more depleted base and if so at what pace.

There is a decent likelihood that that much of this panic is already priced into stock prices especially in certain cyclical areas of the market. Our focus remains to rather be patient and buy better quality businesses once we feel their valuations are attractive on a long term basis. The temptation is always to buy these lower quality businesses especially given that in the sell off the quality businesses didn't become that cheap. They also were quick to recover off the lows we saw, as many investors grappled to own these more durable businesses in a new and uncertain world.

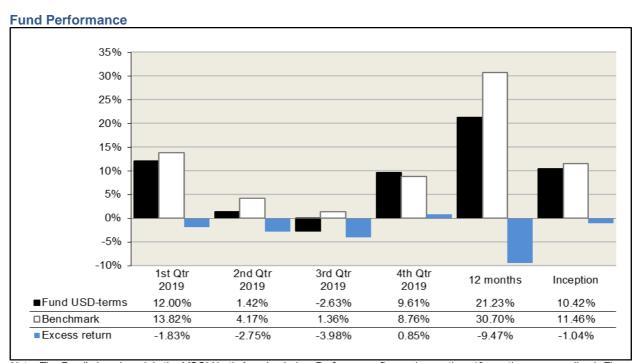

Investment Manager

Sanlam Private Investments (UK) Limited

SANLAM US DIVIDEND FUND

Investment Objective

The Sanlam US Dividend Fund (the "Fund") aims to target capital growth over the longer term, while providing a steady stream of income.

Note: The Fund's benchmark is the MSCI North America Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The US equity markets saw one of the best years on record, with a total return as measured by the MSCI North America Index of 30.70%. This equalled to an average of almost 2.5% per month. Markets advanced in 10 months out of 12, making it a steady advance. Only August and May witnessed declines. June acted as the best month, with a 7% advance. In the process markets naturally hit a new all-time high and broke several new valuation records.

The markets continued to be led by the growth style of investment however, with the technology sector continuing to lead the way and with a large margin. While the value style of investment had a good advance on an absolute basis, it continued to significantly lag behind the broader markets. The month of May and its sell-off was particularly damaging for value, as it lost more than 6% and went to extreme levels. This had followed an already heavy underperformance for value in April, when it lagged 1% behind growth in a month. Since the August sell-off, value slightly outperformed to year-end. However, the summer was one of the most underappreciated market environments ever witnessed by value.

The Fund advanced 21.23% over the period, an acceptable performance for the environment and one broadly in line with its dividend value style. Not being able to hold the market's mega-growth high-flyers was again the main culprit for the underperformance. However, the Fund had a number of stock selection successes, which enabled it to offer good performance despite the adverse environment: One of its largest holdings got acquired with a large premium, when online broker TD Ameritrade agreed to sell to rival Charles Schwab in an all stock deal. This saw our large holding return more than 50% in a short period of time. Elsewhere stock selection was generally profitable and names such as trust bank State Street or clothes designer Ralph Lauren also had strong returns, adding around 50% of performance on a re-rating driven by good results. The latter somehow also benefitted by fashion conglomerate LVMH's offer to acquire NYC icon Tiffany Corporation in November, with a 50% premium.

Currency was a slight positive over the year.

SANLAM US DIVIDEND FUND (CONTINUED)

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity during Q1 has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

Q1 2020 was one of the worst quarters in the history of markets with the most rapid decline ever witnessed - a unique achievement. We live in interesting and unprecedented times.

However, the circumstances have contrived to offer a once-in-a cycle, unique opportunity to scoop up dividend value cheaply in the US.

Exiting the quarter, the Fund was offering a 55% discount versus the markets on an earnings basis, now trading at 7.6 times versus 17.1. This was near record highs and rarely witnessed. The dividend yield was offered at 4.6%, versus 2.4% for the markets, or a 220bps differential. We believe this will be remembered as a great entry point offered for the Fund.

On other value metrics, such as cash flow or book value, the discounts were even wider being offered at 60%. Notably, on a price to sales basis the discount was even more attractive, having widened to as much as 70% again, following a rapid move over the last year from 70 to 60.

The massive discount versus the market, coupled with the major underperformance of style makes the Fund a highly attractive proposition in US equities, especially on a relative basis.

We therefore continue to focus all our efforts on identifying and investing in undervalued North American companies and providing investors the best risk-reward profile.

Investment Manager

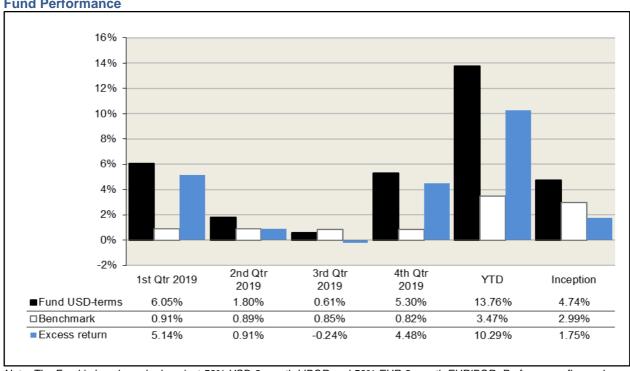

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

HIGH STREET GLOBAL BALANCED FUND

Investment Objective

The High Street Global Balanced Fund (the "Fund") aims to provide a high level of income and the potential for capital growth.

Note: The Fund is bench marked against 50% USD 3-month LIBOR and 50% EUR 3-month EURIBOR. Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

The first quarter of 2019 included a number of geo-political events which posed significant risks to the financial markets, notably Brexit and the US-China trade war. The absence of a trade deal before the 2nd March deadline would have led to an additional round of tariffs being implemented on 200 billion Dollars' worth of Chinese imports. Though we felt that a compromise was likely to be reached, the threat of substantial market declines if the trade war went ahead meant the Fund management team continued to adopt a cautious approach. Our holding of cash, and cash equivalents, stood at 32.7% - the highest level since the Fund launched. Complimenting this defensive strategy, we decided to utilise derivative instruments to hedge our equity downside.

Continued support from central banks continued to outweigh concerns related to slowing global growth, ongoing US-China trade negotiations and Brexit concerns. The US central bank (Fed) left short term interest rates unchanged and struck a dovish tone as they signalled rates to remain unchanged for the remainder of 2019. This was in stark contrast to December's forecast in which they saw two hikes for the year. Jobs data released for the month of February remained buoyant as unemployment remained near record lows with wage inflation coming through at healthy levels. We took the view that the US economy continued to be one of the shining lights in the global economy and so felt it was too early to call for an impending recession.

The European Central Bank (ECB) followed the Fed's tone with a promise to keep rates at historic lows for at least the rest of the year and slashed their 2019 eurozone growth forecast from 1.7% to 1.1%. Contrary to our stance on the US economy, years of monetary stimulus have failed to materially kickstart the eurozone economy and inflation remains well below target at 1%. We took the view that the eurozone faced structural problems that would increasingly manifest with populist movements across the continent. Consequently, we felt that economic stresses were likely to surface in Europe due to the vagrancies of each fiscal policy adopted in member states, and so could be a great risk hanging over financial markets.

HIGH STREET GLOBAL BALANCED FUND (CONTINUED)

Fund Performance (continued)

In the second quarter equity markets sold off sharply after it was announced that the US would be moving ahead with additional tariff increases on \$200bn of Chinese imports. In retaliation, China announced that they would in turn be increasing tariffs on \$60bn of US imports. Tensions escalated further towards the middle of the month when the US announced Huawei, a Chinese technology company, would be blacklisted on short notice. Further news flow out of Washington indicated that the official blacklisting date would be delayed by 90 days which would provide some, if not limited, time for US companies to restructure their supply chains. There was also concern about the economic weapons available to China should trade tensions continue escalating, namely their large holding of US bonds and their stranglehold on the supply of rare-earth metals. These materials are crucial in the production of high technology devices, used primarily in the defence and communications sectors. Any disruptions here could have had significant ramifications for US national defence amongst others.

As had been our stance since the beginning of the year, we felt a cautious approach was still justified and so we maintained our downside protection on the entirety of our equity exposure. This insurance did not come at a great expense to the fund as low prevailing volatility allowed us to purchase it at attractive levels. Due to the underlying mechanics of the instruments used in this strategy, resulting returns in a declining market would only increase as the instruments approached maturity towards the end of September. We felt that the trade war was still in its infancy and as a result we were happy with the downside protection we had in place for the fund. Additionally, our call options on the S&P 500 matured in-the-money and we profited from the position as markets continued their upward march. We decided not to roll these options as the market has had a great run and we feel significant short-term gains are unlikely.

The third quarter began with a tweet from the US President announcing his intention to impose a 10% tariff on the remaining USD 300bn of Chinese imports from the first of September. This caught the market by surprise as a sense of optimism had built following the recent resumption of trade talks between the two world economic powerhouses. Investor concerns, which were already heightened on the back of poor economic datapoints, increased and amplified the threat of an impending recession. This triggered a decline in world equities; safe havens soared and interest rates declined as investors sought the safety of bonds. Our property portfolio benefitted as rates play an important role in the pricing of these instruments. Unfortunately, our corporate bond portfolio didn't benefit to the same degree, as their duration is very low. However, we still enjoyed a relatively high yield of 3.8% from these positions which aided in reducing overall fund volatility. We used this opportunity to increase our exposure to Japan. The Japanese Yen was viewed as a safe haven and therefore likely to appreciate in value should the economic malaise persist or deteriorate further. Exposure was achieved through switching our stake in Alibaba for Softbank and purchasing a new position in Yahoo! Japan.

The final quarter of 2019 included the additional political risk of impeachment concerns in the United States, which joined the lingering issues surrounding trade negotiations and deteriorating global economic data points. President Donald Trump was accused of betraying his oath of office by seeking the Ukrainian President's assistance in re-opening a probe against Hunter Biden, the son of the pre-eminent Democratic candidate. It was claimed that this was in order to further his own interests in next year's national election. We took the view that the probability of impeachment was fairly low, given the fact that Republicans held 53/100 Senate seats at the time. As a result, we did not materially change the portfolio since it seemed very unlikely that 40% of Republicans would vote against Trump. Additionally, somewhat allaying these fears was the increasingly dovish monetary policy implemented by major central banks worldwide.

Our house view at year end was that we believed another surge in equity markets was unlikely and, with several lingering geopolitical risks on the horizon, we would continue our cautious positioning within the Fund. In doing so we positioned the Fund to participate in further market gains while mitigating against sharp downturns.

HIGH STREET GLOBAL BALANCED FUND (CONTINUED)

Fund Outlook

Going forwards, the Fund remains well-positioned to deliver on its mandate of providing a high level of income and the potential for capital growth, while also aiming to protect against downside risk. It continues to hold a high level of cash, which is intended to be deployed selectively upon finding value. Additionally, it continues to make use of derivative strategies to both increase yield and alleviate negative impacts on the Fund through hedging.

The main risk to achieving the Fund's objective in 2020 is the Covid-19 coronavirus pandemic, and its associated impacts on the heath of citizens, the global economy and financial markets. As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

Beyond that, other risks include tensions between Saudi Arabia and Russia in OPEC+, the rise of negative interest rates worldwide and the inability of central banks to cut rates further, and the outcome of the US Presidential election at the end of 2020.

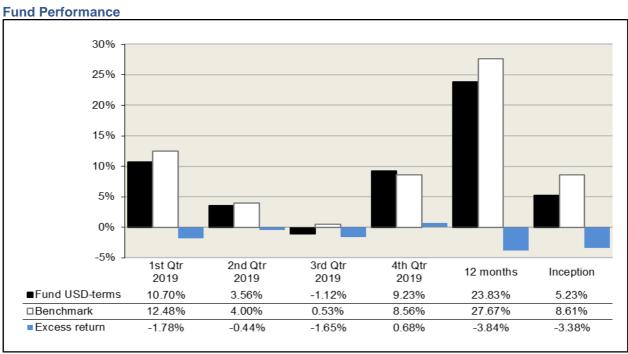

Investment Manager

High Street Asset Management (Pty) Limited

SANLAM GLOBAL VALUE FUND

Investment Objective

The Sanlam Global Value Fund (the "Fund") aims to deliver attractive real returns, and superior investment returns to the wider equity market over time. This goal is achieved by investing in a disciplined manner to buy strong companies (which generate above average cash returns on capital over an economic cycle), at times when they are out of favour in the market and trading at a significant discount to their intrinsic value. We focus our research on unloved and out of favour stocks. Our investment research focuses on the medium-term strengths and cash generation of these companies underlying business models, rather than trying to outguess near term results. Our time horizon in both assessing companies and intended holding period is measured in years rather than months or quarters. We maintain a strict valuation discipline to only buy shares at a significant discount to our estimate of the intrinsic value of future cash flow.

Note: The Fund is bench marked against MSCI World Index. Performance figures longer than 12 months are annualised. Figures are quoted net of Investment Manager and Manager fees.

The period under review can really be divided in two; the first quarter was run with the previous investment management team with April marking the transition to a new team structure. The new team imposed a more robust investment process, with a more de-risked stance leading to significant portfolio turnover over the next couple of quarters.

In USD terms the Fund gained almost 24%, delivering strong absolute returns, it did however lag the index by 3.8%. A large part of this under underperformance occurred in the first half of the year, where cyclical companies like Capri Holdings and Delphi Technologies detracted from performance on the back of market expectation of an economic slowdown combined with fears over the trading relationship with China. Additionally, our difficulty in owning the FAANGs on valuation grounds was detrimental to the Fund with Apple alone detracting in total up to 1.3%. The companies have strong cash flow profiles and dynamic market positions; however, unfortunately we have struggled to find a position for them on valuation grounds in this Fund.

The businesses we like to invest in display the virtue of being cheap for their opportunity set with good cash flow prospects. We have been the recipients of huge premiums on takeovers and strong performance from our companies that have indulged in spinoffs over the last year.

.

SANLAM GLOBAL VALUE FUND (CONTINUED)

Fund Performance (continued)

The Fund's main contributors to the performance over the year were Anadarko, Qorvo and Skyworks. The former was taken over by Occidental, and the remaining two are both involved with RF antenna components to speed along the 5G rollout. The free cash flow generation and growth runway of these companies is excellent, and we believe very strongly they will be key players in this market for the next decade as 5G proliferates and their technology (protected by patents) rewards them well.

The Fund's main detractors to the performance over the year were Dupont, Delphi and Cigna. Dupont has fallen throughout the year in spite of it offloading non-core assets and continuing to look at further sales which we are surprised about; we continue to be positive on the position. Delphi realised a near 60% premium to share price as a result of a takeover offer by BorgWarner which justified our view that the business was far too cheap for its outlook. Cigna has actually been over the year, however, our timing in selling the position was a problem.

New notable investments throughout the year were EXOR, Berkshire Hathaway, Delphi Technologies, American Express, Lloyds, Spirit AeroSystems, Heineken, Adecco, Heineken; while we exited our positions in Cigna, Societe Generale, BNP Paribas, Malaysia Airports, Airbus, ENI, Japan Tobacco, MS&AD and Gilead Sciences.

As patient, long term investors with a value bias we expect to hold stocks over a three to five-year period.

Fund Outlook

Going into 2020, the market was trading near all-time highs; from a valuation perspective the rolling 12m EV/EBITDA of 11.3x vs a range of between 11.1x and 6.9x from 2006 through to 2019 looked pricey as did the rolling 12m P/E ratio valued at 17.0x vs a range of between 15x and 16.9x between 2006 through to 2019. The spread of COVID-19 during the 1st quarter of 2020 and its impact on global economic activity however materially changed the investment outlook. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI World Index dropped by -21.05% in the first quarter of 2020 (with the Fund falling -26.66% over the same period). From its peak on 21 February through to 23 March, the index fell over 33.1%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. Emerging-market stocks fell by 19.1%. In China, however, signs of success in containing the virus helped reduce losses to 8.1%. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business. Given the scale of the current crisis, we may not have reached the trough in global equity markets yet. But eventually, a rebound will come.

Investment Manager

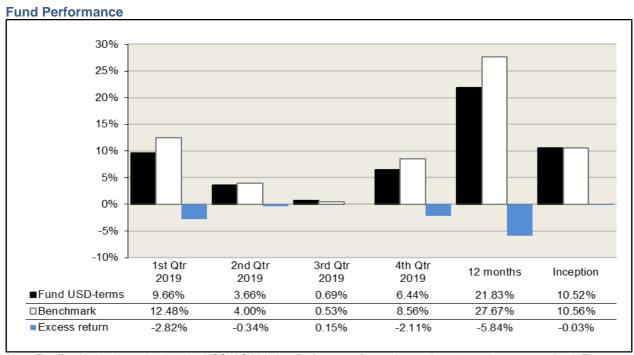

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

SANLAM STABLE GLOBAL FUND

Investment Objective

The Sanlam Stable Global Fund (the "Fund") aims to offer an attractive and differentiated investment proposition to clients. We aim to deliver attractive real returns, CPI+6%, comparable to the long run returns from equities, but with significantly less volatility and lower downside risks than the wider equity market.

These goals are achieved by a portfolio that is focused solely on cash generative, non-cyclical companies. Only 30-35% of the market will meet these criteria. These are approached with a highly disciplined approach to valuation, purchasing these stocks only at prices which will allow us to achieve return objectives. This combination creates a portfolio, which is intended to provide resilience during tougher economic and stock market periods, whilst remaining invested to deliver strong long run returns.

Note: The Fund is bench marked against MSCI ACWI Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The period under review can really be divided in two; the first quarter was run with the previous investment team while April marked the transition to a new team structure. The new team imposed a more robust investment process, with a more de-risked stance leading to significant portfolio turnover over the next couple of quarters.

In USD terms the Fund gained almost 22%, delivering strong absolute returns, it did however lag the broader equity market by just over 4.0%. a large part of this under underperformance occurred in the first half of the year, where cyclical companies like Capri Holdings and Delphi Technologies detracted from performance on the back of market expectation of an economic slowdown combined with fears over the trading relationship with China.

Additionally, our difficulty in owning the FAANGs on valuation grounds was detrimental to the Fund with Apple alone detracting adding up to 1.3%. The companies have strong cash flow profiles and dynamic market positions; however, unfortunately we struggled to find a position for them on valuation grounds in this Fund.

In a market driven by cyclical companies like Industrials, the Fund performed admirably, delivering strong positive absolute returns (+14.3%), while beating its CPI+6% official benchmark, significantly outperforming the Value Index, but lagging the broader equity market by just over 2%.

SANLAM STABLE GLOBAL FUND (CONTINUED)

Fund Performance (continued)

In the first quarter of the year the Fund was significantly held back by our overweight in Tobacco and Healthcare companies. Imperial Brands, Japan Tobacco and British American Tobacco all underperformed on the back of regulatory pressure on combustibles as well as limited traction in NGPs for all three companies. Healthcare companies like Cigna and UnitedHealth also detracted from performance in reaction to the political risks posed by the manifestos of the US democratic party candidates to the presidency.

Conversely, eBay, Aon, Microsoft, Oracle, Danone, Allergan, WPP, Berkshire Hathaway and Heineken, all delivered tremendous returns, with most names rising between 30% and 40%. Allergan in particular was approached by AbbVie in June causing the stock to jump 40%, making this position one of the largest contributors to performance.

WPP, which performed well over the year up by c.25% in GBP, agreed the sale of its highly valuable Kantar business to private equity investors for an estimated \$4bn.

In this period we explicitly decided to reduce our overweight to Tobacco companies because while the sector is prima facie cheap, our exposure to three tobacco names was not needed. Consequently, we sold out of Japan Tobacco at the mid-year point which was down ~15% in USD terms against the broader market up almost 25%. We concentrated our position in BATS which was up ~40% in USD over the year beating the benchmark. New notable investments during the year to 31 December 2019 included Heineken, Berkshire Hathaway and Corteva.

Fund Outlook

In January 2020, the Board of Directors of the Fund resolved that it was in the best interests of the shareholders of the Fund to terminate the Fund in accordance with the Company's memorandum and articles of association and notified investors of their decision.

With effect from 14th April 2020, all trading in the Fund ceased and the Fund closed. The Company automatically repurchased all remaining Shares in the Fund as at that date and the net proceeds were distributed amongst Shareholders in accordance with their respective shareholdings.

Investment Manager

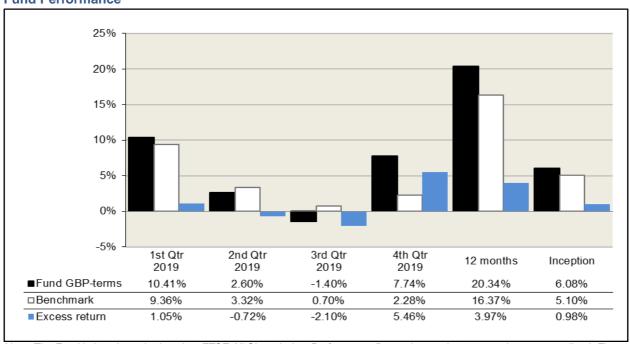

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

SANLAM ACTIVE UK FUND

Investment Objective

The Sanlam Active UK Fund (the "Fund") aims to target capital growth over the longer-term.

Fund Performance

Note: The Fund is bench marked against FTSE All Share Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

Helped by the depressed levels pertaining at the end of 2018, 2019 proved to be a strong year for equity markets and, notwithstanding Brexit uncertainty throughout the period, UK equities participated fully in this rally. The gains came predominantly in the first and last quarters, punctuated by a consolidation period of market jitters in between. The rally in the first quarter was driven by the changed outlook for US interest rates as the Fed acknowledged that that monetary stimulus was required to head off the risk of recession in the face of slower economic growth.

Throughout the year the main threat clouding global growth prospects was the continuing trade war between the US and China. Manufacturing thus bore the brunt of the economic slowdown as companies have postponed capital investment plans and global trade has weakened. The UK market has, of course, also been impacted by political developments along the tortuous path towards Brexit, culminating in the resounding victory for Boris Johnson in the December general election.

The fourth quarter rally was driven by growing anticipation of a US-China trade deal and continuing monetary stimulus together helping to foster a more "risk-on" investor sentiment and hopes for economic recovery in 2020. UK equities additionally benefitted from the resolution of political uncertainty and an acceptance that we would finally "get Brexit done".

The Active UK Fund performed well in 2019 and outperformed the MSCI UK index benchmark by a healthy margin. Sector allocation and stock selection contributed equally. Sector-wise, an overweight stance in consumer discretionary stocks helped, along with an underweight exposure to the lagging oil sector, while stock selection was particularly strong in the materials and financials groups. Individual stocks worthy of note for their positive contribution were Howden Joinery, Taylor Wimpey, Integrafin and Flutter Entertainment, while a new position in Rolls Royce was the main detractor.

