# MANAGEMENT AND ADMINISTRATION

The Authorised Corporate Director ("ACD") and registered office of Premier Miton Multi-Asset Fund 2 ("the Company"):

### PREMIER PORTFOLIO MANAGERS LIMITED

Eastgate Court, High Street, Guildford, Surrey, GU1 3DE

Premier Portfolio Managers Limited is authorised and regulated by the Financial Conduct Authority ("FCA") and is a member of The Investment Association ("IA"). Premier Fund Managers Limited and Premier Portfolio Managers Limited are members of the 'Premier Miton Investors' Marketing group and subsidiaries of Premier Miton Group Plc.

### **DIRECTORS OF THE ACD:**

Mike O'Shea Ian West Piers Harrison Rosamond Borer Gregor Craig Jonathan Willcocks Sarah Walton (Non-Executive Director) Nick Emmins (Non-Executive Director)

# **INVESTMENT ADVISER:**

Premier Fund Managers Limited is the Investment Adviser to Premier Miton Multi-Asset Fund 2.

### **DEPOSITARY:**

Northern Trust Investor Services Ltd 50 Bank Street, Canary Wharf, London, E14 5NT

Authorised and regulated by the Financial Conduct Authority.

## AUDITOR:

KPMG LLP 15 Canada Square, London, E14 5GL

## **ADMINISTRATOR & REGISTRAR:**

Northern Trust Global Services SE, UK Branch 50 Bank Street, Canary Wharf, London, E14 5NT

### COMPANY INFORMATION

The Premier Miton Multi-Asset Fund 2 is an Investment Company with Variable Capital under regulation 12 of the Open-Ended Investment Company Regulations and incorporated in England and Wales under registered number IC000497 and authorised by the FCA with effect from 27 November 2006. Shareholders of the Company are not liable for the debts of the Company. At the period end, the Company contained two sub-funds: Premier Miton Multi-Asset Growth & Income Fund and Premier Miton Multi-Asset Monthly Income Fund.

The Company is a non-UCITS retail scheme which complies with the Financial Conduct Authority's Collective Investment Schemes sourcebook and is structured as an umbrella company so that different sub-funds may be established from time to time by the ACD with the approval of the FCA and the agreement of the Depositary.

Effective from 22 July 2014, the Company is now classified as an Alternative Investment Fund ("AIF") under the Alternative Investment Fund Manager's Directive ("AIFMD").

### REPORT OF THE ACD TO THE SHAREHOLDERS OF THE COMPANY

The ACD, as sole director, presents its report and the unaudited financial statements of the Company for the period from 1 May 2023 to 31 October 2023.

The Company is a non-UCITS scheme which complies with the Financial Conduct Authority's Collective Investment Schemes sourcebook. The shareholders are not liable for the debts of the Company.

The Investment Objectives and Policies of each sub-fund of the Company are covered in the section for each sub-fund. The sub-funds of an umbrella company should be invested as if they were a single company. The names and addresses of the ACD, the Depositary, the Registrar and the Auditor are detailed on this page.

In the future there may be other sub-funds of the Company. As a sub-fund is not a legal entity, if the assets attributable to any sub-fund were insufficient to meet the liabilities attributable to it, the shortfall might have to be met out of the assets attributable to one or more other sub-funds of the Company.

Where a sub-fund invests in other Collective Investment Schemes, the maximum annual management fee that may be charged to that Collective Investment Scheme is 5% of the net asset value of such a scheme, however, it is expected that the actual annual management fee will not exceed 2%.

#### **SUB-FUND CROSS HOLDINGS**

At the period end, none of the shares in the sub-funds were held by any other sub-funds or the Company.

#### **DIRECTORS' STATEMENT**

In accordance with the Regulations, we hereby certify the report on behalf of the Directors of Premier Portfolio Managers Limited.