SANLAM ACTIVE UK FUND (CONTINUED)

Fund Performance (continued)

Investment activity in the period was focussed on increasing exposure to high quality business and in so doing, focussing the portfolio into fewer, high conviction positions. Three new holdings were acquired in the year, all in the first half, these being Rolls Royce, Intercontinental Hotels Group and AstraZeneca. We also increased our investment in Taylor Wimpey, Unilever, Intercontinental Hotels and Lloyds Banking. In contrast, we sold holdings in more volatile businesses such as ITV and Tui, and several smaller companies deemed to be higher risk, including, amongst others, Crest Nicholson, Sophos, Kenmare Resources, Hipgnosis Songs, IQE, Wood Group and Micro Focus.

Fund Outlook

Ever since the Brexit referendum in June 2016, companies in the UK have faced a period of uncertainty, hampering business investment and corporate planning. With the strong working majority now secured for the Conservatives for the next five years, 2020 brought the potential for an acceleration in investment in the UK by business as well as by government.

News of the coronavirus epidemic in Wuhan in central China was unnerving, but investors initially assumed that it would be contained, helped by the seemingly draconian measures put in place by the Chinese authorities. All this changed dramatically for the worse when the virus took hold in northern Italy, and then suddenly it seemed to be everywhere. In late February the penny dropped and investor complacency quickly turned to panic.

The ensuing collapse in equity prices certainly ranks amongst the most rapid and extreme descent into a bear market of any in history. As more countries put most of their economies into lock-down in order to contain the pandemic it quickly became obvious that the world was facing a deep recession on a magnitude not seen since the Great Depression. Fortunately governments immediately recognised this risk and put in place a commensurately unprecedented level of economic support, deploying a wide array of both monetary and fiscal spending measures.

No equity market has been spared in this collapse, but some sectors have proven to be predictably resilient (such as food retailing, consumer staples and healthcare), whilst the most exposed have been travel related businesses such as hotels and airlines. Financials were hit hard as the fall in asset values of everything apart from government bonds and gold will put pressure on capital and solvency levels at banks and insurance companies. In addition, a collapse in oil prices as slumping demand prompted a price war, impacted the shares oil exploration and production businesses.

Given the uncertain length of this health and economic crisis most companies are hoarding whatever cash they have, even to the extent of withholding contractual payments to suppliers and landlords. For many this has become a desperate fight for survival and share prices have become a barometer of how long a particular business can hang on, notwithstanding the government support and expected leniency from bankers.

It is welcome news to see some return to normality in China, and there are tentative signs that the death rates in some badly affected countries, such as Italy, are starting to recede. Equities will rally sustainably only once the virus is beaten. We might see some false dawns in this regard, but ultimately this crisis will pass. The shape and extent of market recovery will then reflect the speed with which economies gradually get back to normal. But the new normal will be different. Government debt will be significantly higher and spending behaviour will be more cautious across all sectors of the economy. A U shaped recovery is probably the best we should hope for.

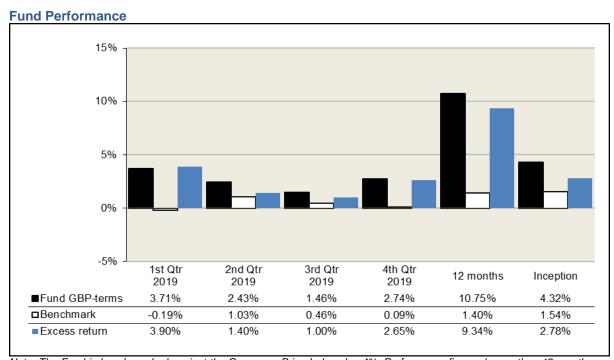

Investment Manager

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

SANLAM MULTI-STRATEGY FUND

Investment Objective

The Sanlam Multi-Strategy Fund (the "Fund") aims to seek to outperform the Consumer Price Index by 4% per annum over five-year periods with a target of generating a positive absolute return on a rolling three year basis.

Note: The Fund is bench marked against the Consumer Price Index plus 4%. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

2019 produced positive returns for the Fund across most asset classes, but not without significant volatility. Markets were skewed by QE policies heavily influenced by government and government agencies with mixed messages from equity and bond markets. Equity investors continue to climb the wall of worry as the longest Bull Run in history continued with the overall environment remaining supportive whilst volatility and a long overdue correction lurking around every corner.

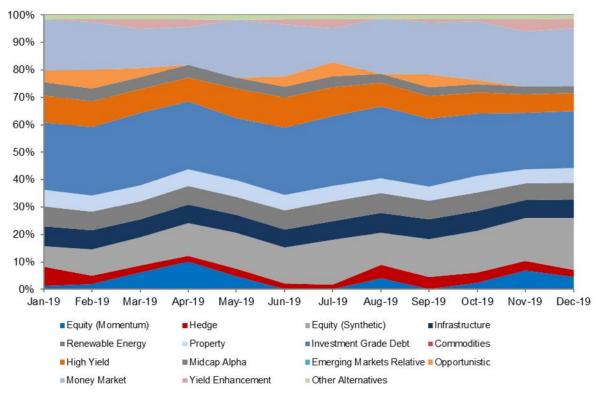

In December, the British voting public re-elected Boris Johnson as prime minister of the UK. This handed him a firm mandate to get on with Brexit and to provide visibility regarding the structure and timings of the UK's withdrawal from the EU and the shape that any future trade deals might look like. Continuing protests in Hong Kong kept the Hang Seng volatile during the latter half of the year, but the market was lifted by the easing tensions and optimism that an initial trade deal will be signed between China and the US.

Against this volatile backdrop the Multi Strategy Fund returned +10.75% over the year and 90 day volatility ranged from 3.5% at the start of the year to 2.8% at year end. Top contributors were synthetic equity, renewables, investment grade debt, property, infrastructure and high yield debt. The hedge positions contributed negatively during the year. Running into the election in mid-December, inflows were used to build up the cash position and reset our hedge positions to mitigate a negative outcome. Post-election, we deployed capital selectively into real asset and fixed income names.

The table on the next page illustrates the changes to the asset allocation during 2019.

SANLAM MULTI-STRATEGY FUND (CONTINUED)

Fund Performance (continued)

Source: Sanlam Investments UK Limited

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

For the 3 month period to March 2020, the Fund fell -6.65%. There were very few places to hide and even having moved to a defensive mode going into 2020, the Fund saw losses in synthetic equity, infrastructure, renewables, property, investment grade debt, high yield bonds, other alternatives and midcap alpha.

It is too early to call the bottom, however whilst we do not know the extent and duration of the coming recession, we do know that events such as this do not last forever and as investors we should be looking for entry points and buying opportunities. Within the Multi Strategy Fund, we continue to hold a defensive stance but we maintain upside exposure through equity index options (rather than pure directional investments) alongside long-life income producing real assets and short duration bonds.

Investment Manager

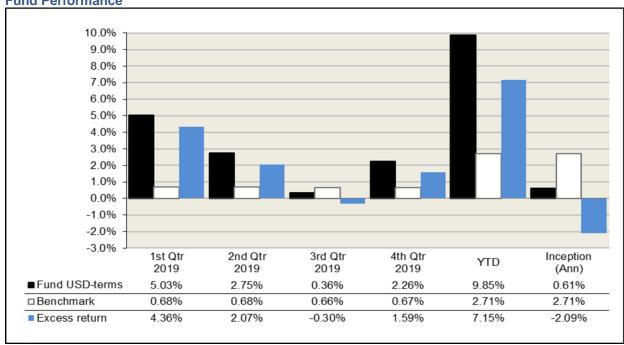

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

ANCHOR GLOBAL STABLE FUND

Investment Objective

The Anchor Global Stable Fund (the "Fund") aims to provide capital growth over the long-term.

Note: The Fund is bench marked against average CPI of G7 countries + 1.5% p.a. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The year started well for the Fund as risk assets bounced back hard from the collapse at the end of 2018 as central banks in the US and EU stopped their quantitative tightening much to the relief of the markets. The year also ended well with global central banks all announcing various forms of quantitative and monetary easing to extend economic growth which was wobbling at the prospect of trade wars. The year end also saw some easing of trade tensions and a market friendly outcome in the UK elections.

The Fund did well across asset classes during 2019 as the liquidity injection supported all asset classes the fund invests in. The Fund also benefitted from being conservatively positioned going into 2019 and was therefore able to add risk timeously in the first quarter. More than 50% of the Fund's year to date return of 9.85% came from equities in 2019, but it was a year in which all asset classes delivered positive returns.

ANCHOR GLOBAL STABLE FUND (CONTINUED)

Fund Outlook

We used some large inflows towards the end of the year to rebalance the Fund and trim risk, leaving the equity component towards the lower end of its usual 20 - 30% range as valuations climbed towards the high end of normal. We also trimmed duration and left the Fund primarily exposed to liquid investment grade credit.

This has served the Fund well in the recent collapse in asset prices due to the outbreak of coronavirus. As noted in the in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented. While we're hopeful that we'll get a short sharp recovery in both economic activity and asset prices once we're through the worst of the restrictions on movement and activity, we not ready to act to make meaningful changes to the asset allocation, preferring to remain conservatively positioned until uncertainty diminishes.

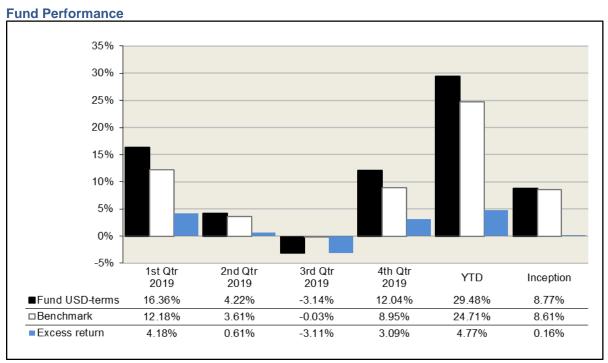

Investment Manager

Anchor Capital (Pty) Limited

ANCHOR GLOBAL EQUITY FUND

Investment Objective

The Anchor Global Equity Fund (the "Fund") aims to provide capital growth over the long-term.

Note: The Fund is bench marked against MSCI World All Country Total Return Net USD Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Anchor Global Equity Fund rose 29.48% in 2019. The largest contributors to alpha during the year were Facebook, Sea, MasterCard, Nintendo and Alibaba. The biggest detractors were Etsy, Charles Schwab, Zozo, Netflix and Illumina. During the year, we successfully topped up several positions in periods of weakness (including Alibaba, Ryanair, Sea and Spotify) which ultimately contributed positively to performance. Several of our large capitalisation shares rewarded our patience by resuming their march higher after several quarters of lacklustre performance.

Fund Outlook

Global markets are in the grip of a coronavirus-induced panic. Notwithstanding the enormous short term impact of social distancing and wide-spread temporary business closures in the service sector (most notably retailers and restaurants) countries like China and South Korea have shown a path to containment and an eventual resumption of activity. Policymakers have announced steadily increasing monetary and fiscal medicine to mitigate the economic side effects of the pandemic. The market is already discounting a significant permanent impairment in corporate earnings, while the far greater likelihood is that any damage is short-lived. Of course, there is always a risk that the situation gets worse before it gets better, in terms of the spread of the virus and its knock-on effects for the economy and markets. Nonetheless, our holdings' valuations (and as a result, prospective returns) appear particularly attractive. Coupled with our expectation that most of our companies will emerge from the crisis stronger than ever, we see every reason to be bullish on the outlook on a multi-year horizon.

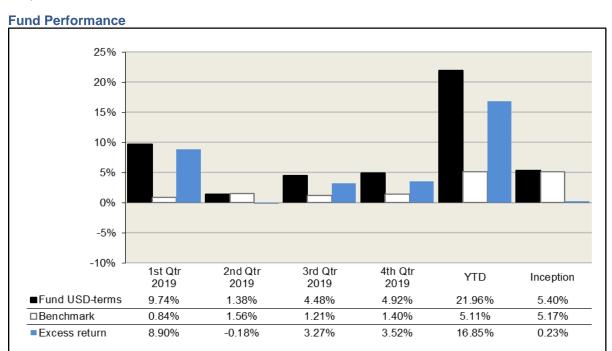

Investment Manager

Anchor Capital (Pty) Limited

BRIDGE GLOBAL MANAGED GROWTH FUND

Investment Objective

The Bridge Global Managed Growth Fund (the "Fund") aims to seek income and moderate capital growth over the long-term. Income (which will be reinvested in the portfolio) will be a key component of the portfolio return.

Note: The Fund is benchmarked against US Consumer Price Index plus 3%. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

During 2019 the headwinds were strong across the global landscape, including a weak global economy, anaemic manufacturing output, flat to negative corporate earnings and US yield curve inversion. The ongoing trade war between the US and China, together with elevated geopolitical risks also increased the medium-term recession risk during 2019.

The year was also characterised by increased social and political unrest. In September, Saudi Arabia's oil and refining facilities were attacked, leading to a spike in global oil prices. Anti-government demonstrations were commonplace across the globe, with citizens protesting various forms of taxation, human rights and corruption. The protests in Hong Kong gained the most coverage.

The US Federal Reserve ended 2018 with fairly hawkish commentary, which saw equity markets decline significantly in Q4'18. In January, they did a complete U-turn and noted that they were reviewing their balance sheet reduction programme. In the following months, due to weakening economic data, the Fed cut US interest rates by 25bps on three occasions. During December, the US House of Representatives impeached President Trump, but US equity markets continued to hit new highs.

Despite all the headwinds, US equities delivered their best year since 2013, driven by a resilient consumer and a dovish US Federal Reserve (lower interest rates). The S&P 500 index produced a total return of +31.5% for 2019, after strong returns from three sectors: technology (+48.0%), communications (+30.9%) and financials (+29.2%). The MSCI World Index (USD) produced a similar total return of +27.7%. Global listed property prices also rose significantly in 2019, on the back of lower interest rates and falling long bond yields. The GPR 250 REIT delivered a total return of 24.3%.

The Fund advanced by 4.92% in the fourth quarter, in line with global equity and property prices, and finished the year up 21.96%. The annual performance was helped by allocations to listed property, consumer staples, technology and healthcare companies. All the other sectors also contributed positively to the Fund's annual return. The Fund only had two constituents that negatively detracted from performance, Simon Property and Imperial Brands. As the Fund's benchmark is inflation and not market-linked, the Fund outperformed its benchmark by 16.85% for the year.

BRIDGE GLOBAL MANAGED GROWTH FUND (CONTINUED)

Fund Outlook

The fourth quarter of 2019 ended with a more positive bias as the United States and China agreed the first phase of a trade deal and in the United Kingdom, Prime Minister Boris Johnson's Conservative Party won a landslide in the general election, paving the way for the UK to exit the European Union on 31 January 2020. The global political uncertainty that undermined business confidence and investment throughout most of 2019 gave way to a more optimistic outlook for 2020. However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed that investment outlook.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. At present it's too early to call the bottom. The market is digesting the impact of the COVID-19 virus on the economy against the huge global stimulus announced by governments around the world and the outcome will ultimately effect the depth and the duration of the coming recession. We are mindful that events like these do not last forever and as investors we should be looking for entry points and buying opportunities.

The Fund continues to allocate 65% of the portfolio to high quality businesses that are expected to deliver inflation-beating earnings growth over the medium and long term and reward shareholders with above-average dividend yields. The Fund also allocates 25% of the portfolio to listed property companies that offer the highest possible combination of income yield and income growth, while at the same time providing an acceptable level of property and geographic diversification. The balance of the portfolio comprises short and medium-dated government and corporate debt. As a result, the Fund is expected to exhibit lower price volatility in the short-term, without compromising the potential to deliver on the Fund's long-term objective of providing returns in excess of US CPI+3%.

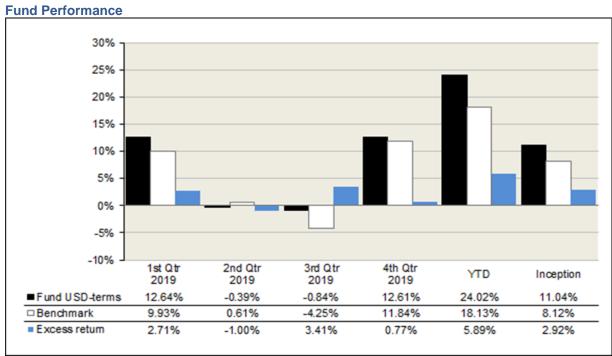

Investment Manager

Bridge Fund Managers (Pty) Limited

DENKER GLOBAL EMERGING MARKETS FUND

Investment Objective

The Denker Global Emerging Markets Fund (the "Fund") strives to provide long-term capital growth in excess of the MSCI Emerging Market Index by investing in emerging and frontier market equities that the investment manager has identified as being undervalued and offering potential for above average share price appreciation on a rolling three year basis.

Note: The Fund's benchmark is the MSCI Emerging Markets Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

In 2019, Global equities enjoyed the fourth best calendar-year return on record. All major regions and sectors contributed positively while the US market (31% return) was the star performer for the year. Emerging Markets (EM) was up 18.6% on a total return basis and was one of the laggards globally. Within EM, the top performing country was Russia, outperforming the Index by 26% and the worst performing market was Argentina, underperforming the EM Index by 37%. Pleasingly, the Fund was up 24.02% for the year, not far behind Global Equities and 5.89% ahead of the MSCI Emerging Market Index. The Fund was rated top quartile for the year according to Morningstar ratings.

Emerging Markets rose strongly in the first quarter, increasing by almost 10%, but lost track over the next two quarters as investor risk appetite was tempered by the escalation of trade tensions between the US and China. However, EMs sprung back to life in the last quarter (11.84%) due to positive developments on the trade front along with global monetary easing. On a sectoral basis, all EM sectors advanced over the course of the year, led by some of the underperformers of 2018, namely Information Tech (37.6%), Consumer Discretionary (34.0%) and Real Estate (18.7%). Materials (2.3%) and Health Care (2.7%) languished at the bottom of the table.

There were a number of changes to the Portfolio in the second half of 2019 that contributed handsomely to the outperformance namely Qualicorp, China Medical Systems, Aspen Pharmacare and Woogjin Coway to name a few. A number of positions were excited due to structural issues in the Industry (Matahari Dept. stores) and company specific issues (Yes Bank). In December new positions were added to Unilever Global, Garanti Bank and Resolute Mining. All of these business provide significant margin of safety relative to our assessment of fair value and tick all the right boxes in terms of Quality (FCF yield, ROE, Balance Sheet strength) and excellent corporate governance.

DENKER GLOBAL EMERGING MARKETS FUND (CONTINUED)

Fund Performance (continued)

Major detractors for the year included Matahari Department Stores, a retailer in Indonesia, Yes Bank who provide banking services for both Corporate and Retail clients in India and Noah Holdings, a wealth management business in China. Our bottom up thesis on Noah highlights a major dislocation in the long term fundamental value of the businesses vs. the current share price and we remain comfortable holding a sizable position in the company. We sold out of our position in Yes Bank and Matahari in the second half of the year to fund better ideas in the portfolio.

Our top contributors in the Fund were Vipshop, an online retail platform in China, a food retailer in Russia called X5, a Dental Insurance provider in Brazil, Qualicorp and a gaming company in China called Netease. Other notable contributions came from Aspen Pharmacare and China Medical Systems. We have started taking profits on a number of these shares to fund new ideas but still remain shareholders in all of the above contributors.

Fund Outlook

Going into 2020, Global risk was at elevated levels and was starting to undermine investor sentiment post the recent Middle East tension between US and Iran. Recent data provided by JP Morgan on Global PMI's highlighted a world moving into a contraction phase which prompted monetary authorities in key Global regions like the US, Japan, EU and China to pump further liquidity into the market. The US was particularly aggressive towards the end of 2019.

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The MSCI World Index dropped by -21.05% in the first quarter of 2020. From its peak on 21 February through to 23 March, the index fell over 33.1%, before recouping some losses later that month after the US Congress passed a \$2 trillion stimulus bill. Emerging-market stocks fell by 19.1%. In China, however, signs of success in containing the virus helped reduce losses to 8.1%. While no sector was spared in the global sell-off, energy stocks and financials were hardest hit.

Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households.

We don't know when the markets will recover. It's also too soon to say whether a recovery will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business and what implications that may have for emerging markets. Given the scale of the current crisis, we may not have reached the trough in global equity markets yet. But eventually, a rebound will come.

Interestingly, in these tough times we find some of the best long term investment opportunities in high quality business models with deep moats.

Investment Manager

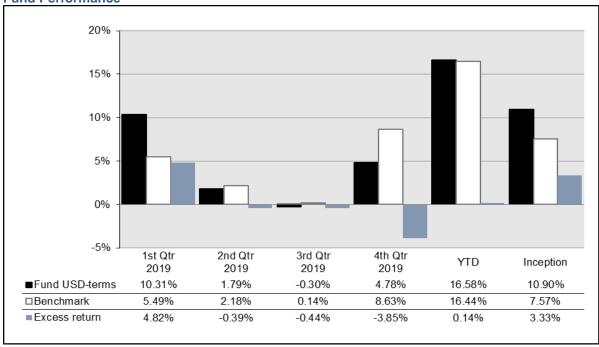

Denker Capital (Pty) Limited

ABSA AFRICA EQUITY FUND

Investment Objective

The ABSA Africa Equity Fund (the "Fund") aims to provide long-term capital growth through exposure to African equity securities by investing in equity securities listed on recognised stock exchanges across the African continent as well as equities that may be listed and/or traded in recognised exchanges outside of Africa.

Fund Performance

The Fund measures its performance relative to a benchmark index, the MSCI EFM Africa (Ex-South Africa) for reference or investor communication purposes, including in the Company's annual and half-yearly reports. However, the performance of the Fund relative to the Benchmark Index is not factored in any way into the investment process and the Fund does not operate any form of target to outperform the Benchmark Index.

Note: The Fund is bench marked against the MSCI Africa ex South Africa Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

In terms of African markets, the first half of 2019 was a mixed bag for the Fund. In US Dollar terms, Kenya was up 6.1%, Nigeria down -3.7% and Morocco down -1.2%. The standout outperformer was the Egyptian market which once again showed the benefits of diversification within the asset class with the market up 16.0% to the end of June 2019. The MSCI EFM Africa ex-South Africa benchmark was up in 1H19 by 7.67% in USD terms. The Fund was up 12.10% over the same period, a relative outperformance of 4.43%.

The second half of 2019 saw broadly positive moves in African markets with the exception of Nigeria. Kenya saw a massive rally of 12.32% in USD, Morocco was also very strong, rallying 8.14%. Egypt's rally was more moderate at 3.02% after its standout performance during the first half whilst Nigeria's falls continued during the second half of the year which saw a severe decline of -11.59%. The MSCI EFM Africa ex South Africa benchmark was up 16.44% for the year in USD. The Fund was up 16.58% over the same period, marginally outperforming the benchmark by just 0.14%.

ABSA AFRICA EQUITY FUND (CONTINUED)

Fund Outlook

Going into 2020, we expected the broad Egyptian market to take the lead in performance in the first half of 2020. This was partly driven by lower interest rates in that market, spurred by lower inflation prints and an improving domestic and external balances. We also expected Kenya and Nigerian markets to be stock picking markets with no major market-wide catalysts while Morocco would remain a defensive place to hide.

However, as set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

The Fund's benchmark dropped by -27.68% in the first quarter of 2020 with the Fund falling -24.65%. Like elsewhere, the lockdowns accompanying COVID-19 and the expected contraction in global output in 2020 weigh heavily on the growth outlook for African markets. The actual out turn will depend upon the speed with which the outbreak is contained in the key markets and economic activity returns to normalcy.

Even with much turmoil and volatility, we remain optimistic that long term investors will experience positive risk adjusted returns by investing in African assets ex-South Africa. However, we feel that more than ever investors must be very discerning in which asset classes, companies, and to a certain extent which countries they are invested in.

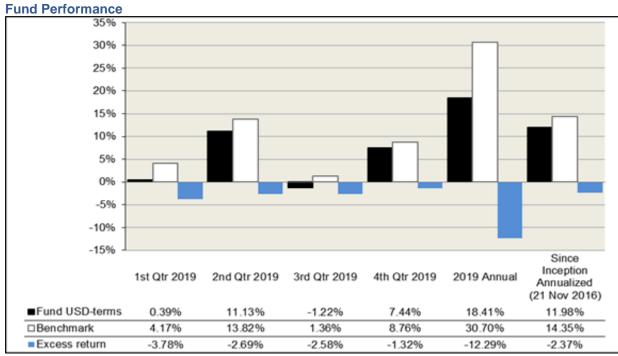

Investment Manager

Absa Asset Management (Pty) Limited

SANLAM CENTRE AMERICAN SELECT EQUITY FUND

Investment Objective

The Sanlam Centre American Select Equity Fund (the "Fund") aims to achieve long-term capital growth.

Note: The Fund is bench marked against MSCI North America Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

In what was one of the best years on record in US equity markets, the Fund disappointed with a return of 18.41% versus the benchmark MSCI North America Index return of 30.7%, a relative underperformance of -12.29%. Since inception and on an annualised basis, the Fund is -2.37% behind its benchmark.

The Investment Manager focuses on each individual portfolio company's growth outlook and capacity to create shareholder value, utilizing a bottom-up fundamental stock selection process and considers valuation or the price one pays at purchase as the most critical element of successful investment. Unfortunately, a value style of investing lagged in such a strongly advancing market environment which, combined with our defensive positioning of the portfolio in expectation of a US recession due to the slowdown in industry, resulted in the Fund underperforming the market for 2019.

Fund Outlook

Going into 2020, we remained disciplined and concentrated the portfolio in our best investments; continuing to utilize hedges and other capital protective strategies (e.g., put options) when deemed appropriate in the belief that our pragmatic, large-capitalization, valuation-sensitive, growth and concentrated, high-conviction approach to stock selection, with a cognisance of risk management that includes tactically implementing capital protective investments, seems positioned to perform well relative to less risk aware strategies.

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity materially changed the investment outlook for 2020, with Q1 seeing the US markets experience one of their worst quarters in history, losing more than 20%. Markets had enjoyed a strong start to the year, adding 5% in January and continuing to rise up higher until over half way through the quarter, or 19th February, before a massive sell-off hit the markets. The decline has now gone down in history as the fastest decline/correction ever.

SANLAM CENTRE AMERICAN SELECT EQUITY FUND (CONTINUED)

Fund Outlook (continued)

In such an environment, there were very few place to hide, even being positioned defensively. The Fund lost -12.31% over the first quarter which although still a loss, compares favourably with the benckmark that lost -20.16%.

Government action to date, including the US Congress passing a \$2 trillion stimulus bill, has been to mitigate the damage to household and corporate balance sheets. The speed and size of the fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. It's too soon to say when a recovery will come and whether it will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business.

Centre Asset Management, LLC

SANLAM GLOBAL CONVERTIBLE SECURITIES FUND

Investment Objective

The investment objective of the Sanlam Global Convertible Securities Fund (the "Fund") is to provide global equity-like returns with significantly less risk. The objective is achieved by seeking to capture the majority of stock market advances while simultaneously providing downside protection during market declines. Statistical focus on convertible structure is used to create a balanced, diversified portfolio that optimizes the asymmetrical risk/reward characteristics of convertibles. The investment approach is not reliant on forecasting or market timing. The Fund strives for a consistent risk/reward profile at all times.

Note: The Fund is bench marked against the JP Morgan 3M USD LIBOR +3% p.a. Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

Financial markets rallied in the first half of 2019, becoming increasingly impacted by global macro issues as the year progressed. Markets grappled with fluctuating views regarding global economic growth, US-China trade, and the outlook for interest rates. These competing factors caused an uptick in volatility/weakness in May, but ultimately resulted in strong performance by both stocks and bonds supported by dovish statements by the Fed and ECB.

Despite the uptick in May, equity market volatility declined substantially from the elevated levels at the end of December 2018. Convertible securities moved higher during the first half of 2019 buoyed by advances in underlying stocks, tightening corporate spreads, and falling rates. The US was the top performing convertible market, followed by Asia Ex-Japan and Europe. Japanese convertibles lagged due to the more defensive nature of the market but still posted positive returns.

Global equity markets were mixed during Q3, as growth concerns, political uncertainty in Hong Kong and Britain, and trade tensions resulted in heightened volatility and investor de-risking in August. Large cap blue chips were the top performers, while small cap, growth, and Asia Ex-Japan equities generally declined. Safe-haven assets including high grade and sovereign bonds, USD, and gold rallied as interest rates declined and credit spreads tightened. Energy was particularly weak, and Technology and Healthcare lagged more defensive sectors as investors reevaluated equity valuations and repositioned into value names.

SANLAM GLOBAL CONVERTIBLE SECURITIES FUND (CONTINUED)

Fund Performance (continued)

The final quarter of 2019 witnessed a sustained rally for global equities as the geopolitical risks that had been creating headwinds were resolved favorably by year-end including a phase one trade agreement between the US and China and clarity on Brexit. The Americas and Asia Ex-Japan, particularly Technology stocks, were the top performers, while European equities were comparatively weak. Increased growth prospects and a risk-on environment caused yield curves to steepen and corporate credit spreads to tighten. Convertibles posted strong returns driven by rising equities despite the fact that many of the top contributors to the indices (e.g., FAANG stocks) are not represented in the convertible universe. Regional and sector performance largely mirrored the broader equity indices.

The convertible primary market finished strong with over \$4BIn in new deals across regions, resulting in the best year for issuance since 2014, and meaningfully expanding the size of the convertible market and the availability of balanced structures.

The Fund advanced +15.43% net, capping a strong year for returns.

Fund Outlook

After a strong start to 2020, equity markets fell sharply at the end of February on accelerating concerns regarding the coronavirus outbreak. As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020.

The Fund performed in line with expectations, capturing just 35% of declines in global equity markets and ending the first quarter down -12.92%. That said, convertibles have proved to be defensive and the primary market was surprisingly active during Q1 with \$9.3Bln of new deals, the vast majority of which coming in the US.

Given the scale of the current crisis, we are likely to experience further volatility in share prices until there is clarity on the duration of lockdowns. The Fund continues to be well-positioned for this future volatility.

Investment Manager

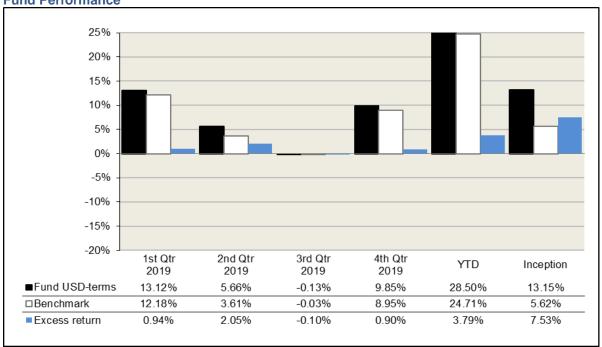

Zazove Associates, LLC

AUTUS GLOBAL EQUITY FUND

Investment Objective

The Autus Global Equity Fund (the "Fund") aims to provide capital growth over the long-term.

Fund Performance

Note: The Fund is benchmarked against the MSCI ACWI Net Total Return USD Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

Whilst the Fund advanced 28.50%, 2019 saw global growth beginning to slow. The United States Treasury bond yield curve inverted at the two-year and ten-year maturities which caused some investors to speculate that a recession could be looming. The last time the yield curve inverted at these maturities was in 2007. However, US corporate earnings growth appeared to be sustained during 2019, albeit at a lower rate than in 2018 due to the base effects of President Trump's sweeping 2017 tax cuts.

During the year, the Fund sold out of Boeing as uncertainty surrounded the company following two fatal airplane crashes in less than five months. Health Insurance Innovations was also sold a result of a possible class action lawsuit against the company. The Fund also cut its positions in General Motors, Netflix, and Encana due to lower expected growth in the future, whilst Broadcom and Comcast were sold during the year on expectations of lower returns for the telecommunications industry.

Wariness of certain parts of the healthcare industry has led us to sell our positions in Celgene and Allergan.

Enbridge, Cigna, and ConocoPhillips were bought as promising opportunities for the portfolio in the long term. Raytheon was added to the fund again after a month-long hiatus as its valuation became attractive.

The Fund's overweight positions in the likes of Alibaba, Visa, Microsoft, United Health, Adobe all contributed to the portfolio's strong performance in 2019.

AUTUS GLOBAL EQUITY FUND (CONTINUED)

Fund Outlook

A deliberate switch to lower-beta stocks as well as a slightly higher level of cash holdings was achieved during the year. This has subsequently proved fortuitous during the 1st quarter of 2020 given the spread of COVID-19 and its impact on global economic activity which has materially changed the investment outlook for 2020.

Global growth is undoubtedly going to be severely impacted by the effects of Coronavirus. The huge area of uncertainty is due to the fact that it is very hard to currently predict the timeline around its duration. Government action to date has been to mitigate the damage to household and corporate balance sheets. The speed and size of that fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. Our focus for the foreseeable future is on being patient and only buying better quality businesses where we feel their valuations are attractive on a long term basis

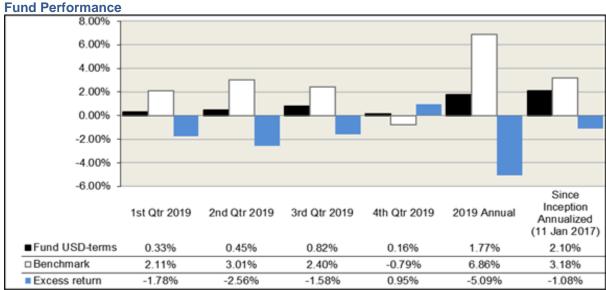

Investment Manager

Autus Fund Managers (Pty) Limited

SANLAM CENTRE ACTIVE US TREASURY FUND

Investment Objective

The Sanlam Centre Active US Treasury Fund (the "Fund") aims to maximize investors' total return through capital appreciation and current income.

Note: The Fund is bench marked against Bloomberg Barclays U.S. Treasury Total Return Unhedged USD. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and Manager fees.

The Fund invests in fixed-rate U.S. Treasury securities (with a minimum credit rating of investment grade or above), including Treasury bonds (long-term government securities which pay interest every six months with various maturities), Treasury bills (short-term government securities with maturities ranging from a few days to 52 weeks), Treasury notes (government securities that are issued with various maturities and pay interest every six months), and Treasury Inflation-Protected Securities ("TIPS"). For the year ended 31 December 2019, the Fund returned 1.77% versus a benchmark return of 6.86%, a relative underperformance of -5.09%.

The Fund's performance, which has been disappointing for the year, reflects interest income combined with our active duration management decisions that impact capital gain or loss capture. Duration decisions are implemented using futures contracts on U.S. Treasury securities. These contracts are very liquid and allow us to maintain consistent cash flow from the core portfolio of U.S. Treasury notes and bonds. These active duration decisions are based on the near-term outlook for interest rates which is based, in turn, on a monthly review of economic conditions and current bond market valuation, processed through our investment discipline, the Interest Rate Scorecard. The Interest Rate Scorecard is designed to anticipate rate moves and adjust portfolio duration tactically for the benefit of shareholders of the Fund by taking advantage of rate declines and shielding value against rate increases. For 2019 the Scorecard targeted portfolio duration at the discipline's zero lower bound. The cautious stance reflected the ongoing strength of labor market activity, both level and momentum, in the U.S., a rate of inflation consistent with the FOMC's 2% goal, monetary policy that was likely overly accommodative and at times extremely overbought condition of the U.S. Treasury market.

Fund Outlook

Over the long run, interest rate behavior is determined by real economic growth, investors' inflation expectations or concerns, monetary policy, and bond market valuations (term premium). The Treasury Fund portfolio manager's view is that the dramatic decline into negative territory in the term premium of the bellwether 10-year U.S. Treasury note will be reversed to a large extent, if not completely, over time. There is not yet evidence to suggest that investors over time will be willing to accept less compensation for maturity risk than has been true in the past. As term premiums revert toward their long term mean of 1.6%, rates on longer dated issues will increase. Beyond the effect of an increasing risk premium, any increase in interest rates will also reflect the strength of economic growth, the rate of inflation, the behaviour of the monetary authorities, and the risk appetite of bond investors globally.

SANLAM CENTRE ACTIVE US TREASURY FUND (CONTINUED)

Fund Outlook (continued)

Going forward and consistent with history, rate behavior seems likely to continue to be cyclical in nature and jagged or violent in pattern as both market participants and policy makers react and overreact to the impacts of changing economic, inflation and political conditions. The Interest Rate Scorecard is designed for such a world. It is intended to anticipate rate moves and adjust portfolio duration tactically for the benefit of shareholders of the Treasury Fund by taking advantage of rate declines and shielding value against rate increases.

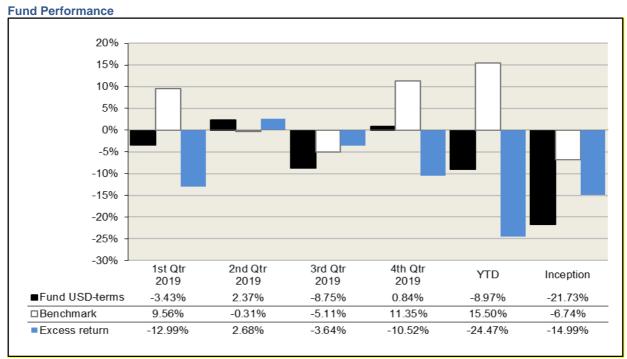

Investment Manager

Centre Asset Management, LLC

WISIAN CAPITAL SOUTH AFRICAN EQUITY FUND

Investment Objective

The Wisian Capital South African Equity Fund ("the Fund") aims to achieve long-term capital growth.

The Fund is bench marked against MSCI Emerging Markets BM. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

Both developed and emerging markets were constrained by late cycle dynamics for the calendar year 2019 post a period of fiscal tightening in 2018. Conditions were further exacerbated by the China-US trade war and diminishing levels of economic slack in most major markets. As an example of the latter, unemployment levels fell as low as 3.5% leaving little room for further improvement in productivity.

To sustain the cycle further and prevent a major shock from the trade war, central banks engaged in cycle-extending actions to reverse the tightening in 2018 and further ease monetary policy. Abnormally low inflation levels amidst such conditions allowed central banks to loosen without much risk. China also engaged in stimulation while balancing a strong need to reduce leverage in their economy.

As a result, recession indicators flashed red including the inversion of the yield curve in many markets. Most market participants expected the cycle to be extended by the stimulus and US and China reaching a Phase 1 deal late in 2019. This resulted in a strong recovery in the 4th quarter after a year of high volatility and uncertainty. The nervousness was greatest in emerging markets due to their dependence on China and trade flows from European markets.

South African markets, which is where the Fund invests, were unable to keep up with emerging markets due to country specific issues which drove negative investor sentiment. The year was one of transition to a new President and market participants awaited certainty on a number of issues including: possible rating downgrade by Moody's, measures to rejuvenate economic growth, repair of key state owned enterprises (including power generation company, Eskom) and addressing rampant corruption in the economy.

Local companies continue to earn extremely strong returns well above their cost of capital. However, their economic performance has been impaired somewhat over the past few years due to political uncertainty. Most counters have reached extremely low valuations as a result. The only segment of the market that has outperformed has been resources due to a recovery in metal prices over the past few years. The Fund avoids commodity companies due to the cyclical risk they introduce into the portfolio which could result in permanent impairment of client capital. We, therefore, hold quality companies at a time when the style is out of favour locally and also invest in a market that has been out of favour. This six-sigma situation has caused us to underperform our benchmark. We do not expect this to continue indefinitely due to the strong cash flow profile and low valuations of the companies we hold.

WISIAN CAPITAL SOUTH AFRICAN EQUITY FUND (CONTINUED)

Fund Outlook

The outlook for the coming period depends entirely on the impact of the coronavirus on global markets. To date, the virus has moved most markets into recessionary, bear market territory. South Africa has been disproportionately affected due to weakness in both its currency and its markets. What were cheap valuations have now been pushed to levels not seen before this decade on many of our holdings. We are confident of a reversion to the mean in terms of valuation in the future. South Africa, over a 100 year period, has consistently been ranked amongst the best performing markets globally in US Dollar terms. We believe some reversion will take place from the current extreme lows. However, the timing of this will depend a lot on the progression of the coronavirus and its impact globally.

During periods of high uncertainty, the market gravitates strongly toward safe haven assets such as the US Dollar or Gold. We expect our Fund to underperform during such risk off conditions especially given that one of the larger markets in the MSCI EM index, China, has already started recovering from the impact of the virus on its economy. However, post resolution of this global pandemic, we expect the Fund to be extremely well positioned to achieve its objective going forward.

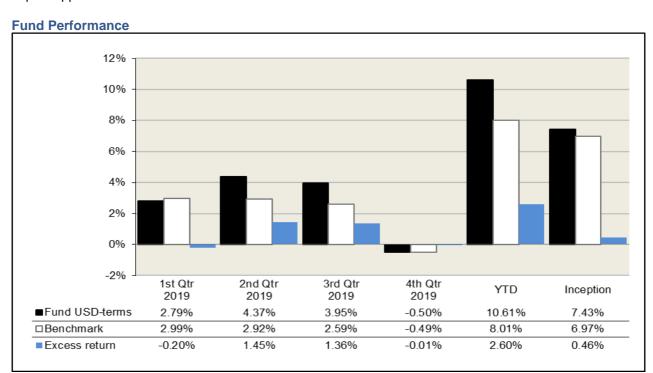

Investment Manager

First Avenue Investment Management (Pty) Ltd

CAMERON HUME GLOBAL FIXED INCOME ESG FUND

Investment Objective

The investment objective of the Fund is to provide income with the possibility of long-term growth from capital appreciation.

The Fund is benchmarked against Bloomberg Barclays Global Aggregate (Hedged) Index. Note: Performance figures longer than 12 months are annualised. Figures quoted are net of fees.

The first and second quarters of 2019 were dominated by the rapid repricing of US interest rate risk, following the indications that trade talks with China were deteriorating. The portfolio was positioned long US yields, as well as longs in Australia, Canada and New Zealand, which had a positive impact on performance. In addition, long Japanese yen aided performance. Anticipating a 'dove trap' ahead of the June ECB meeting, we positioned long France bonds and long euro forward swaps. The ECB has now indicated further stimulus is likely, which favours credit spread exposure. Relative shorts in both Japanese and euro swaps partly offset gains. Early in the second quarter we closed all exposures in global inflation, anticipating that the fall in global market yields would also cause global inflation swap yields to fall. Towards the end of the second quarter we sold volatility in US short-dated forward yields as it was at near cycle highs rather than tracking rates lower.

The third quarter was dominated by unwinding of the US/China tariff premium in bonds, as yields rose and curves steepened. The Fund was positioned for further falls in yields across Sweden and Canada forwards, which detracted from performance. Diversified short positions in both Australia and Norway forwards partly offset these losses. Exposure to rates options strategies in UK, euro & US rates both diversified risk and contributed positive returns. US inflation forwards rose through the quarter, diversifying long positions in rates and contributing to positive returns. Positions across global credit also added positive returns from tighter spreads.

The fourth quarter was dominated by unwinding of the US/China tariff premium in bonds, as yields rose and curves steepened. The Fund was positioned for further falls in yields across Sweden and Canada forwards, which detracted from performance. Diversified short positions in both Australia and Norway forwards partly offset these losses. Exposure to rates options strategies in UK, euro & US rates both diversified risk and contributed positive returns. US inflation forwards rose through the quarter, diversifying long positions in rates and contributing to positive returns. Positions across global credit also added positive returns from tighter spreads.

CAMERON HUME GLOBAL FIXED INCOME ESG FUND (CONTINUED)

Fund Outlook

As set out in the Manager's Economic and Market review, the spread of COVID-19 during the first quarter and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented. The sudden stop to economic activity has seen companies rush to identify and secure their liquid assets.

Governments action to date has been to mitigate the damage to household and corporate balance sheets. The longer the current economic freeze lasts the more likely governments are to increase their support for critical sectors and vulnerable households. This will weaken sovereign balance sheets making sovereign defaults or inflationary policies more likely, if still remote. As a result, it may be some time before we know the true cost to business and the overall economy and we can expect continued volatility for the foreseeable future as a result.

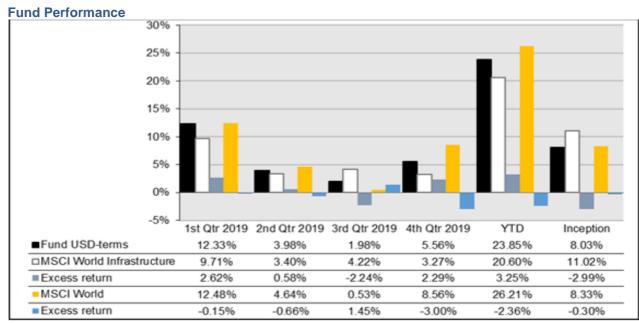

Investment Manager

Cameron Hume Limited.

SANLAM CENTRE GLOBAL LISTED INFRASTRUCTURE FUND

Investment Objective

The investment objective of the Fund is to provide income with the possibility of long-term growth from capital appreciation.