Gregor Craig Director (of the ACD) 19 December 2023 lan West Director (of the ACD)

# **IMPORTANT NOTES**

# **Value Assessment Report**

It is our duty as Authorised Fund Manager ("AFM") to act in the best interests of our investors. As part of fulfilling this duty, we need to consider whether the charges taken from our funds are justified in the context of the overall service and value that we provide to our investors. The FCA have introduced new rules requiring the Boards of AFMs to consider robustly and in detail whether they are delivering value for money to their investors and to explain the assessment annually in a Value Statement made available to the public. The Value Assessment Report is available on the Premier Miton website www.premiermiton.com and can be found within the Literature section of the website under Funds, select any of the sub-funds of the Premier Miton Multi-Asset Fund 2, Regulatory documents. The Value Assessment Report will be published before 30 April each year and will cover the period 1 January to 31 December for the previous year.

# MANAGEMENT AND ADMINISTRATION

# **Russian Investment Update**

Premier Miton's directly invested funds have a policy to exclude Russian Sovereign debt, corporate debt instruments and equities listed on a Russian exchange or issued by a company incorporated in Russia or Belarus. Outside of our directly invested funds, including in our range of multi-manager funds which invest in Collective Investment Schemes, we have a policy to exclude Russian domiciled funds and to ensure that managers of external schemes intend to fully comply with sanctions issued against Russia and other relevant countries.

<sup>&</sup>lt;sup>3</sup>The net asset value per share is calculated on a bid basis and excludes any distribution payable.

ONGOING CHARGES FIGURE (OCF)				
	31/10/23	30/04/23		
Class A Income & Accumulation Shares	1.59%	1.57%		
Class B Income & Accumulation Shares	1.09%	1.07%		
Class C Income & Accumulation Shares	0.84%	0.82%		

The ongoing charges figure is based on the last six month's expenses for the period ending 31 October 2023 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

## SYNTHETIC RISK AND REWARD INDICATOR (SRRI)

The sub-fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Synthetic Risk and Reward Indicator table demonstrates where the subfund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

### INVESTMENT OBJECTIVE AND POLICY

The Premier Miton Multi-Asset Growth & Income Fund aims to provide total returns comprised of capital growth and income over the long-term, being five years or more.

Five years is also the minimum recommended period for holding shares in this sub-fund. This does not mean that the sub-fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

Income is paid twice a year as dividend distributions.

The Investment Adviser aims to achieve the sub-fund's objective by investing in a globally diversified portfolio of investments covering different asset classes (in developed and up to 25% in less developed countries); these will include investments in equities (company shares), fixed income (including bonds issued by governments and companies (including higher quality investment grade and lower quality sub-investment grade bonds)), convertible bonds (bonds that can convert into company shares), property company shares (including Real Estate Investment Trusts), other asset classes which may include indirect exposure to commodities such as gold, deposits, cash and near cash. The Investment Adviser would look to invest between 50% to 80% in equities, however the exposure may approach 90% following a strong period of equity performance, relative to other asset classes, and may remain at that level for a short period (typically up to six months) if appropriate. The sub-fund may invest up to 40% in fixed income instruments.

The Investment Adviser will typically gain exposure to the different asset classes and underlying investments through direct investments, but may also invest in collective investment schemes (including those managed by the ACD and its affiliates, other regulated and unregulated funds), including open-ended investment companies and Exchange Traded Funds, closed end investment companies (including investment trusts) and up to 5% in structured investments.

The sub-fund may invest in derivatives, warrants and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for investment purposes as well as for the purpose of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price). The use of derivatives will be limited and the sub-fund may only invest up to 5% in warrants.

 $<sup>^{\</sup>rm 2}\,\mbox{From}$  29 June 2021 to 31 December 2021.

### INVESTMENT REVIEW

#### PERFORMANCE

The Premier Miton Multi-Asset Growth & Income Fund (Class C Income shares) delivered a return of -0.73% during the period, ahead of the -3.12% return delivered by the IA Mixed Investment 40%-85% Shares sector.

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics. The sub-fund is classified in the IA Mixed Investment 40%-85% Shares sector, which we believe is a meaningful comparator to help investors assess the performance of the sub-fund.