The Fund is benchmarked against MSCI World Infrastructure Index (M1WO0INF) and the MSCI World Index (NDDUWI). Note: Figures are quoted net of fees.

For the 12 month period ended 31 December 2019, the Fund returned 23.85%, outperforming the MSCI World Infrastructure Index by 3.25% but underperforming the wider MSCI World Index by -2.36%.

The largest positive contributors to relative performance over the period included the Fund's investments in the Energy sector due to our overweight allocation; the Utilities sector due to sour underweight allocation and stock selection (Companhia de Saneamento Basico do Estado de Sao Paulo, Enel Americas, China Resources Gas Group); the Industrials sector due to good stock selection, particularly our position in Grupo Aeroportuario del Pacifico; and the Communication Services sector due to our underweight allocation and stock selection (Bezeq The Israeli Telecommunication Corp., Hellenic Telecommunications Organization). The Consumer Discretionary sector was largely neutral in its impact during 2019.

Global listed infrastructure securities remain a compelling investment option, characterized by high dividend yields, stable cash flows, and attractive risk-adjusted performance, while offering a long-term hedge against inflation. Despite significant funding gaps for infrastructure in developed markets, and the years of debate about replacing outdated backbone systems, infrastructure investment has declined as a share of GDP (Gross Domestic Product) in more than half of the G20 economies since the global financial crisis. Years of underinvestment in critical areas such as transportation, water treatment, and power grids could erode future growth potential and productivity. Municipalities are now focusing efforts on connecting institutional investors with projects that need their capital as well as creating an expanded role for public-private partnerships and tax and other incentives to undertake infrastructure investment. We believe the majority of the infrastructure funding gap will likely be financed by the private sector, creating significant opportunities within publicly traded global listed infrastructure assets, especially in the Telecom and more innovative areas where the intellectual capital resides. Infrastructure is also a defensive asset class because of the characteristics of the underlying assets owned by many global listed infrastructure companies including: 1) inelastic demand due to the essential nature of the assets used in everyday life; 2) high barriers to entry due to the critical and often irreplaceable nature of the assets; and 3) contractual revenue streams that offer inflation protection in many cases.

SANLAM CENTRE GLOBAL LISTED INFRASTRUCTURE FUND (CONTINUED)

Fund Performance (continued)

Conventional wisdom holds that you invest in bonds for yield and equities for capital appreciation. While this might be true historically, with 10-Year Treasury yields collapsing (to 1.5% from 3.2%) over the past 9 months, infrastructure related stocks now offer the best of both. Currently, the S&P 500 Index's dividend yield of 1.9% supersedes Treasury yields and, from a sector perspective, Infrastructure related sectors such as Telecom (4.6%), Energy (3.9%), and Utilities (3.0%) are all well above the market.

The combination of continued underperformance of limited partnership structured energy equities and improved free cash flow for some companies has begun to drive investor interest in the sustainability of increasingly attractive dividend yields in the infrastructure related sectors.

The Fund finished 2019 targeting energy, telecom, industrials, and other undervalued areas of globally listed infrastructure industries and sub-sectors. The combination of low embedded growth and a robust stream of income payments effectively lowers the duration of the portfolio and, if interest rates rise, this will help protect against a broader based contraction in valuation multiples. Lastly, the Fund's unique exposure to next-generation global infrastructure adjacencies, including public cloud deployments, data center monitoring, cybersecurity, and IIoT (Industrial Internet of Things) is a key differentiator against legacy managed infrastructure portfolios, which overlook these powerful trends within the industry.

Fund Outlook

Going into 2020, the Fund was positioned targeting energy, telecom, industrials, and other undervalued areas of globally listed infrastructure industries and sub-sectors. The combination of low embedded growth and a robust stream of income payments effectively lowers the duration of the portfolio and, if interest rates were to rise, this would help protect against a broader based contraction in valuation multiples. The Fund's unique exposure to next-generation global infrastructure adjacencies, including public cloud deployments, data center monitoring, cybersecurity, and IIoT (Industrial Internet of Things) was also a key differentiator against legacy managed infrastructure portfolios, which overlook these powerful trends within the industry.

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity materially changed the investment outlook for 2020, with Q1 seeing the US markets experience one of their worst quarters in history, losing more than 20%. Markets had enjoyed a strong start to the year, adding 5% in January and continuing to rise up higher until over half way through the quarter, or 19th February, before a massive sell-off hit the markets. The decline has now gone down in history as the fastest decline/correction ever.

In such an environment, there were very few places to hide, even being positioned defensively. The Fund lost -22.91% over the first quarter, underperforming the MSCI World Infrastructure Index which was down - 17.93% by 4.99%.

Government action to date, including the US Congress passing a \$2 trillion stimulus bill, has been to mitigate the damage to household and corporate balance sheets. The speed and size of the fiscal and monetary response has been encouraging and a welcome contrast to the 2008 crisis. It's too soon to say when a recovery will come and whether it will be faster or slower than normal, as much will depend on how quickly countries are able to contain the virus and reopen for business.

Investment Manager

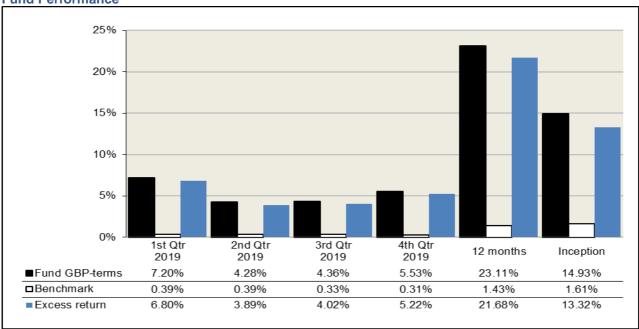

Centre Asset Management, LLC

SANLAM REAL ASSETS FUND

Investment Objective

The investment focus is on listed securities that derive their value from underlying real assets. These exhibit distinct attractive characteristics that differentiate themselves from other asset classes. Our overriding mandate is real asset exposure and there are no restriction on access vehicles. The Fund aims for regular income and capital growth through investments in real asset securities, with a target return of CPI+4% over a full investment cycle.

Fund Performance

This Fund is benchmarked against an equally weighted composite taken from the CPI rate of the component countries of the G10 region. Performance figures are based on fund inception as at 21st August 2018. Figures are quoted gross of fees.

2019 marked the first full calendar year for the Sanlam Real Assets Fund. Despite the political standoffs, both in the UK and abroad, it was a year that saw record highs in global equity markets and compression in bond yields. The Fund enjoyed a run of 12 consecutive positive months, returning +23.11% over the period. This performance was generated with an average 90D volatility of 4.6% over the year compared to the MSCI World of 12.0%. At strategy level positive contributions came from Infrastructure, Property, Renewables and Other Alternatives. Renewables were the top performing strategy in 2019, contributing 45% of performance for the Fund over the period

Over the year the holdings in the Fund raised over £4 billion in fresh capital. Proceeds were used to pay down debt facilities, expand portfolios and capitalise on attractive opportunities in pipelines. As has been the case in recent years, most capital raisings across the portfolio holdings were significantly oversubscribed, underpinning the strong market sentiment for real assets in the current low interest rate environment.

Fund Outlook

The positive momentum in global equity markets continued into 2020 with markets climbing the wall of worry, as the longest economic cycle in history kept rolling on posting new highs.

In February, news of a sharp uptick in coronavirus cases outside of China triggered an abrupt sell-off across global equity markets with the last week of the month recording the largest weekly market declines in the US and UK since the global financial crisis, sending investors flocking to safe haven assets.

The COVID-19 outbreak has subsequently caused widescale disruption to more and more economies around the world. Unprecedented measures have been taken to curtail the spread with many countries implementing full lockdowns. There has been a very strong and swift response from central banks and governments in the form of both fiscal and monetary stimulus, and there is now a sense that authorities will do everything they can to help.

SANLAM REAL ASSETS FUND (CONTINUED)

Fund Outlook (continued)

At present it's too early to call the bottom. The market is digesting the impact of the COVID-19 virus on the economy with the outcome ultimately determining the depth and the duration of the coming recession. We are mindful that events like these do not last forever and as investors we should be looking for entry points and buying opportunities.

Fundamentally, real assets remain attractive against the ongoing market volatility and the low interest rate environment. The Fund continues to hold a balanced portfolio of investments that fit our theme of "pillars of a functioning economy" with long-term, stable and predictable cash generative assets.

Sanlam Investments UK Limited (formerly Sanlam FOUR Investments UK Limited)

SATRIX GLOBAL FACTOR ENHANCED EQUITY FUND

Investment Objective

The Satrix Global Factor Enhanced Equity Fund ("the Fund") aims to target capital growth over the long term in excess of the MSCI World Index (un-hedged) in U.S. dollars with net dividends reinvested (the "Benchmark"), over rolling thirty six-month periods. The Investment Manager shall manage a diversified Portfolio consisting primarily of equity securities by varying the proportions of securities held by the Portfolio on the basis of exposure to factors, with the aim to deliver returns in excess of the Benchmark. The factors the Investment Manager will consider are Value, Momentum, Small Size, Quality, and Low Volatility.

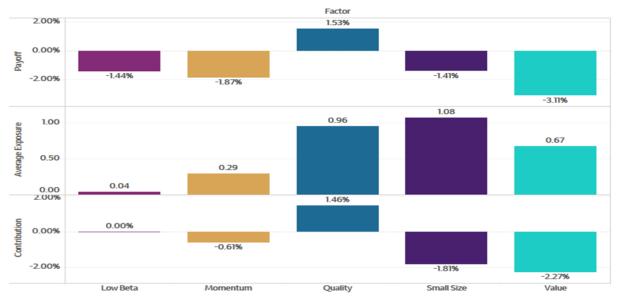

The Fund is bench marked against the MSCI World Index. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

For the first full calendar year in 2019, the Fund increased by 21.32% while the MSCI World Index increased 27.67% over the same period. The year proved to be a challenging period for traditional factor returns across the MSCI World Universe. Quality was a bright spot for the portfolio while Momentum, Value and Size detracted from active returns. The 4th quarter in particular was a challenging period for all factors with exception to quality. Low Beta provided marginally positive contributions through the first 3 quarters of 2019 before returns to Low Beta turned sharply negative in what can only be described as a risk-on environment. The chart below provides an overview of the total returns per unit exposure, along with the average exposure, and total contributions of each alpha factor in the portfolio.

SATRIX GLOBAL FACTOR ENHANCED EQUITY FUND (CONTINUED)

Fund Performance (continued)

Factor Performance Contributions in Satrix Global Factor-Enhanced Equity Fund Most Recent Quarter

For a majority of 2019, macroeconomic uncertainties such as US-China trade tensions, Brexit, and direction of US monetary policy dominated investor sentiment on a periodic basis. Other than a strong rally in January coming off the lows of the December 2018 drawn, returns to equities were modest due to these dramatic swings in investor sentiment. Sentiment turned sharply positive in the 4th quarter as it US-China trade tensions began to ease and the US Federal Reserve proceeded with a series of three 25 bps rate cuts. This sharp move higher had negative implications for payoffs for several alpha factors.

The risk-on environment during the 4th quarter produced negative payoffs for Low Beta, Momentum, Small Size, and Value. Low Beta in particular, went from the top performing factor with 1.8% positive payoffs through the end of September to negative payoffs of 1.3% for the calendar year (3.1% drawdown). Broad based risk-on moves such as this can make it difficult for fundamental factors to provide sources of alpha generation. Although 2019 proved to be a challenging period for the Factor-Enhanced Fund, we remain confident the fundamentals and factors will continue to provide meaningful sources of alpha over the longer-term. Our factor exposures were relatively consistent throughout 2019. During the 4th quarter we increased our Small Size and Low Beta exposure while lowering exposure to Quality, Value and Momentum due to the volatility experienced across these factors over the recent period.

Fund Outlook

Sources of alpha can be elusive at times and 2019 was such a period for most fundamental factors with exception to Quality.

As set out in the Manager's Economic and Market review, the spread of COVID-19 during Q1 2020 and its impact on global economic activity has materially changed the investment outlook. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented. Although factors generally suffered from the dual shocks of COVID-19 and the oil price war between Saudi Arabia and Russia, the opportunity set remains attractive.

We remain confident that factors will continue to provide a source of alpha and a consistent approach of taking active exposure towards these factors will be rewarded. Our approach of developing pure alpha factors that are neutral to other factor exposures helps ensure that we do not have unintended secondary exposures as a result.

Investment Manager

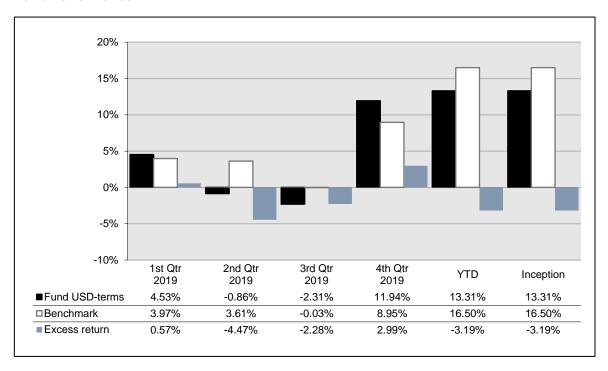

Wells Capital Management, Inc.

PERPETUA GLOBAL EQUITY UCITS FUND

Investment Objective

The Perpetua Global Equity UCITS Fund ("the Fund") aims to target capital growth over the long term through investment of up to 100% of the Fund's Net Asset Value primarily in a global range of equity securities of companies listed on Recognised Exchanges.

Fund Performance

The Fund is bench marked against MSCI All Country World Index Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

The Fund launched on 1 February 2019. For the eleven months ended 31 December 2019, the Fund returned 13.31%, compared to the benchmark MSCI All Country World Index ("MSCI ACW Index") which returned 16.50%, a relative underperformance of 3.19%. Overall performance was driven by a strong fourth quarter return of 11.94%, compared to the benchmark return of 8.95%.

The main contributors to absolute performance were Apple, Bed, Bath & Beyond, American Express, Transocean and Universal Display Corp. These seven shares contributed approximately half of the Fund's YTD return. The key detractors from absolute performance were Limited Brands, the Michaels Companies, Franklin Resources, Affiliated Managers Group and Hugo Boss, returning -2.7% collectively. On a relative basis, however, Fund performance trailed exceptionally strong benchmark returns which were predominately driven up by U.S. mega-cap, growth-oriented shares such as Facebook, Amazon, Apple, Alphabet, Microsoft, Mastercard, Visa and PayPal. The S&P 500 technology sector rose by 50% in 2019 – by far the largest gain among the index's 11 sectors and comparative developed market indices across Europe and Japan.

It is worth noting that the MSCI ACW Index produced its second-best return since the global financial crisis, only trailing the returns achieved in 2009, the year of the recovery. This is exceptional, and an outlier, considering 2019 was the 10th year anniversary of the bull market. There were several factors that fuelled these strong equity market gains – falling interest rates as the U.S. Federal Reserve cut three times, negative yielding corporate and government bonds pushing investors into equities in search of satisfactory returns, US-China trade-war de-escalation following an agreement struck in the fourth quarter, and one step closer to a Brexit deal. But more than any of the above, positive market sentiment was the main driver as the market price-to-earnings (P/E) ratio significantly expanded despite negative corporate earnings growth and less capital returned to shareholders. Market expectations appear to have shot well ahead of underlying fundamentals such as earnings and dividends.

PERPETUA GLOBAL EQUITY UCITS FUND (CONTINUED)

Fund Performance (continued)

While it is bitterly disappointing that Fund performance has trailed the benchmark over the past eleven months, we believe absolute returns were satisfactory, especially when viewed through the lens of market returns driven by a handful of U.S. mega-cap technology shares and exuberant market sentiment chasing growth-oriented equities.

Fund Outlook

There were 45 positions in the Fund at year-end with cash at 3.3%. The Fund went into 2020 overweight the following sectors - financials, consumer discretionary, consumer staples and energy. This, however, does not adequately characterise the Fund's positioning and future return drivers. Financial service companies - banks, insurers, asset managers and consumer credit lenders - make up slightly more than a quarter of the Fund, the largest of which include Berkshire Hathaway, Wells Fargo, Franklin Resources and American Express. The financial shares can be characterised as well-capitalised, wellmanaged, well-positioned companies that create value through good capital allocation and prudent risk taking, allowing them to compound book value per share for many years to come. Consumer cyclical companies - apparel retailers, household furnishings, autos and auto components - make up roughly 18% of the Fund. Bricks and mortar retailers have endured an extremely challenged last few years as consumers have shopped increasingly more online and spent less time visiting shopping malls. Market participants have relegated these stocks to the garbage bin resulting in them selling at extremely cheap prices. We believe one-sided narratives calling for the end to brick-and-mortar retail is far too premature as the winners in the future will be the ones that can deliver a seamless omni-channel experience. It strikes us as odd that online only retailers have been investing in traditional retail stores while investors price these very assets as dinosaurs about to become extinct. The Fund's auto holdings include BMW and Continental - two market leading, high quality companies trading on extremely cheap valuations due to temporary cyclical factors.

Approximately 15% of the Fund is invested in consumer defensives – food & drug retailers, tobacco and food producers, brewers – that occupy market leading positions and significant incumbent cost advantages. The major shares here include Philip Morris International, British American Tobacco, Tesco, Magnit, X5 Retail Group and Kraft Heinz. Last, offshore oil & gas service companies - Transocean, Tidewater, Diamond Offshore Drilling, Valaris – make up 11% of the Fund. These shares are trading at multi-decade lows following a severe industry downturn which started in 2014 and bottomed at the end of 2017. Demand has started to recover while supply has shrunk significantly since the peak of the cycle. The demand-supply balance has begun to tighten at much lower levels of offshore oil & gas exploration and development spending compared to prior cycles, thereby driving industry pricing up from extremely depressed levels. Furthermore, the significant underinvestment in offshore reserve replacement has meant that many of the oil supermajors will see their offshore production rates decline in the not too distant future if they don't start spending again. We believe many of these companies recognise this danger and have begun to sanction new projects and approve financial investment decisions.

The performance of the Fund will remain challenged in an environment of negative yielding bonds and high investor optimism for 'safe-haven' and growth-oriented shares which benefit from low interest rates and long duration cash flows. This type of investing is inconsistent with Perpetua's long-term, bottom-up, valuation-based approach. An environment characterized by rising interest rates from extremely low levels, and recovering global economic growth, should lift corporate earnings of the more economically sensitive companies. The combination of rising earnings and rising valuation multiples should drive strong absolute and relative performance, especially if it coincides with a narrowing of the valuation dispersion between cheap and expensive shares in the market.

At the time of writing, global equities have declined more than 30% year-to-date due to the demand shock caused by COVID-19 related shutdowns and the collapse of the oil price, following a disagreement between Russia and Saudi Arabia on OPEC + alliance production cuts. The current situation is evolving with ferocious speed across the world and impacting every corner of the globe, and every sector in the real economy. Fear and panic have gripped not only the world's population but investors too. We believe this to be one of the best opportunities in the stock market for more than a decade, and potentially one of the five best buying opportunities throughout history.

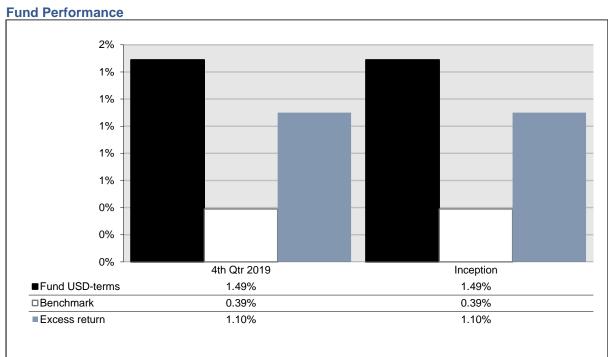

Investment Manager

Perpetua Investment Managers (Pty) Limited

SANLAM US ABSOLUTE RETURN FUND

Investment Objective

The Sanlam US Absolute Return ("the Fund") aims to deliver a positive return over the medium to longer term in all market conditions.

The Fund is bench marked against the SOFR Rate (Securitized Overnight Financing Rate). Note: Figures are quoted gross of fees.

The Sanlam US Absolute Return Fund launched on 7th October 2019. Over the short period to 31 December 2020, it returned 1.49% vs.0.39% for its cash benchmark. The long side of the portfolio gained 13.66%, while the short side of the portfolio lost 11.51%.

The long side of the portfolio was deeply entrenched in value territory, offering more than a 50% discount vs. the market on earnings, and even higher discounts on other valuation metrics. This was coupled with quality factors that were higher than the markets' on average.

The short side of the book was a blend of value and growth style investments, predominantly expensive, low-quality stocks.

Fund Outlook

Q1 2020 has seen US markets seen one of their worst quarters in history, losing more than 20%. The outbreak of the Coronavirus was the culprit. Markets had enjoyed a strong start to the year, adding 5% in January and continuing to rise up higher until over half way through the quarter, or 19th February, before a massive sell-off hit the markets. The decline looks set to go down in history as the fastest decline/correction ever.

As set out in the Manager's Economic and Market review, the spread of COVID-19 and its impact on global economic activity has materially changed the investment outlook for 2020. The development of the coronavirus and COVID-19 crisis has been as rapid as it has been unprecedented.

For the first quarter, the Fund fell -2.82%. Over the same period, the MSCI North America fell -20.16%.

In these challenging times, we continue to focus all our efforts on identifying the most attractive North American investment opportunities, to provide investors with an optimal US long/short exposure.

Prices

There is a single price for buying, selling and switching Share classes in each Fund. This is represented by the Net Asset Value per share class of the relevant Fund. In the case of subscriptions, a preliminary charge of up to 5% may be added to the Net Asset Value per share of the classes of certain Funds, as set out in the relevant offering supplements. The Company may waive in whole or in part the preliminary charge. A conversion fee of up to 2% may be charged on applications to convert shares of any class to shares of another class. A repurchase fee of up to 3% may be deducted from the Net Asset Value per share of the classes of certain Funds, as set out in the relevant offering supplements. The Company may waive, in whole or in part, the repurchase fee.

Dealing

The Dealing Day is, except where otherwise clarified in the Prospectus or sub-fund supplement, any day other than Saturday or Sunday on which banks are open for business in Dublin. The valuation point is, except where otherwise clarified in the Prospectus or sub-fund supplement, the close of business in each relevant market on the business day immediately preceding a dealing day.

Shares

Applications for shares, except where otherwise clarified in the Prospectus or sub-fund supplement, must be sent so as to arrive at the Registrar and Transfer Agent's office, no later than 4.00pm (Irish time) on the business day preceding the relevant dealing day, or such later time as the Directors may from time to time permit. Applications which are received late, or funds which are not cleared by the relevant time, will be held over and invested at the next dealing day. Requests for repurchases, except where otherwise clarified in the Prospectus or sub-fund supplement, should be sent so as to arrive at the Registrar and Transfer Agent's office by post, facsimile or telex by no later than 4.00pm on the business day preceding the relevant dealing day.

2 Significant accounting policies

(a) Basis of preparation

The financial statements have been prepared in accordance with Irish Statute comprising the Companies Act 2014 under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss. The financial statements are prepared in US Dollars and on a going concern basis.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU") and interpretations adopted by the International Accounting Standard Board ("IASB").

The principle accounting policies adopted in the preparation of the financial statements are set out below/overleaf.

All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating shares, unless otherwise stated.

The Statement of Financial Position presents assets and liabilities in decreasing order of liquidity and does not distinguish between current and non-current items.

for the year ended 31 December 2019

2 Significant accounting policies (continued)

(b) Significant accounting judgments and estimates

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the amounts recognised in the financial statements. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

Going Concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

Fair Value of Financial Instruments

When the fair value of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be determined based on quoted prices in an active market, they are determined using an appropriate valuation technique. The valuation techniques employed by the Company and the judgements, estimates and assumptions associated with them are disclosed in note 2(d).

Investment Entity Status

The Company's management has determined that the Company has all of the typical characteristics of an investment entity as set out in IFRS 10.

(c) Income recognition

Interest income and expense are recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest rate method.

Dividends are recognised as income on the dates the securities are first quoted "ex dividend" to the extent that information thereon is reasonably available to the relevant Fund. Bank deposit interest and other income are accounted for on an accruals basis. Income which is subject to a deduction of tax at source is shown gross of such withholding tax.

Withholding tax recoverable is accounted for on a receipts basis. Franked investment income (which comprises most of the UK source dividend income) is shown net of the notional tax credit.

(d) Financial instruments

(i) Classification

In accordance with IFRS 9, Financial Instruments ("IFRS 9"), the Funds classify all of their financial assets and financial liabilities at initial recognition into the categories of financial assets and financial liabilities discussed below.

In applying that classification, a financial asset or financial liability is considered to be held for trading if:

- (a) It is acquired or incurred principally for the purpose of selling or repurchasing it in the near term; or
- (b) On initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which, there is evidence of a recent actual pattern of short-term profit-taking; or
- (c) It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument)

Financial assets

The Funds classify their financial assets as subsequently measured at amortised cost or measured at fair value through profit or loss on the basis of both:

- The entity's business model for managing the financial asset;
- The contractual cash flow characteristics of the financial asset.

Financial assets measured at amortised cost

A debt instrument is measured at amortised cost if it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Funds include in this category short-term non-financing receivables including restricted broker balances, accrued income and other receivables.

for the year ended 31 December 2019

2 Significant accounting policies (continued)

(d) Financial instruments (continued)

(i) Classification (continued)

Financial assets (continued)

Financial assets measured at fair value through profit or loss A financial asset is measured at fair value through profit or loss if:

- (a) Its contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and interest (SPPI) on the principal amount outstanding; or
- (b) It is not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell; or
- (c) At initial recognition, it is irrevocably designated as measured at fair value through profit or loss when doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

The Funds' investment portfolios are managed and performance is evaluated on a fair value basis. The Funds are primarily focused on fair value information and uses that information to assess the asset's performance and to make decisions The contractual cash flows of the Funds' debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Funds business model's objectives. Consequently, all investments are measured at fair value through profit or loss.

Financial liabilities

Financial liabilities measured at fair value through profit or loss

A financial liability is measured at fair value through profit or loss if it meets the definition of held for trading.

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

Financial liabilities measured at amortised cost

This category includes all financial liabilities, other than those measured at fair value through profit or loss. The Funds include in this category short-term payables.

The Funds' policies require the Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

(ii) Recognition

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument.

A regular way purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or liabilities are recorded in the Statement of Comprehensive Income.

(iii) Measurement and fair value measurement principles

Initial measurement

Financial assets and financial liabilities at fair value through profit or loss are recorded in the Statement of Financial Position at fair value. All transaction costs for such instruments are recognised directly in "net gains/losses on financial assets and liabilities measured at fair value through profit or loss" in the Statement of Comprehensive Income.

Financial assets and liabilities (other than those classified as at fair value through profit or loss) are measured initially at their fair value plus any directly attributable incremental costs of acquisition or issue.

for the year ended 31 December 2019

- 2 Significant accounting policies (continued)
- (d) Financial instruments (continued)
- (iii) Measurement and fair value measurement principles (continued)

Subsequent measurement

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are re-measured at fair value. Subsequent changes in the fair value of those financial instruments are recorded in net gains/(losses) on financial assets and liabilities measured at fair value through profit or loss in the statement of comprehensive income.

Interest and dividends earned or paid on these instruments are recorded separately in interest revenue or expense and dividend revenue or expense in the statement of comprehensive income.

Debt instruments, other than those classified as at fair value through profit or loss, are measured at amortised cost using the effective interest method less any allowance for impairment. Gains and losses are recognised in profit or loss when the debt instruments are derecognised or impaired, as well as through the amortisation process.

Fair value measurement principles

In accordance with IFRS 13, Fair Value Measurement ("IFRS 13"), the fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives, trading securities and exchange-traded funds) are based on the last reported sales price at the close of trading on the reporting date, if the last reported sales price falls within the bid-ask spread. However, if the last reported sales price falls outside the bid-ask spread, Management will determine the point within the bid-ask spread that is most representative of fair value.

Assets not listed, or traded on any stock exchange or over-the-counter market, are valued at their fair value as determined with care and in good faith by the Administrator in consultation with the relevant Investment Manager and approved by the Directors (the Administrator having to be approved by the Depositary as a competent person for such purpose).

Collective investment schemes – investments in open-ended collective investment schemes are valued at the latest available net asset value. Closed-ended schemes which are traded as liquid schemes are valued at bid price at the year end or if unavailable, a mid quotation from a broker or, if unavailable or unrepresentative, the latest available net asset value as deemed relevant to the collective investment scheme.

Derivative instruments – exchange-traded derivative instruments are valued at the settlement price for such instruments as determined on the specific market. If such a price is not available, the fair value shall be the probable realisation value estimated by the Administrator in consultation with the Investment Manager and, if applicable, approved by the Directors.

OTC derivative instruments are valued at the settlement price as provided by the counterparty and verified by the Administrator on a monthly basis, or by a competent person appointed by the Administrator and approved for such a purpose by the Depositary. Such competent person may be the relevant Investment Manager provided that he is independent of the counterparty.

A CFD is an agreement in the OTC market, between the Fund and a CFD counterparty to pay or receive the change in the value of an underlying security.

In a long CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have increased in value had it been invested in the underlying investment or investments, plus any dividends that would have been received on those securities. In a short CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have decreased in value had it been invested in the underlying investment or investments. Unrealised gains/losses on CFDs are reported in the Statement of Comprehensive Income.

Forward foreign exchange contracts are valued with reference to the prevailing market maker quotations, namely the price at which a new forward contract of the same maturity could be undertaken or, if unavailable, at the settlement price provided by the counterparty.

Futures contracts are valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on

for the year ended 31 December 2019

futures contracts until the contracts are terminated, at which time realised gains and losses are recognised.

for the year ended 31 December 2019

2 Significant accounting policies (continued)

(d) Financial instruments (continued)

(iii) Measurement and fair value measurement principles (continued)

Fair value measurement principles (continued)

Interest rate swaps involve the exchange by the Fund with a counterparty of their respective commitments to pay or receive interest. The differential to be paid or received on the interest rate swap is recognised over the life of the agreement as a realised gain or loss with payments made or received on a net basis on the stated payment dates. The interest rate swap agreements are stated at fair value. Unrealised gains/losses are reported in the Statement of Comprehensive Income.

Similarly, index and inflation swaps are individually negotiated agreements between a Fund and a counterparty to swap one stream of payments (linked to a given index or rate of inflation) for another. They are similar to interest rate swaps and are stated at fair value with unrealised gains/losses reported in the Statement of Comprehensive Income.

Rights contracts are options to purchase additional securities from the issuer at a specified price during a specified period. Rights are valued at the prevailing market price at the reporting date. Changes in unrealised gains and losses for the year are included in the Statement of Comprehensive Income.

(iv) Derecognition

A financial asset (or, where applicable, a part of a financial asset or a part of a group of similar financial assets) is derecognised where the rights to receive cash flows from the asset have expired, or the Company has transferred its rights to receive cash flows from the asset, or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement and the Company has:

- (a) Transferred substantially all of the risks and rewards of the asset; or
- (b) Neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Company has transferred its right to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

The Company derecognises a financial liability when the obligation under the liability is discharged, cancelled or expired.

(v) Offsetting financial instruments

Financial assets and liabilities are offset and the net amounts reported in the statement of financial position, when a current legally enforceable right to offset the recognised amounts exists and there is intent to settle on a net basis or to settle the asset and the liability simultaneously.

(vi) Impairment

Financial assets that are measured at amortised cost are reviewed at each reporting date. The Company applies the general approach in accordance with IFRS 9.

The Company measures the loss allowance at an amount equal to the lifetime expected credit losses("ECLs") if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Company shall measure the loss allowance at an amount equal to 12-month expected credit losses.

The Company's approach to ECLs reflects a probability-weighted outcome, the time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions. Significant financial difficulties of the counterparty, probability that the counterparty will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required.

If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 45 days past due or if the credit rating of the counterparty deteriorates to below investment grade. Any contractual payment which is more than 90 days past due is considered credit impaired.

for the year ended 31 December 2019

2 Significant accounting policies (continued)

(e) Foreign currency translation

Functional and presentation currency

Items included in each Fund's financial statements are measured using the currency of the primary economic environment in which it operates ('the functional currency'). The currency of a Fund's return, the capital of a Fund, how performance of a Fund is evaluated and how liquidity is managed are all factors in determining the primary economic environment in which a Fund operates and its functional currency.

US Dollar ("USD") is the functional currency of Bridge Global Property Income Fund, Sanlam African Frontier Markets Fund, Denker Global Equity Fund, Sanlam Global Bond Fund, Denker Global Financial Fund, Sanlam Global Property Fund, Sanlam World Equity Fund, Satrix World Equity Tracker Fund, SIIP India Opportunities Fund, Denker Global Dividend Fund, Satrix North America Equity Tracker Fund, Satrix Emerging Markets Equity Tracker Fund, Sanlam Managed Risk Fund, Sanlam US Dividend Fund, High Street Global Balanced Fund, Sanlam Global Value Fund, Sanlam Stable Global Fund Anchor Global Stable Fund, Anchor Global Equity Fund, Bridge Global Managed Growth Fund, Sanlam Global Emerging Markets Fund, ABSA Africa Equity Fund, Sanlam Centre American Select Equity Fund, Sanlam Global Convertible Securities Fund, Sanlam Japan Equity Fund, Sanlam Centre Active US Treasury Fund, Autus Global Equity Fund, Wisian Capital South African Equity Fund, Cameron Hume Global Fixed Income ESG Fund, Sanlam Centre Global Listed Infrastructure Fund, Satrix Global Factor Enhanced Equity Fund, Perpetua Global Equity UCITS Fund and Sanlam US Absolute Return Fund.

Euro ("EUR") is the functional currency of Satrix Europe (ex UK) Equity Tracker Fund.

Pound Sterling ("GBP") is the functional currency of P-Solve Inflation Plus Fund, Sanlam Strategic Bond Fund, Sanlam Accel Income Fund, Satrix UK Equity Tracker Fund, Sanlam Global High Quality Fund, Sanlam Global Value Fund, Sanlam Stable Global Fund, Sanlam Active UK Fund, Sanlam Multi-Strategy Fund and Sanlam Real Assets Fund.

The Company has adopted USD as its presentation currency. Where necessary, each Fund's financial position is translated from its functional currency to the presentation currency, as follows:

- assets and liabilities, including net assets attributable to holders of redeemable participating shares, are
 translated at the closing rate at each reporting date. Exchange differences arising between the rate of
 translation of subscriptions and redemptions are also attributed to the holders of redeemable participating
 shares; and
- income and expenses for each Statement of Comprehensive Income are translated at average exchange rates (unless the year end is not a reasonable approximation of the cumulative effect of rates prevailing on the transaction dates, in which case income and expenses are translated at the rates prevailing on the dates of the transactions).

During the year ended 31 December 2019 the functional currency of two sub-funds of the Company, namely Sanlam Stable Global Fund and Sanlam Global Value Fund, changed from GBP to USD. The presentational currency of the sub-funds was also changed. The change in accounting policy has been applied retrospectively and the comparative results have been amended to reflect the change in functional and presentation currency of the two sub-funds. This change has not impacted on the results or primary statements of the Company which continues to use USD as the and functional and presentational currency.

Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Proceeds from subscriptions and amounts paid on redemption of redeemable participating shares are translated at yearly average rates, which approximate the rates prevailing at the dates of the transactions. Translation differences on non-monetary items, such as equities held at fair value through profit and loss, are reported as part of the fair value gain or loss.

(f) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are included within liabilities.

for the year ended 31 December 2019

2 Significant accounting policies (continued)

(f) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are included within liabilities.

The Company has adopted the Fund Asset Model in compliance with the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers ("the Investor Money Regulations"). Accordingly, the Company has established subscription, redemption and dividend cash accounts, at umbrella level, which are held in the name of the Company (the "Umbrella Cash Accounts"). All subscriptions, redemptions or dividends payable to or from the relevant Fund will be channelled and managed through such Umbrella Cash Accounts and no such accounts operate at the level of each individual Fund. However, the Company ensures that the amounts within an Umbrella Cash Account, whether positive or negative, can be attributed to the relevant Fund in order to comply with the requirement that the assets and liabilities of each Fund are kept separate from all other Funds and that separate books and records are maintained for each Fund in which all transactions relevant to a Fund are recorded. At 31 December 2019, an amount of USD XXXXXX (2018: USD 1,477,853) was held in the Umbrella Cash Accounts.

(g) Margin accounts

Margin accounts represent the margin deposit amounts held with brokers as security for derivative financial instruments.

(h) Distribution policy

Dividends may be declared out of the accumulated net revenue (consisting of all revenue accrued including interest and dividends) and net realised and unrealised capital gains, and are accounted for when declared. Surplus net income for the year ended 31 December 2018 was distributed during the course of 2019.

The distribution on the redeemable participating shares is recognised in the Statement of Comprehensive Income as finance costs when they are ratified at the Annual General Meeting.

(i) Net gain or loss on financial assets and liabilities at fair value through profit or loss

This item includes changes in the fair value of financial assets and liabilities and excludes interest and dividend income and expense. Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised in the reporting period. Realised gains and losses on disposals of financial instruments classified as 'at fair value through profit or loss' are calculated using the Weighted Average Cost ("WAC") method. They represent the difference between an instrument's initial carrying amount and disposal amount, or cash payments or receipts made on derivative contracts (excluding payments or receipts on collateral margin accounts for such instruments).

(j) Adoption of new and amended accounting standards and interpretations

IFRIC 23, 'Uncertainty over income tax treatments'

IFRIC 23 provides a framework to consider, recognise and measure the accounting impact of tax uncertainties. The interpretation provides specific guidance in several areas where previously IAS 12 was silent. There is no specific guidance in IAS 12, and the Company today may be using different models to determine the unit of account and measure the consequences of tax uncertainties. The interpretation also explains when to reconsider the accounting for a tax uncertainty, and it states specifically that the absence of comment from the tax authority is unlikely, in isolation, to trigger a reassessment. There are no new disclosure requirements in IFRIC 23. IFRIC 23 is effective for annual periods starting on or after 1 January 2019. Adoption of IFRIC 23 did not have a material impact on the Company's financial statements.

There are no other new standards, interpretations or amendments to existing standards that are effective for the year beginning on or after 1 January 2019, that would have had a material impact on the financial statements of the Company.

Standards and amendments to existing standards effective 1 January 2019

A number of new standards, interpretations and amendments to published standards have been issued to date and are not yet effective for the financial statements of the Company for the year ended 31 December 2019, and have not been applied nor early adopted in preparing these financial statements.

The standards, interpretations and amendments issued but not yet effective at the date of the issuance of the financial statements are listed overleaf:

for the year ended 31 December 2019

2. Significant accounting policies (continued)

(j) Adoption of new and amended accounting standards and interpretations (continued)

Standards and amendments to existing standards effective 1 January 2019 (continued)

Standard:	Narrative:	Effective Date:*
Amendments to IFRS 3	Definition of a Business	1 January 2020
Amendments to IAS 1 and IAS 8	Definition of Material	1 January 2020
IFRS 17	Insurance Contracts	1 January 2021

^{*} Annual periods beginning on or after.

The Directors anticipate that the adoption of new standards, interpretations and amendments that were in issue at the date of authorisation of these financial statements, but not yet effective, will have no material impact on the financial statements in the year of initial application.

3 Taxation

The Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. It is not chargeable to Irish tax on its income or gains. Tax may arise on the happening of a chargeable event. A chargeable event includes any distribution payments to shareholders or any other encashment, redemption or transfer of shares.

No tax will arise on the Company in respect of chargeable events in respect of:

- a shareholder who is not an Irish resident and not ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company; and
- certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Following legislative changes in the Finance Act 2006, the holding of shares at the end of a Relevant Period will, in respect of Irish Resident investors, also constitute a chargeable event. To the extent that any tax issues arise on such a chargeable event, such tax will be allowed as a credit against any tax payable on the subsequent encashment, redemption or cancellation of the relevant Shares.

Relevant Period is defined as a period of 8 years beginning with the acquisition of a Share by a shareholder and each subsequent period of 8 years beginning immediately after the preceding relevant period.

Dividend income, interest and capital gains received by the Company may be subject to non-recoverable withholding tax in the countries of origin.

4 Share Capital

Authorised Share Capital

The authorised share capital of the Company is 1,000,000,000,000 shares of no par value.

Non-participating Shares

Seven non-participating shares of USD 1 each were issued for the purposes of incorporation of the Company. These shares are beneficially owned by the Manager. The Manager is an indirect subsidiary of Sanlam Ltd, the ultimate majority shareholder of the Company. The holder or holders of non-participating shares are entitled to one vote only in respect of all non-participating shares. The non-participating shares do not form part of shareholders' Funds. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

for the year ended 31 December 2019

4 Share Capital (continued)

Redeemable Participating Shares

Each Fund may issue one of more classes of shares and each class of shares in a Fund may have different charging structures and different minimum initial investment amounts, minimum additional investment amounts and minimum shareholding requirements. Each class of shares has a distinct fee structure as outlined in note 11.

Subscriptions to all Class E Funds will only be available with approval of the Directors. Subscriptions to certain other classes may also be restricted and require the approval of the Directors, and these are set out, if applicable, in the supplement of the Fund.

The redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. They carry voting rights. The participating share can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The participating share is carried at the redemption amount that is payable at the reporting date if the shareholder exercises the right to put the share back to the Company.

The shares issued by the Company are freely transferable and entitled to participate equally in the profits and dividends of the Company and in its net assets upon liquidation. The shares, which are of no par value, carry no preferential or pre-emptive rights and are entitled to one vote each at all meetings of the relevant class of Shareholders. All shares rank pari-passu.

The movement of the redeemable participating shares of each Fund during the years ended 31 December 2019 and 31 December 2018 are disclosed in the tables in the following pages.

Participating share transactions for the year ended 31 December 2019 and 31 December 2018:

7 Fair value of financial instruments

The following table shows financial instruments recognised at fair value. The fair value hierarchy shall have the following levels:

- Quoted prices in active markets for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2); and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

Assets measured at fair value at 31 December 2019 and 31 December 2018

The following tables analyse within the fair value hierarchy the Funds' financial assets measured at fair value through profit or loss at 31 December 2019 and 31 December 2018:

7 Fair value of financial instruments (continued)

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded derivatives, government bonds and collective investment schemes. The Fund does not adjust the quoted price for these instruments nor does it apply a discount to securities where the volume traded in the market is low to the Fund's holding.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. Over-the-counter derivatives such as interest rate swaps and forward currency contracts are classified within level 2. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include illiquid equity securities.

Significant transfers between levels 1, 2 and 3

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded derivatives, government bonds, futures contracts, exchange traded option contracts and collective investment schemes. The Fund does not adjust the quoted price for these instruments nor does it apply a discount to securities where the volume traded in the market is low to the Fund's holding.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. Over-the-counter derivatives such as interest rate swaps, rights and forward currency contracts are classified within level 2. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include illiquid equities.

The following tables show significant transfers between level 3 and level 2 of the fair value hierarchy for financial assets recognised at fair value for the year ended 31 December 2019:

for the year ended 31 December 2019

7 Fair value of financial instruments (continued)

Significant transfers between levels 1, 2 and 3 (continued)

There were no significant transfers between levels during the year ended ended 31 December 2019.

The following tables show significant transfers between level 3 and level 2 of the fair value hierarchy for financial assets recognised at fair value for the year ended 31 December 2018:

Sanlam World Equity Fund – 2018	
	Transfer from level 3 to level 2
Warrants	504
Sanlam Global Value Fund – 2018	
	Transfer from level
	3 to level 2
Warrants	1,738

Sanlam World Equity Fund and Sanlam Global Value Fund held a position in Ezion Holdings Ltd. Trading of the company's shares were suspended in August 2017. A decision was taken by the Valuation Committee to write down the value of this position by 30%. As a result, the position was transferred from level 1 to level 3 of the fair value hierarchy. The suspension was lifted in April 2018 and the shares resumed trading. The Funds disposed of their equity holding in Ezion Holdings Limited. However, the Funds continue to hold a related warrant on the stock. The warrants were transferred from level 3 to level 2 of the fair value hierarchy during the period.

Level 3 Assets measured at fair value reconciliation

The following tables show a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 between 1 January and 31 December 2019:

Denker Global Equity Fund

The level 3 position held by the Denker Global Equity Fund at 31 December 2019 and 31 December 2018 is the Accident Exchange Group Plc which is valued at USD Nil (2018: USD Nil)

Accident Exchange Group Plc is a delisted security and classified as level 3 due to its trading status.

There has been no movement in the value of the position in the year ended 31 December 2019 or the comparative period.

IFRS 7 requires a reconciliation showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a reconciliation has not been provided.

for the year ended 31 December 2019

7 Fair value of financial instruments (continued)

The Sanlam Equity Allocation Fund did not hold any level 3 positions at 31 December 2019.