### **MARKET REVIEW**

It was a difficult time for financial markets, as interest rates moved higher over the period, central banks retained their inflation-fighting stance and the oil price moved materially higher. Most equity markets struggled over the period and many fell in value significantly. A notable exception was the US, which just managed positive returns, helped by its significant exposure to information technology.

Indeed, in terms of sectors, information technology was the strongest performer while, more typically defensive sectors like consumer staples, utilities and healthcare, were the worst performers. The term consumer staples refer to a set of essential products used by consumers. This category includes things like household goods, and hygiene products.

Turning to bonds, US and UK government bonds fell over the period, also hurt by the move higher in interest rates and fears of inflation. Commodities were dominated by the higher oil price and currencies were dominated by a stronger US dollar.

#### PORTFOLIO ACTIVITY

The main change in the portfolio over the period was an increase in the level of investment in company shares (equities). We added significantly to Japanese and US equities, where there are lots of attractively valued investment options, often in the medium sized company space. We also added to our investments in UK equities and Asia Pacific equities. We reduced our level of investment in Europe, largely through selling companies whose share price had disappointed and, to a much lesser extent, we reduced our level of investment in Emerging Markets equities.

In contrast, to the increase in our level of investment in equities, we cut back our investment level in bonds, especially corporate bonds and we almost completely sold our investments in government bonds. Our level of investment in commodities, property and cash remained broadly the same.

### OUTLOOK

The direction of US interest rates continues to be the main driver of financial markets. In turn, this is driven by the strength of the US economy and the degree of US inflation. The general perception is that inflation will fall to pre-Covid levels of around 2% and may stay there.

Our view on inflation is somewhat different to the general view. Remember that inflation in all the G7 countries remains above target, even if it is falling. We believe that there are several long-term forces that argue that inflation will reaccelerate. Interestingly, many of these are the very same dynamics, though in reverse, that pushed inflation lower over the last 25 years. Globalisation has moved to deglobalisation, resource abundance has moved to resource constraint and a more disciplined approach to government spending has given to a more extravagant approach. These all contribute to higher inflation. On top of that, the conflicts remain in the Ukraine and the Middle East, which are important in terms of food and oil prices respectively.

The outlook for income growth investing remains favourable in the medium term in our view, particularly against a backdrop of higher inflation and interest rates.

ONGOING CHARGES FIGURE (OCF)				
	31/10/23	30/04/23		
Class A Income & Accumulation Shares	1.84%	2.17%		
Class B Income & Accumulation Shares	1.34%	1.67%		
Class C Income & Accumulation Shares	1.09%	1.42%		

The ongoing charges figure is based on the last six month's expenses for the period ending 31 October 2023 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

In line with the Investment Association "Disclosure of Fund Charges and Costs" circular published July 2020 and updated November 2023, the OCF quoted includes costs associated with Open Ended Investment Companies.

The sub-fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Synthetic Risk and Reward Indicator table demonstrates where the subfund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

### INVESTMENT OBJECTIVE AND POLICY

The investment objective of the Premier Miton Multi-Asset Monthly Income Fund is to provide income together with the potential for capital growth over the long-term, being five years or more.

Five years is also the minimum recommended period for holding shares in this sub-fund. This does not mean that the sub-fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

Income will be paid monthly as dividend distributions.

The Investment Adviser aims to achieve the sub-fund's objective by investing in collective investment schemes (including those managed by the ACD and its affiliates and other regulated and unregulated funds), including openended investment companies and Exchange Traded Funds, and closed ended investment companies (including investment trusts). These will invest globally in a broad range of underlying assets (in developed and up to 25% in less developed countries) which will include bonds (issued by governments and companies (including higher quality investment grade and lower quality sub-investment grade bonds), convertible bonds (bonds that can convert into company shares), company shares, property (indirectly, through collective investment schemes and Real Estate Investment Trusts ("REITs")) and alternative investments. The sub-fund will also invest in deposits, cash and near cash

The sub-fund will maintain an exposure to different asset classes, but those exposures will vary as economic and market conditions change.

The sub-fund may also invest directly in transferable securities (including company shares and bonds), this will typically be where asset class exposure can be obtained more efficiently, and up to 30% in structured investments, which may be used following a period of extreme market moves or when asset prices reach very low valuations relative to other asset classes.