The level 3 position held by the Sanlam Equity Allocation Fund at 31 December 2018 is Rolls-Royce Holding Pfd which is valued at GBP 426. This security is thinly traded and is classified as level 3 due to its trading status.

IFRS 7 requires a reconciliation showing the change in fair value due to a change in inputs used, where one or more of the inputs changes to reasonable alternative assumptions. As no reasonable alternative exists a reconciliation has not been provided.

Satrix Emerging Markets Equity Tracker Fund

The level 3 positions held by the Satrix Emerging Markets Equity Tracker Fund at 31 December 2019 is a special purpose vehicle which was spun out from Hanergy Thin Film Power Group Limited and valued at USD 28,044 (2018: USD Nil).

Trading was suspended on Hanergy Thin Film Power Group Limited on 20 May 2015 and it was classified as level 3 due to its trading status. Following approval by the Valuation Committee, in July 2015 a decision was taken to write down the value of the positions held in Hanergy Thin Film Power Group Limited by an amount of 44.5% from the last available reported price. In January 2016, the Valuation Committee approved that this position be written down to zero value with immediate effect. In June 2019 a proposal to delist the Company was agreed with shareholders. A special purpose vehicle was created and shareholders were issued with a proportionate interest in the new entity. It is the expectation that the special purpose vehicle will be listed at a future date. At 31 December 2019 the Fund's interest in the special purpose vehicle is fair valued based on the determined price at the date of restructuring.

Balance as at 31 December/1 January	15,255	-	
Total unrealised gains and losses for the year included in profit or loss for level 3 assets held at year end	15,255	-	

The level 3 position held by the Sanlam Equity Allocation Fund at 31 December 2019 is Rolls-Royce Holding Pfd which is valued at GBP 15,255. This security is thinly traded and is classified as level 3 due to its trading status

In 2018 Sanlam Global Value Fund held a position in Ezion Holdings Ltd which was classified as Level 3 at the beginning of 2018. Trading of the company's shares were suspended in August 2017. A decision was taken by the Valuation Committee to write down the value of this position by 30%. As a result, the position was transferred from level 1 to level 3 of the fair value hierarchy. The suspension was lifted in April 2018 and the shares resumed trading. The Fund disposed of its equity holding in Ezion Holdings Limited. However, the Fund continued to hold a related warrant on the stock. The warrants were transferred from level 3 to level 2 of the fair value hierarchy during 2018.

For the purpose of IFRS 7 for the reconciliation showing the change in fair value due to a change in inputs used, changes to one or more of the inputs to reasonably alternative assumptions, is irrelevant as there does not exist a reasonable alternative inputs.

for the year ended 31 December 2019

8 Financial assets and liabilities not measured at fair value

For all non-financial assets and liabilities at fair value through profit and loss, their carrying values are a reasonable approximation of fair value.

9 Offsetting financial assets and liabilities

IFRS 7 requires an entity to disclose information to enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on the entity's financial position.

At 31 December 2019, 22 Funds (2018: 21 Funds) held derivative financial instruments that were subject to an enforceable master netting arrangement or similar agreement.

The tables on the following pages provide information on the financial impact of netting for instruments subject to an enforceable master netting arrangement or similar agreement at 31 December 2019 and 31 December 2018.

The column "Related amounts not set off in the statement of financial position" in the following tables discloses amounts with respect to derivative financial instruments which are subject to master netting arrangements but were not offset due to meeting the net settlement/simultaneous settlement criteria or because the rights to set-off are conditional upon the default of the counterparty only.

11 Related party transactions and significant agreements

All related party transactions have been entered into and conducted under normal market conditions.

Significant Agreements

Directors' interests

At 31 December 2019, Haydn Franckeiss had an interest of 183,154 (2018: 183,154) shares in Denker Global Dividend Fund and 13,537 (2018: Nil) shares in Sanlam Real Assets Fund.

The other Directors who held office on 31 December 2019 had no interest in the shares of the Company or Funds at that date or at any time during the financial period.

Manager

Until 1 October 2018, SAMI acted as both Manager and Administrator to the Company pursuant to the Amended and Restated Management and Administration Agreement. Following the change of Administrator effective 1 October 2018, SAMI now acts only as Manager to the Company. SAMI is an ultimate subsidiary company of Sanlam Limited. Sanlam Life, a fellow subsidiary, is a significant indirect shareholder of the Company. The Manager is entitled to receive a management fee (a percentage of the net assets per annum) from each of the Funds as follows:

Fund	Share Class	Rate of Management fees

Performance Fee

For certain share classes of SIIP India Opportunities Fund, Sanlam Global Property Fund, Denker Global Financial Fund, Denker Global Equity Fund, Sanlam African Frontier Markets Fund, Anchor Global Equity Fund, Sanlam Global Convertible Securities Fund, Autus Global Equity Fund, Wisian Capital South African Equity Fund and Sanlam US Absolute Return Fund, the Manager shall also be entitled to receive out of the assets of the Funds a performance fee in respect of each performance period.

The performance periods for Sanlam African Frontier Markets Fund, Denker Global Financial Fund, Denker Global Equity Fund, Sanlam Global Property Fund, SIIP India Opportunities Fund and Sanlam Global Convertible Securities Fund comprise each successive six month period from 1 January to 30 June and from 1 July to 31 December. The performance periods for Anchor Global Equity Fund, , Autus Global Equity Fund, Wisian Capital South African Equity Fund and Sanlam US Absolute Return Fund comprise each annual period from 1 January to 31 December.

The performance periods for Sanlam Global Emerging Markets Fund comprise each calendar monthly period.

- (a) The performance fee shall be equal to 10% to 20% (depending on the fund) of the difference between the percentage movement in the Net Asset Value per Share (A) being the Initial Issue Price for the first performance period and the percentage movement in the relevant index as set out in the prospectus (the "Index") (B) during the performance period multiplied by the average of the Net Asset Value of the Fund as at each Valuation Point during the performance period prior to any accrual for performance fees but after accruing for all other fees and expenses.
- (b) Where the Fund has underperformed the Index during a performance period (where A-B is a negative number), the Manager will not repay any amounts of performance fee paid by the Fund in respect of previous performance periods but no further performance fees will be charged until such time as any underperformance is recaptured by the Fund (until A-B measured since the end of the last performance period in respect of which a performance fee was paid becomes positive).
- (c) For the performance period in which any underperformance is first recaptured, the performance fee will be calculated in accordance with paragraph (b) above, except that the performance fee will only take into account any subsequent outperformance (A-B will be measured since the end of the last performance period in respect of which a performance fee was paid). Performance fee calculations in subsequent performance periods will revert to being based on the performance over the relevant performance period as calculated in accordance with paragraph (a) above.
- (d) The performance fee shall be calculated by the Administrator (subject to verification by the Depositary) and accrued in the Net Asset Value calculated in respect of each Dealing Day based on the performance to date of the Fund during that performance period.

Net realised and unrealised capital gains plus net realised and unrealised capital losses as of the relevant Valuation Point shall be taken into account in calculating the Net Asset Value per Share. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised. Benchmarks will take account of income and capital gains/losses.

Administrator

In its role as the Administrator, Brown Brothers Harriman Fund Administration Services (Ireland) Limited is entitled to receive out of the assets of each Fund an annual fee ranging from 0.00% - 0.15% of the net assets of the Fund. Certain Funds are also subject to a minimum annual fee and/or additional annual fee ranging from USD 10,000 - 25,000 per annum. In addition, the Administrator is entitled to receive its reasonable costs and expenses incurred in the performance of its duties as Administrator of the Company. These fees shall accrue and be calculated on each dealing day and shall be payable monthly in arrears.

Prior to 1 October 2018, SAMI was the Administrator of the Company. SAMI was entitled to receive out of the assets of each Fund an annual fee at the same rates.

The administration fees earned by the Administrator during the year and outstanding accrued administration fees at 31 December 2019 and 31 December 2018 are presented in the Statement of Comprehensive Income and Statement of Financial Position respectively.

Investment Managers, Investment Advisors and Investment Allocation Manager

The Investment Managers are appointed by the Manager. For certain Funds and certain share classes of Funds, the Manager will pay out of its fees, the fees of the Investment Managers, Investment Allocation Manager and Investment Advisors (as applicable) appointed to those Funds.

For the remaining Funds of the Company, the fees of the appointed Investment Managers, Investment Allocation Manager and Investment Advisors (as applicable) are paid directly by the Fund.

The table below sets out the rates for the annual Investment Management fees paid directly by these Funds to the Investment Managers (in respect of each share class of the relevant Fund). These fees are payable monthly in arrears and accrued by reference to the net assets of the relevant share class on each dealing day.

The aggregate management fees and investment management fees earned by the Manager and Investment Managers during the year are disclosed in the Statement of Comprehensive Income.

Four of the appointed Investment Managers, Sanlam Investments UK Limited, Sanlam Investment Management (Pty) Limited, Sanlam Private Investments (UK) Limited and Centre Asset Management LLC and are related parties to the Company and the Manager. Sanlam Investments UK Limited is also the appointed Investment Allocation Manager for a number of the Funds.

Securities Lending

Pursuant to the Securities Lending Agency Agreement, SAMI was appointed as securities lending agent to the Company. Pursuant to the Securities Lending Sub-Agency Agreement, effective 24 February 2016, Brown Brothers Harriman & Co. was appointed by SAMI as securities lending sub-agent to the Company.

The securities lending agent and securities lending sub-agent receive remuneration for their services provided as part of the Company's securities lending arrangements, the terms of which are set out in the agreements referenced above.

Further details on the Company's securities lending activity are disclosed in note 16.

Registrar and Transfer Agent

Brown Brothers Harriman Fund Administration Services (Ireland) Limited is the appointed Registrar and Transfer Agent to the Company. Transfer agency fees are charged at normal commercial rates. The Registrar and Transfer Agent is not a related party to the Company.

Depositary

Brown Brothers Harriman Trustee Services (Ireland) Limited is the appointed Depositary to the Company. The Depositary will be entitled to receive from the Company, out of the assets of the Fund, an annual fee which will not exceed 0.02% of the net assets of the Fund (plus VAT, if any) together with reasonable costs and expenses incurred by the Depositary in the performance of its duties as Depositary of the Fund. These fees shall accrue and be calculated on each Dealing Day and shall be payable monthly in arrears. The Depositary shall also be entitled to be reimbursed out of the assets of the Fund all agreed transaction charges (which will be charged at normal commercial rates).

Management and investment management fees

The Manager may rebate a portion of its fees to certain of the Funds of Sanlam Universal Funds plc, Sanlam Global Funds plc and Sanlam Qualifying Investors Funds plc where those Funds are themselves invested into Funds of the Company or enter into special fee arrangements and/or rebate agreements, in its sole discretion, with certain shareholders who may be affiliates of the Manager, including Botswana Insurance Fund Management, Sanlam Private Investments (Pty) Limited, Sanlam Life Insurance Limited, Sanlam Life & Pensions (UK) Limited and Sanlam Collective Investments Limited. With the exception of P-Solve Inflation Plus Fund, rebate income earned by each of the Funds of the Company, as disclosed on the Statement of Comprehensive Income, was paid from the profits of the Manager.

Related Party Transactions

Certain Sanlam Universal Funds plc sub-funds operate as the primary investments for certain sub-funds of Sanlam Global Funds plc and Sanlam Qualifying Investors Funds plc.

Sanlam Investments and Pensions Limited invests in the E Class of the Sanlam Global Bond Fund.

SAMI is appointed as Investment Manager to certain segregated portfolios which also invest into Class E share classes of sub-funds of the Company.

At an EGM on 25 March 2019, shareholders of Bridge Global Equity Income Growth Fund approved the merger of the fund into Bridge Global Managed Growth Fund. The merger took effect from 23.59pm on Friday 12 April 2019. As part of the merger assets of Bridge Global Equity Income Growth Fund were transferred to Bridge Global Managed Growth Fund. The fair value of the assets at the date of transfer was USD 4,305,286.

The following in specie transfers occurred during the year ended 31 December 2018:

Subscriptions in Cameron Hume Global Fixed Income ESG Fund and redemptions from Sanlam Global Bond Fund by the shareholder, Sanlam Institutional Bond Fund, were made by means of a transfer of assets with a fair value at the date of transfer of USD 79,819,413.

Subscriptions in Sanlam Real Assets Fund include in specie transfers from shareholders during the year in exchange for assets with a fair value at the date of transfer of USD 67,980,076.

Cross Investments

The following are the fair values of intercompany positions held by Funds within the Company at 31 December 2019:

		Fair Value at 31
Fund Name	Position Held	December 2019
Sanlam Accel Income Fund	Sanlam US Dividend Fund	GBP 1,492,167
Sanlam Accel Income Fund	Sanlam Strategic Bond Fund	GBP 1,789,692
Sanlam Al Global Managed Risk Fund	Satrix World Equity Tracker Fund	USD 69,696,549

Details of the Managers policies with respect to cross investment are documented in the Prospectus of the Company and the offring supplements of applicable Funds.

Further details regarding the intercompany positions as disclosed above and the investment strategies of the relevant funds are disclosed in the portfolio of investments and the reports of the investments managers.

for the year ended 31 December 2019

12 Efficient portfolio management

The Company on behalf of a Fund may employ techniques and instruments relating to transferable securities, money market instruments and/or other financial instruments in which it invests for efficient portfolio management purposes. Use of such techniques and instruments should be in line with the best interests of Shareholders and will generally be made for one or more of the following reasons:

- (a) the reduction of risk:
- (b) the reduction of cost; or
- (c) the generation of additional capital or income for the relevant Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules.

The Funds may engage in transactions in Financial Derivative Instruments (FDI) for the purposes of efficient portfolio management. Further details on the Funds' investments in FDIs are disclosed in note 13.

The Funds may enter into forward foreign currency contracts for efficient portfolio management purposes. Forward foreign currency exchange contracts are used to hedge against anticipated future changes in exchange rates which otherwise might either adversely affect the value of the Fund's portfolio securities or adversely affect the price of securities which the Funds intend to purchase at a later date.

The Funds may also enter into futures contracts for efficient portfolio management purposes. The primary purpose for which the Funds use futures contracts are cash equalisation, hedging and return enhancement. The purpose of cash equalisation is to expose uninvested cash within the Funds to equity market-like returns and ensure that the Funds' liquid assets are utilised as though invested in the markets.

Interest rate swaps are used for hedging against adverse movements in interest rates. Options offer the ability, when used as a hedging tool to be utilised in efficient portfolio management, to provide offsetting insurance of asset value in an uncertain or highly volatile market environment. The Funds, where permitted, may use options to hedge or achieve exposure to a particular currency, underlying security or equity index.

By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist the Funds in meeting their investment objectives.

The Funds also engage in securities lending activities for efficient portfolio management purposes, details of which are set out in note 16. Disclosures in accordance with the EU Securities Financing Transactions Regulation ("SFTR") are set out in the unaudited schedules attached to these financial statements.

13 Transactions in Financial Derivative Instruments

The Funds may engage in transactions in Financial Derivative Instruments (FDI) for the purposes of efficient portfolio management, investment and/or to protect against risks within the conditions and limits laid down by the Central Bank from time to time.

Hedging is used by the Funds to limit or control risks, such as adverse movements in exchange rates and interest returns.

By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist the Funds in meeting their investment objectives.

The relevant Investment Manager will look to ensure that the techniques and instruments used are economically appropriate in that they will be realised in a cost-effective way.

for the year ended 31 December 2019

13 Transactions in Financial Derivative Instruments (continued)

Specific instruments

At 31 December 2019, 28 Funds hold derivative financial instruments, namely forward currency contracts, futures contracts, interest rate swaps and option contracts. Details of the open derivative financial instruments at the reporting date are included in the Portfolio of Investment for each Fund.

Forward currency contracts

Certain of the Funds may invest in Forward currency contracts. As part of its investment policy, a Fund may enter into transactions which alter the currency exposure of underlying assets in which the Fund is invested from time to time where the Investment Manager considers it appropriate to retain the currency exposure consistent with the Fund's investment objective. This may involve a Fund investing in an asset denominated in currency (X) where the Investment Manager wishes to translate the currency denomination of that asset (X) into a third party currency (Y) that may be different to the base currency through the use of forward currency contracts. There can be no guarantees that the practice of investing in an uncorrelated currency (Y) will be effective and there is a risk of loss in the event of adverse currency movements relative to both the currency of denomination and the base currency.

Investment in FDI permits the Fund to manage risk and invest more efficiently to achieve the investment objective of the Fund. These strategies include increasing the level of exposure to non-base currency in the Fund's portfolio in response to the Investment Manager's views on market prospects and prices and values. Gains and losses arising from such transactions are reflected at Fund level in the Statement of Comprehensive Income.

Where a Fund utilises FDI which alter the currency exposure characteristics of transferable securities held by that Fund, the performance of that Fund may be strongly influenced by movements in foreign exchange rates because currency positions held by the Fund may not correspond with the securities positions held.

Futures contracts

Certain of the Funds may invest in Futures contracts for hedging or investment purposes. Futures contracts allow investors to hedge against market risk or modify exposure to the underlying market. They can also be used to "equitise" cash balances as described in note 12. Using futures to achieve a particular strategy instead of transacting the underlying or related equity security or equity index, can result in both lower transaction costs as well as more timely execution of portfolio strategy. Since these contracts are marked to market daily, investors can, by closing out their position, exit from their obligation to buy or sell the underlying assets prior to the contract's delivery date. Futures contracts are valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised.

Interest rate, index and inflation swaps

Interest rate swaps may be used for hedging against adverse movements in interest rate. Interest rate swaps involve the exchange by a Fund with a counterparty of their respective commitments to pay or receive interest. The differential to be paid or received on the interest rate swap is recognised over the life of the agreement as a realised gain or loss with payments made or received on a net basis on the stated payment dates. The interest rate swap agreements are stated at fair value. A Fund may also use index and inflation rate swaps in a similar manner, to exchange payments at a fixed or floating rate in return for payments based on realised inflation or to swap the return of an index such as an interest rate index with that of another. Such swaps are also stated at fair value. Unrealised gains/losses are reported in the Statement of Comprehensive Income.

Contracts for difference

Contracts for Difference ("CFDs") are agreements between a buyer and seller to exchange the difference in price of an underlying instrument (equity) over a period of time. CFDs are cash settled. CFDs are a perpetual contract, which means a position will not expire unless the position is closed out. The Fund may use CFDs to hedge against market risk or adjust exposure to an underlying market. Any market risk arising from CFDs will be totally offset at all times and shall not be used for the purposes of obtaining leverage. CFDs are stated at fair value. Unrealised gains/losses are reported in the Statement of Comprehensive Income.

for the year ended 31 December 2019

13 Transactions in Financial Derivative Instruments (continued)

Specific instruments (continued)

Option contracts

Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a currency at a specified rate. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. A Fund, where permitted to use options, may be a seller or buyer of put and call options. Options are liquid and traded efficiently. Changes in the value of open options contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised. All open put option positions as at 31 December 2018 are covered and are not used for the purposes of obtaining leverage.

Risks

Market risk

This is the general risk attendant to all investments that the value of a particular investment will change in a way detrimental to the portfolio's interest.

Management risk

FDI are highly specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The successful use of FDI draws upon the Investment Manager's special skills and experience and usually depends on the Investment Manager's ability to forecast price movements, interest rates, or currency exchange rate movements correctly.

Should prices, interest rates, or exchange rates move unexpectedly, a portfolio may not achieve the anticipated benefits of the transactions or may realise losses and thus be in a worse position than if such strategies had not been used. The use of FDI requires an understanding not only of the underlying instrument but also of the FDI itself, without the benefit of observing the performance of the FDI under all possible market conditions. In particular, the use and complexity of FDI require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that an FDI adds to a portfolio and the ability to forecast price, interest rate or currency exchange rate movements correctly.

Counterparty and Credit Risk

This is the risk that a loss may be sustained by a portfolio as a result of the failure of a counterparty to an FDI to comply with the terms of the FDI contract. The credit risk for exchange-traded FDI is generally less than for privately negotiated FDI, since the clearing house, which is the issuer or counterparty to each exchange-traded FDI, provides a guarantee of performance. This guarantee is supported by a daily payment system (i.e., margin requirements) operated by the clearing house in order to reduce overall credit risk. For privately negotiated FDI, there is no similar clearing agency guarantee. Therefore, the Investment Manager will consider the creditworthiness of each counterparty to a privately negotiated FDI in evaluating potential credit risk.

Liquidity Risk

Liquidity risk exists when a particular instrument is difficult to purchase or sell. If an FDI transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated FDI), it may not be possible to initiate a transaction or liquidate a position at an advantageous price.

Legal Risk

The use of OTC FDI, such as forward contracts, swap agreements and CFDs, will expose the Fund to the risk that the legal documentation of the relevant OTC contract may not accurately reflect the intention of the parties.

for the year ended 31 December 2019

13 Transactions in Financial Derivative Instruments (continued)

Risks (continued)

Other risks

Other risks in using FDI include the risk of mispricing or improper valuation of FDI and the inability of FDI to correlate perfectly with underlying assets, rates and indices. Many FDI, in particular privately negotiated FDI, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the portfolio concerned.

FDI do not always perfectly or even closely track the value of the assets, rates or indices they are designed to track. Consequently, a portfolio's use of FDI may not always be an effective means of, and sometimes could be counterproductive to, furthering the portfolio's investment objective.

Collateral

At 31 December 2019 and 31 December 2018, the Funds have not received any non-cash assets as collateral with respect to the open FDIs.

Margin accounts, as disclosed in the Statement of Financial Position, represent cash deposited with brokers transferred against open FDIs. The balances may be restricted.

Gains and losses on Financial Derivative Instruments

Details of the net unrealised gains/(losses) on open forward currency contracts, interest rate swaps, futures and options if any, are disclosed in the Portfolio of investments of each Fund.

Net realised and change in unrealised gains/(losses) on FDI's are included in the Statement of Comprehensive Income of each Fund within Net gains/(losses) on financial assets and liabilities at fair value through profit or loss.

Note 2(d) outlines the Company's specific accounting policies with respect to FDI's.

14 Soft commissions

During the year, the Investment Manager and connected persons to certain of the Funds have entered into soft commission arrangements with brokers in respect of which certain goods and services used to support the investment decision process were received. The Investment Manager and connected persons do not make direct payment for these services but do transact an agreed amount of business with the brokers on behalf of the Company and commission is paid on these transactions.

The goods and services utilised for the Company include computer hardware and software used for economic and political analysis, portfolio analysis including valuation and performance measurement, market analysis, data and quotation services and investment related publications. The Investment Manager considers these arrangements are to the benefit of the Company and has satisfied itself that it obtains best execution on behalf of the Company and the brokerage rates are not in excess of customary institutional full service brokerage rates.

15 Contingent and cross liability of Funds

The Directors are not aware of any such existing or contingent liability at 31 December 2019 or 31 December 2018. The Company's amended Articles provide for segregated liability between the various Funds. These provisions, and the Funds' application of them may not yet have been fully tested by Irish or foreign courts. Accordingly, while the liabilities of one Fund will not generally impact on or be paid out of the assets of another Fund, it is not entirely free from doubt that the assets of any Fund are protected from the liabilities of other Funds of the Company.

As at 31 December 2019 and 31 December 2018, there were no cross liabilities held between the Funds.

for the year ended 31 December 2019

16 Securities lending activities

Securities lending activities are conducted through SAMI and Brown Brothers Harriman & Co pursuant to the Securities Lending Agency Agreement and Securities Lending Sub-Agency Agreement dated 24 February 2016.

In this arrangement, the Company transfers securities to a counterparty, in return for which it is agreed that securities of the same kind and amount should be transferred back to the Company at a later date. The arrangement has the substance of a loan of the Company's securities in return for collateral.

Aggregate income arising from securities lending activities consists of fees charged to counterparty, where the counterparty has provided collateral other than cash, plus net realised income derived from investments of cash collateral less any rebate payable to counterparty on cash collateral less any commissions or similar transaction costs. Pursuant to the Securities Lending Agency Agreement, income from securities lending activities is split in the ratio of 70:30 in favour of the Company, with SAMI receiving 30% as remuneration for their services.

The tables below and overleaf disclose the income arising from securities lending activities, the costs and fees incurred, the exposure at the reporting date and the amount of collateral held.

At 31 December 2019 and 31 December 2018, all collateral is in the form of high quality government bonds.

At 31 December 2019, the counterparties to the Funds' outstanding securities lending activities are Citigroup, Credit Suisse, Deutsche Bank, HSBC Bank, JP Morgan Securities, Societe Generale, Morgan Stanley & Co. International and UBS. In other months during the reporting period, additional counterparties included ING Bank, Merrill Lynch International and Goldman Sachs.

The following Funds incurred the following income, costs and fees in relation to securities lending activities for the year ended 31 December 2019:

^{1 %} of net assets

18 Financial instruments and associated risks

The Funds maintain positions in a variety of non-derivative financial investments and a limited number of financial derivative instruments as determined by their investment management strategies. The Funds' investment portfolios are comprised of quoted and non-quoted equity, debt and derivative investments and investments in underlying funds.

The Funds' investing activities expose them to various types of risks that are associated with the financial investments and markets in which they invest. The significant types of financial risks to which the Funds are exposed include market risk, liquidity risk and counterparty credit risk.

Asset allocation is determined by the Investment Manager or the Investment Allocation Manager (where applicable) to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by each Fund's Investment Manager or Investment Allocation Manager (where applicable).

An Investment Manager is appointed to each Fund and is provided with an Investment Management Agreement which includes a detailed set of guidelines on the parameters within which the portfolio of assets (for an Investment Manager within a Multi Managed Fund) or a Fund (for single Investment Manager Funds) must be managed. These guidelines will include items such as maximum exposure to a single issuer, tracking error limits and the relevant UCITS rules with which all UCITS Funds are required to comply. Each Investment Manager is required to report to SAMI on a monthly basis that they have managed the portfolio in accordance with the Investment Management Agreement and Guidelines and that no breaches occurred.

² % of the gains in net assets (above a benchmark if applicable)

for the year ended 31 December 2019

18 Financial instruments and associated risks (continued)

If during the course of the month the Investment Manager does detect a breach they must notify SAMI immediately with the details of the breach, its cause, the impact on the Fund/Portfolio and their proposed action to resolve the breach.

SAMI will engage with the relevant Investment Manager and/or the Investment Allocation Manager (as applicable) to determine what action should be taken (this can include putting the Fund back to the position it would have been in if the breach had not taken place). The Depositary will also be consulted to ensure they are in agreement with the proposed remedy.

Each Investment Manager appointed by SAMI will have its own risk management policies and procedures in place, which may differ from Investment Manager to Investment Manager, and these will be considered by the Investment Allocation Manager (where the Investment Allocation Manager has been appointed to the applicable Fund) and SAMI at the time of assessing the Investment Manager and in regular periodic assessments of the Investment Manager. Varieties of methods are used to monitor market risk and are described below.

Investment reports, detailing the performance of the Funds are considered by the Board of Directors on a quarterly basis.

The nature and extent of the financial investments outstanding at the reporting date and the risk management policies employed by the Fund are detailed in the following pages.

(i) Market Risk

The potential for changes in the fair value or cash flows of the Funds' investment portfolio is referred to as market risk. Categories of market risk include currency risk, interest rate risk and other price risk.

The Company's market risk strategy is driven by the Company's Funds investment objectives. The Board has instructed each Investment Manager, and Investment Allocation Manager to manage each of the risks in accordance with policies and procedures in place.

(a) Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

Several of the Funds invest in financial investments and enter into transactions denominated in currencies other than their functional currency. Consequently, the Funds may be exposed to risks that the exchange rate of its functional currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Fund's assets or liabilities denominated in currencies other than the functional currency.

When considering the asset allocation of the portfolio or Fund, each appointed Investment Manager factor into their considerations the likely movement of foreign exchange rates in investment decisions. Where the Investment Managers have an approved risk management process filed with SAMI and approved by the Central Bank, they may use financial derivative instruments, such as forward currency contracts.

Each Investment Manager must report on a monthly basis to SAMI that the portfolio or Fund is managed in accordance with their investment management agreement, guidelines and risk management process, as applicable.

Certain of the Funds may also enter into forward currency contracts to mitigate the exchange rate risk between the base currency of the relevant Fund and the currency in which shares in a class of that Fund are designated where that designated currency is different to the base currency of the specific Fund

To the extent that hedging is successful, the performance of the hedged class is likely to move in line with the performance of the underlying assets and investors in the hedged class will not benefit if the class currency falls against the base currency and/or the currency in which the assets of the Fund are denominated. Whilst gains and losses arising from such transactions are reflected at Fund level in the Statement of Comprehensive Income, the specific costs and gains/(losses) of the share class hedging transactions accrue solely to the relevant class and may not be combined or offset against the exposures of other share classes or specific assets.

for the year ended 31 December 2019

18 Financial instruments and associated risks (continued)

(i) Market Risk (continued)

(a) Currency Risk (continued)

The following tables set out the Funds' exposure to foreign currency risk and sensitivity analysis. The amounts disclosed for investments in the tables overleaf for 31 December 2019 and 31 December 2018 represent the unrealised gain/(loss) for forward currency and futures contracts, interest rate swaps and the fair value for securities.

Currency risks may result from exposures to changes in spot prices, forward prices and volatilities of currency rates. The percentage movement as defined at the bottom of the tables has been applied to these figures to show their sensitivity to movements in foreign currency rates.

The Fund's exposure to foreign currency risk at 31 December 2019 and 31 December 2018 has been set out below/overleaf:

Bridge Global Property Income Fund

^{*}The estimated movement is based on the average of the last two years exchange rate movements which management consider is a reasonably possible change in foreign exchange rates, but actual results can differ significantly.

(b) Interest Rate Risk

Interest rate risks may result from exposures to changes in the level, slope and curvature of the yield curve, the volatility of interest rates, mortgage prepayment speeds and credit spreads.

The Funds may invest in fixed income securities and swap contracts. Any change to relevant interest rates for particular securities may result in the Investment Manager being unable to secure similar returns upon the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general, have the opposite effect. Other assets and liabilities bear no interest rate risk.

For the Funds that invest in fixed income securities, the appointed Investment Managers review the positions on at least a daily basis.

The estimated movement is based on management's determination of a reasonably possible change in interest rates, taking into account current market conditions and expectations for future interest rate movements, but actual results can differ significantly.

(c)

Other Price Risk

Other price risks may result from exposure to changes in the prices and volatilities of individual equities, equity baskets, equity indices, and commodities.

Price risk is the risk that the value of a financial investment will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or any factor affecting financial investments traded in the market. It represents the potential loss each Fund might suffer through holding market positions in the face of price movements. Each appointed Investment Advisor considers the asset allocation of the portfolio in order to spread the risk associated with particular market sectors whilst continuing to follow the Fund's investment objective.

Each Fund is required to be managed in accordance with UCITS rules. These rules set out in detail requirements for diversification that seek to mitigate the impact of other price risk. Each Investment Manager is required to report to SAMI each month that the respective Fund or portfolio (where the Fund is multimanaged) has been managed in accordance with the Investment Management Agreement and guidelines agreed between Investment Manager and SAMI.

As the majority of the Funds' financial investments are carried at fair value with fair value changes recognised in the Statement of Comprehensive Income, all changes in market conditions will directly affect net assets attributable to holders of redeemable participating shares. The Fund's quantitative exposure to price risk at the reporting date is represented by the financial assets and liabilities at fair value through profit or loss which are analysed in the schedule of investments of each Fund.

18 Financial instruments and associated risks (continued)

(ii) Liquidity Risk

Liquidity risk is defined as the risk that a Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Exposure to liquidity risk increases because of the possibility that the Fund could be required to redeem its shares earlier than expected. The Fund is exposed to cash redemptions of its redeemable shares on a regular basis. Shares are redeemable at the holder's option based on the Fund's net asset value per share at the time of redemption calculated in accordance with the Fund's constitution.

The Funds provide for the subscription and redemption of shares and are, therefore, exposed to the liquidity risk of meeting shareholder redemptions at any time.

The majority of the Company's financial investments are listed securities trading on a regular basis which are readily realisable. However, certain of the Funds may also invest in emerging and frontier markets or have exposure to such markets which involve additional risks and special considerations. Such risks can include less liquidity, longer settlement periods for securities transactions and limitations on repatriation of invested capital and the ability to exchange local currencies for US dollars which increase liquidity risk. As a result, all Investment Managers are required to keep appropriate levels of cash or near cash investments to meet normal day to day liquidity demands, for example from normal levels of investor redemptions and to meet expense payments as they fall due. The Company has also agreed credit lines with their bankers, Brown Brothers Harriman, which allow for temporary overdrafts to cover periods of extreme liquidity demands. However, it should be noted that in extreme conditions, it may be difficult for a Fund to realise an investment on short notice without suffering a discount to market value.

In the event of significant requests for redemption of shares resulting in the Fund having to liquidate investments more rapidly than otherwise desirable in order to raise cash for the redemptions and achieve a market position appropriately reflecting a smaller asset base, the Board of Directors has the ability to levy a dilution charge so that the investors remaining in the Fund are not disadvantaged.

The Fund manages its obligation to repurchase the shares when required to do so and its overall liquidity risk as follows:

- The articles provide that the Company cannot affect the repurchase of Shares, if after payment of any account in connection with such repurchase, the Net Asset Value of the issued share capital would be equal or less than €300,000 or its foreign currency equivalent.
- The Directors are entitled to limit the number of shares of any Fund repurchased on any Dealing Day to Shares representing 10% of the total Net Asset Value of Shares of that Fund in issue on that Dealing Day. In this event, the limitation will apply pro-rata so that all shareholders wishing to have shares of the Fund repurchased on that Dealing Day realise the same proportion of such Shares and Shares not repurchased, but which would have otherwise have been repurchased, will be carried forward for repurchase on the next Dealing Day and will be dealt with in priority (on a rateable basis) to repurchase request received subsequently. If requests for repurchases are carried forward, the Administrator will inform the shareholders affected.
- The Articles contain special provisions where a repurchase request received from a Shareholder would result in more than 5 % of the Net Asset Value of Shares of any Fund being repurchased by the Company on any Dealing Day. In such a case the Company may satisfy all or part of the repurchase request by a distribution of investments of the relevant Fund in specie provided that such a distribution would not be prejudicial to the interests of the remaining Shareholders of that Fund. The Shareholder however may require the Company to sell such investments on his behalf and pay him the proceeds of sale less any costs incurred in connection with such sale.

for the year ended 31 December 2019

18 Financial instruments and associated risks (continued)

(ii) Liquidity Risk (continued)

The Directors may at any time temporarily suspend the calculation of the Net Asset Value of any Fund and the issue, repurchase and conversion of Shares and the payment of repurchase proceeds during inter alia any period during which any transfer of Funds involved in the realisation or acquisition of investments of the relevant Fund cannot, in the opinion of the Directors, be effected at normal prices or rates of exchange or any period during which the Directors are unable to repatriate Funds required for the purpose of making payments due on repurchase of Shares in the relevant Fund, or any period when the Directors consider it to be in the best interest of the Company. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

The Funds' policy is to satisfy redemption requests by the following means:

- 1. Withdrawal of cash deposits;
- 2. Disposal of highly liquid assets (i.e., short-term, low-risk debt investments);
- 3. Disposal of other Investments:
- 4. The Fund may borrow on a temporary basis in order to fund redemptions; and
- 5. Searching for new investors.
- The Fund invests primarily in marketable securities and other financial instruments, which under normal market conditions are readily convertible to cash. In addition, the Fund's policy is to maintain sufficient cash and cash equivalents to meet normal operating requirements and expected redemption requests.
- Trading limits and collateral arrangements limit the extent to which liabilities can be incurred by the Fund.
- It is the Funds' policy that the Investment Manager monitors the Funds' liquidity position on a daily basis and that the Board of Directors reviews it on a quarterly basis.

The tables below/overleaf summarise the liquidity profile of each Fund's financial liabilities and gross-settled derivatives based on contractual undiscounted cash flows. Balances due within 6 months equal their carrying amounts, as the impact of discounting is insignificant. The tables also analyse the liquidity profile of each Fund's financial assets (undiscounted where appropriate) in order to provide a complete view of the Fund's contractual commitments and liquidity. Gross settled derivatives are calculated based on the spot price of the index.

¹Certain Funds, such as Sanlam African Frontier Markets Fund and ABSA Africa Equity Fund Equity Fund, invest in emerging and frontier markets in accordance with their investment objectives. Given the nature of such markets, certain securities of such funds may be difficult or impossible to sell at the time and the price that the Investment Manager would like or be limited to limitations on repatriation and the ability to exchange local currency for US\$. The Investment Manager may therefore have to lower the price to effect a secondary market sale, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on the relevant Fund's management or performance.

¹Certain Funds, such as Sanlam African Frontier Markets Fund and ABSA Africa Equity Fund Equity Fund, invest in emerging and frontier markets in accordance with their investment objectives. Given the nature of such markets, certain securities of such funds may be difficult or impossible to sell at the time and the price that the Investment Manager would like or be limited to limitations on repatriation and the ability to exchange local currency for US\$. The Investment Manager may therefore have to lower the price to effect a secondary market sale, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on the relevant Fund's management or performance.

18 Financial instruments and associated risks (continued)

(iii) Credit Risk

Credit risk is the risk that a counterparty to a financial asset will fail on a commitment that it has entered into with the Fund. A Fund is subject to the possibility of insolvency, bankruptcy or default of a counterparty with which the Fund, as appropriate, trades such instruments. This could result in substantial losses to the Fund.

Each Fund will be exposed to credit risk on the counterparties with which it trades in relation to over-the-counter ("OTC") derivative contracts. Such instruments are not afforded the same protections as may apply to participants trading futures or options on organised exchanges, such as the performance guarantee of an exchange clearing house. Each Investment Manager who invests in derivatives is required to prepare a risk management process which will be approved by the Central Bank. Investment Managers who enter into transactions involving financial derivatives are required to report to the Manager on a monthly basis that they have complied with the requirements of their risk management process.

The various Investment Managers to the Funds have adopted procedures to reduce credit risk related to their dealings with counterparties in respect of Bonds and Collective Investment Schemes. Before transacting with any counterparty, the Investment Manager or its affiliates evaluate both credit-worthiness and reputation by conducting a credit analysis of the party, their business and reputation. The reputational risk of approved counterparties is then monitored on an ongoing basis, including periodic reviews of financial statements and interim financial reports as needed.

In order to reduce exposure to credit losses, master netting agreements ("MNAs") are entered into with OTC derivative counterparties, excluding those counterparties executing only spot foreign exchange contracts. While MNA's do not result in an offset of reported assets and liabilities because transactions are generally settled on a gross basis, MNA's do provide for the reduction of credit risk on favourable contracts to the extent of the value of unfavourable contracts in the event of default as all amounts with the counterparty are terminated and settled on a net basis.

A Fund may enter into stocklending/reverse and repurchase agreements provided that it is within the conditions and the limits laid down by the Central Bank, allowed within the supplement or the purpose of generating income for the Company with an acceptable level of risk. Such arrangements are those where the Company or the Depositary delivers securities to a third party in return for which it is agreed those securities or securities of the same kind and amount should be redelivered to the Company or the Depositary at a later date.

Collateral obtained, in terms of the Regulations, under a securities lending arrangement must be liquid and in the form of one of the following:

- (i) cash;
- (ii) government or other public securities;
- (iii)certificates of deposit issued by relevant institutions;
- (iv)bonds/commercial paper issued by relevant institutions or by non-bank issuers where the issue and issuer are rated A1 or equivalent;
- (v) letters of credit with a residual maturity of three months or less, which are unconditional and irrevocable and which are issued by relevant institutions; and
- (vi)equity securities traded on a stock exchange in the EEA, Switzerland, Canada, Japan, the United States, Jersey, Guernsey, the Isle of Man, Australia or New Zealand.

The counterparty to a securities lending arrangement must have a minimum credit rating of A2 or equivalent.

for the year ended 31 December 2019

18 Financial instruments and associated risks (continued)

(iii) Credit Risk (continued)

At 31 December 2019, the following financial assets were exposed to counterparty credit risk:

- investments in debt securities;
- investments in collective investment schemes;
- investments in exchange-traded funds; and
- derivative financial assets.

The fair value of these financial assets best reflects the maximum counterparty credit risk exposure at the reporting date.

The Company measures credit risk and expected credit losses on financial assets measured at amortised cost using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward-looking information in determining any expected credit loss. At 31 December 2019 and 2018, all cash and broker balances are held with counterparties with a credit rating of A+ or higher and can be settled within 1 week. Management consider the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Company.

The maximum exposure to credit risk as at the reporting date can be analysed as per the tables in the following pages for the year ended 31 December 2019 and 31 December 2018.

No positions are either past due or impaired.

20 Transaction costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Total transaction costs for the year ended 31 December 2019 and 31 December 2018 are detailed below:

	Year ended	Year ended

21 Reconciliation of net asset value presented in the financial statements to the dealing net asset value

Sanlam African Frontiers Market Fund

In assessing the value of the Fund's Zimbabwe listed securities for the purposes of calculating the dealing NAV, the Manager applies a discount to the listed price of the securities. The discount reflects the Managers expectation of the realisable value as opposed to the value determined by the listed prices on the Zimbabwe Stock Exchange. The discount reflects trading, currency and inflationary difficulties related to Zimbabwe securities. The applied discount is determined based on multiple inputs. The primary input is determined by assessing for a selected dual listed security the discount that is applied between the price traded in the London Stock Exchange and the Zimbabwe Stock Exchange. A secondary input is an inflation adjustment that reflects the time taken to complete trades and the inflationary environment in Zimbabwe.

In accordance with IFRS 13, Fair Value Measurement, if there is a quoted price in an active market for an asset or a liability, an entity shall use that price without adjustment when measuring fair value. As a result, in the preparation of the financial statements the discount applied to the dealing NAV has been reversed and the listed prices at the reporting date are the only inputs in determining the fair value of the Zimbabwe listed securities.

The tables below detail the differences in the NAV and NAV/share between what is reported for dealing purposes and what is reflected in the financial statements.

Description	31 December 2019 USD	31 December 2018 USD
Net asset value used in the calculation of the dealing net asset value	72,735,288	84,855,957
Reversal of discount applied to Zimbabwe positions	1,515,401	27,643,767
Net asset value per financial statements	74,250,689	112,499,724

for the year ended 31 December 2019

22 Significant events during the year

Since 31 December 2018, a number of Funds had a change in name as follows:

Name at 31 December 2018:	Name changed to:
Sanlam FOUR US Dividend Fund	Sanlam US Dividend Fund
Sanlam FOUR Global Equity Fund	Sanlam Global Value Fund
Sanlam FOUR Stable Global Equity Fund	Sanlam Stable Global Fund
Sanlam FOUR Active UK Equity Fund	Sanlam Active UK Fund
Sanlam FOUR Multi-Strategy Fund	Sanlam Multiy Strategy Fund
Denker Global Emerging Markets Fund	Sanlam Global Emerging Markets Fund
Sanlam Managed Risk Fund	Sanlam Al Global Managed Risk Fund

Perpetua Global Equity UCITS Fund and Sanlam US Absolute Return Fund, authorised designated subfunds of the Company, launched on 28 January 2019 and 7 October 2019, respectively.

On 23 December 2019, the Company issued a new prospectus for the Company and new offering supplements for all Funds of the Company. The updated documents were issued to address a number of changes, primarily as a result of the implementation of the Securities Financing Transactions Regulations ("SFTR"). In addition, a number of Funds had a change in name as mentioned above.

The Sanlam Global High Quality Fund also introduced new minimum subscription amounts for each share class and redesignated the Class F Income (GBP) Shares as Class I Income (GBP) Shares.

At an EGM on 25 March 2019, shareholders of Bridge Global Equity Income Growth Fund approved the merger of the fund into Bridge Global Managed Growth Fund. The merger took effect from 23.59pm on Friday 12 April 2019.

Denker Capital (Pty) Ltd was replaced by Sanlam Investment Management (Pty) Limited as Investment Manager of Sanlam Global Emerging Markets Fund.

The base currency of two sub-funds namely, Sanlam Global Value Fund and Sanlam Stable Global Fund was changed from GBP to USD.

The following sub-funds closed during the year:

Fund name	Closing date
P-Solve Inflation Plus Fund	30 May 2019
Sanlam Japan Equity Fund	4 July 2019
Satrix North America Equity Tracker Fund	30 August 2019
Satrix UK Equity Tracker Fund	10 December 2019
Sanlam Strategic Bond Fund	20 December 2019

There were no other significant events during the year.

23 Significant events since the end of the year

As noted in the Directors' Report, a novel coronavirus was first detected in late December 2019 in Wuhan City, Hubei Province, China and is causing an outbreak of respiratory disease in countries around the world. On 11 February 2020, the World Health Organization (the "WHO") named the disease "COVID-19" and on 11 March 2020, the WHO declared a pandemic. Most countries around the world have suffered outbreaks of the disease and are likely to suffer a continued increase in recorded cases. The COVID-19 outbreak has seen a sudden and rapid decline in global economic growth.