The sub-fund may invest in derivatives, warrants and forward transactions (whose value is based on the change in price of an underlying investment) for efficient portfolio management and investment purposes, including hedging (hedging is designed to offset the risk of another investment falling in price). The use of derivatives will be limited and the sub-fund may only invest up to 5% in warrants.

<sup>&</sup>lt;sup>2</sup> From 29 June 2021 to 31 December 2021.

### INVESTMENT REVIEW

#### **PERFORMANCE**

Over the last six months, in the weak equity (company shares) and bond market environment, the Premier Miton Multi-Asset Monthly Income Fund produced a return of -4.65% which compares to a return of -2.86% from the Investment Association Mixed Investment 20% to 60% shares sector. Over the period, the sub-fund's low exposure to bonds was relatively beneficial, as we avoided most of weakness of the gilt market. However, exposure to small and medium sized UK companies detracted, as did the allocation to property that suffered in the rising interest rate environment.

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics. The sub-fund is classified in the IA Mixed Investment 20% to 60% shares sector, which we believe is a meaningful comparator to help investors assess the performance of the sub-fund.

#### **MARKET REVIEW**

It was a volatile period for equity and bond markets, as central banks undertook action in an attempt to bring down rates of inflation. Interest rates were raised in the US, the UK and the Eurozone, and even the Bank of Japan indicated that the era of ultra-low rates was coming to an end.

This had a particularly negative effect on government bond markets which declined sharply over the period, especially in the UK and the US. The majority of equity markets also weakened, as investors had to contend with the theme of interest rates being higher for longer. UK equities were weak, with small and medium sized companies in particular under pressure in the rising interest environment, alongside a subdued outlook for the economy.

European equities also struggled, but Japanese equities performed better, boosted by encouraging upgrades to company earnings, combined with potential policy change from the Bank of Japan to strengthen the Yen, as well as expectations of improved corporate governance. US equities saw moderate gains, though this was mostly due solely to the stronger dollar, with the market here mainly driven higher by a handful of expensive large technology companies. Asian ex-Japan equities also saw a weaker spell, as China's economic recovery appeared to falter. The higher interest rate backdrop also proved to be a headwind for commercial property.

# **PORTFOLIO ACTIVITY**

We made an increase to equities, adding to what we believed were unloved UK equities around the middle of the period, this being a market that has good defensive characteristics and can provide a good level of income. Elsewhere in equities, we took some profits in Emerging markets, where our holding has performed particularly well this year, while adding to Asia ex-Japan which has had a more challenging time.

The overall exposure to bonds was reduced as we took some profits in areas that had performed well earlier in the period, such as bonds issued by Emerging Market countries. We also disposed of a floating rate position (a type of bond that does not pay a fixed rate of interest) that had performed very well over the last year or so, as well as selling a fund investing in European financials debt which has also had a good year. However, we did add exposure to high quality corporate bonds given the more attractive yields available. The holdings in Alternatives have performed well compared with bonds in the recent rising interest rate environment, but with yields on bonds now more attractive, we reduced exposure to Alternatives, selling out of Fortem Capital Alternative Growth, which led to a rise in the cash level.

#### OUTLOOK

We believe that valuations on UK equities are compelling and the market continues to be unloved, while still providing an attractive level of income. We also see opportunity in Europe and Japan, with the latter benefiting from corporate governance reforms and still very low interest rates, while Asia ex-Japan may see improved sentiment following various measures introduced in China to support the economy. We continue to avoid US equities with valuations still looking high, particularly if the economy weakens next year. Given the far more attractive yields now available, we continue to favour bonds, especially high-quality corporate bonds, though we are more cautious on high yield bonds in the event that a more severe decline in economic activity does materialise. With the UK rate hiking cycle either at or close to a peak, this should provide some support for the UK commercial property market, and we are confident that our listed holdings should see a return to favour, while at the same time producing attractive and in most cases inflation-protected income. Our Alternatives have played a very useful role for some time now, but better opportunities in bonds now present themselves.