There has been extreme volatility and limited liquidity in securities markets and such markets have been subject to governmental intervention. Certain Governments have imposed restrictions on the manufacture of goods and the provision of services in addition to the free movement of persons. This has had a material impact on the activities of businesses, their profitability and their ability to generate positive cash flow. In these market conditions there is a much higher risk of credit defaults and bankruptcies. It's too soon to say when a recovery will come or whether that recovery will be faster or slower than normal, as much will depend on how quickly individual countries are able to contain the virus and reopen for business. As a result, this may have a material impact on the performance of the Funds.

for the year ended 31 December 2019

23 Significant events since the end of the year (continued)

There is a possibility with the severe decline in economic activity and restrictions imposed, of disruption of electricity, other public utilities or network services, as well as system failures at facilities or otherwise affecting businesses which could adversely affect the performance of the Funds. COVID-19 has resulted in employees of the Manager, the Investment Managers and service providers to the Funds to adjust working practices, work remotely for prolonged periods of time or to be potentially absent from work due to illness as a result of the disease which may adversely impact the day to day operations of the Funds.

Following a decision of the Directors, it was resolved to terminate the Sanlam Stable Global Fund with effect from 15 April 2020 upon which date all trading in the fund ceased and all shares were repurchased.

Up to the date of approval of the financial statements, there were no other material subsequent events affecting the Company which necessitate disclosure or revision of the figures included in the financial statements.

24 Auditors fee

Auditor remuneration for the year was EUR 296,868 excluding VAT (2018: EUR 345,836 excluding VAT). Auditor remuneration related solely to the audit of the financial statements for the year ended 31 December 2019. There were no other assurance services, tax advisory services or other non-audit services provided by the auditor of the Company.

25 Off balance sheet arrangements

The Company was (not) party to off balance sheet arrangements for the twelve months from 1 January 2019 to 31 December 2019 or 1 January 2018 to 31 December 2018.

26 Approval of the Financial Statements

The financial statements were approved by the Board of Directors on 28 April 2020.

INDEX TRACKING (UNAUDITED)

Tracking error is the volatility of the difference between the return of the index tracking UCITS and the return of the index or indices tracked.

The Company has three index tracking Funds in existence at 31 December 2019. In accordance with the ESMA Guidance on ETFs and other UCITS issues, set out below are the year to date tracking errors for each of the Sanlam Index Tracking Funds together with the anticipated tracking errors as set out in the relevant supplements. An explanation of differences is provided below.

Fund Name	Benchmark index	Anticipated Tracking Error	Realised Tracking Error %
	MSCI World Index (Developed Markets) in US Dollars Unhedged with income reinvested (or another appropriate major world equity index selected		
Satrix World Equity Tracker Fund Satrix Emerging Market Equity Tracker	by the Manager)	Up to 100 bps	-0.22%
Fund	MSCI Europe ex-UK Index MSCI Emerging Markets	Up to 100 bps	-0.76%
Satrix Europe (ex UK) Equity Tracker Fund	Index	Up to 50 bps	0.60%

Fund Name	Explanation of difference
Satrix World Equity Tracker Fund Satrix Emerging Market Equity Tracker	Witihin anticipated tracking error range.
Fund	Witihin anticipated tracking error range. The realised tracking error exceeded the anticipated range as a result of the postive outperformance of the optimisation tracking
Satrix Europe (ex UK) Equity Tracker Fund	strategy of the Fund.

Tracking difference is defined as the difference in the annual return of the index tracking UCITS and the annual return of the tracked index. The realised Fund performance against the performance of the relevant benchmark index during the year ended 31 December 2019 is set out in the Investment Manager's report for each of the index tracking Funds.

GLOBAL EXPOSURE (UNAUDITED)

UCITS funds are required to monitor exposures on a daily basis by utilising either the commitment approach or the value at risk ("VaR") approach when financial derivative instruments ("FDI") are held. The commitment approach to monitoring market risk is used by the Investment Managers of the following Funds of the Company active as at 31 December 2019 which are permitted to use DFI:

ABSA Africa Equity Fund Sanlam Global Property Fund Sanlam World Equity Fund Sanlam Al Global Managed Risk Fund Sanlam US Dividend Fund High Street Global Balanced Fund Sanlam Global Value Fund Sanlam Stable Global Fund Sanlam Active UK Fund Sanlam Multi-Strategy Fund Anchor Global Stable Fund Anchor Global Equity Fund Sanlam Global Emerging Markets Fund Sanlam Real Assets Fund Satrix Global Factor Enhanced Equity Fund Sanlam Global Convertible Securities Fund Sanlam Centre Global Listed Infrastructure Fund Wisian Capital South African Equity Fund Sanlam Global High Quality Fund Autus Global Equity Fund Sanlam Centre Active U.S. Treasury Fund Sanlam Centre American Select Equity Fund Perpetua Global Equity UCITS Fund

Derivatives will primarily be used to gain exposure to certain asset classes in which it is not permitted to directly invest and/or for purposes of hedging and efficient portfolio management. Breaches of the exposure limits, if any, are identified using the commitment approach, addressed by the Investment Manager and reported to the Directors.

An annual FDI report is provided to the Central Bank detailing any exposures breached during the year and any material changes to the risk monitoring process. During the year ended 31 December 2019, there were no material breaches of the FDI exposure limits. Please see the credit risk section for a review of the risk and related measurements related to FDI counterparties as of 31 December 2019.

In respect to Sanlam Global Bond Fund and Cameron Hume Global Fixed Income ESG Fund, the Relative VaR approach to monitoring exposure is utilised. Sanlam US Absolute Return Fund utilises the Absolute VaR approach.

Sanlam Global Bond Fund and Cameron Hume Global Fixed Income ESG Fund held forward currency contracts, futures and interest rate and inflation swaps during the year ended 31 December 2019. Sanlam US Absolute Return Fund held Contracts for Difference.

The calculation of relative VaR is carried out in accordance with the following parameters:

- (a) one-tailed confidence interval of 99 %;
- (b) holding period equivalent to 1 month (20 business days);
- (c) effective observation period (history) of risk factors of at least 1 year (250 business days) unless a shorter observation period is justified by a significant increase in price volatility (for instance extreme market conditions):
- (d) quarterly data set updates, or more frequent when market prices are subject to material changes;
- (e) at least daily calculation.

GLOBAL EXPOSURE (UNAUDITED) (CONTINUED)

The relative VaR limit for Sanlam Global Bond Fund and Cameron Hume Global Fixed Income ESG Fund is two times or 200% of the benchmark VaR. The absolute VaR limit for Sanlam US Absolute Return Fund is 20%.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective relative VaR regulatory limit.

Fund	Market Risk Approach	VaR as at Year End (31/12/2019)	Highest Utilization of the VaR Limit %	Lowest Utilization of the VaR Limit %	Average Utilization of the VaR Limit %
Sanlam Global Bond Fund	Relative VaR	0.31%	59.48%	46.32%	53.69%
Cameron Hume Global Fixed Income ESG Fund	Relative VaR	0.79%	113.05%	32.79%	74.93%
Sanlam US Absolute Return Fund	Absolute VaR	9.9%	52.50%	45%	49%

^{*}Relative VaR Limit Utilisation = [Fund VaR / (2 * Benchmark VaR)]

Fund	Average Leverage** (gross exposure method) for the year ended 31/12/2019	Average Leverage** (commitment method) for the year ended 31/12/2019
Sanlam Global Bond Fund	565%	0.00%
Cameron Hume Global Fixed Income ESG Fund	1,547%	0.00%
Sanlam US Absolute Return Fund	220%	0.00%

^{**}Leverage is calculated on a gross exposure basis, by taking the sum of the notional values of the derivatives used by a Fund, without netting and is expressed as a percentage of the net asset value.

The Reference Benchmark for Sanlam Global Bond Fund and Cameron Hume Global Fixed Income ESG Fund is the Barclays Capital Aggregate Index (Unhedged) in US Dollars with net coupons reinvested. Details of the highest, lowest and average VaR of the Reference Benchmark are set out below:

Reference Benchmark	Highest VaR	Lowest VaR	Average VaR
Barclays Capital Aggregate Index (Unhedged) in US Dollars with net	2.78%	2.55%	2.66%
coupons reinvested			

Values of FDI positions held at 31 December 2019 are listed in the schedules of investments of the Funds. FDI positions are subject to risks that have the potential to influence the value of the Funds. These risks are detailed in the price risk and currency risk sections which provide analyses of the potential impact to the values due to these risks. Further, an analysis of the time available to liquidate the positions held by the Funds can be found in the liquidity risk section.

No other Fund held any derivative positions during the year ended 31 December 2019. The Funds have primarily held bonds, equities, collective investment schemes, exchange traded funds, cash and cash equivalents. These portfolios are monitored regularly for any change that would require FDI risk monitoring.

TOTAL EXPENSE RATIOS (UNAUDITED)

The Average Total Expense Ratio table shows the actual expenses incurred by the Fund during the reporting period, expressed as a percentage of the average net asset value (NAV) of the Fund for the reporting period.

SAMI REMUNERATION POLICY

Purpose and objective

Sanlam Asset Management (Ireland) Limited ("SAMI"), as a UCITS Manager and AIFM, has implemented a remuneration policy (the "SAMI Remuneration Policy") in line with the provisions of the ESMA guidelines on sound remuneration policies under the UCITS V Directive (Directive 2014/91/EU) (ESMA/2016/575) (the "UCITS remuneration guidelines") which came into effect on 18 March 2016 and also Article 13 of the Directive 2011/61/EC on Alternative Investment Fund Managers, in particular Annex II, and of the European Securities and Markets Authority's ("ESMA's") "Guidelines on sound remuneration policies under the AIFMD" (together the "Remuneration Guidelines").

The purpose of the SAMI Remuneration Policy is to provide clear direction and policy regarding SAMI's remuneration policies and practices consistent with the principles set out in the Remuneration Guidelines. The SAMI Remuneration Policy also complies with the overarching remuneration philosophy of the Sanlam Investments Cluster (the "Cluster Policy") with local adjustments to adhere to regulations applicable in Ireland.

The objective of the SAMI Remuneration Policy and the Cluster Policy is to support SAMI's and the Sanlam Investments Cluster's business objectives, and the Sanlam Group corporate values, including prudent risk management, by attracting, retaining and motivating the key talent to achieve these outcomes. The SAMI Remuneration Policy has been designed to be consistent with and promote sound and effective risk management, not encourage excessive or inappropriate risk-taking, eliminate conflicts of interest and be cognisant of SAMI's Treating Customers Fairly and Conduct Risk policies.

Design

In the design of its Remuneration Policy, SAMI has also taken into account the nature, scale and complexity of its business. In determining the range of activities undertaken, SAMI has given due consideration to the number of funds under management, the type of investments, the investment strategies, the investment location, the distribution models and the investor base. Due consideration has also been given to the resources available to SAMI and the resources and expertise of the various third parties engaged to support SAMI and carry out certain functions on its behalf.

The SAMI Remuneration Policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of SAMI or of the UCITS and Alternative Investment Funds under SAMI's management as a UCITS Manager and AIFM, including Sanlam Universal Funds Plc (the "Company").

Risk management

SAMI recognises the important role played by sound risk management in protecting stakeholders. Moreover, SAMI acknowledges that inappropriate remuneration structures could in certain circumstances result in situations whereby individuals assume more risk on the relevant institution's behalf than they would have done had they not been remunerated that way. The SAMI Remuneration Policy aligns the risk taking behaviour of employees and officers with SAMI's risk appetite and the risk appetite in respect of each of the funds.

Fixed and variable remuneration

In deciding the mix between fixed and variable remuneration, SAMI is mindful of the need to ensure that the basic pay of staff is adequate to remunerate the professional services rendered taking into account, inter alia, the level of education, the degree of seniority and the level of expertise and skills required.

SAMI recognises that variable remuneration is an important tool to incentivise staff. It also gives SAMI or the Investment Managers (and therefore the Company) flexibility such that, in years in which SAMI or the Investment Managers perform poorly, variable remuneration may be reduced or eliminated. In some circumstances, however, variable remuneration, if inappropriately structured, can lead to excessive risk taking as employees may be incentivised to keep taking risk to maintain or increase their variable remuneration. Accordingly, there is a clear and well defined pay-for-performance philosophy that seeks to attract, retain and motivate employees who are accountable and whose behaviours are aligned with SAMI's strategic goals, Conduct Risk and Treating Customers Fairly principles.

As an AIFM and UCITS Management Company, SAMI's revenues are based on a percentage of the NAVs of the Funds, including that of the Company. As a result, its revenues may be more volatile than other types of businesses. SAMI may also be paid expenses and other revenue from the Funds to which it provides services. Variable remuneration allows SAMI to reduce the risk that its capital base is eroded due to the need to pay fixed remuneration costs should trading revenues decline. Owing to the nature of the contracts SAMI enters into with its Directors and their Designated Persons, the ratio of variable pay to fixed pay is considered appropriate but is kept under review.

Decision-making process

The level of variable remuneration within SAMI is dependent on the achievement of individual goals, overall individual performance, the financial results of SAMI, the Sanlam Investments Cluster, the Sanlam Group and the achievement of Treating Customers Fairly outcomes.

Individual goals, consistent with shareholder goals, are set at the beginning of the year and performance is measured through Sanlam's performance management process. Goals set shall be financial and non-financial in nature. Mistakes resulting in unforced and avoidable losses may be penalised. Variable remuneration paid is based on the previous year's financial results and individual performance outcomes as determined as a result of a formal review of performance carried out in January following the end of the performance year. This timing allows full year financial results to be considered along with other non-financial goals and objectives. Individuals are not involved in setting their own remuneration. Pro-rata payments apply to new appointments based on time in the job over the financial year.

Ratings are used to differentiate and reward individual performance – but do not pre-determine compensation outcomes. Compensation decisions remain discretionary and are made as part of the year end compensation process. Compensation practices do not provide undue incentives for short term planning or short term financial rewards, do not reward unreasonable risk. Short and long-term strategic objectives are measured and rewarded to mitigate unreasonable or excessive risk-taking and provide balance.

Oversight of the Investment Managers' Remuneration Framework

As a UCITS Manager and AIFM, SAMI ensures that the persons to whom portfolio and/or risk management activities have been delegated are subject to remuneration arrangements that are equally as effective as those provisions of Remuneration Guidelines. As the discretionary portfolio management activity has been delegated to the Investment Managers, SAMI shall ensure those staff of Investment Managers who engage in discretionary portfolio management activity are subject to a remuneration framework consistent with the provisions of the Remuneration Guidelines. SAMI will assess on a regular basis the appropriateness of the Investment Managers' remuneration framework, the applicable policies and procedures in this regard for continuing compliance with the Remuneration Guidelines, and ensure that updates are made as necessary in line with the applicable regulations.

SAMI shall determine, on a case by case basis, whether or not the scope of the mandate granted to a particular delegate is such that the relevant staff of the Investment Manager constitute "Identified Staff" for the purposes of SAMI's Remuneration Policy.

Proportionality

SAMI, as a UCITS Manager and AIFM, may take a proportionate approach, both in respect of how the SAMI Remuneration Policy shall apply to itself and to any relevant delegates (e.g. Investment Managers), in order to ensure compliance in a manner and to the extent that is appropriate to the size and internal organisation of the relevant entity and the nature, scope and complexity of its activities. In assessing what is proportionate, SAMI shall have regard to the provisions contained in the Remuneration Guidelines and will focus on the combination of all the criteria mentioned therein.

Quantitative Remuneration Disclosure

SAMI is required under the UCITS remuneration guidelines to make quantitative disclosures of remuneration. The UCITS remuneration guidelines on quantitative remuneration disclosures apply only to full performance periods. The financial year and performance period of SAMI ends on 31 December which coincides with the financial year of the Company. Accordingly the quantitative remuneration disclosures provided in respect to SAMI as UCITS Manager relate to the year ended 31 December 2019.

The disclosures set out below are made in line with SAMI's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops, SAMI may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated.

The table below provides an overview of the following:

- Aggregate total remuneration paid by SAMI to all employees:
- Aggregate total remuneration paid by SAMI to senior management and other Identified Staff who have a material impact on the risk profile of the Company*; and
- The allocation of aggregate total remuneration paid by SAMI to senior management and other Identified Staff which is attributable to the Company**.

	2019 Average	2019	2019	2019 Carried
	Number of beneficiaries	Fixed remuneration paid	Variable remuneration paid	interest paid by the AIF
		US\$	US\$	US\$
Total remuneration paid by SAMI during financial year	9	1,171,336	867,485	Nil
Total remuneration paid to employees who have a material impact on the risk profile of the Company: Senior management (including				
executives)	5	869,965	870,363	Nil
Other Identified Staff*	N/A	N/A	N/A	Nil
Allocation of total remuneration paid to the employees attributable to the Company**:				
Senior management (including executives)	5	554,211	554,464	Nil
Other risk takers/other	ŭ	33.,211	33 ., 10 1	
identified staff	N/A	N/A	N/A	Nil

	2018 Average	2018	2018	2018 Carried
	Number of beneficiaries	Fixed remuneration paid	Variable remuneration paid	interest paid by the AIF
		US\$	US\$	US\$
Total remuneration paid by SAMI during financial year	13	1,482,651	983,255	Nil
Total remuneration paid to employees who have a material impact on the risk profile of the Company: Senior management (including				
executives) Other Identified Staff*	6 N/A	1,036,233 N/A	856,876 N/A	Nil Nil
Other Identified Staff	IN/A	IN/A	IN/A	INII
Allocation of total remuneration paid to the employees attributable to the Company**: Senior management (including				
executives) Other risk takers/other	6	688,747	569,535	Nil
identified staff	N/A	N/A	N/A	Nil

^{*}There are no Other Identified Staff of the UCITS Manager, in addition to Senior Management of the UCITS Manager, who would have

a material impact on the risk profile of the Company.

**As Identified Staff of the UCITS Manager typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the UCITS Manager and across the wider Sanlam Group, the allocation of aggregate total remuneration paid which is attributable to the Company is calculated based on total assets of the Company which are managed by SAMI as a proportion of the total assets under the management of SAMI at 31 December 2019 and 2018.

Remuneration Disclosures in respect to Identified Staff of Delegates

SAMI has delegated discretionary portfolio management responsibilities to various Investment Managers, many of whom may have financial year ends and performance periods that do not coincide with the financial year and performance period end of SAMI or the UCITS. Accordingly, the provision of meaningful and comparable information in respect to Identified Staff of Delegates for the financial year ended 31 December 2019 is limited.

Notwithstanding the foregoing, the total remuneration for services rendered paid to SAMI and each Delegate out of the assets of the relevant Fund in respect of this financial year is disclosed in the financial statements.

Delegates with arrangements equally as effective as those under Article 69(3)(a) of the UCITS Directive

The following Investment Managers, to which investment management activities are delegated in respect to certain Funds of the Company as indicated, are authorised and regulated by the Financial Conduct Authority in the United Kingdom:

Investment Management Firm	Funds of the Company to which Investment Management activities are delegated as at 31.12.2019	Aggregate quantitative information on remuneration for Code staff whose actions have material impact on the risk profile of the firm*
Sanlam Investments UK Limited	Sanlam Accel Income Fund	1,172
	Sanlam US Dividend Fund	
	Sanlam Global Value Fund	
	Sanlam Stable Global Fund	
	Sanlam Multi-Strategy Fund	
	Sanlam Active UK Fund	
	Sanlam Global High Quality Fund	
	Sanlam World Equity Fund	
	Sanlam Real Assets Fund	
	Sanlam US Absolute Return Fund	
AllianceBernstein Limited	Sanlam Global Property Fund	4,639
Cameron Hume Limited	Sanlam Global Bond Fund	1,020
	Cameron Hume Global Fixed	
	Income ESG Fund	

^{*}The aggregate remuneration disclosed above for each Investment Management Firm is the latest information disclosed by the respective delegate for the firm as a whole (or the delegate's group where the relevant information is disclosed at the group level) in accordance with the FCA Remuneration Code and related guidance.

Other Investment Management Delegates

For the following investment management firms, the table below sets out the total amount of remuneration for the financial year, split into fixed and variable remuneration, paid by the delegate to the identified staff of the delegate – and number of beneficiaries - which is linked to the delegated Fund as indicated in the table:

Investment Management Firm	Funds of the Company to which Investment Management activities are delegated as at 31.12.2019	Total remuneration paid by the delegate in respect to its last financial year (in US\$'000)	Pro-rated fixed remuneration paid to identified staff linked to Fund/(s) (in US\$'000)*	Pro-rated variable remuneration paid to identified staff linked to Fund/(s) (in US\$'000)*	Average No. of Identified staff linked to Fund/(s)

Other Investment Management Delegates (Continued)

Investment Management Firm	Funds of the Company to which Investment Management activities are delegated as at 31.12.2019	Total remuneration paid by the delegate in respect to its last financial year (in US\$'000)	Pro-rated fixed remuneration paid to identified staff linked to Fund/(s) (in US\$'000)*	Pro-rated variable remuneration paid to identified staff linked to Fund/(s) (in US\$'000)*	Average No. of Identified staff linked to Fund/(s)
Centre Asset Management	Sanlam Centre American Select Equity	N/A – refer to Note 1	N/A- refer to	N/A – refer to	2
LLC	Fund		Note 1	Note 1	
	Sanlam Active US Treasury Fund				
	Sanlam Centre Global Listed Infrastructure				
	Fund				
Wells Capital	Satrix Global Factor Enhanced Equity Fund	8,085,000	Immaterial	Immaterial	2
Management, Inc					
Perpetua Investment	Perpetua Global Equity UCITS Fund	N/A – refer to Note 1	N/A- refer to	N/A – refer to	2
Managers (Pty) Limited			Note 1	Note 1	

^{*}the pro-rated allocation of fixed and variable remuneration paid to identified staff is calculated based on the aggregate proportionate share of the total AUM of the Investment Manager attributable to the Fund/(s) as at 31 December 2019.

Note 1: The identified staff of these investment management firms are the Directors and owners of the relevant businesses with each being paid a basic fixed salary plus a pre-determined, fixed proportion of net profits (if any), in accordance with their ownership interest in the business. None of these individuals receive any fixed or variable remuneration that is directly attributable to their activities as investment manager to the respective Funds. Accordingly, there is a strong, natural alignment between the investors' interests, the interests of the Investment Management Firm and the Director/Owners.

NOTICE OF ANNUAL GENERAL MEETING Of Sanlam Universal Funds Plc

NOTICE is hereby given that the annual general meeting of Sanlam Universal Funds Plc. will be held at Beech House Beech Hill Road Dublin 4 on 26 June 2020 at 12.00 pm for the following purposes:
