## COMPANY INFORMATION

### About Artemis

Artemis is a leading UK-based fund manager, offering a range of funds which invest in the UK, Europe, the US and around the world.

As a dedicated, active investment house, we specialise in investment management for both retail and institutional investors across Europe.

Independent and owner-managed, Artemis opened for business in 1997. Its aim was, and still is, exemplary investment performance and client service. All Artemis' staff share these two precepts – and the same flair and enthusiasm for fund management.

The firm now manages some £23.9 billion\* across a range of funds, two investment trusts and both pooled and segregated institutional portfolios.

Our managers invest in their own and their colleagues' funds. This has been a basic tenet of the Artemis approach since the firm started. It means that interests of our fund managers are directly aligned with those of our investors.

\* Source: Artemis as at 31 May 2023.

### The company

Artemis Investment Funds ICVC ('the company') is an investment company with variable capital incorporated under the Open-Ended Investment Companies Regulations 2001 ('the Regulations') in England and Wales under registered number IC001014 and authorised and regulated by the Financial Conduct Authority ('FCA') with effect from 20 June 2014. The company has been certified by the FCA as complying with the conditions necessary for it to enjoy the rights conferred by the UCITS Directive. The company has an unlimited duration. Each sub-fund is treated as a segregated portfolio of assets, and those assets can only be used to meet the liabilities of that sub-fund. Shareholders are not liable for the debts of the company or any other sub-fund. The base currency of the company is Sterling.

The company has an umbrella structure and currently has ten sub-funds, each with a different investment objective. In the financial statements you will find an investment review for each sub-fund (unless the sub-fund closed during the period) which includes details of the investment objective.

The company is registered for sale in Guernsey, Isle of Man, Jersey and Luxembourg. Such registrations are subject to applicable local laws and regulations and some sub-funds and/or share classes may not be available in all jurisdictions.

### Annual report and financial statements

We are pleased to present the annual report and financial statements of the company for the year ended 28 February 2023. As required by the Regulations, information for each of the sub-funds has also been included in these financial statements. On the following pages we present the performance of each of those sub-funds during the period.

### Annual general meetings

The company has dispensed with the need to hold annual general meetings.

### Prospectus

Copies of the most recent Prospectus are available free of charge from the authorised corporate director ('ACD') at the address on page 177.

### Sub-fund cross holdings

At the year-end none of the shares in any of the sub-funds were held by any other sub-funds of the company.

### Significant events

The Artemis US Absolute Return Fund closed on 12 June 2023.

### Share class launches

The following share classes were launched during the year:

| Artemis SmartGARP Global Emerging Markets Equity Fund |            |
|---|------------|
| E accumulation GBP                                    | 15/08/2022 |
| E distribution GBP                                    | 15/08/2022 |

## Remuneration

All UCITS schemes are required to comply with the UCITS Remuneration Code.

This includes a requirement to disclose in the annual report of each scheme, details of the total amount of remuneration paid by the manager to its partners and staff for its financial year.

As the Artemis Investment Funds ICVC (the 'company') is a UCITS scheme, Artemis Fund Managers Limited ("AFML") as manager is required to make these disclosures. Artemis operates its remuneration policies and practices at a group level which includes both Artemis Investment Management LLP and its subsidiary AFML. Details of the group remuneration policies are available on Artemis' website [artemisfunds.com](https://artemisfunds.com). Remuneration levels are set to attract, retain and motivate talented partners and staff and align the long term interests of partners and staff with those of our clients.

The remuneration policies which apply to all partners and staff across the group are overseen by the Remuneration Committee. The members of the Remuneration Committee are all non-executive officers. The Remuneration Committee is responsible for setting and overseeing the implementation of Artemis' remuneration policy, including approving the remuneration of partners and other senior staff. The Remuneration Committee will regularly review the remuneration policy to ensure it remains appropriate. The Remuneration Committee considers inputs from Artemis' Risk and Compliance function when reviewing remuneration issues, including any risk adjustments or controls considered necessary.

The Artemis remuneration period runs from 1 January to 31 December. Certain partners and staff are classified as 'Identified Staff' as their professional activities have a material impact on the risk profile of the firm. The payment of some of their variable remuneration (which may include profit share for partners) is deferred. Further, Artemis has the ability to reduce all or part of deferred variable remuneration that has been previously allocated to identified staff both (a) before the end of the vesting period and (b) within two years following the payment of any elements of variable remuneration.

No staff are employed by AFML directly. Staff are employed and paid by other entities of Artemis. Artemis has apportioned the total amount of remuneration paid to all 224 Artemis partners and staff in respect of AFML's duties performed for the UCITS schemes based on the number of funds. It has estimated that the total amount of remuneration paid in respect of duties for the sub-funds within the company for the year ended 31 December 2022 is £7,099,098 of which £3,107,169 is fixed remuneration and £3,991,929 is variable remuneration.

The aggregate amount of remuneration paid to UCITS Remuneration Code and Identified Staff that is attributable to duties for the company for the year ended 31 December 2022 is £2,527,085. Code and Identified Staff are those senior individuals whose managerial responsibilities or professional activities could influence, and have a material impact on, the overall risk profile of each regulated entity and the funds it manages.

For the purposes of the UCITS Remuneration Code, the AFML Code staff include the members of Artemis' Management and Executive Committees, certain fund managers and others in specified roles. This includes certain individuals who are partners in Artemis Investment Management LLP.

## Value assessment

Artemis Fund Managers Limited (AFML) has conducted a detailed assessment of whether its funds are providing value to shareholders. AFML must publish publicly, on an annual basis, a statement setting out a summary of the outcome of the process and whether or not AFML believes the payments out of the scheme property are justified in the context of the overall value delivered to shareholders. Composite reports on Assessment of Value have been published via the website [artemisfunds.com](https://artemisfunds.com).

## COMPANY INFORMATION

---

### Tax information reporting

UK tax legislation requires fund managers to provide information to HM Revenue & Customs ('HMRC') on certain investors who purchase shares or units in collective investment schemes. Accordingly, the fund may have to provide information annually to HMRC on the tax residencies of those unitholders that are tax resident out with the UK, in those countries that have signed up to the OECD's ('Organisation for Economic Co-operation and Development') Common Reporting Standard for Automatic Exchange of Financial Account Information (the 'Common Reporting Standard'), or the United States (under the Foreign Account Tax Compliance Act, 'FATCA').

All new investors that invest in the fund must complete a certification form as part of the application form. Existing shareholders may also be contacted by the Registrar should any extra information be needed to correctly determine their tax residence. Failure to provide this information may result in the account being reported to HMRC.

For further information, please see HMRC's Quick Guide: Automatic Exchange of Information – information for account holders: [gov.uk/government/publications/exchange-of-information-account-holders](https://gov.uk/government/publications/exchange-of-information-account-holders).

### Statement of the Depositary's responsibilities in respect of the scheme and report of the Depositary to the shareholders of the Artemis Investment Funds ICVC ('the Company') for the year ended 28 February 2023

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228), as amended, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together "the Scheme documents") as detailed below.

The depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The depositary must ensure that:

- the Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares of the Company are calculated in accordance with the Regulations;

- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Corporate Director ('the ACD'), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that Company is managed in accordance with the Regulations and Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the ACD:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

J.P. Morgan Europe Limited  
London  
3 March 2023

## Statement of the ACD's responsibilities

COLL requires the ACD to prepare financial statements for each accounting period which give a true and fair view of the financial affairs of the company at the year end and of the net revenue or expense and net gains or losses on the scheme property of the company for the period then ended.

In preparing the financial statements the ACD is required to:

- (i) follow applicable accounting standards;
- (ii) make judgements and estimates that are reasonable and prudent;
- (iii) select suitable accounting policies and then apply them consistently;
- (iv) prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in operation for the foreseeable future. For reasons stated in Note 1 (a) to the financial statements of Artemis Global Equity Income Fund, Artemis Pan-European Absolute Return Fund and US Absolute Return Fund the financial statements of these sub-funds have been prepared on a break-up basis.
- (v) comply with the Instrument of Incorporation and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 ('SORP'). The ACD is required to keep proper accounting records and to manage the company in accordance with the Regulations, the Instrument of Incorporation and prospectus.

The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

## Report of the authorised corporate director

We hereby approve the Annual Report of Artemis Investment Funds ICVC for the year ended 28 February 2023 on behalf of Artemis Fund Managers Limited in accordance with the requirements of Collective Investment Schemes Sourcebook ('COLL') as issued and amended by the FCA.

M J Murray  
Director

L E Cairney

## COMPANY INFORMATION

---

### Independent auditor's report to the members of Artemis Investment Funds ICVC

#### Opinion

We have audited the financial statements of Artemis Investment Funds ICVC ("the Company") comprising each of its sub-funds for the year ended 28 February 2023, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Shareholders, the Balance Sheet, Distribution Tables and related notes, including a summary of the significant accounting policies for each of the sub-funds. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice)

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Company comprising each of its sub-funds as at 28 February 2023 and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company comprising each of its sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Emphasis of matter – Financial Statements of Artemis Global Equity Income Fund, Artemis Pan-European Absolute Return Fund and US Absolute Return Fund prepared on break up basis

We draw attention to Note 1(a) of the financial statements of Artemis Global Equity Income Fund, Artemis Pan-European Absolute Return Fund and US Absolute Return Fund which explains that the sub-funds are closed and in the process of being terminated. The Authorised Corporate Director ('the ACD') therefore does not consider it to be appropriate to adopt the going concern basis of accounting in preparing the financial statements. Accordingly, the financial statements for these sub-funds only, have been prepared on a break-up basis as described in Note 1(a). The financial statements for the Company as a whole remain prepared on a going concern basis. Our opinion is not modified in respect of this matter.

#### Conclusions relating to going concern

The financial statements for the Artemis Global Equity Income Fund, Artemis Pan-European Absolute Return Fund and US Absolute Return Fund have been prepared on a break-up basis as disclosed in Note 1(a).

In auditing the financial statements of the remaining sub-funds, we have concluded that the ACD's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the remaining sub-funds' ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the remaining sub-funds' ability to continue as a going concern.

#### Other information

The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

### Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the “FCA”)

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Instrument of Incorporation; and
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the ACD’s report for the financial year for which the financial statements are prepared is consistent with the financial statements.

### Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

### Responsibilities of the ACD

As explained more fully in the ACD’s responsibilities statement set out on page 3, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor’s responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

### Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), Investment Management Association’s Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies (OEIC) Regulations, the Company’s Instrument of Incorporation and the Prospectus.
- We understood how the Company is complying with those frameworks through discussions with the ACD and the Company’s administrator and a review of the Company’s documented policies and procedures.
- We assessed the susceptibility of the Company’s financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management’s propensity to influence revenue and amounts available for distribution. We identified a fraud risk in relation to the incomplete or inaccurate income recognition through incorrect classification of special dividends and the resulting impact to amounts available for distribution. We tested the appropriateness of management’s classification of a sample of special dividends as either a capital or revenue return.

## COMPANY INFORMATION

---

- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the ACD with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Company.
- Due to the regulated nature of the Company, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

### Use of our report

This report is made solely to the Company's Members, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Company's Members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's Members as a body, for our audit work, for this report, or for the opinions we have formed.

|                            |   |  |
|----------------------------|---|--|
| <b>Objective</b>           | To generate a return that exceeds the iBoxx £ Collateralized & Corporates Index, after fees, over rolling three-year periods, through a combination of income and capital growth. |  |
| <b>Investment policy</b>   | <b>What the sub-fund invests in</b>   | <ul style="list-style-type: none"> <li>At least 80% in investment grade corporate bonds.</li> <li>The sub-fund may also invest in other bonds, cash and near cash, preference shares, convertibles, other transferable securities, other sub-funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.</li> <li>At least 80% of the sub-fund will be denominated in or hedged back to sterling.</li> </ul>  |
|                            | <b>Use of derivatives</b>   | <p>The sub-fund may use derivatives:</p> <ul style="list-style-type: none"> <li>to achieve the sub-fund objective</li> <li>to produce additional income or growth</li> <li>for efficient portfolio management purposes to reduce risk and manage the sub-fund efficiently.</li> </ul>  |
|                            | <b>Where the sub-fund invests</b>   | <ul style="list-style-type: none"> <li>Sterling corporate bonds</li> <li>To a lesser extent, global corporate bonds (including emerging markets). In this context, emerging market countries means countries included in the MSCI Emerging Markets Index and those included in the World Bank definition of developing economies or those countries which are, in the manager's opinion, developing countries.</li> </ul>  |
|                            | <b>Industries the sub-fund invests in</b>   | <ul style="list-style-type: none"> <li>Any</li> </ul>  |
|                            | <b>Credit quality of bonds the sub-fund invests in</b>  | <ul style="list-style-type: none"> <li>At least 80% in investment grade corporate bonds, being</li> <li>BBB- or above by Standard &amp; Poor's; or</li> <li>BBB- or above by Fitch; or</li> <li>Baa3 or above by Moody's</li> </ul>  |
|                            | <b>Other limitations specific to this sub-fund</b>  | <ul style="list-style-type: none"> <li>None</li> </ul>   |
| <b>Investment strategy</b> |   | <ul style="list-style-type: none"> <li>The sub-fund is actively managed.</li> <li>Investment opportunities across the corporate bond and broader fixed income markets are assessed.</li> <li>Returns of the sub-fund are driven by four pillars: <ul style="list-style-type: none"> <li>active asset allocation across the credit market</li> <li>stock selection</li> <li>sector allocation</li> <li>duration decisions</li> </ul> </li> <li>The sub-fund seeks bonds with the potential for positive changes to their investment outlook, either through improving corporate health or the market having taken an overly negative view on the issuer's prospects.</li> <li>The sub-fund also seeks bonds with the potential for upside surprise through corporate restructuring or tax and/or legislative change that may lead to early redemption at a higher price.</li> </ul> |
| <b>Benchmarks</b>          |   | <ul style="list-style-type: none"> <li><b>Markit iBoxx £ Collateralized &amp; Corporates Index</b><br/>A widely-used indicator of the performance of sterling denominated corporate investment grade bonds, in which the sub-fund invests. It acts as a 'target benchmark' that the sub-fund aims to outperform. Management of the sub-fund is not restricted by this benchmark.</li> <li><b>IA £ Corporate Bond NR</b><br/>A group of asset managers' funds that invest in similar asset types to the sub-fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the sub-fund's performance can be compared. Management of the sub-fund is not restricted by this benchmark.</li> </ul>  |

# ARTEMIS CORPORATE BOND FUND

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the sub-fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect fund performance:**

- **Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The sub-fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- **Bond liquidity risk:** The sub-fund holds bonds which could prove difficult to sell. As a result, the sub-fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- **Credit risk:** Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the sub-fund.
- **Derivatives risk:** The sub-fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the sub-fund value will reduce.
- **Charges from capital risk:** Where charges are taken wholly or partly out of a sub-fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
- **Emerging markets risk:** Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.

There was no change to the risk indicator in the 12 months to 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

# ARTEMIS CORPORATE BOND FUND

## INVESTMENT REVIEW

- The fund returned (9.6)% in a very weak market for corporate bonds.
- Rising inflation and interest rates drove bond prices lower.
- Corporate bonds now offer compelling yields.

Over the 12-month period, the fund fell 9.6%. It held up better than its benchmark, the iBoxx £ Collateralized & Corporate Index, which fell 13.0%<sup>1</sup>.

2022 set a record for the worst year on record for corporate bonds with the index being down over 19%. For context the worst yearly performance for the index prior to this was a loss of close to 9% in 2008 (Chart 1).

**Chart 1: ICE BofA Sterling Corporate & Collateralized index annual returns**

Source: Bloomberg as at 31 December 2022

The aggressive sell-off in corporate bonds was driven by rising inflation, which led to the Bank of England raising interest rates. There were also concerns that a cost-of-living crisis could risk tipping the UK into a recession. The combination of a worsening inflationary backdrop, as well as worries about economic growth, meant that government bonds sold off and credit spreads (the difference between government bond yields and corporate bond yields) widened.

The 'mini'-budget announced in September 2022 further exacerbated the sell-off and caused gilts to fall further as the unfunded tax giveaways, combined with the lack of scrutiny from the Office for Budget Responsibility, led to a crisis of confidence in UK institutions. Alongside this, pension funds were forced to sell holdings to meet liquidity requirements.

Past performance is not a guide to the future.

<sup>1</sup> Source: Artemis/ Lipper Limited, class I accumulation GBP. All figures show total returns with income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the IA sector benchmark.

<sup>2</sup> Bond prices move in inverse relation to interest-rate expectations; having a lower duration is helpful when rate expectations move higher but hurts when they fall.

A relief rally ensued the following month after Rishi Sunak became Prime Minister and re-instated some fiscal discipline, largely reversing Liz Truss's fiscal policies from the not-so-mini budget in the previous month. Indications that inflation may be nearing its peak also helped government bonds perform well towards the end of the period.

In this environment, the fund fell 9.6%. As noted above, it held up better than its benchmark, the iBoxx £ Collateralized & Corporate Index, which fell 13.0%. The fund was positioned to be less sensitive to changes in interest rates ('short duration') and so was slightly more resilient than the index when bond markets sold off. Credit selection also positively contributed to the fund's outperformance. Notably, the fund had no exposure to Russian energy company Gazprom, which fell heavily following Russia's invasion of Ukraine.

### Fund Activity

#### Government Bond

Over the period, the fund largely maintained a duration position of around 1-year shorter than the benchmark (that is, we made the fund less sensitive to changes in interest rates<sup>2</sup>). This helped performance as government bonds sold off. We tactically adjusted the position during the year. Government bond markets tend to perform well over the summer, so we reduced the short duration position in anticipation of this, which proved to be timely. By the beginning of August, the fund had increased its short position closer to 1.3 years again, just before gilts started to sell off aggressively again.

The sell-off was further accelerated at the end of September amid a crisis of confidence in UK institutions, when 30-year gilt yields breached 5%. Due to the violent and tactical nature of the sell-off – pension funds were being forced to liquidate assets to fund collateral calls – we took the view to partially close the short duration position to 0.5yrs, which we did by buying inflation-linked gilts, which had sold off more than conventional gilts. This proved to be the fund's best trade since its inception. Shortly afterwards, the Bank of England announced that it would launch a purchase facility to buy long-dated gilts to restore calm in the market. While all assets benefited from this, inflation-linked gilts, which had been the biggest underperformer, bounced back strongly and we sold out of this position 58% higher than where we bought it.

## ARTEMIS CORPORATE BOND FUND

---

Following the panic in the gilt markets after the mini-budget, the fund partially closed its longstanding short duration position from around 1-year short to 0.25 year short. This proved timely as gilts started to see a recovery. The fund's underweight duration continues to be taken by avoiding the longest-dated bonds, which have benefited most from central banks' buying programmes and so may suffer when these programmes come to an end.

### Corporate bonds

Credit spreads (the difference in yield between corporate and government bonds) mostly widened<sup>3</sup> over the period, amid concerns that higher interest rates and a cost-of-living crisis would cause a hard economic landing. The fund had been proactive in switching from lower-quality to higher-quality bonds, especially within the financials sector, and while the fund's overweight in the sector should have been detrimental, the fund's credit selection in the sector contributed positively to performance.

The weakness in corporate bonds accelerated after the mini-budget. While we did not predict that pension funds would be forced sellers of bonds, we had been cautious around risk more generally and were short the longest-dated bonds. Following the aggressive sell-off, we re-invested cash across the market, even in longer-dated bonds. Following a strong recovery, we started shifting some of our longer-dated holdings back into shorter-dated bonds. To give an idea of how active we were over this period, at one point the fund had 8% in cash but it is now close to fully invested.

As usual, the fund has been active in relative value trades (that is, switching between different bonds issued by the same company). Notably, the fund sold out of a number of sterling-denominated bonds and switched into euro-denominated bonds in companies such as Logica and Axa, as the euro bonds had underperformed. Over the summer, we saw a reversal of this, and rotated back into sterling-denominated bonds.

The new issue market continues to be active, although at a slower pace than we saw the previous year. Another notable theme this year has been the number of companies buying back their bonds during the period. Examples included General Electric, GSK, Tesco Property, Orange, HSBC and TFL, amongst others. This constant buying back of bonds has been a positive technical backdrop.

### Outlook – An attractive entry point

Corporate bond yields have risen meaningfully relative to yields in other asset classes and now compare favourably to other income opportunities. In government bond markets, after being very cautious on valuations at the start of the year, we now see pockets of value emerging, by no means across the board but our focus most recently has been on shorter-dated bonds which already price in several interest rate hikes by the Bank of England. We have also trimmed the fund's underweight duration position as we are of the view that government bond yields are at an attractive level. And while yields have become more attractive, investors are being asked to take less risk to earn this yield. Because of the price falls, investors can buy a bond below its redemption value. A bond is typically priced at 100 (that is, when the bond matures, the investor gets 100% of the loan amount). Investors can buy this bond at 90% and get paid back 100% at the maturity of the bond. This means investors have capital downside protection - a very rare occurrence that we haven't seen since the Global Financial Crisis. We believe the chance of investment-grade companies defaulting is extremely remote: these are some of the largest and strongest companies in the world.

Given interest rates have already risen sharply, the risk of a further large move is minimal. We believe this combination of higher yields, lower risk to capital and lower interest-rate risk is a rare and attractive occurrence in corporate bonds.

**Stephen Snowden and Grace Le**  
Fund managers

---

<sup>3</sup> Bond credit spreads move continuously, just like stock prices. A narrowing bond credit spread can point to improving economic conditions and lower overall risk. A widening bond credit spread typically suggests worsening economic conditions and higher overall risk.

# NOTES TO THE FINANCIAL STATEMENTS

---

## 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period, net of any accrued interest in the case of debt securities, which is included in the balance sheet as a revenue related item. Listed investments are valued at fair value which is deemed to be the bid or SETS price.

The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Over-the-counter derivatives are priced at fair value using valuation models or data sourced from market data providers. Interest on margin accounts held with brokers is included in the revenue return. All other gains/losses and cash flows from derivatives except for bond futures are included in the capital return.

Open forward currency contracts are shown in the Portfolio Statement at market value and the net gains are reflected within forward currency contracts under net capital (losses)/gains in the Notes to the financial statements.

Where bond futures positions generate total returns the returns are apportioned between capital and income to reflect the nature of the transaction. Any capital gains/losses are included within net capital (losses)/gains and any revenue or expense is included within Revenue or Interest payable and similar charges respectively in the Statement of total return. Cash held at future brokers as margin is reflected separately within cash and bank balances.

**(e) Revenue.** Interest from debt securities is recognised on an effective interest rate basis inclusive of any expected changes to future cash flows. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## ARTEMIS CORPORATE BOND FUND

### 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. The ACD and the depositary have agreed, for the distribution classes only, that 100% of the annual management charge is to be transferred to capital for the purpose of calculating the distribution, as permitted by COLL. The distribution currently payable reflects this treatment.

Gains and losses on investments, derivatives and forward currency contracts, whether realised or unrealised, are taken to capital and are not available for distribution. The sub-fund satisfied the qualifying investments test of Statutory Instrument 2006/964 Authorised Investment Funds (Tax) Regulations 2006 Regulation 19 throughout the year.

All distributions made are therefore made as interest distributions. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

### 3. Net capital (losses)/gains

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------------|---------------------------|---------------------------|
| Currency gains/(losses)    | 691                       | (412)                     |
| Derivative contracts       | 37                        | (1)                       |
| Forward currency contracts | (4,151)                   | 612                       |
| Non-derivative securities  | (100,918)                 | (41,541)                  |
| <b>Net capital losses</b>  | <b>(104,341)</b>          | <b>(41,342)</b>           |

### 4. Direct transaction costs

There were no commissions or taxes paid in relation to transactions on the portfolio during the current year or previous year.

#### Dealing spread

As at the balance sheet date the average portfolio dealing spread was 0.65% (2022: 0.66%). This spread represents the difference between the bid and offer prices of each underlying investment expressed as a percentage of the value determined by reference to its offer price.

### 5. Revenue

|                             | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|-----------------------------|---------------------------|---------------------------|
| Interest on debt securities | 33,437                    | 18,848                    |
| Bank interest               | 435                       | 1                         |
| <b>Total revenue</b>        | <b>33,872</b>             | <b>18,849</b>             |

### 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 1,707                     | 1,294                     |
| Administration fees  | 1,068                     | 863                       |
| <b>Total expenses</b>  | <b>2,775</b>              | <b>2,157</b>              |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £9,650 (2022: £9,400). This fee is paid by the manager.

## 7. Interest payable and similar charges

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Interest payable                                  | 16                        | 2                         |
| <b>Total interest payable and similar charges</b> | <b>16</b>                 | <b>2</b>                  |

## 8. Taxation

| <b>a) Analysis of the tax charge for the year</b>                                    |                           |                           |
| <b>Total taxation (Note 8b)</b>  | -                         | -                         |
| <b>b) Factors affecting the tax charge for the year</b>                              |                           |                           |
| Net revenue before taxation  | 31,081                    | 16,690                    |
| Corporation tax at 20% (2022: 20%)   | 6,216                     | 3,338                     |
| <b>Effects of:</b>   |                           |                           |
| Tax deductible interest distributions  | (6,216)                   | (3,338)                   |
| <b>Tax charge for the year (Note 8a)</b>   | -                         | -                         |
| <b>c) Provision for deferred tax</b>   |                           |                           |
| No provision for deferred tax has been made in the current or prior accounting year. |                           |                           |
| <b>d) Factors that may affect future tax charges</b>                                 |                           |                           |
| The sub-fund has not recognised a deferred tax asset (2022: £nil).                   |                           |                           |

## 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Interim gross interest distribution - May 2022        | 5,340                     | 3,469                     |
| Interim gross interest distribution - August 2022     | 6,438                     | 4,185                     |
| Interim gross interest distribution - November 2022   | 9,319                     | 4,751                     |
| Final gross interest distribution - February 2023     | 13,991                    | 5,922                     |
|   | <b>35,088</b>             | <b>18,327</b>             |
| Add: amounts deducted on cancellation of shares       | 418                       | 366                       |
| Deduct: amounts added on issue of shares              | (3,621)                   | (1,364)                   |
| <b>Distributions</b>                                  | <b>31,885</b>             | <b>17,329</b>             |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Net revenue after taxation                            | 31,081                    | 16,690                    |
| Annual management charge paid from capital            | 804                       | 640                       |
| Undistributed revenue brought forward                 | 1                         | -                         |
| Undistributed revenue carried forward                 | (1)                       | (1)                       |
|   | <b>31,885</b>             | <b>17,329</b>             |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 26.

## ARTEMIS CORPORATE BOND FUND

### 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

## 17. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise bonds, derivatives, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub-fund's operations.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's portfolio statement. The sub-fund, in order to meet its investment objective and policy, invests predominantly in bonds and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund as disclosed in the balance sheet.

#### (i) Interest rate risk

Changes in interest rates or changes in expectations of future interest rates may result in an increase or decrease in the market value of the investments held. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background. Key determinants include economic growth prospects, inflation, governments' fiscal positions, short-term interest rates and international market comparisons. As part of the continuing review of the portfolio, the manager monitors and reviews these factors.

The following table details the interest rate risk profile of the sub-fund:

| Currency                | Floating rate <sup>†</sup><br>Assets/(liabilities)<br>£'000 | Fixed rate<br>financial assets<br>£'000 | Financial assets/<br>(liabilities) not<br>carrying interest<br>£'000 | Total<br>£'000   |
|-------------------------|---|---|--|------------------|
| <b>28 February 2023</b> |   |   |  |                  |
| Sterling                | <b>1,152,888</b>  | -                                       | <b>(2,906)</b>   | <b>1,149,982</b> |
| US Dollar               | <b>20,752</b>   | -                                       | <b>328</b>   | <b>21,080</b>    |
| Euro                    | <b>19,424</b>   | -                                       | <b>126</b>   | <b>19,550</b>    |
| <b>28 February 2022</b> |   |   |  |                  |
| Sterling                | 47,029  | 651,956                                 | 68,353   | 767,338          |
| US Dollar               | -   | 18,911                                  | (18,766)   | 145              |
| Euro                    | 40  | 44,234                                  | (46,128)   | (1,854)          |

<sup>†</sup> Includes cash and bank balances.

The forward currency contracts for Euro, Sterling and US Dollar are not included within this table. These can be found in the portfolio statement on page 16.

As at 28 February 2023 if there is a parallel shift in government bond yields with an increase of 1%, the sub-fund could expect to see an approximate 6.3% fall in the prices of the underlying bonds it holds (2022: 7.0%). A 1% fall in government bond yields

## ARTEMIS CORPORATE BOND FUND

would have an equal and opposite impact. This calculation has been prepared on a modified duration basis. Modified duration follows the concept that interest rates and fixed rate bond prices move in opposite directions. The calculation has been used to serve as an indication of the possible impact to the fund from changes to government bond yields. This concept relies on a large number of assumptions, in particular, that all bonds are equally sensitive to government bond yields. In practice, this is not the case as many bonds with higher credit risk have lower correlation with government bond yields and in some cases even negative correlation. The sub-fund contains a high and varying proportion of bonds with sometimes a high degree of credit risk. Furthermore, this makes the assumption of a parallel shift in yields. In practice, when interest rates change, longer dated government bond yields do not usually move in parallel with short-term interest rates. It is not unusual to see a negative correlation to short-term interest rate movements. The calculation also includes the impact of any futures positions, which are priced according to the yield of 10 year government bonds.

### (ii) Currency risk

A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. Therefore, the ACD may decide that a proportion of the investments that are not priced in sterling, may be covered by forward currency contracts, so that the sub-fund's exposure to currency risk is reduced. The loss on forward currency contracts for the period was £4,151,000 (2022: gain £612,000).

Revenue received in foreign currencies is converted into sterling on or near the date of receipt.

The exposure to each currency is shown in the tables below.

| Currency                | Investments<br>£'000 | Net other assets/<br>(liabilities)<br>£'000 | Forward<br>currency<br>contracts<br>£'000 | Total<br>£'000 |
|-------------------------|----------------------|---|---|----------------|
| <b>28 February 2023</b> |                      |   |   |                |
| Sterling                | 1,133,301            | 16,681                                      | 40,486                                    | 1,190,468      |
| US Dollar               | 20,752               | 328   | (21,154)                                  | (74)           |
| Euro                    | 19,424               | 126   | (19,834)                                  | (284)          |
| <b>28 February 2022</b> |                      |   |   |                |
| Sterling                | 679,380              | 22,787                                      | 65,171                                    | 767,338        |
| Euro                    | 18,911               | 306   | (19,072)                                  | 145            |
| US Dollar               | 44,234               | (1,054)                                     | (45,034)                                  | (1,854)        |

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of decreasing the return and net assets by £18,000 (2022: £85,000). A five percent decrease would have an equal and opposite effect.

### (iii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those relating to interest rate risk, currency risk and credit and counterparty risk), whether caused by factors specific to an investment or wider issues affecting the market generally. The portfolio is invested in securities domiciled in a number of countries and will be exposed to market movements in the relevant country arising from changes in the local economy and government decisions. As part of the continuing review of the portfolio, the ACD monitors and reviews these factors. A five per cent increase in the value of the sub-fund's portfolio would have the effect of increasing the return and net assets by £58,674,000 (2022: £37,180,000). A five per cent decrease would have an equal and opposite effect.

Returns from bonds are fixed at the time of purchase, the fixed coupon payments are known, as are the final redemption proceeds. This means that if a bond is held until its redemption date, the total return achieved is unaltered from its purchase date. However, over the life of a bond, the yield (and hence market price) at any given time will depend on the market environment at that time. Therefore, a bond sold before its redemption date may have a different price to its purchase level and a gain or loss may be realised.

Bond investments are exposed to credit rating risk which reflects the ability of a bond issuer to meet its obligations (i.e. pay interest on a bond and return the capital on the redemption date). Generally, the higher the credit rating of the bond issuer, the rate at which they can borrow money may be lower than a bond issuer with a lower credit rating reflecting the potentially higher risk. Additionally, the credit rating of a bond is likely to impact upon the market price of a bond with a higher credit rating reflecting the greater expectation that the bond will be redeemed by the issuer on the maturity date at the nominal amount. An element of the market price of a bond will reflect this.

#### (iv) Leverage risk

Leverage is defined as any method by which the sub-fund can increase its exposure by borrowing cash or securities or from leverage that is embedded in derivative positions. The ACD is required to calculate and monitor the level of leverage of the sub-fund, expressed as a percentage of the exposure of the sub-fund and its net asset value under the 'sum of the notionals' and 'commitment' method.

The sub-fund can use cash borrowing (subject to restrictions as set out in its Prospectus and COLL) and financial derivatives as sources of leverage. A result of 100% indicates that no leverage has been used.

As at 28 February 2023 and 28 February 2022 leverage ratios of the sub-fund were:

|                      | 28 February 2023<br>% | 28 February 2022<br>% |
|----------------------|-----------------------|-----------------------|
| Sum of the notionals | 116.5                 | 122.7                 |
| Commitment           | 100.0                 | 100.0                 |

#### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with J.P. Morgan Chase N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirement stipulated in COLL and the Prospectus. The derivatives are disclosed in the portfolio statement and UBS AG ('UBS') and JPMorgan are the counterparties for forward currency contracts. Aside from the custodian, the derivative counterparties and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

#### Debt security credit analysis\*

At the reporting date, the credit analysis of the sub-fund's debt securities was as follows:

|                                   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|-----------------------------------|---------------------------|---------------------------|
| Investment grade securities       | 1,060,434                 | 619,842                   |
| Below investment grade securities | 113,043                   | 106,074                   |
| Unrated securities                | -                         | 16,610                    |
| <b>Total of debt securities</b>   | <b>1,173,477</b>          | <b>742,526</b>            |

\* Source of credit ratings: Artemis Investment Management LLP.

# ARTEMIS CORPORATE BOND FUND

## Counterparty and collateral exposure

The types of derivatives held at the balance sheet date were forward currency contracts. Details of the individual contracts are disclosed separately in the portfolio statement and the total position by counterparty and the collateral pledged, at the balance sheet date, were as follows:

| Currency                | Forward currency contracts<br>£'000 | Total gross exposure<br>£'000 | Net collateral<br>(pledged)/held<br>£'000 |
|-------------------------|-------------------------------------|-------------------------------|---|
| <b>28 February 2023</b> |                                     |                               |   |
| Goldman Sachs           | (39)                                | (39)                          | -   |
| JPMorgan                | (452)                               | (452)                         | 600                                       |
| UBS                     | (11)                                | (11)                          | 150                                       |
| <b>28 February 2022</b> |                                     |                               |   |
| JPMorgan                | 714                                 | 714                           | (630)                                     |
| UBS                     | 351                                 | 351                           | (370)                                     |

Only cash collateral is pledged or held by the sub-fund. The balance includes cash held at brokers.

## (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances. Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the funds and investor base. This includes but is not limited to what percentage of the fund can be liquidated within certain redemption horizons, whether the largest investors in the fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered. There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

## 18. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 17 and Notes 6, 9, 11 and 13 on pages 19 to 21 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £8,671,000 (2022: due from £212,000).

## 19. Share classes

The annual management charge on each share class is as follows:

|                    |       |
|--------------------|-------|
| F distribution GBP | 0.15% |
| F accumulation GBP | 0.15% |
| I distribution GBP | 0.25% |
| I accumulation GBP | 0.25% |

The net asset value per share and the number of shares in each class are given in the comparative tables on page 27. The distributions per share class are given in the distribution tables on page 26. All classes have the same rights on winding up.

## 20. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This fund pays quarterly interest distributions.  
The following table sets out the distribution periods.

| Quarterly distribution periods | Start            | End              | Ex-dividend date | Pay date        |
|--------------------------------|------------------|------------------|------------------|-----------------|
| First interim                  | 1 March 2022     | 31 May 2022      | 1 June 2022      | 29 July 2022    |
| Second interim                 | 1 June 2022      | 31 August 2022   | 1 September 2022 | 31 October 2022 |
| Third interim                  | 1 September 2022 | 30 November 2022 | 1 December 2022  | 31 January 2023 |
| Final                          | 1 December 2022  | 28 February 2023 | 1 March 2023     | 28 April 2023   |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Corporate shareholders should note that a holding in a fund with more than 60% of its net assets in interest bearing assets may be required to be treated as a creditor loan relationship for corporation tax purposes.

| Lowest price                                  | <b>81.18</b>       | 103.06     | 88.94      | <b>87.69</b>       | 108.62      | 89.61       |

The operating charges are calculated on an ex-post basis and as such may differ from the ongoing charges figure where the ongoing charge has been annualised for a class that has not been open for a full year.

High and low price disclosures are based on quoted unit prices. Therefore opening and closing NAV prices may fall outside the high/low price threshold.

## Ongoing charges

| Class              | 28 February 2023 |
|--------------------|------------------|
| F distribution GBP | 0.27%            |
| F accumulation GBP | 0.27%            |
| I distribution GBP | 0.37%            |
| I accumulation GBP | 0.37%            |

Ongoing charges show the annualised operating expenses of each share class as a percentage of the average net assets of that class for the preceding 12 months.

Past performance is not a guide to the future.

\* Source: Artemis/ Lipper Limited, class I accumulation GBP from 30 October 2019 to 28 February 2023. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the **IA** sector benchmark.

\*\* Value at 12 noon valuation point.

\*\*\* Value at close of business.

Class I accumulation is disclosed as it is the primary share class.

# ARTEMIS GLOBAL EQUITY INCOME FUND

## NOTE ON MERGER

### Artemis Global Equity Income Fund merger

On 10 July 2020, the Artemis Global Equity Income Fund was merged with the Artemis Global Income Fund.

As a result of the relatively low level of assets in the sub-fund, its Authorised Corporate Director, Artemis Fund Managers Limited, proposed that it be merged with the Artemis Global Income Fund.

This fund has the same investment objective, policy and strategy, but a different legal structure: it is a unit trust. Both funds were managed by the same team of fund managers and held a similar portfolio of investments.

The merger was proposed so that investors could remain invested in their chosen investment strategy, benefit from lower costs offered by a larger fund, and avoid having their shares paid out when the Artemis Global Equity Income Fund closed - which could be treated as a 'disposal' of shares for tax purposes and so give rise to capital gains tax on any gains arising.

The merger was approved by shareholder vote at a meeting on 26 June 2020 and became effective on 10 July 2020. Following the merger, shareholders in the Artemis Global Equity Income Fund received units in the Artemis Global Income Fund. The direct costs associated with the merger, including the legal and accounting costs, were paid by Artemis and not by either of the funds involved.

The sub-fund will be wound up when outstanding withholding tax reclaims have been recovered and paid to Artemis Global Income Fund.

If you have any queries concerning the merger, please contact our client services team on 0800 092 2051 (outside the UK +44 1268 445 401) between 8:00am and 6:00pm (Monday to Friday) or by e-mail at [investorsupport@artemisfunds.com](mailto:investorsupport@artemisfunds.com). You can find information and regular updates on the Artemis Global Income Fund on the Artemis website.

\* The financial statements have been prepared on a break-up basis.

# NOTES TO THE FINANCIAL STATEMENTS

## 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared using the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL').

The financial statements have been prepared on a break-up basis for Artemis Global Equity Income Fund as this sub-fund is closed and is in the process of being terminated following the merger with Artemis Global Income Fund. Under this basis, assets are recorded at their recoverable value and liabilities are recorded at their expected settlement value. Any additional costs in respect of the termination of the sub-fund will be borne by the ACD.

**(b) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(c) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management.

**(d) Revenue.** Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/ stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(e) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(f) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(g) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation.

The ACD and the depositary have agreed, for the distribution class only, that 100% of the annual management charge is to be transferred to capital for the purpose of calculating the distribution, as permitted by COLL. The distribution currently payable reflects this treatment.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution.

With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

## ARTEMIS GLOBAL EQUITY INCOME FUND

### 3. Net capital gains

|                          | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--------------------------|---------------------------|---------------------------|
| Currency gains           | -                         | -                         |
| <b>Net capital gains</b> | -                         | -                         |

### 4. Direct transaction costs

There were no commissions or taxes paid in relation to transactions on the portfolio during the current year or previous year.

#### Dealing spread

As at the balance sheet date the average portfolio dealing spread was nil% (2022: nil %). This spread represents the difference between the bid and offer prices of each underlying investment expressed as a percentage of the value determined by reference to its offer price.

### 5. Revenue

|                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------|---------------------------|---------------------------|
| Bank interest        | -                         | -                         |
| <b>Total revenue</b> | -                         | -                         |

### 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | -                         | -                         |
| <b>Total expenses</b>  | -                         | -                         |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

### 7. Taxation

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| <b>a) Analysis of the tax charge in the year</b>        |                           |                           |
| Irrecoverable overseas tax                              | 20                        | -                         |
| <b>Total taxation (note 7b)</b>                         | 20                        | -                         |
| <b>b) Factors affecting the tax charge for the year</b> |                           |                           |
| Net revenue before taxation                             | -                         | -                         |
| Corporation tax at 20% (2022: 20%)                      | -                         | -                         |
| <b>Effects of:</b>                                      |                           |                           |
| Irrecoverable overseas tax                              | 20                        | -                         |
| <b>Tax charge for the year (note 7a)</b>                | 20                        | -                         |

#### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

#### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £nil (2022: £414,000) arising as a result of having unutilised management expenses of £nil (2022: £2,072,000) and non-trade loan relationship deficits of £nil (2022: £29,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

## 8. Distributions

| <b>Total cash and cash equivalents</b> | <b>-</b>                  | <b>-</b>                  |

## 11. Other creditors

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Amounts due to Artemis Global Income Fund * | 101                       | 143                       |
| <b>Total other creditors</b>                | <b>101</b>                | <b>143</b>                |

\* The amount payable to Artemis Global Income Fund includes an accrued balance for withholding tax reclaimable which has been translated into sterling at the year end exchange rate. The ACD will pay out these amounts to Artemis Global Income Fund when they have been received from the tax authorities.

## 12. Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the current or prior year end.

## 13. Risk disclosures

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

### (a) Market risk

As the sub-fund closed on 10 July 2020 there were no investments as at 28 February 2023 and 28 February 2022.

### (i) Interest rate risk

As the sub-fund closed on 10 July 2020 there were no investments as at 28 February 2023 and 28 February 2022.

## ARTEMIS GLOBAL EQUITY INCOME FUND

---

### (ii) Currency risk

As the sub-fund closed on 10 July 2020 there were no investments as at 28 February 2022. A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. The gain on forward currency contracts for the year was £nil (2022: £nil). Revenue received in foreign currencies is converted into sterling on or near the date of receipt.

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of increasing the return and net assets by £nil (2022: £nil). A five percent decrease would have an equal and opposite effect.

### (iii) Other price risk

As the sub-fund closed on 10 July 2020 there are no investments held at the year end, the sub-fund's exposure to other price risk is considered to be insignificant.

### (b) Credit and counterparty risk

As the sub-fund closed on 10 July 2020 there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

#### Counterparty and collateral exposure

As the sub-fund closed on 10 July 2020 there were no investments at 28 February 2023. At the balance sheet date no collateral was held or pledged by the Fund or on behalf of the counterparties.

### (c) Liquidity risk

As the sub-fund closed on 10 July 2020 there was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

## 14. Related party transactions

As the sub-fund closed on 10 July 2020 there were no investments as at 28 February 2023. At the balance sheet date no related party transactions in respect of the above.

## 15. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

# ARTEMIS PAN-EUROPEAN ABSOLUTE RETURN FUND

## NOTE ON CLOSURE

### Closure of Artemis Pan-European Absolute Return Fund.

Artemis Pan-European Absolute Return Fund closed on 20 May 2020.

At Artemis, we regularly review the range of funds we offer to ensure we are offering appropriate products to our investors. Given the small size of this sub-fund (approximately £7 million as at 31 March 2020), its investment performance and having seen continued redemptions, we reviewed its ongoing viability and future prospects. Having considered a number of options, we concluded that its closure was in the best interests of investors.

The costs associated with the closure of the sub-fund, including the legal and regulatory charges, were met by Artemis, although trading-related transaction costs associated with the disposal of its investments were borne by the sub-fund.

The sub-fund will be wound up when outstanding withholding tax reclaims have been recovered and paid to shareholders.

If you have any questions about the sub-fund's closure, please contact our client services team on 0800 092 2051 (outside the UK +44 1268 445 401) between 8:00am and 6:00pm (Monday to Friday) or by e-mail at [investorsupport@artemisfunds.com](mailto:investorsupport@artemisfunds.com).

## OBJECTIVE AND INVESTMENT POLICY\*

|                          |  |   |
|--------------------------|--|---|
| <b>Objective</b>         | <p>To achieve a positive return over a rolling three-year period, after fees, notwithstanding changing market conditions.</p> <p>The fund also targets returns in excess of 3 Month LIBOR, after fees, in calculating the performance fee payable 6-to the manager.</p> <p>There is no guarantee that the fund will achieve a positive return over a rolling three-year period or any other time period and your capital is at risk.</p> |   |
| <b>Investment policy</b> | <b>What the sub-fund invests in</b>  | <ul style="list-style-type: none"> <li>At least 80% in shares of European companies, either directly or indirectly through derivatives.</li> <li>Up to 20% in shares, or derivatives of shares, of companies in other countries, bonds, cash, near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.</li> </ul>  |

# ARTEMIS PAN-EUROPEAN ABSOLUTE RETURN FUND

## NOTES TO THE FINANCIAL STATEMENTS

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared using the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL').

The financial statements have been prepared on a break-up basis for Artemis Pan-European Absolute Return Fund as this sub-fund is closed and in the process of being terminated, as disclosed on the page 36. Under this basis, assets are recorded at their recoverable value and liabilities are recorded at their expected settlement value. Any additional costs in respect of the termination of the sub-fund will be borne by the ACD.

**(b) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period.

Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(c) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management.

**(d) Revenue.** Interest from debt securities is recognised on a time apportioned basis inclusive of any expected changes to future cash flows. Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/ stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Dividends on unquoted stocks are credited to revenue when the right to receive payment is established. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. The dividend equivalent values on contracts for difference are recognised when the underlying security is quoted ex-dividend. For long contracts a compensatory payment is credited to revenue whereas for short contracts a compensatory payment is debited from revenue. Bank interest is recognised on an accruals basis.

**(e) Expenses.** All expenses (other than the performance fee and those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(f) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(g) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

### 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised. For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

### 3. Net capital gains

|                    | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--------------------|---------------------------|---------------------------|
| Capital gains      | -                         | -                         |
| <b>Total gains</b> | -                         | -                         |

### 4. Direct transaction costs

There were no commissions or taxes paid in relation to transactions on the portfolio during the current year or previous year.

#### Dealing spread

As at the balance sheet date the average portfolio dealing spread was nil% (2022: nil%). This spread represents the difference between the bid and offer prices of each underlying investment expressed as a percentage of the value determined by reference to its offer price.

### 5. Revenue

|                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------|---------------------------|---------------------------|
| Bank interest        | -                         | -                         |
| <b>Total revenue</b> | -                         | -                         |

### 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | -                         | -                         |
| <b>Total expenses</b>  | -                         | -                         |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £nil (2022: £nil). This fee is paid by the manager.

### 7. Taxation

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>a) Analysis of the tax charge for the year</b>  |                           |                           |
| Irrecoverable overseas tax   | -                         | -                         |
| <b>Total taxation (note 7b)</b>  | -                         | -                         |
| <b>b) Factors affecting the tax charge for the year</b>  |                           |                           |
| Net revenue before taxation  | -                         | -                         |
| Corporation tax at 20% (2022: 20%)   | -                         | -                         |
| <b>Effects of:</b>   |                           |                           |
| Irrecoverable overseas tax   | -                         | -                         |
| <b>Tax charge for the year (note 7a)</b>   | -                         | -                         |
| <b>c) Provision for deferred tax</b>   |                           |                           |
| No provision for deferred tax has been made in the current or prior accounting year.   |                           |                           |
| <b>d) Factors that may affect future tax charges</b>   |                           |                           |
| The sub-fund has not recognised a deferred tax asset of £1,341,000 (2022: £1,341,000) arising as a result of having unutilised management expenses of £6,705,000 (2022: £6,705,000) and non-trade loan relationship deficits of £5,377,000 (2022: £5,377,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised. |                           |                           |

## ARTEMIS PAN-EUROPEAN ABSOLUTE RETURN FUND

### 8. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Distributions   | -                         | -                         |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Deficit transferred to capital                        | -                         | -                         |
| Net expense after taxation                            | -                         | -                         |
|   | -                         | -                         |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares.

### 9. Debtors

|                                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--------------------------------------|---------------------------|---------------------------|
| Overseas withholding tax recoverable | 98                        | 102                       |

\* The amount payable to shareholders includes an accrued balance for withholding tax reclaimable which has been translated into sterling at the year end exchange rate. The ACD will pay out these amounts to shareholders when they have been received from the tax authorities.

### 12. Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the current or prior year end.

### 13. Risk disclosures

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

#### (a) Market risk

As the sub-fund closed on 20 May 2020 there were no investments as at 28 February 2023 and 28 February 2022.

##### (i) Interest rate risk

As the sub-fund closed on 20 May 2020 there were no investments as at 28 February 2023 and 28 February 2022.

##### (ii) Currency risk

As the sub-fund closed on 20 May 2020 there were no investments as at 28 February 2023. A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. The gain on forward currency contracts for the year was £nil (2022: £nil). Revenue received in foreign currencies is converted into sterling on or near the date of receipt.

##### (iii) Other price risk

As the sub-fund closed on 20 May 2020 there are no investments held at the year end, the sub-fund's exposure to other price risk is considered to be insignificant.

#### (b) Credit and counterparty risk

As the sub-fund closed on 20 May 2020 there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

##### Counterparty and collateral exposure

As the sub-fund closed on 20 May 2020 there were no investments at 28 February 2023. At the balance sheet date no collateral was held or pledged by the Fund or on behalf of the counterparties.

#### (c) Liquidity risk

As the sub-fund closed on 20 May 2020 there was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

#### 14. Related party transactions

As the sub-fund closed on 20 May 2020 there were no investments as at 28 February 2023. At the balance sheet date no related party transactions in respect of the above.

#### 15. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

# ARTEMIS POSITIVE FUTURE FUND

## OBJECTIVE AND INVESTMENT POLICY

|                          |   |  |                            |   |
|--------------------------|---|--|----------------------------|---|
| <b>Objective</b>         | To grow capital over a five year period by investing in companies which meet the manager's criteria for positive environmental and/or social impact.  |  | <b>Investment strategy</b> | <ul style="list-style-type: none"> <li>The sub-fund is actively managed and will be concentrated, typically investing in 35-45 companies at any time.</li> <li>A number of companies are removed from the investment universe at the outset of the investment process using the criteria set out in the investment policy above.</li> <li>A research driven stock selection process is then used to identify innovative companies whose products and services the manager believes are disrupting established industries by offering a positive environmental and/or social impact.</li> <li>The manager believes that companies which have a combination of disruptive positive impact, favourable strategic positioning, an emerging competitive advantage and improving operational quality are more likely to deliver significant economic returns for their shareholders. These companies are also typically growing faster than the market.</li> <li>Assessment and measurement of a company's ability to deliver positive environmental and/or social impact and generate financial returns will be conducted at a company level. When considering the positive impact of a company, the manager analyses the impact of: <ul style="list-style-type: none"> <li>the products and services it provides;</li> <li>its operational practices and standards; and</li> <li>its future positive impact or capacity for improvement.</li> </ul> </li> <li>The manager is predominantly driven by a qualitative approach to research and stock selection but also utilise quantitative screening and third-party research, including environmental, social and governance (ESG) screens.</li> <li>Engagement forms an important part of the manager's investment process. The manager expects that investee companies should set ambitious goals and seek to continuously improve. Engagement allows the manager to identify and monitor the progressive management philosophy they seek at investee companies. If it is the manager's opinion that an investee company no longer meets the required investment criteria or is not making sufficient progress on improving their operational performance, the sub-fund will not make any further investments in the company and will seek to realise its investment in an orderly fashion.</li> <li>The manager will report, on at least an annual basis, on the environmental and/or social impact of the companies in which the fund invests consistent with the stated strategy using both qualitative and quantitative assessments. The report will also provide details of the manager's stewardship activities.</li> </ul> |
| <b>Investment policy</b> | <p><b>What the sub-fund invests in</b></p> <ul style="list-style-type: none"> <li>80% to 100% in company shares.</li> <li>Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.</li> </ul> <p><b>Use of derivatives</b></p> <p>The sub-fund may use derivatives for efficient portfolio management purposes to:</p> <ul style="list-style-type: none"> <li>reduce risk</li> <li>manage the sub-fund efficiently.</li> </ul> <p><b>Where the sub-fund invests</b></p> <ul style="list-style-type: none"> <li>Globally</li> </ul> <p><b>Industries the sub-fund invests in</b></p> <ul style="list-style-type: none"> <li>Any, except for those excluded at the sub-industry level below.</li> </ul> <p><b>Other limitations specific to this sub-fund</b></p> <p>Shares in the following types of company are automatically excluded:</p> <ul style="list-style-type: none"> <li>Alcohol: companies which derive more than 10% revenue from alcohol;</li> <li>Tobacco: companies which derive more than 10% revenue from tobacco;</li> <li>Weapons: companies which produce or sell civilian firearms and/or manufacture or sell armaments, nuclear weapons or associated strategic products;</li> <li>Nuclear power: companies which own a nuclear power facility;</li> <li>Gambling: companies which derive more than 5% of revenue from gambling;</li> <li>Animal testing: companies that engage in the production and sale of animal tested cosmetics;</li> <li>Adult entertainment: companies which own an adult entertainment company or produce adult entertainment;</li> <li>Genetic modification: companies which conduct genetic modification for agricultural purposes; and</li> <li>Fossil fuels: companies which: <ul style="list-style-type: none"> <li>-own oil &amp; gas reserves; or</li> <li>-engage in conventional or unconventional oil and gas production and processing; or</li> <li>-own thermal coal reserves, mine thermal coal or derive more than 10% revenue from thermal coal-based electricity generation.</li> </ul> </li> <li>Biodiversity and land use: Companies that the manager determines to be implicated in severe controversies related to the company's use or management of natural resources; and</li> <li>Companies that the manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.</li> </ul> |  | <b>Benchmarks</b>          |   |
|                          |   |  |                            | <ul style="list-style-type: none"> <li><b>MSCI AC World NR GBP NR</b><br/>A widely-used indicator of the performance of global stockmarkets, in which the fund invests. # ARTEMIS POSITIVE FUTURE FUND

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the sub-fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- **Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- **Emerging markets risk:** Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
- **Concentration risk:** The sub-fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.
- **Charges from capital risk:** Where charges are taken wholly or partly out of a sub-fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
- **Smaller companies risk:** Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.
- **Specialist investment objective risk:** The sub-fund will only invest in companies which have a positive environmental and/or social impact. It is also prevented from investing in companies which conduct certain types of activities. The universe of potential investments available to the sub-fund will therefore be smaller than if no such restrictions were applied. If a company in which the sub-fund invests no longer meets the criteria for investment and/or is not making sufficient progress on improving its operational performance, the manager will seek to sell the investment.

The price which may be obtained for selling an investment in these circumstances might be lower than that which could have been obtained had the sale not been required.

There was no change to the risk indicator in the 12 months to 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

## INVESTMENT REVIEW

- The fund returned (10.2)% versus 1.7% from the MSCI AC World Index<sup>1</sup>.
- The Inflation Reduction Act in the US should hasten the triumph of clean technologies.
- Emerging-growth equities appear to be attractively valued by almost any historic standard.

### Our 'emerging growth' stocks underperformed

Market conditions for investors in 'growth' companies (companies whose sales are expected to keep growing at an above-average pace) were extremely challenging for most of the 12 months covered by this report – particularly in the first half of the year. A confluence of factors drove inflation to 40-year highs and pushed expectations for interest rates sharply higher, increasing funding costs for growth companies and sending their share prices lower. Our fund returned (10.2)% in sterling terms over the year while the benchmark MSCI AC World Index returned 1.7%.

Although many of the factors that have pushed inflation and rates higher will prove to be temporary, it is impossible to forecast when (or even if) some will be resolved. The war in Ukraine and supply-chain disruptions both remain meaningful factors and the interest-rate shock is clearly beginning to affect demand.

Yet while it was clearly a difficult year for our strategy, it is our belief that 'growth' equities and especially emerging-growth equities – those in the early stages of their journey and whose growth can be rapid but volatile – now appear to be attractively valued by almost any historic standard. According to our analysis, 'emerging-growth' stocks (companies in the early stages of their journey, which are investing for future growth rather than focusing on short-term profits) now trade on roughly the same multiple as the broader global equity market – despite being expected to grow nearly twice as quickly.

### Our investment process did not work in the way we expected, so we took steps to improve it

The easy response to a period of underperformance would have been to ape what so many other funds do, by buying larger, more defensive companies. Our belief, however, is that we can deliver the greatest impact – and the best long-term returns – by investing in small-to-mid cap growth companies bringing change to unsustainable systems such as fossil fuels, healthcare, education and food production.

But while we remain committed to the core elements of our investment style, with hindsight it became clear that we had underestimated the risk of persistent inflation and had been too slow to react to the possibility of a 'regime change' in financial markets. When 2022 began, we had large positions in a number of higher-risk, more volatile 'emerging growth' stocks. At times we made the situation worse by adding to these stocks on weakness (a 'buy-the-dip' approach had worked well in previous market downturns). In retrospect, we had too much invested in higher-risk stocks and the size of our positions were larger than they should have been given the wider environment.

So, after analysing our returns, we concluded that our holdings in higher-risk, emerging growth stocks needed to be smaller. We also resolved to be more proactive in selling holdings when we stop understanding why a given stock is underperforming. We no longer add to holdings when their share price drops unless we can be 100% confident the share-price movement is unwarranted.

### Our clean tech holdings have performed relatively well in recent months...

During the summer, the US Senate reached a deal – the Inflation Reduction Act – to invest in renewable energy technologies. The bill includes US\$430bn in new spending on energy, electric vehicle credits and health insurance. It was partly because of this that some of the renewable energy companies in our portfolio – Nibe and SolarEdge – performed relatively well. In combination with the fuel crisis in Europe, the Act should dramatically accelerate the adoption of clean technologies.

### We reduced the fund's exposure to slowing economic growth

Given the economic challenges, it is vital that we continually look for evidence that our portfolio companies are delivering as expected and that we adjust our views and the portfolio when they are not. To this end, we reduced the portfolio's exposure to slowing economic growth by halving our positions in **Disco** and **Teradyne**, two holdings that are directly exposed to weaker demand for semiconductors.

We sold our position in **MIPS**, whose technology enhances the protection that cycling helmets provide to their wearers. It is directly exposed to a fall in consumer spending on cycling accessories; bike sales were a clear beneficiary of the pandemic.

Disappointing results from **Chegg** reduced our stock-specific conviction, so we reduced the size of our position. We sold out of **DocuSign** following very disappointing results.

Past performance is not a guide to the future.

<sup>1</sup> Source: Artemis/ Lipper Limited, from 6 April 2021 to 28 February 2023, class I accumulation GBP. All figures show total returns with income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the IA sector benchmark.

## ARTEMIS POSITIVE FUTURE FUND

---

We also sold **Avita Medical** and **Volpara**. This was a challenging decision because both companies are executing well, have a clear positive impact and the potential to create significant value. However, we were concerned about the trading liquidity in the stocks and their balance sheet runway given their negative cashflow status.

### We added some new stocks to the fund

In September, we bought **Energy Recovery**, a technology company whose unique product captures waste energy from certain industrial processes and feeds it back to the system. Primarily used in desalination to this point, it is now expanding into some new end markets such as refrigeration. We believe this has yet to be factored into its valuation.

We also bought high-quality UK industrial **Halma**, which has growth businesses in several clean technology areas.

**NIBE** is one of the world's largest manufacturers of heat pumps and focuses primarily on the German and Nordic markets. We believe end demand will be accelerated by the war in Ukraine and that we are early in the adoption curve as consumers switch away from gas boilers toward more environmentally friendly heat pumps.

We bought **Veeva Systems**, a high-quality, cash-generative, founder-run software company that delivers leading software for the pharmaceutical industry. Veeva was the first US company in history to convert to a Public Benefit Corporation ('PBC' status places a legal obligation on the company to consider its impact on workers, the community and the environment– not just its shareholders. For PBCs, sustainability is a core principle rather than an afterthought). Their goal is to reduce clinical-trial times and reduce costs by 25% while creating high-quality employment opportunities.

**PowerSchool** provides software for so called 'K-12' schools in the US, which educate children from kindergarten through to year 12. Using PowerSchool's software to manage records and assessments allows teachers to focus their time and energy on teaching. The education sector has been a slow adopter of technology but software delivered via the cloud makes it much easier for schools to adopt these solutions.

We also purchased **Airtel Africa**, a FTSE 100 company that has exposure to 14 African telecom markets. The recent launch of their mobile money product in Nigeria, low levels of mobile phone penetration and favourable demographic trends should support rapid growth in sales over the next five years. The company has targets for improving digital inclusion and gender diversity.

### We engaged with our holdings

We have voted at a number of AGMs over the past 12 months. These included the AGM of Montrose Environmental, whose advisory remuneration report was rejected by its shareholders; we also voted against as we felt awards to the executives were too generous.

At the AGM of e-commerce platform Shopify, meanwhile, we opposed the award of 'founder shares' to CEO Tobi Lütke. Our view was that the arrangement provided Tobi control with (potentially) only a minimum shareholding.

We also voted at the AGM of online education services provider Coursera and gave the company our view of what would constitute a credible 'net zero' commitment.

### Several of our companies reported on their progress towards being more sustainable

**Tesla** published its 2021 Impact Report. Rather than scrutinising the company's 'actual' positive impact, attention focused on its criticism of ESG and its focus on the dollar value of risk/return. In a nod to some of the controversies around its historical operations, the company recognised that it could do better. Tesla is targeting sales of 20 million electric vehicles in 2030 (it sold 0.94 million in 2021) and 1,500 GWh of energy storage (versus 4 GWh in 2021).

**Insulet**, which makes drug-delivery devices, published its **third sustainability report**. This provided evidence of the progress it is making in multiple areas – progress we would expect to continue as the company scales up.

**Tetra-Tek**, the environmental consulting engineer, provided baseline impact metrics for its activities and measured progress towards its 2030 sustainability programme goals – including improving the lives of a billion people by 2030.

Implantable lens manufacturer, **Staar Surgical**, published its 2022 Sustainability Report. We view this as a step up from its previous publications and as evidence that the company is thinking deeply about efficiency in all its forms.

**Craig Bonthron, Neil Goddin, Jonathan Parsons and Ryan Smith**  
Fund Managers

## INVESTMENT INFORMATION

### Ten largest purchases and sales for the period ended 28 February 2023

## NOTES TO THE FINANCIAL STATEMENTS

---

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period. Where a sub-fund invests in markets that are closed for trading at the sub-fund's valuation point, the ACD will allow for the Net Asset Value to be adjusted (based on movements of index futures or other suitable proxies in markets closed at the sub-fund valuation point, since the last market close), to reflect more accurately the fair value of the sub-fund's investments. Listed investments are valued at fair value which is deemed to be the bid or SETS price. The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Exchange traded derivatives are priced at fair value, which is deemed to be the bid price. Open forward currency contracts are shown in the Portfolio Statement at market value and the net gains are reflected within forward currency contracts under net capital losses in the Notes to the financial statements.

**(e) Revenue.** Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital.

It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

### 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. The ACD and the depositary have agreed, for the distribution classes only, that 100% of the annual management charge is to be transferred to capital for the purpose of calculating the distribution, as permitted by COLL. The distribution currently payable reflects this treatment. Gains and losses on non-derivative investments and currencies, whether realized or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised. For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares. Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

### 3. Net capital losses

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

| <b>Percentage of sub-fund average net assets</b> |                    | <b>0.03%</b>        | <b>0.02%</b>   |                               |  |  |

During the year the sub-fund incurred £nil (2022: £nil) in capital transaction charges.

#### Dealing spread

As at the balance sheet date the average portfolio dealing spread was 0.12% (2022: 0.34%). This spread represents the difference between the bid and offer prices of each underlying investment of the sub-fund expressed as a percentage of the value determined by reference to its offer price.

### 5. Revenue

|                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------|---------------------------|---------------------------|
| Overseas dividends   | 137                       | 58                        |
| Bank interest        | 37                        | -                         |
| UK dividends         | 13                        | -                         |

## ARTEMIS POSITIVE FUTURE FUND

### 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 141                       | 117                       |
| Administration fees  | 48                        | 42                        |
| <b>Total expenses</b>  | <b>189</b>                | <b>159</b>                |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £9,000 (2022: £8,000). This fee is paid by the manager.

### 7. Taxation

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| <b>a) Analysis of the tax charge for the period</b>       |                           |                           |
| Irrecoverable overseas tax                                | 18                        | 6                         |
| <b>Total taxation (note 7b)</b>                           | <b>18</b>                 | <b>6</b>                  |
| <b>b) Factors affecting the tax charge for the period</b> |                           |                           |
| Net revenue before taxation                               | (2)                       | (101)                     |

| Unutilised management expenses                            | 30                        | 32                        |
| Irrecoverable overseas tax                                | 18                        | 6                         |
| Non-taxable UK dividends                                  | (3)                       | -                         |
| Non-taxable overseas dividends                            | (27)                      | (12)                      |
| <b>Tax charge for the period (note 7a)</b>                | <b>18</b>                 | <b>6</b>                  |

#### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

#### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £62,243 (2022: £31,716) arising as a result of having unutilised management expenses of £311,215 (2022: £158,579). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

### 8. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Final dividend distribution                           | 30                        | 4                         |
| Add: amounts deducted on cancellation of shares       | 4                         | -                         |
| Deduct: amounts added on issue of shares              | (7)                       | (2)                       |
| <b>Distributions</b>                                  | <b>27</b>                 | <b>2</b>                  |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Annual management charge paid from capital            | 27                        | 20                        |
| Deficit transferred to capital                        | 21                        | 89                        |
| Revenue paid on conversion of shares                  | (1)                       | -                         |
| Net expense after taxation                            | (20)                      | (107)                     |
|   | <b>27</b>                 | <b>2</b>                  |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 57.

## 9. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 - Investments with unadjusted quoted prices in an active market;

Level 2 - Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 - Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |             | 28 February 2022 |             |
|--------------|------------------|-------------|------------------|-------------|
|              | Assets           | Liabilities | Assets           | Liabilities |
|              | £'000            | £'000       | £'000            | £'000       |
| Level 1      | 29,064           | -           | 31,758*          | -           |
| <b>Total</b> | <b>29,064</b>    | <b>-</b>    | <b>31,758</b>    | <b>-</b>    |

\* Level 1 includes fair value adjustment based on movement of futures in markets closed at the sub-fund valuation point, since the last market close.

## 10. Debtors

|  | 28 February 2023 | 28 February 2022 |
|--|------------------|------------------|
|  | £'000            | £'000            |

### 15. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, derivatives and cash balances which include debtors and creditors that arise directly from the sub-fund's operations. The fund only executes derivative contracts where both the derivative instrument and the counterparty have been approved by the manager.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's portfolio statement. The sub-fund, in order to meet its investment objective and policy, invests predominantly in equities and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund as disclosed in the balance sheet.

#### (i) Interest rate risk

Changes in interest rates or changes in expectations of future interest rates may result in an increase or decrease in the market value of the investments held. As the majority of the sub-fund's financial assets are non-interest bearing, the sub-fund is only subject to limited exposure to fair value interest rate risk due to fluctuations in levels of market interest rates and therefore no sensitivity analysis has been provided.

#### (ii) Currency risk

A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. Therefore, the ACD may decide that a proportion of the investments that are not priced in sterling, may be covered by forward currency contracts, so that the sub-fund's exposure to currency risk is reduced. The gain on forward currency contracts for the period was £1,000 (2022: £20,000).

The exposure to each currency is shown in the tables below.

| Currency                | Investments<br>£'000 | Net other assets/<br>(liabilities)<br>£'000 | Forward currency<br>contracts<br>£'000 | Total<br>£'000 |

| Hong Kong Dollar        | 713                  | -   | -                                      | 713            |

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of increasing the return and net assets by £1,346,000 (2022: £1,599,000). A five percent decrease would have an equal and opposite effect.

### (iii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those relating to interest rate risk, currency risk and credit and counterparty risk), whether caused by factors specific to an investment or wider issues affecting the market generally. The value of equities is dependent on a number of factors, arising from the performance of the company itself and matters arising in the wider market (for example the state of the underlying economy and current government policy). The portfolio is invested in securities domiciled in a number of countries and will be exposed to market movements in the relevant country arising from changes in the local economy and government decisions. As part of the continuing review of the portfolio, the ACD monitors and reviews these factors. A five per cent increase in the value of the sub-fund's portfolio would have the effect of increasing the return and net assets by £1,453,000 (2022: £1,588,000). A five per cent decrease would have an equal and opposite effect.

### (iv) Leverage risk

Leverage is defined as any method by which the sub-fund can increase its exposure by borrowing cash or securities or from leverage that is embedded in derivative positions. The ACD is required to calculate and monitor the level of leverage of the sub-fund, expressed as a percentage of the exposure of the sub-fund and its net asset value under the 'sum of the notionals' and 'commitment' method.

The sub-fund can use cash borrowing (subject to restrictions as set out in its Prospectus and COLL) and financial derivatives as sources of leverage. A result of 100% indicates that no leverage has been used.

As at 28 February 2023 and 28 February 2022 the leverage ratios of the sub-fund were:

|                      | 28 February 2023<br>% | 28 February 2022<br>% |
|----------------------|-----------------------|-----------------------|
| Sum of the notionals | 100.0                 | 100.0                 |
| Commitment           | 100.0                 | 100.0                 |

## ARTEMIS POSITIVE FUTURE FUND

---

### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with J.P. Morgan Chase N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit worthiness of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirement stipulated in COLL and the Prospectus.

### (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances. Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the funds and investor base. This includes but is not limited to what percentage of the fund can be liquidated within certain redemption horizons, whether the largest investors in the fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered. There was no significant concentration of liquidity risk as at 28 February 2023.

## 16. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 49 and notes 6, 8, 10 and 12 on pages 52 to 53 including all issues and cancellations where the ACD acted as principal.

The balance due from the ACD as at 28 February 2023 in respect of these transactions was £12,000 (2022: due to the ACD £455,000).

## 17. Share classes

The annual management charge on each share class is as follows:

|                    |       |
|--------------------|-------|
| F distribution GBP | 0.35% |
| F accumulation GBP | 0.35% |
| I distribution GBP | 0.75% |
| I accumulation GBP | 0.75% |

The net asset value per share and the number of shares in each class are given in the comparative tables on page 58. The distributions per share class are given in the distribution tables on page 57. All classes have the same rights on winding up.

## 18. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This sub-fund pays annual dividend distributions.  
The following table sets out the distribution periods.

| Annual distribution period | Start        | End              | Ex-dividend date | Pay date      |
|----------------------------|--------------|------------------|------------------|---------------|
| Final                      | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

\*\* Launched on 6 April 2021.

The operating charges are calculated on an ex-post basis and as such may differ from the ongoing charges figure where the ongoing charge has been annualised for a class that has not been open for a full year. High and low price disclosures are based on quoted unit prices. Therefore opening and closing NAV prices may fall outside the high/low price threshold.

## Ongoing charges

| Class              | 28 February 2023 |
|--------------------|------------------|
| F distribution GBP | 0.50%            |
| F accumulation GBP | 0.50%            |
| I distribution GBP | 0.90%            |
| I accumulation GBP | 0.90%            |

Ongoing charges shows the annual operating expenses of each share class as a percentage of the average net assets of that class for the preceding 12 months.

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- Charges from capital risk:** Where charges are taken wholly or partly out of a sub-fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
- Emerging markets risk:** Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
- China risk:** The sub-fund can invest in China A-shares (shares traded on Chinese stock exchanges in Renminbi). There is a risk that the sub-fund may suffer difficulties or delays in enforcing its rights in these shares, including title and assurance of ownership.

There was no change to the risk indicator in the 12 months to 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

# ARTEMIS SMARTGARP GLOBAL EMERGING MARKETS EQUITY FUND

## INVESTMENT REVIEW

- Significant outperformance over the period.
- Stocks on lower valuations have outperformed.
- The long-term investment case remains compelling.

### Performance – Positive in a falling market

The fund returned 1.8% in the twelve months to 28 February 2023, significantly ahead of the MSCI Emerging Markets index's (6.1) % and the average peer's return of (4.5) %. In the longer term, performance since launch of 6.5% per annum puts us ahead of both the benchmark index at 4.4% and the average peer at 2.0% per annum<sup>1</sup>.

### Stock picking opportunities in China

Our preference for 'deep value' names in China (stocks whose share prices appear extremely low relative to their earnings) contributed positively to performance in the last year and remains a significant exposure in the fund. Top contributors were in logistics (Sinotrans), telecommunications (China Mobile) and energy (Sinopec).

By the end of October, we sensed a more favourable balance between risk and reward developing in the Chinese market. This prompted us to buy some consumer stocks, an area we had been light on in the fund since the pandemic in 2020. Signs of more relaxed Covid controls and a potential re-opening of the economy fuelled a strong rally in the following months. Our holding in Hello Group (social networking) was a beneficiary of this improved sentiment.

### Brazil and Turkey contribute strongly

Elsewhere, winners were found in Brazil and Turkey. Brazil benefited from firm commodity prices and an export boom. Our holdings in Gerdau (steel) and BB Seguridade (insurance) performed well against this backdrop. Energy giant Petrobras had a strong year, mainly because of the substantial dividends they delivered to investors.

The Turkish stock market was a surprise winner in the period. Its economy is battling against inflation near 80% and persisting in unconventional monetary policies. Despite this, its stock market was the best performer in emerging markets in the last year. Profit growth in our Turkish holdings has been strong against the backdrop of economic headwinds. Glass producer Sisecam, bottler Coca Cola Icecek were both amongst the top contributors. Shares in Sisecam rose +208% in the period.

Chart 1: Country contribution to relative performance

Source: Artemis

### Technology hardware among detractors

In a volatile year for share prices, there were inevitably some disappointments among our holdings. Heightened concerns about the real estate sector in China and tighter credit controls on property investment led to our holding in Country Garden falling significantly. Concerns emerged about a slowdown in demand for technology from a weaker global economy. The fund benefited from being underweight to the sector, but Lenovo and Phison Electronics were detractors among our technology holdings.

Despite these setbacks, the fund outperformed significantly in the period. It was a good year for value stocks and mid-caps, both areas where we have found (and continue to find) plenty of opportunities.

### Review – Rate hikes, dollar strength and slowing growth weigh on markets

Firm food and energy prices alongside aggressive monetary policy tightening all pointed to a slowdown in developed economies. Aggressive rate hikes by the US Federal Reserve (Fed) and the associated strength of the US dollar weighed on sentiment towards emerging markets.

### Emerging market central banks have taken measures to protect against inflation

A number of EM central banks raised interest rates in 2021, pre-empting similar moves by the Fed by almost a year. With tightening supply chains and rising food costs, central bankers acted early to curb inflationary threats, putting them in a better place than they have been historically. In aggregate, emerging countries continue to have current account surpluses, largely a result of the healthy fundamentals of Asian economies.

Past performance is not a guide to the future.

<sup>1</sup> Source: Artemis/ Lipper Limited, class I accumulation GBP. All figures show total returns with dividends and/or income reinvested, net of all charges. Our benchmark is MSCI EM (Emerging Markets) NR. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the IA sector benchmark.

## China – Depressed valuations with positive catalysts

The situation in China dominated sentiment during the first half of the period because of its continued 'zero Covid' strategy, geopolitical concerns and political risks following the 20<sup>th</sup> National Congress of the Chinese Communist Party. Sentiment had improved rapidly by the end of 2022. Positive developments in money supply and monetary policy provided some support, but the main catalyst was China's reopening. As the country moved away from a 'zero Covid' policy, the potential unleashing of substantial excess savings amongst consumers created opportunities. By the end of the period, data releases were signalling a broad pickup in economic activity and corporate news pointed to improving consumer sentiment and a recovery in demand.

## Transactions – following the process to find opportunities

We continued to find plenty of companies delivering good growth and trading on low valuations. Our systematic approach to screening companies for favourable characteristics ensures that we remain consistent in this discipline. At the country level we increased our stakes in China, India and Taiwan at the expense of Korea and Turkey. Among sectors, we added to consumer discretionary and staples and reduced materials, energy and technology.

## We remain positioned for a rotation into value

The result of these changes is that the fund continues to offer an attractive combination of extremely low valuations and attractive growth prospects. We remain overweight China, Brazil and Turkey and underweight India, Taiwan and Saudi Arabia. At the sector level, energy, financials and industrials feature as the largest overweights. Materials, semiconductors and software and services the largest underweights. Our 'value' bias remains substantial. In other words, we favour stocks whose share prices are low relative to their earnings, meaning they trade on low price-to-earnings (p/e) multiples. The fund trades on a price/earnings ratio of 6.2x, compared to the benchmark index at 11.8x (a 48% discount).

Chart 2: The fund's P/E ratio versus the market

### Fund characteristics

Relative P/E ratio of the fund versus market

Source: Artemis, Bloomberg, MSCI as at 28 February 2023.

Despite the significant outperformance of value stocks in the last year, our discount to the market has not changed much. This is because many of our companies are seeing their growth forecasts revised up significantly. With this fundamental support in place, we expect share prices to follow.

## Emerging market equities remain cheap and unloved

For much of the period, Chinese equity markets have suffered from weaker sentiment for reasons highlighted above. Periods of excess pessimism also coincide with the point of maximum financial opportunity. In our experience, these environments create opportunities for stock pickers. Most global (and, indeed most emerging market funds) have relatively little capital committed to Chinese stocks. Yet in our view, the potential for significant reforms and consumers pent-up demand to support growth appears to be underestimated.

More broadly, stocks in emerging markets are trading on multi-decade valuation lows against developed markets across a range of metrics. They remain out of favour and extremely cheap relative to US stocks. With signs of supportive policy measures ahead and beneficiaries from shifting supply chains aplenty, sentiment should improve from here.

## Our focus on fundamentals

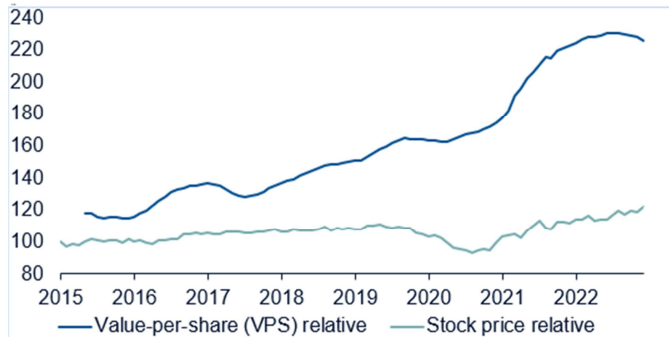

For a number of years, speculation and surging share prices have reduced investors' focus on fundamentals. This has subsequently created excessively high valuations in parts of the market (such as US technology stocks) that have now started to unwind. We think this has further to run. We see less risk in companies that have been overlooked and trade on low valuations, but where there are signs of improving fundamentals.

We continue to believe that a focus on companies' fundamentals, such as earnings and cash flows, combined with a strict discipline around valuations is the best way to navigate markets. To monitor how effective we are at doing this, we track earnings, cash flows, dividends, operating profits and asset values at the company level. We can then compare the combined measure of a company's financial fundamentals (its 'fundamental value per share') to the broader market.

# ARTEMIS SMARTGARP GLOBAL EMERGING MARKETS EQUITY FUND

Chart 3 shows the evolution of the fund's fundamental value per share relative to the market and its relative performance.

Fund managers

Source: Artemis, Bloomberg

## Divergence between fundamentals and share prices

The divergence between fundamentals and share prices is substantial, as shown by the wide gap between the two lines. In the three years to the end of February, the companies the fund has invested in have, on average, grown their fundamental value per share 11% faster than the market per annum. While the fund has outperformed in the same period, it has lagged this fundamental growth significantly. In our opinion, there remains significant further catch-up potential for our fund regardless of the future direction of the equity market.

### SmartGARP® – Evidence-based investing...

The Artemis SmartGARP Global Emerging Markets Equity Fund is one of five Artemis funds that rely heavily on SmartGARP, Artemis' proprietary stock-screening tool.

SmartGARP screens 2500 stocks across emerging and frontier markets, looking for those whose valuation appears out of line with their growth prospects and where there is a catalyst that might cause investors to re-appraise their views about the company. And while SmartGARP helps partly by singling out potentially undervalued stocks, it also monitors whether the reasons for investing in our existing holdings are still valid. As an unemotional and objective yardstick, SmartGARP is an extremely valuable tool.

The last 12 months have been no different to our experience from the last few decades, we have once again found the unemotional and objective yardstick of SmartGARP to be an extremely useful tool.

Raheel Altaf and Peter Saacke

# NOTES TO THE FINANCIAL STATEMENTS

## 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period. Listed investments are valued at fair value which is deemed to be the bid or SETS price. The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers.

**(e) Revenue.** Dividends receivable from equity and non-equity shares are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends on unquoted stocks are credited to revenue when the right to receive payment is established. Dividends received as shares (scrip/stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend

results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money. Indian capital gains tax is accounted for on an accruals basis.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. The ACD and the depositary have agreed, for the distribution classes only, that 100% of the annual management charge is to be transferred to capital for the purpose of calculating the distribution, as permitted by COLL. The distribution currently payable reflects this treatment.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

# ARTEMIS SMARTGARP GLOBAL EMERGING MARKETS EQUITY FUND

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

## 3. Net capital losses

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------------|---------------------------|---------------------------|

| Overseas stock dividends | -                         | 3                         |
| Bank interest            | 43                        | 1                         |
| <b>Total revenue</b>     | <b>27,855</b>             | <b>25,186</b>             |

## 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 2,546                     | 2,961                     |
| Administration fees  | 667                       | 825                       |
| <b>Total expenses</b>  | <b>3,213</b>              | <b>3,786</b>              |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £9,000 (2022: £8,000). This fee is paid by the manager.

| <b>Tax charge for the year (note 8a)</b>                | <b>2,144</b>              | <b>2,265</b>              |

### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £2,002,000 (2022: £1,483,000) arising as a result of having unutilised management expenses of £10,012,000 (2022: £7,416,000) and non-trade loan relationship deficits of £15,000 (2022: £15,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

## 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Final dividend distribution                           | 23,271                    | 16,214                    |
| Add: amounts deducted on cancellation of shares       | 3,586                     | 6,414                     |
| Deduct: amounts added on issue of shares              | (3,871)                   | (3,173)                   |
| <b>Distributions</b>                                  | <b>22,986</b>             | <b>19,455</b>             |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Net revenue after taxation                            | 22,494                    | 19,132                    |
| Annual management charge paid from capital            | 372                       | 323                       |
| Indian capital gains tax                              | 120                       | -                         |
|   | <b>22,986</b>             | <b>19,455</b>             |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 76.

## 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

\* Launched on 15 August 2022

### 16. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub fund's operations.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's portfolio statement. The sub-fund, in order to meet its investment objective and policy, invests predominantly in equities and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund as disclosed in the balance sheet.

#### (i) Interest rate risk

Changes in interest rates or changes in expectations of future interest rates may result in an increase or decrease in the market value of the investments held. As the majority of the sub-fund's financial assets are non-interest bearing, the sub-fund is only subject to limited exposure to fair value interest rate risk due to fluctuations in levels of market interest rates and therefore no sensitivity analysis has been provided.

#### (ii) Currency risk

## ARTEMIS SMARTGARP GLOBAL EMERGING MARKETS EQUITY FUND

A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. Therefore, the ACD may decide that a proportion of the investments that are not priced in sterling, may be covered by forward currency contracts, so that the sub-fund's exposure to currency risk is reduced. The gain on forward currency contracts for the year was £7,000 (2022: £46,000).

Revenue received in foreign currencies is converted into sterling on or near the date of receipt.

The exposure to each currency is shown in the tables below.

|                         | Investments<br>£'000 | Net other assets/<br>(liabilities)<br>£'000 | Forward currency<br>Contracts<br>£'000 | Total<br>£'000 |

| Indonesian Rupiah       | 1,069                | -   | -                                      | 1,069          |
| Sterling                | -                    | (2,371)                                     | -                                      | (2,371)        |

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of increasing the return and net assets by £17,954,000 (2022: £16,220,000). A five percent decrease would have an equal and opposite effect.

### (iii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those relating to interest rate risk, currency risk and credit and counterparty risk), whether caused by factors specific to an investment or wider issues affecting the market generally. The value of equities is dependent on a number of factors, arising from the performance of the company itself and matters arising in the wider market (for example the state of the underlying economy and current government policy). The portfolio is invested in securities domiciled in a number of countries and will be exposed to market movements in the relevant country arising from changes in the local economy and government decisions. As part of the continuing review of the portfolio, the ACD monitors and reviews these factors. A five per cent increase in the value of the sub-fund's portfolio would have the effect of increasing the return and net assets by £17,807,000 (2022: £16,077,000). A five per cent decrease would have an equal and opposite effect.

### (iv) Leverage risk

Leverage is defined as any method by which the sub-fund can increase its exposure by borrowing cash or securities or from leverage that is embedded in derivative positions. The ACD is required to calculate and monitor the level of leverage of the sub-fund, expressed as a percentage of the exposure of the sub-fund and its net asset value under the 'sum of the notionals' and 'commitment' method.

The sub-fund can use cash borrowing (subject to restrictions as set out in its Prospectus and COLL) and financial derivatives as sources of leverage. A result of 100% indicates that no leverage has been used.

The maximum level of leverage which the ACD may employ on behalf of the sub-fund is 200% under the commitment method. A result of 100% indicates that no leverage has been used.

As at 28 February 2023 and 28 February 2022 the leverage ratios of the sub-fund were:

|                      | 28 February 2023<br>% | 28 February 2022<br>% |
|----------------------|-----------------------|-----------------------|
| Sum of the notionals | 101.1                 | 100.5                 |
| Commitment           | 100.8                 | 100.1                 |

### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with J.P. Morgan Chase N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirement stipulated in COLL and the Prospectus.

Aside from the custodian, the derivative counterparties and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

### Counterparty and collateral exposure

As at 28 February 2023 and 28 February 2022 no financial derivative instruments were held.

# ARTEMIS SMARTGARP GLOBAL EMERGING MARKETS EQUITY FUND

---

## (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modelling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the funds and investor base. This includes but is not limited to what percentage of the fund can be liquidated within certain redemption horizons, whether the largest investors in the fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered.

There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

## 17. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 67 and Notes 6, 9, 11 and 13 on pages 70 to 72 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £2,157,000 (2022: £3,247,000).

## 18. Share classes

The annual management charge on each share class is as follows:

|                    |       |
|--------------------|-------|
| E distribution GBP | 0.60% |
| E accumulation GBP | 0.60% |
| I distribution GBP | 0.75% |
| I accumulation GBP | 0.75% |

The net asset value per share and the number of shares in each class are given in the comparative tables on pages 77 and 78. The distributions per share class are given in the distribution tables on page 76. All classes have the same rights on winding up.

## 19. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This sub-fund pays annual dividend distributions.  
The following table sets out the distribution periods.

| Distribution period | Start        | End              | Ex-dividend date | Pay date      |
|---------------------|--------------|------------------|------------------|---------------|
| Final               | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

The fund has not held more than 60% of its net assets in interest bearing securities during any of the distribution periods. Corporate shareholders should note that a holding in a fund with more than 60% of its net assets in interest bearing assets may be required to be treated as a creditor loan relationship for corporation tax purposes.

## OBJECTIVE AND INVESTMENT POLICY

|                          |  |  |  |  |
|--------------------------|--|--|--|--|
| <b>Objective</b>         | To achieve a positive return of at least 2.5% above the Bank of England (BOE) base rate, after fees, on an annualised basis over rolling three-year periods. |  | <b>Other limitations specific to this sub-fund</b> | <ul style="list-style-type: none"> <li>The sub-fund's portfolio duration will vary between -2 years and +4 years</li> <li>No more than 40% net exposure (longs minus shorts) in aggregate in a combination of emerging market debt securities and below investment grade securities.</li> <li>Up to 5% exposure to any non-government issuer of investment grade securities.</li> <li>Up to 3% exposure to an individual issuer of below investment grade securities or an issuer listed, headquartered or having significant business in emerging markets. In this context, emerging market countries means countries included in the MSCI Emerging Markets Index and those included in the World Bank definition of developing economies or those countries which are, in the manager's opinion, developing countries.</li> </ul>  |
| <b>Investment policy</b> | <b>What the sub-fund invests in</b>  | <ul style="list-style-type: none"> <li>Bonds in any currency, directly or indirectly using derivatives, including: <ul style="list-style-type: none"> <li>Government bonds</li> <li>Corporate bonds</li> <li>Asset-backed securities</li> <li>Mortgage-backed securities</li> </ul> </li> <li>The sub-fund may also invest in cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.</li> </ul>  | <b>Investment strategy</b>                         | <ul style="list-style-type: none"> <li>The sub-fund is actively managed.</li> <li>A combination of three strategies is used: <ul style="list-style-type: none"> <li>Carry strategy: a global portfolio of investment grade corporate and government bonds. This aims to generate predictable returns over the medium term.</li> <li>Credit strategy: aims to generate returns through the manager's highest-conviction ideas on credit assets which are expected to rise or fall in value over a particular period. These ideas may be implemented through trades which are intended to exploit the relative prospects of two assets or indices, for example by taking a long position in one and a short position in the other.</li> <li>Rates strategy: aims to exploit expected movements in inflation rates, interest rates globally and the value of global government bonds. The manager seeks to generate returns by using derivatives to take long and short positions in global government bonds, inflation rates or interest rates.</li> </ul> </li> </ul> |
|                          | <b>Use of derivatives</b>  | <p>The sub-fund may use derivatives:</p> <ul style="list-style-type: none"> <li>for investment purposes to achieve the sub-fund objective, including taking long and short positions in sovereign bonds, credit spreads (via credit default swaps on single issuers or indices), interest rates or inflation expectations</li> <li>to produce additional income or growth</li> <li>for efficient portfolio management purposes to reduce risk and manage the sub-fund efficiently.</li> </ul>  |  |  |
|                          | <b>Where the sub-fund invests</b>  | <ul style="list-style-type: none"> <li>Globally.</li> <li>No more than 40% net exposure (longs minus shorts) in emerging market debt securities.</li> <li>At least 90% of the sub-fund will be denominated in or hedged back to sterling.</li> </ul>   |  |  |
|                          | <b>Industries the sub-fund invests in</b>  | <ul style="list-style-type: none"> <li>Any</li> </ul>  |  |  |
|                          | <b>Credit quality of bonds the sub-fund invests in</b>   | <ul style="list-style-type: none"> <li>Investment grade corporate being <ul style="list-style-type: none"> <li>BBB- or above by Standard &amp; Poor's; or</li> <li>BBB- or above by Fitch; or</li> <li>Baa3 or above by Moody's</li> </ul> </li> <li>No more than 40% net exposure (longs minus shorts) in below investment grade securities.</li> <li>Up to 10% in unrated bonds</li> <li>The sub-fund will not invest in bonds below B3 by Moody's, B- by S&amp;P or B- by Fitch (the Minimum Bond Rating). Where the sub-fund has exposure to an index the Minimum Bond Rating will apply to the average credit rating of bonds making up the index.</li> </ul> | <b>Benchmark</b>                                   | <ul style="list-style-type: none"> <li><b>Bank of England (BOE) base rate</b><br/>BOE base rate is a measure of the interest rate at which the BOE, the UK's central bank, lends money to other banks. It is used as a way of estimating the amount of interest which could be earned on cash. It acts as a 'target benchmark' that the sub-fund aims to outperform by at least 2.5%, after fees, on an annualised basis over rolling three-year periods. There is no guarantee that the sub-fund will achieve a positive return over a rolling three- year period or any other time period and your capital is at risk.</li> </ul>  |

# ARTEMIS TARGET RETURN BOND FUND

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the sub-fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- **Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- **Higher-yielding bonds risk:** The sub-fund may invest in higher-yielding bonds, which may increase the risk to capital. Investing in these types of assets (which are also known as sub-investment grade bonds) can produce a higher yield but also brings an increased risk of default, which would affect the capital value of the sub-fund.
- **Credit risk:** Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the sub-fund.
- **Derivatives risk:** The sub-fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the sub-fund value will reduce.
- **Absolute return risk:** The sub-fund is not guaranteed to produce a positive return and as an absolute return sub-fund, performance may not move in line with general market trends or fully benefit from a positive market environment.

- **Emerging markets risk:** Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
- **Bond liquidity risk:** The sub-fund holds bonds which could prove difficult to sell. As a result, the sub-fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- **Counterparty risk:** Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the sub-fund due to events beyond the sub-fund's control. The sub-fund's value could fall because of loss of monies owed by the counterparty and/or the cost of replacement financial contracts.
- **Mortgage- or asset-backed securities risk:** Mortgage- or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers.
- **Charges from capital risk:** Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
- **Leverage risk:** The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.
- **Target return risk:** The sub-fund is not guaranteed to produce a positive return over a rolling three year period or any other time period and capital is at risk.

There was no change to the risk indicator in the 12 months to 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

## INVESTMENT REVIEW

- Bond markets endured their biggest losses in decades.
- The fund fell by 0.7% over the year<sup>1</sup>.
- Despite these (modest) losses, the fund is still firmly in positive territory since its launch in 2019

### The fund, briefly described...

This fund seeks to identify and exploit opportunities across fixed-income markets – in different regions, industry sectors and credit ratings. We seek returns in three distinct modules. By limiting the proportion of the fund that can be invested in any one of these modules, we hope to prevent the fund from becoming too reliant on any single source of opportunity.

The carry module is the most defensive part of our fund. Our focus here is on investment-grade<sup>2</sup> bonds (both corporate bonds and government bonds in developed markets) that are due to mature (return the capital their bondholders have invested) within the next three years.

In our credit module, we look for isolated, idiosyncratic pockets of value across investment-grade, high-yield<sup>3</sup> and emerging bond markets.

Our rates module focuses on the opportunities – in both relative and absolute terms – that we find across the world's major government bond markets. Our views on interest rates, inflation and on the relationship between countries' short-term and long-term borrowing costs (as shown by the yield curve, a line illustrating the cost of borrowing over various time horizons) shape the investments we make here.

### A word on risk...

This fund invests in a range of different bonds issued by governments and companies. As events in 2022 showed, prices of even the safest forms of bonds can fall. Changes in inflation or interest rates, for example, can cause bond prices to fall quite sharply.

### The fund was down this year because every corner of the fixed income market was down

The fund generated a negative return over the year, falling by 0.7%. Our target is to produce a positive return of at least 2.5% above the Bank of England's base rate, after fees, on an annualised basis (over rolling three-year periods). Over the 12 months covered by this report, hitting that target would have meant generating a return of 4.5%.

Past performance is not a guide to the future.

<sup>1</sup>Source: Artemis/ Lipper Limited, class I accumulation GBP. All figures show total returns with income reinvested, net of all charges. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class.

<sup>2</sup>Investment-grade bonds are issued by companies with higher credit ratings – businesses which independent agencies such as S&P and Moody's consider to be at relatively low risk of defaulting on their debts.

<sup>3</sup>High-yield bonds are those which ratings agencies regard as being at greater risk of defaulting on their debts and so which offer higher yields to compensate for this risk.

Yet while our failure to hit that target certainly feels disappointing, these headline return figures must be set into broader context: this is a fixed-income fund and, in 2022, the asset class we invest in experienced the worst conditions seen in decades.

- the UK corporate bond index suffered its largest fall since it was created in 1997.
- the US corporate bond index suffered its largest fall ever since it was created in 1976.
- short-dated sterling corporate bonds fell by 8.0%.
- short-dated UK gilts fell by 25.1%.

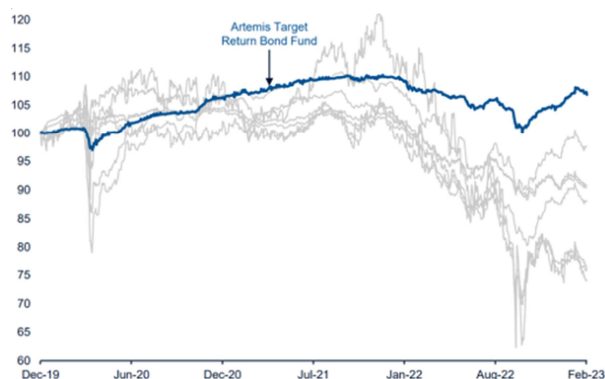

These losses were a direct result of the profound changes taking place in the global economy and financial system. A year ago, the US Federal Reserve was still buying bonds through quantitative easing and holding interest rates at zero. A year later, it has responded to rampant inflation by shrinking its balance sheet (selling its holdings in assets such as US Treasuries) by over half-a-trillion dollars and by pushing up US interest rates to almost 5%. Similar processes have unfolded in Europe and the UK.

So, the fund was down this year because every corner of the fixed income market fell in reaction to the attempts of the world's central banks to bring inflation under control.

### The fund is still in positive territory since launch

Even after the historic fall in bond prices seen in 2022, the fund is still in positive territory since its launch in 2019 (up 6.8%). As Chart 1 shows, the fund's performance relative to every part of its investable universe since launch in December 2019 remains robust.

**Chart 1: Strong performance relative to investable universe since launch**

Source: Bloomberg, class I accumulation shares in GBP from 3 December 2019 to 28 February 2023. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. The grey lines in the chart above show the performance of the indices listed in the table to the right of the chart.

|                                 | Annualised Return (%) | Volatility (%) |

## Why we are positive on the fund's prospects for 2023

The dramatic cheapening that fixed income markets experienced in 2022 means that the asset class has become very compelling – particularly relative to equities. Investors no longer need resort to financial engineering – or to buy esoteric or illiquid products – in order to generate positive real returns.

1) One of our core hunting grounds – the short-maturity investment-grade corporate bonds held in our carry module – now appear very attractive.

At the end of 2022, the yield on short-dated (1-3 year) sterling corporate bonds was 5.79%<sup>4</sup> with 1.79 years of duration<sup>5</sup>. That yield would need to increase to 9% to result in this asset class generating a negative total return over a one-year holding period. While this is mathematically possible, we believe it is highly unlikely. The balance between risk and reward here is compelling: short-dated corporate bonds have a low degree of sensitivity to changes in interest rates (they are 'short duration' assets) and, as investment-grade debt, carry a low risk of default.

2) Elevated market volatility in 2023 will create dislocations that we can exploit across the fund's other two modules.

We have a significant degree of exposure to short-dated corporate bonds, but we also invest in different assets and deploy additional strategies that have historically proven to moderate losses when markets are weak; our rates module generated a positive return last year despite near-universal losses in bond markets.

These strategies also offer the potential to deliver stronger returns when markets recover. We believe that investing beyond short-dated sterling corporates gives the fund valuable diversification and offers additional sources of return, making ours a compelling alternative to funds investing solely in short-dated investment-grade corporate bonds.

**Stephen Snowden and Juan Valenzuela**  
Fund managers

<sup>4</sup> A bond's yield is calculated by dividing the regular coupons it pays (which don't change) by its price (which does).

<sup>5</sup> Duration expresses a bond's sensitivity to interest-rate movements. A higher duration implies greater price volatility when rates move. It is quoted as the percentage change in price for a one percentage point change in interest rates. So the price of a bond with a duration of 1.79 would be expected to fall by about 1.79% for each 1% move higher in interest rates.

The comparative percentage figures in brackets are as at 28 February 2022.

<sup>^</sup> Global exposure has been calculated in line with the guidelines issued by the European Securities and Markets Authority ('ESMA') and represents the market value of an equivalent position in the underlying investment of each derivative contract. For all other asset types the percentage of net assets has been calculated based on the valuation of each holding.

# ARTEMIS TARGET RETURN BOND FUND

## NOTES TO THE FINANCIAL STATEMENTS

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period, net of any accrued interest in the case of debt securities, which is included in the balance sheet as a revenue related item. Listed investments are valued at fair value which is deemed to be the bid or SETS price.

The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Exchange traded derivatives are priced at fair value, which is deemed to be the bid price. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers. Interest on margin accounts held with brokers is included in the revenue return. All other gains/losses and cash flows from derivatives except for bond futures and swaps are included in the capital return.

Open forward currency contracts are shown in the Portfolio Statement at market value and the net gains/(losses) are reflected within Forward currency contracts under Net capital (losses)/gains in the Notes to the financial statements.

Where bond futures positions generate total returns the returns are apportioned between capital and income to reflect the nature of the transaction. Any capital gains/losses are included within Net capital gains/(losses) and any revenue or expense is included within Revenue or Interest payable and similar charges respectively in the Statement of total return. The revenue return element in respect of bond futures is calculated by reference to the quoted yield of the index upon which the future is based compared to synthetic LIBOR. Cash held at future brokers as margin is reflected separately within cash and bank balances.

Open interest rate and credit default swaps are shown in the Portfolio Statement and are priced at fair value using valuation models and data sourced from market data providers. Net (losses)/ gains are reflected within Derivative contracts under Net capital gains in the Notes to the financial statements. Interest receivable or payable on interest rate swaps is included within Derivative revenue or Interest payable and similar charges respectively in the Statement of total return.

**(e) Revenue.** Interest from debt securities is recognised on an effective interest rate basis inclusive of any expected changes to future cash flows. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund.

This is known as “dilution”. Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply “swing pricing” as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. The ACD and the depositary have agreed, for the distribution classes only, that 100% of the annual management charge is to be transferred to capital for the purpose of calculating the distribution, as permitted by COLL.

The distribution currently payable reflects this treatment. Gains and losses on non-derivative investments and forward currency contracts, whether realised or unrealised, are taken to capital and are not available for distribution.

The sub-fund satisfied the qualifying investments test of Statutory Instrument 2006/964 Authorised Investment Funds (Tax) Regulations 2006 Regulation 19 throughout the year. All distributions made are therefore made as interest distributions. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

## 3. Net capital losses

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------------|---------------------------|---------------------------|
| Derivative contracts       | 5,642                     | 2,039                     |
| Currency gains/(losses)    | 869                       | (470)                     |
| Forward currency contracts | (2,509)                   | 750                       |
| Non-derivative securities  | (17,471)                  | (9,086)                   |
| <b>Net capital losses</b>  | <b>(13,469)</b>           | <b>(6,767)</b>            |

## 4. Direct transaction costs

There were no commissions or taxes paid in relation to transactions on the portfolio during the current year or previous year.

### Dealing spread

As at the balance sheet date the average portfolio dealing spread was 0.59% (2022: 0.46%). This spread represents the difference between the bid and offer prices of each underlying investment expressed as a percentage of the value determined by reference to its offer price.

## 5. Revenue

|                                | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--------------------------------|---------------------------|---------------------------|
| Interest on debt securities    | 11,150                    | 4,043                     |
| Revenue from other derivatives | 117                       | 35                        |
| Bank interest                  | 43                        | -                         |
| <b>Total revenue</b>           | <b>11,310</b>             | <b>4,078</b>              |

## ARTEMIS TARGET RETURN BOND FUND

### 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 542                       | 259                       |
| Administration fees  | 375                       | 206                       |
| <b>Total expenses</b>  | <b>917</b>                | <b>465</b>                |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £11,600 (2022: £11,150). This fee is paid by the manager.

### 7. Interest payable and similar charges

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Interest payable on short futures                 | 230                       | 129                       |
| Interest payable                                  | 43                        | 12                        |
| <b>Total interest payable and similar charges</b> | <b>273</b>                | <b>141</b>                |

### 8. Taxation

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>a) Analysis of the tax charge for the year</b>                                    |                           |                           |
| <b>Total taxation (note 8b)</b>  | -                         | -                         |
| <b>b) Factors affecting the tax charge for the year</b>                              |                           |                           |
| Net revenue before taxation  | 10,120                    | 3,472                     |
| Corporation tax at 20% (2022: 20%)   | 2,024                     | 694                       |
| <b>Effects of:</b>   |                           |                           |
| Tax deductible interest distributions  | (2,024)                   | (694)                     |
| <b>Tax charge for the year (note 8a)</b>   | -                         | -                         |
| <b>c) Provision for deferred tax</b>   |                           |                           |
| No provision for deferred tax has been made in the current or prior accounting year. |                           |                           |
| <b>d) Factors that may affect future tax charges</b>                                 |                           |                           |
| The sub-fund has not recognised a deferred tax asset (2022: £nil).                   |                           |                           |

### 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Interim gross interest distribution - May 2022        | 2,141                     | 416                       |
| Interim gross interest distribution - August 2022     | 2,253                     | 794                       |
| Interim gross interest distribution - November 2022   | 2,856                     | 1,147                     |
| Final gross interest distribution - February 2023     | 3,068                     | 1,860                     |
|   | <b>10,318</b>             | <b>4,217</b>              |
| Add: amounts deducted on cancellation of shares       | 501                       | 37                        |
| Deduct: amounts added on issue of shares              | (580)                     | (727)                     |
| <b>Distributions</b>                                  | <b>10,239</b>             | <b>3,527</b>              |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Net revenue after taxation                            | 10,120                    | 3,472                     |
| Annual management charge paid from capital            | 119                       | 55                        |
|   | <b>10,239</b>             | <b>3,527</b>              |

The distributions take account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distributions per share are set out in the distribution tables on page 98.

## 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |                | 28 February 2022 |              |
|--------------|------------------|----------------|------------------|--------------|
|              | Assets           | Liabilities    | Assets           | Liabilities  |
|              | £'000            | £'000          | £'000            | £'000        |
| Level 1      | 633              | (335)          | 551              | 100          |
| Level 2      | 250,947          | (1,785)        | 232,528          | 1,581        |
| <b>Total</b> | <b>251,580</b>   | <b>(2,120)</b> | <b>233,079</b>   | <b>1,681</b> |

## 11. Debtors

|  | 28 February 2023 | 28 February 2022 |
|--|------------------|------------------|
|  | £'000            | £'000            |
| Accrued revenue                            | 3,920            | 3,481            |
| Amounts receivable for issue of shares     | 9,486            | 1,823            |

### 17. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise bonds, derivatives and cash balances which include debtors and creditors that arise directly from the sub-fund's operations. The fund only executes derivative contracts where both the derivative instrument and the counterparty have been approved by the ACD.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk, arises mainly from uncertainty about future values of financial instruments in the sub-fund's investment portfolio. The sub-fund, in order to meet its investment objective and policy, invests predominantly in bonds and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund disclosed in the balance sheet. The ACD uses a value-at-risk approach to measure the funds exposure to market risk.

#### Value at risk ("VaR")

The ACD is currently empowered to enter into derivative transactions on behalf of the sub-fund. The use of these strategies is subject to a risk management process and the ACD analyses the overall risk position of the sub-fund on a daily basis, which is then used by the ACD to evaluate the exposures and risks in the portfolio. As part of the process, the VaR is used on a daily basis to calculate the market price risk on the sub-fund in absolute terms. The maximum limit for UCITS funds is 20% of its NAV, in accordance with the Committee of European Securities Regulators ('CESR') guidance. VaR expresses the maximum expected loss by the sub-fund in a defined period, at a specified confidence level. The parameters used are: a confidence level of 99%, uses two year risk factor data and a 20 business day holding period.

|                                     | 28 February 2023<br>% | 28 February 2022<br>% |
|-------------------------------------|-----------------------|-----------------------|
| <b>At 28 February</b>               | <b>2.98</b>           | <b>2.24</b>           |
| Average utilisation during the year | <b>3.10</b>           | 1.12                  |
| Highest utilisation during the year | <b>4.52</b>           | 2.24                  |
| Lowest utilisation during the year  | <b>1.93</b>           | 0.71                  |

### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with J.P. Morgan Chase N.A. ('JP Morgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirement stipulated in COLL and the Prospectus. In order to diversify counterparty risk the sub-fund holds cash with a number of other counterparties other than JP Morgan. The derivatives are disclosed in the portfolio statement and J.P. Morgan Securities Plc is the counterparty for futures contracts, forward contracts and swaps, UBS is the counterparty for forward currency contracts and Goldman Sachs International ('Goldman Sachs') is the counterparty for swaps and forward contracts. Aside from the custodian, the derivative counterparties and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

## ARTEMIS TARGET RETURN BOND FUND

### Debt security credit analysis \*

At the reporting date, the credit analysis of the sub-fund's debt securities was as follows:

|                                   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

Only cash collateral is pledged or held by the sub-fund. The balance includes cash held at brokers.

### (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each sub-fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the sub-funds and investor base. This includes but is not limited to what percentage of the sub-fund can be liquidated within certain redemption horizons, whether the largest investors in the subfund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered.

There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

### 18. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 89 and Notes 6, 9, 11 and 13 on pages 92 to 93 including all issues and cancellations where the ACD acted as principal.

The balance due from the ACD as at 28 February 2023 in respect of these transactions was £9,126,000 (2022: £1,325,000).

## 19. Share classes

The annual management charge on each share class is as follows:

|                    |       |
|--------------------|-------|
| F distribution GBP | 0.15% |
| F accumulation GBP | 0.15% |
| I distribution GBP | 0.25% |
| I accumulation GBP | 0.25% |

The net asset value per share and the number of shares in each class are given in the comparative tables on page 99. The distributions per share class are given in the distribution tables on page 98. All classes have the same rights on winding up.

## 20. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

# ARTEMIS TARGET RETURN BOND FUND

## DISTRIBUTION TABLES

This sub-fund pays quarterly interest distributions. The following table sets out the distribution periods.

| Quarterly distribution periods | Start            | End              | Ex-dividend date | Pay date        |
|--------------------------------|------------------|------------------|------------------|-----------------|
| First interim                  | 1 March 2022     | 31 May 2022      | 1 June 2022      | 29 July 2022    |
| Second interim                 | 1 June 2022      | 31 August 2022   | 1 September 2022 | 31 October 2022 |
| Third interim                  | 1 September 2022 | 30 November 2022 | 1 December 2022  | 31 January 2023 |
| Final                          | 1 December 2022  | 28 February 2023 | 1 March 2023     | 28 April 2023   |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

\* Direct transaction costs are stated after deducting the amounts collected in relation to estimated dealing costs added to the issue of shares and subtracted from the cancellation of shares.

The operating charges are calculated on an ex-post basis. High and low price disclosures are based on quoted unit prices. Therefore opening and closing NAV prices may fall outside the high/low price threshold.

## ARTEMIS TARGET RETURN BOND FUND

### Ongoing charges

| Class              | 28 February 2023 |
|--------------------|------------------|
| F distribution GBP | 0.29%            |
| F accumulation GBP | 0.29%            |
| I distribution GBP | 0.39%            |
| I accumulation GBP | 0.39%            |

Ongoing charges shows the annual operating expenses of each share class as a percentage of the average net assets of that class for the preceding 12 months.

### Class I accumulation performance

|                                    | Since launch * | 3 years | 1 year | 6 months |
|------------------------------------|----------------|---------|--------|----------|
| Artemis Target Return Bond Fund**  | 6.8            | 6.1     | (0.7)  | 2.0      |
| Artemis Target Return Bond Fund*** | 6.9            | 6.1     | (0.8)  | 2.1      |
| Bank of England Base Rate +2.5%    | 11.0           | 10.1    | 4.5    | 2.7      |
| Bank of England Base Rate          | 2.5            | 2.3     | 2.0    | 1.5      |

Past performance is not a guide to the future.

\* Source: Artemis/ Lipper Limited, class I accumulation GBP from 3 December 2019 to 28 February 2023. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class.

\*\* Value at 12 noon valuation point

\*\*\* Value at close of business

Class I accumulation is disclosed as it is the primary share class.

# ARTEMIS US ABSOLUTE RETURN FUND

## NOTE ON CLOSURE

### Closure of Artemis US Absolute Return Fund.

At Artemis, we regularly review the funds across our range to ensure we are offering appropriate products to our investors.

Following continuous large redemptions from Artemis US Absolute Return Fund, we have undertaken an assessment of the ongoing viability of the fund and its future prospects, in terms of increasing size and scale through gaining new investors and determined that the fund is no longer economically viable. The fund had approximately £15.3 million assets under management, as at 28 April 2023.

Having considered a number of options, we have concluded that there are no suitable options for maintaining the fund and closing the fund is therefore in the best interests of investors. The effective date of the closure was 12 June 2023.

## OBJECTIVE AND INVESTMENT POLICY

|                          |   |  |
|--------------------------|---|--|
| <b>Objective</b>         | <p>To achieve a positive return over a rolling three-year period, after fees, notwithstanding changing market conditions.</p> <p>The sub-fund also targets returns in excess of SONIA + 0.1%, after fees, in calculating the performance fee payable to the manager.</p> <p>There is no guarantee that the sub-fund will achieve a positive return over a rolling three-year period or any other time period and your capital is at risk.</p> |  |
| <b>Investment policy</b> | <b>What the sub-fund invests in</b>   | <ul style="list-style-type: none"> <li>The sub-fund invests in shares and makes extensive use of equity derivatives (complex financial instruments) so the sub-fund can take positions the investment manager believes will either rise in value (long positions) or fall in value (short positions), meaning that the sub-fund may benefit from either scenario. Derivatives may be based on individual companies or equity indices.</li> <li>At least 60% of the sub-fund, calculated on a gross basis (long and short positions in aggregate), will be invested directly, or indirectly via derivatives, in companies of any size.</li> <li>The sub-fund may also invest in bonds, cash, near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.</li> </ul> |
|                          | <b>Use of derivatives</b>   | <p>The sub-fund may use derivatives:</p> <ul style="list-style-type: none"> <li>for investment purposes to achieve the fund objective, including taking long and short positions</li> <li>to produce additional income or growth</li> <li>for efficient portfolio management purposes to reduce risk and manage the sub-fund efficiently.</li> <li>to create leverage.</li> </ul>  |

|  |   |  |
|--|---|--|
|  | <b>Where the sub-fund invests</b>   | <ul style="list-style-type: none"><li>At least 60% of the fund (calculated on a gross basis) will be invested directly or indirectly in companies in the United States of America, including companies in other countries that are headquartered or have a significant part of their activities in the USA, but the sub-fund may also invest in other countries.</li></ul> |
|  | <b>Industries the sub-fund invests in</b>   | <ul style="list-style-type: none"><li>Any</li></ul>  |
| <b>Other limitations specific to this sub-fund</b> | <ul style="list-style-type: none"><li>Gross exposure to companies, either directly or indirectly through derivatives, will be below 200%.</li><li>Net exposure (longs minus shorts) to companies, either directly or indirectly through derivatives, will typically lie in the range of -30% to +40%.</li><li>The sub-fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives and for when the investment manager wishes to take a defensive stance. The sub-fund may employ 'leverage' (so that the sub-fund can invest a greater amount than its actual value) when the investment manager has greater confidence in the opportunities available.</li></ul> |  |
| <b>Investment Strategy</b>                         | <ul style="list-style-type: none"><li>The sub-fund is actively managed.</li><li>The manager uses multiple sources of information, both to generate ideas and to assist in validating and testing candidate companies for investment. This is complemented by techniques such as data mining (examining large databases of information) and financial analysis.</li><li>External research is also used in order to tap into knowledge already available and to look for different views.</li><li>The manager carries out a significant amount of analysis of wider economic trends to understand cyclical and long-term trends and the outlook. Judgement, skill and experience drive the investment process.</li></ul>              |  |
| <b>Benchmark</b>                                   | <ul style="list-style-type: none"><li><b>SONIA (Sterling Overnight Index Average) + 0.1%</b><br/>A widely-used measure of the average interest rate at which banks lend to each other, used to estimate the amount of interest which could be earned on cash. It acts as a 'target benchmark' that the sub-fund aims to outperform by at least 0.1%. Artemis is paid a performance fee if the sub-fund's performance exceeds the benchmark.</li></ul>   |  |

# ARTEMIS US ABSOLUTE RETURN FUND

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect fund performance:**

- **Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- **Derivatives risk:** The sub-fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the sub-fund value will reduce.
- **Cash risk:** The sub-fund may hold a large amount of cash. If it does so when markets are rising, the sub-fund's returns could be less than if the cash was fully invested in other types of assets.
- **Absolute return risk:** The sub-fund is not guaranteed to produce a positive return and as an absolute return sub-fund, performance may not move in line with general market trends or fully benefit from a positive market environment.
- **Leverage risk:** The sub-fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.

There was no change to the risk indicator in the 12 months ended 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

# ARTEMIS US ABSOLUTE RETURN FUND

## INVESTMENT REVIEW

- In a challenging period for the US market, the fund fell 1.1% in sterling terms<sup>1</sup>.
- As interest rate expectations increased, 'growth' stocks came under pressure.
- We have increased exposure to long-term winners trading at a cyclic bottom such as Nvidia and Meta.

It was a volatile period for US markets. As inflation continued to push higher, interest-rate expectations also rose. As a result, fears of recession periodically weighed on investors' minds and on the US equity market. The review period ended amid a renewed sell-off triggered by a speech in which the US Federal Reserve's chairman Jerome Powell suggested that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The implication was that interest rates would need to remain higher for longer than some investors had hoped.

### This is a 'long/short' fund

It combines a portfolio of 'long' positions (which benefit when share prices rise) with an offsetting, roughly equally sized portfolio of 'short' positions (which benefit when a given company's share price falls). In our long book, we buy shares in companies where analysis suggests that the balance between risk and potential reward is attractive. In part, returns from these positions reflect our ability to pick the 'right' stocks. But they also depend on what is happening in the wider US market: it is more likely that the value of our long positions will rise when share prices in general are moving higher – but it will tend to fall when the wider market does.

Offsetting these long positions, we hold 'short' positions, whose value increases when the share price of a given company falls – and vice versa. Here, we look for US companies whose share prices we think are too high and so could be vulnerable to a correction. When share prices fall, these can be positive for the fund's returns. Equally, however, there can be periods when share prices rise irrespective of companies' underlying financial merits, and this tends to hurt our short positions.

### The fund made a negative return

Over the 12 months covered by this report, the fund fell by 1.1% in sterling terms. Rising interest rates and higher borrowing costs put downward pressure on the valuations awarded to growth stocks – companies that are expected to keep increasing their sales at a faster-than-average pace. Growth stocks tend to struggle when interest rates are rising or are expected to move higher.

Within software, our long position in Sumo Logic detracted as did a number of our software holdings. Our long position in Upstart Holdings, a cloud-based lending platform that uses artificial intelligence to predict credit risk, acted as a drag on returns. As economic conditions began to deteriorate and credit conditions grew worse, it became evident that its loan selection had also deteriorated. Although it may gain further market share, the current economic environment could be a difficult one for it to navigate. We closed the position. Elsewhere, long positions in cyclical growth companies (companies whose sales are viewed as being sensitive to conditions in the wider economy) also suffered. These included Pool Corp and Saia. Both businesses have strong fundamentals and continue to deliver good results, but that carried little weight with a nervous market. Our long positions in Meta, Linde, Copart, Costco, Lockheed Martin and Oracle contributed positively to performance.

Challenging market conditions meant most of the top contributions came from our short positions. Many of these were in the tech sector and ranged from IT services stocks through to software and semiconductor companies. Semiconductor stocks were particularly weak in August due to rising inventories of some types of chips, as well as some ongoing supply-chain issues. We also had significant short contributions from unprofitable technology companies and put option spreads<sup>2</sup> on the S&P500 index.

### Outlook – Caution prevails...

We remain cautious on the economic outlook. The actions and utterances of the Federal Reserve are likely to continue to dominate the headlines for the foreseeable future and an economic slowdown – or an outright recession – now seems unavoidable. The impact of that slowdown on corporate earnings is still to come. The recent turmoil in the banking industry will likely reverberate through the rest of the economy. While share prices in some areas have fallen a long way, they might yet have further to fall. At the same time, share prices in some of the more defensive parts of the markets are starting to look elevated. We will be looking to increase gross exposure<sup>3</sup> over the next few months as we gain more conviction in the potential for some of our long positions. We have added to our long exposure in Nvidia and Meta and have reduced our exposure to software stocks with meaningful exposure to corporate IT spending levels which we believe will come under pressure.

\* The financial statements have been prepared on a break-up basis.

## NOTES TO THE FINANCIAL STATEMENTS

---

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared using the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a break-up basis for Artemis US Absolute Return Fund as this sub-fund is closed and in the process of being terminated, as disclosed on the page 101. Under this basis, assets are recorded at their recoverable value and liabilities are recorded at their expected settlement value. Any additional costs in respect of the termination of the sub-fund will be borne by the ACD.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period, net of any accrued interest in the case of debt securities, which is included in the balance sheet as a revenue related item. Where a sub-fund invests in markets that are closed for trading at the sub-fund's valuation point, the ACD will allow for the Net Asset Value to be adjusted (based on movements of index futures or other suitable proxies in markets closed at the sub-fund valuation point, since the last market close), to reflect more accurately the fair value of the sub-fund's investments. Listed investments are valued at fair value which is deemed to be the bid or SETS price.

The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-funds between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Exchange traded derivatives are priced at fair value, which is deemed to be the bid price for long positions and the offer price for short positions. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers. Contracts for difference held in the portfolio are valued at bid when held long and offer when short. Interest on margin accounts held with brokers is included in the revenue return. All other gains/losses and cash flows from derivatives are included in the capital return.

Open forward foreign exchange contracts are shown in the Portfolio Statement at market value and the net gains/(losses) are reflected within forward currency contracts under net capital losses in the Notes to the financial statements.

Where bond futures positions generate total returns the returns are apportioned between capital and income to reflect the nature of the transaction. Any capital gains/losses are included within Net capital losses and any revenue or expense is included within Revenue or Interest payable and similar charges respectively in the Statement of total return.

The contracts for difference held in the portfolio are valued based on the price of the underlying security or index which they are purchased to reflect. The nature and intended use of these derivatives is to synthetically allow the sub-fund to go long and short on an underlying asset without the need to trade the physical securities. They are valued at the quoted bid price of the underlying security when held long and at the quoted offer price of the underlying security when short. There are revenue and capital returns to be derived from these instruments. Dividends on contracts for difference are recognised when the securities are quoted ex-dividend. Cash held at CFD brokers as margin is reflected separately within cash and bank balances.

**(e) Revenue.** Interest from debt securities is recognised on a time apportioned basis inclusive of any expected changes to future cash flows. Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than the performance fee and those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

## ARTEMIS US ABSOLUTE RETURN FUND

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

## 3. Net capital losses

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

## 4. Direct transaction costs

For purchases and sales of equities and derivatives, broker commissions, transfer taxes and stamp duty are paid by the sub-fund on each transaction and are summarised below. Bonds have no separately identifiable transaction costs, these costs form part of the dealing price.

|  | Principal<br>£'000 | Commission<br>£'000 | Taxes<br>£'000 | Total after<br>costs<br>£'000 | Year ended 28 February 2023                     |  |

### 8. Taxation

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>a) Analysis of the tax charge for the year</b>  |                           |                           |
| Irrecoverable overseas tax   | 13                        | 63                        |
| <b>Total taxation (note 8b)</b>  | <b>13</b>                 | <b>63</b>                 |
| <b>b) Factors affecting the tax charge for the year</b>  |                           |                           |
| Net expense before taxation  | 62                        | (1,138)                   |
| Corporation tax at 20% (2022: 20%)   | 12                        | (228)                     |
| <b>Effects of:</b>   |                           |                           |
| Unutilised management expenses   | 4                         | 227                       |
| Irrecoverable overseas tax   | 13                        | 63                        |
| Utilisation of non-trade deficit carried forward   | -                         | 75                        |
| Non-taxable overseas dividends   | (16)                      | (74)                      |
| <b>Tax charge for the year (note 8a)</b>   | <b>13</b>                 | <b>63</b>                 |
| <b>c) Provision for deferred tax</b>   |                           |                           |
| No provision for deferred tax has been made in the current or prior accounting year.   |                           |                           |
| <b>d) Factors that may affect future tax charges</b>   |                           |                           |
| The sub-fund has not recognised a deferred tax asset of £3,116,000 (2022: £3,112,000) arising as a result of having unutilised management expenses of £15,579,000 (2022: £15,561,000) and non-trade loan relationship deficits of £981,000 (2022: £981,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised. |                           |                           |

### 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Final dividend distribution                                     | 43                        | -                         |
| Add: amounts deducted on cancellation of shares                 | 6                         | -                         |
| <b>Distributions</b>  | <b>49</b>                 | <b>-</b>                  |
| <b>Movement between net revenue/(expense) and distributions</b> |                           |                           |
| Net revenue/(expense) after taxation                            | 49                        | (1,201)                   |
| Deficit transferred to capital                                  | 49                        | 1,201                     |
|   | <b>98</b>                 | <b>-</b>                  |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 118.

### 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |             | 28 February 2022 |             |
|--------------|------------------|-------------|------------------|-------------|
|              | Assets           | Liabilities | Assets           | Liabilities |
|              | £'000            | £'000       | £'000            | £'000       |
| Level 1      | 5,231            | 52          | 13,777 *         | 393         |
| Level 2      | 11,404           | -           | 27,128           | -           |
| <b>Total</b> | <b>16,635</b>    | <b>52</b>   | <b>40,905</b>    | <b>393</b>  |

\* Level 1 includes fair value adjustment based on movement of futures in markets closed at the sub-fund valuation point, since the last market close.

## ARTEMIS US ABSOLUTE RETURN FUND

### 17. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, bonds, derivatives, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub-fund's operations. The sub-fund only executes derivative contracts where both the derivative instrument and the counterparty have been approved by the ACD.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's portfolio statement. The sub-fund, in order to meet its investment objective and policy, maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund disclosed in the balance sheet. The ACD uses a value-at-risk approach to measure the sub-fund's exposure to market risk.

#### Value at risk ("VaR")

The ACD is currently empowered to enter into derivative transactions on behalf of the sub-fund. The use of these strategies is subject to a risk management process and the ACD analyses the overall risk position of the sub-fund on a daily basis, which is then used by the ACD to evaluate the exposures and risks in the portfolio.

As part of the process, the VaR is produced on a daily basis to calculate the market price risk on the sub-fund. VaR expresses the maximum expected loss by the sub-fund in a defined period within a defined confidence level. The model used for the sub-fund has a confidence level of 99%, uses two year risk factor data over a 20 day business period (i.e. it predicts the maximum loss that could arise over a 20 business day period) and is based on the portfolio at the point of the calculation. The ACD monitors and ensures that the absolute VaR is no more than 20% of the sub-fund's net asset value, in accordance with CESR guidance.

## (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a preapproved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with JPMorgan Chase Bank N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JPMorgan may cause the subfund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JPMorgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit worthiness of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirements stipulated in COLL and the Prospectus. Cash accounts are maintained at several counterparties. The derivatives are disclosed in the portfolio statement and Goldman Sachs International ('Goldman Sachs'), Morgan Stanley ('Morgan Stanley') and JPMorgan Chase Bank N.A. ('JPMorgan') are the counterparties for the CFDs and JPMorgan is the counterparty for the forward currency contracts, future contracts and options. Aside from the custodian, the derivative counterparties and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

### Counterparty and collateral exposure

The types of derivatives held at the balance sheet date were contracts for difference, options, future contracts and forward currency contracts. Details of the individual contracts are disclosed separately in the portfolio statement and the total position by counterparty at the balance sheet date was as follows:

|                         | Contracts for<br>difference<br>£'000 | Options<br>£'000 | Future<br>contracts<br>£'000 | Forward<br>currency<br>contracts<br>£'000 | Total gross<br>exposure<br>£'000 | Net collateral<br>(pledged)/held<br>£'000 |

| JPMorgan                | (207)                                | -                | 15                           | -   | (192)                            | 351                                       |
| Morgan Stanley          | (1,795)                              | 242              | -                            | -   | (1,553)                          | (30)                                      |
| Goldman Sachs           | (5,447)                              | -                | -                            | -   | (5,447)                          | (37)                                      |

Only cash collateral is held or pledged by the sub-fund. The balance includes cash held at brokers.

## (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each sub-fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

## ARTEMIS US ABSOLUTE RETURN FUND

---

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the sub-funds and investor base. This includes but is not limited to what percentage of the sub-fund can be liquidated within certain redemption horizons, whether the largest investors in the sub-fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered.

There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

### 18. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 109 and notes 6, 9, 11 and 14 on pages 112 to 114 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £281,000 (2022: £354,000).

### 19. Share classes

The annual management charge on the I accumulation GBP (NAV Hedged) share class is 0.75%.

The net asset value per share and the number of shares in each class are given in the comparative tables on page 119. The distributions per share class are given in the distribution tables on page 118.

### 20. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This sub-fund pays annual dividend distributions.  
The following table sets out the details of the distribution.

| Annual distribution period | Start        | End              | Ex-dividend date | Pay date      |
|----------------------------|--------------|------------------|------------------|---------------|
| Final                      | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

|                          | <b>Industries the sub-fund invests in</b><br><br><b>Other limitations specific to this sub-fund</b>   | <ul style="list-style-type: none"> <li>Any</li> <li>Total derivatives (longs plus shorts) are likely to represent a significant proportion of the sub-fund's gross exposure to companies, which will typically lie in a range of +100% to +200% of net asset value.</li> <li>Net exposure (longs minus shorts) to companies will typically lie in the range of +85% to +110% depending on market conditions.</li> <li>A significant proportion of the sub-fund will be held in cash due to the level of derivative use.</li> <li>To allow the sub-fund to manage counterparty risk, it may also invest its cash in government bonds, generally of less than one year maturity.</li> </ul> |                            |  |

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- **Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The sub-fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- **Derivatives risk:** The sub-fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the sub-fund value will reduce.
- **Cash risk:** The sub-fund may hold a large amount of cash. If it does so when markets are rising, the sub-fund's returns could be less than if the cash was fully invested in other types of assets.
- **Leverage risk:** The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.

There was no change to the risk indicator in the 12 months to 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

# ARTEMIS US EXTENDED ALPHA FUND

## INVESTMENT REVIEW

- The fund returned 0.5% versus a 2.3% return from the benchmark S&P500 index<sup>1</sup>.
- A challenging period for the fund's holdings in the financials sector.
- This was partially offset by strong contributions from utilities holdings.

### Inflation dominated market sentiment

As the year progressed, inflation spread from goods through to services and wages, leading to fears that inflationary pressures would remain elevated. While supply chains showed signs of easing following disruption seen during the pandemic, the labour market remained tight. As a result, US Treasury yields spiked more quickly than at any other time in recent history. With the era of 'free money' apparently over, equities weakened substantially through to October, when bond yields hit their peak.

From October onward, sentiment improved dramatically, apparently spurred by the view that inflation was unlikely to rise further, and bond yields fell. Markets ended the reporting period strongly, albeit with index returns being driven by gains for 'mega-cap' technology shares such as Apple and Microsoft.

The period ended with several ominous signs, including negative readings from a range of outlook indicators, from measures of business confidence through to purchasing managers indices (a measure of industrial activity).

### This is a 'long/short' fund

It combines a portfolio of 'long' positions (which benefit when share prices rise) with an offsetting portfolio of 'short' positions (which benefit when a given company's share price falls). In our long book, we buy shares in companies where our team-based analysis suggests that the balance between risk and potential reward is attractive. In part, returns from these positions reflect our ability to pick the 'right' stocks. But they also depend on what is happening in the wider US market: it is more likely that the value of our long positions will rise when share prices in general are moving higher – but they will tend to fall when the wider market does.

Offsetting these long positions, we hold 'short' positions, whose value increases when the share price of a given company falls – and vice versa. Here, we look for companies whose share prices we think are too high and so could be vulnerable to a correction. When share prices fall, these can be positive for the fund's returns.

Past performance is not a guide to the future.

<sup>1</sup>Artemis/Lipper Limited, class I accumulation GBP. All figures show total returns with dividends and/or income reinvested, net of all charges.

Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class. Our benchmark is the S&P 500 TR GBP Index.

<sup>2</sup>Net exposure is the difference between a fund's short positions and long positions, expressed as a percentage. A lower level of net exposure decreases the risk of the fund's portfolio being affected by market fluctuations.

<sup>3</sup>A type of options strategy where an investor or trader expects a moderate-to-large decline in the price of a security or asset.

### A new manager

Adrian Brass joined Artemis' US equities team in September 2022 and became lead manager on the fund.

### Performance ... lagged a falling market in the earlier part of the period

The fund underperformed in the earlier part of the period, through to the end of July. In a falling market, our low net exposure<sup>2</sup> (the difference between the fund's short positions and long positions<sup>3</sup>) and holding S&P500 index 'put' options (a financial instrument that acts as a form of insurance against market falls) helped its performance. But this was more than offset by negative stock selection, particularly in the financials sector.

### Financials – suffering in a changing interest-rate regime

We held a number of higher-growth banks and lenders including SVB Financial, Upstart Holdings and Signature Bank. These initially performed well but suffered from the dramatic shift in interest rates and bond yields through the period. Their end markets – early-stage financing, alternative lending and crypto currency respectively – all came under pressure from higher rates. And while we sold these holdings in 2022 before the full extent of their difficulties became apparent, our exposure to these stocks had a negative impact on returns.

### Energy – a spike in oil prices proves temporary

Oil prices initially spiked higher on Russia's invasion of the Ukraine, only to relinquish these gains on concerns about slowing economic growth and its effect on demand. This eroded the gains energy company shares had experienced earlier in the year and also resulted in diverging fortunes across the sector. Shares of larger, diversified oil companies like Exxon (which the fund did not own) generally remained firm while those of smaller, more focused exploration and production (E&P) stocks like EOG, Conoco and Hess (which we held) came under pressure.

## Utilities – strong returns from PG&E

The fund's position in Pacific Gas and Energy (PG&E), the California-based utility, helped performance. We bought the stock believing it to be a very cheaply valued turnaround opportunity. PG&E went into bankruptcy several years ago following its culpability in the Californian wildfires in 2018. We have been encouraged by the new management team's substantial moves to invest in safety improvements and improve procedures such as undergrounding cables, having quick alert systems and shutoffs, and pruning or removing trees close to electricity facilities. Importantly, the regulator appears to be giving its safety measures the seal of approval, and the shares are slowly moving to reflect this.

## Consumer-related stocks

The fund benefited from strong performance from consumer-related stocks ranging from autopart retailer O'Reilly Automotive, through to the off-price clothing retailer, Burlington Stores and pet care retailer Petco Health. We find that consumer-related stocks offer substantial opportunities on both the long and the short side, especially at this point in the economic cycle, when there is a polarisation in views: sentiment towards some stocks is overly complacent while share prices elsewhere appear unduly depressed.

## Outlook – A wide dispersion in valuations creates opportunities

The slowing economy and uncertainty over whether it will progress into a full recession has led to polarised valuations. Some areas, such as advertising, semiconductors, housing-related and transport have already seen a slowdown in activity. This has been reflected in lower equity valuations. Other more defensive areas are being viewed as safe havens, with valuations in areas such as capital goods through to consumer staples looking particularly high.

The fund typically has three clusters of opportunity:

Most of the fund's long positions are in high-quality<sup>4</sup> companies that are growing at a reasonable pace and trading on what we believe to be attractive valuations. These tend to have low economic sensitivity and range from insurance brokers and financial exchanges across to enterprise software. It should be noted that we also have many short positions in the 'quality' or 'growth' areas, but these are in stocks where we believe expectations and valuations have got too high and therefore are vulnerable to correction.

Alongside these typically long-term holdings, we have been increasing the fund's allocation to more cyclical (economically sensitive) sectors. Our long positions are in stocks with depressed earnings estimates and valuations, which we believe are offering a substantially attractive risk-reward to the patient investor. Our short positions are typically 'later cycle' stocks (such as the aforementioned capital goods and consumer staples companies). We suspect this is a dangerous point of the economic cycle for these businesses: their earnings and share prices could be at risk.

Third, the fund has long exposure to turnaround, or 'deep value' names. For example, a new management team with a new strategy may be in the process of reviving a hitherto undermanaged and undervalued business. Our view is that successful execution of such strategies will lead to substantial upside in share prices (PG&E is a case in point). Set against these attractive turnarounds, we have a portfolio of short positions which we consider to be value-traps: poor businesses which are likely to continue destroying shareholder value and lagging the market.

**Adrian Brass**  
Fund manager

---

<sup>4</sup> A 'quality' company typically has low debt, sustainable earnings and growing asset values. The hope is that they can be relied on to spring no unwelcome surprises.

## ARTEMIS US EXTENDED ALPHA FUND

### INVESTMENT INFORMATION

Ten largest purchases and sales for the year ended 28 February 2023

| Purchases              | Cost<br>£'000 | Sales            | Proceeds<br>£'000 |

The comparative percentage figures in brackets are as at 28 February 2022.

<sup>†</sup> Fair value adjustment based on movements of futures in markets closed at the fund valuation point, since the last market close.

<sup>^</sup> Global exposure has been calculated in line with the guidelines issued by the European Securities and Markets Authority ('ESMA') and represents the market value of an equivalent position in the underlying investment of each derivative contract. For all other asset types the percentage of net assets has been calculated based on the valuation of each holding.

## NOTES TO THE FINANCIAL STATEMENTS

---

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period, net of any accrued interest in the case of debt securities, which is included in the balance sheet as a revenue related item. Where a sub-fund invests in markets that are closed for trading at the sub-fund's valuation point, the ACD will allow for the Net Asset Value to be adjusted (based on movements of index futures or other suitable proxies in markets closed at the sub-fund valuation point, since the last market close), to reflect more accurately the fair value of the sub-fund's investments. Listed investments are valued at fair value which is deemed to be the bid or SETS price. The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Exchange traded derivatives are priced at fair value, which is deemed to be the bid price for long positions and the offer price for short positions. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers. Contracts for difference held in the portfolio are valued at bid when held long and offer when short. Interest on margin accounts held with brokers is included in the revenue return. All other gains/losses and cash flows from derivatives are included in the capital return.

Open forward foreign exchange contracts are shown in the Portfolio Statement at market value and the net gains/(losses) are reflected within forward currency contracts under net capital gains in the Notes to the financial statements.

Where bond futures positions generate total returns the returns are apportioned between capital and income to reflect the nature of the transaction. Any capital gains/losses are included within Net capital gains/(losses) and any revenue or expense is included within Revenue or Interest payable and similar charges respectively in the Statement of total return.

The contracts for difference held in the portfolio are valued based on the price of the underlying security or index which they are purchased to reflect. The nature and intended use of these derivatives is to synthetically allow the sub-fund to go long and short on an underlying asset without the need to trade the physical securities. There are revenue and capital returns to be derived from these instruments. Dividends on contracts for difference are recognised when the securities are quoted ex-dividend. Cash held at CFD brokers as margin is reflected separately within cash and bank balances.

**(e) Revenue.** Interest from debt securities is recognised on a time apportioned basis inclusive of any expected changes to future cash flows. Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. The dividend equivalent values on contracts for difference are recognised when the underlying security is quoted ex-dividend. For long contracts a compensatory payment is credited to revenue whereas for short contracts a compensatory payment is debited from revenue. Bank interest is recognised on an accruals basis.

## ARTEMIS US EXTENDED ALPHA FUND

**(f) Expenses.** All expenses (other than the performance fee and those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. Gains and losses on non-derivative investments and forward currency contracts, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

## 3. Net capital gains

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

#### 4. Direct transaction costs

For purchases and sales of equities and derivatives, broker commissions, transfer taxes and stamp duty are paid by the sub-fund on each transaction and are summarised below. Bonds have no separately identifiable transaction costs; these costs form part of the dealing price.

|  | Principal<br>£'000 | Commission<br>£'000 | Taxes<br>£'000 | Total after<br>costs<br>£'000 | Year ended 28 February 2023<br>Commission as<br>a percentage of<br>principal % | Taxes as a<br>percentage of<br>principal % |

| <b>b) Factors affecting the tax charge for the year</b> |                           |                           |
| Net revenue/(expense) before taxation                   | 38                        | (842)                     |
| Corporation tax at 20% (2022: 20%)                      | 8                         | (168)                     |
| <b>Effects of:</b>                                      |                           |                           |
| Unutilised management expenses                          | 590                       | 757                       |
| Irrecoverable overseas tax                              | 556                       | 659                       |
| Overseas withholding tax expensed                       | (2)                       | (1)                       |
| Non-trade loan relationship deficit                     | 28                        | -                         |
| Prior year adjustments                                  | (3)                       | -                         |
| Non-taxable overseas dividends                          | (624)                     | (588)                     |
| <b>Tax charge for the year (note 8a)</b>                | <b>553</b>                | <b>659</b>                |

#### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

#### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £9,463,000 (2022: £8,632,000) arising as a result of having unutilised management expenses of £47,314,000 (2022: £43,161,000) and non-trade loan relationship deficits of £1,204,000 (2022: £1,204,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

## 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| <b>Distributions</b>                                  | -                         | -                         |
| <b>Movement between net revenue and distributions</b> |                           |                           |
| Deficit transferred to capital                        | 515                       | 1,500                     |
| Expenses paid from capital                            | -                         | 1                         |
| Net expense after taxation                            | <u>(515)</u>              | <u>(1,501)</u>            |
|   | -                         | -                         |

The distribution takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 139.

## 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |                      | 28 February 2022 |                      |
|--------------|------------------|----------------------|------------------|----------------------|
|              | Assets<br>£'000  | Liabilities<br>£'000 | Assets<br>£'000  | Liabilities<br>£'000 |
| Level 1      | 253,197*         | 1,886                | 375,083*         | 4,479                |
| Level 2      | 110              | -                    | 7,133            | -                    |
| <b>Total</b> | <b>253,307</b>   | <b>1,886</b>         | <b>382,216</b>   | <b>-</b>             |

\* Level 1 includes fair value adjustment based on movement of futures in markets closed at the sub-fund valuation point, since the last market close.

## 11. Debtors

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| Sales awaiting settlement                  | 730                       | 11,545                    |
| Accrued revenue                            | 134                       | 109                       |
| Overseas withholding tax recoverable       | 12                        | 25                        |
| Amounts receivable on derivative contracts | -                         | 172                       |
| US income tax recoverable *                | -                         | 486                       |
| <b>Total debtors</b>                       | <b>876</b>                | <b>12,337</b>             |

\* US income tax recoverable relates to over-withheld tax in the US during the period FYE 2017 – FYE 2019 relating to multiple assets.

### 17. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, bonds, derivatives, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub-fund's operations. The sub-fund only executes derivative contracts where both the derivative instrument and the counterparty have been approved by the ACD.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's investment portfolio. The sub-fund, in order to meet its investment objective and policy, invests predominantly in equities and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund disclosed in the balance sheet. The ACD uses a value-at-risk approach to measure the sub-funds exposure to market risk.

##### Value at Risk ('VaR')

The ACD is currently empowered to enter into derivative transactions on behalf of the sub-fund. The use of these strategies is subject to a risk management process and the ACD analyses the overall risk position of the sub-fund on a daily basis, which is then used by the ACD to evaluate the exposures and risks in the portfolio. As part of the process, the VaR is used on a daily basis to calculate the market price risk on the sub-fund relative to a reference portfolio, the S&P 500 Index. The maximum limit for UCITS funds is twice the VaR of the reference portfolio, i.e. +100%, in accordance with the Committee of European Securities Regulators ('CESR') guidance. A relative VaR of zero indicates that the sub-fund is estimated to have the same market price risk as the reference portfolio. A negative relative VaR indicates that the sub-fund's market price risk is estimated to be lower than the reference portfolio. VaR expresses the maximum expected loss by the sub-fund in a defined period, at a specified confidence level. The parameters used are: a confidence level of 99%, uses one year risk factor data and a 20 business day holding period. It should be noted that VaR assumes that risk in the future can be predicted from the historic distribution of returns and so this methodology can be vulnerable to extreme, unforeseen events and therefore the VaR analysis is complemented with additional scenario and stress testing.

| Lowest utilisation during the year  | <b>0.71</b>           | 0.77                  |

#### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with J.P. Morgan Chase N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

## ARTEMIS US EXTENDED ALPHA FUND

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirement stipulated in COLL and the Prospectus. In order to diversify counterparty risk the sub-fund holds cash with a number of other counterparties other than JP Morgan. The derivatives are disclosed in the portfolio statement and J.P. Morgan Securities Plc is the counterparty for forward currency contracts and CFDs (excluding US CFDs) and Goldman Sachs International ('Goldman Sachs') is the counterparty for US CFDs. Morgan Stanley is a counterparty for options and contracts for difference. Aside from the custodian, the derivative counterparties and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

### Counterparty and collateral exposure

The types of derivatives held at the balance sheet date were contracts for difference, future contracts, forward currency contracts and options. Details of the individual contracts are disclosed separately in the portfolio statement and the total position by counterparty and the collateral pledged, at the balance sheet date, were as follows:

|                         | Contracts for<br>difference<br>£'000 | Options<br>£'000 | Future<br>contracts<br>£'000 | Forward currency<br>contracts<br>£'000 | Total net exposure<br>£'000 | Net collateral held/<br>(pledged)<br>£'000 |

| Morgan Stanley          | (10,461)                             | 2,979            | -                            | -                                      | (7,482)                     | 732  |

Only cash collateral is held or pledged by the sub-fund. The balance includes cash held at brokers.

### (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each sub-fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk.

Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the sub-funds and investor base. This includes but is not limited to what percentage of the sub-fund can be liquidated within certain redemption horizons, whether the largest investors in the sub-fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered.

There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

## 18. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 129 and notes 6, 9, 11 and 14 on pages 133 to 135 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £14,535,000 (2022: £1,166,000).

## 19. Share classes

The annual management charge on each share class is 0.75%

The net asset value per share and the number of shares in each class are given in the comparative tables on page 140. The distributions per unit class are given in the distribution tables on page 139. All classes have the same rights on winding up.

## 20. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## ARTEMIS US EXTENDED ALPHA FUND

### DISTRIBUTION TABLES

This sub-fund pays annual dividend distributions.  
The following table sets out the details of the distribution.

| Distribution period | Start        | End              | Ex-dividend date | Pay date      |
|---------------------|--------------|------------------|------------------|---------------|
| Final               | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

\* Direct transaction costs are stated after deducting the amounts collected in relation to estimated dealing costs added to the issue of shares and subtracted from the cancellation of shares.

The operating charges are calculated on an ex-post basis. High and low price disclosures are based on quoted unit prices. Therefore opening and closing NAV prices may fall outside the high/low price threshold.

Management of the sub-fund is not restricted by this benchmark.</li> <li><b>IA North America NR</b><br/>A group of other asset managers' funds that invest in similar asset types as this sub-fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the sub-fund's performance can be compared. Management of the sub-fund is not restricted by this benchmark.</li> </ul> |  |

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stock markets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- Concentration risk:** The sub-fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.

There was a change to the risk indicator from 5 to 6 in the 12 months ended 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

## INVESTMENT REVIEW

---

- The fund fell by 3.3% versus the S&P 500's gain of 2.3%<sup>1</sup>.
- The biggest negatives were our holdings in banks.
- We added Meta to the portfolio.

### Rising inflation and higher interest rates drove the market

Inflation and interest rates were the dominant theme in the market over the reporting period. Spurred by disruptions to commodity markets caused by the tragic events in Ukraine, inflation increased from 7% at the start of the year, peaking at around 9% in June. The Federal Reserve responded by raising rates. Initially, this was somewhat tentative – with a hike of 0.25% in March followed by one of 0.50% in May. But it then delivered four back-to-back hikes of 0.75%.

Unsurprisingly, these moves were keenly felt in interest-rate sensitive sectors of the economy such as housing:

- US 30-year mortgage rates started 2022 at a little over 3% but peaked in November at around 7.3%.
- Housing starts declined by about a quarter from peak to trough.
- Homebuilders and related stocks (as measured by the S&P Homebuilding Index) fell by around 42% from December 2021, to the middle of June 2022.

While overall real economic growth remained positive, recession concerns intensified over the course of the year. Manufacturing and services surveys both showed deterioration through 2022, with both crossing the threshold separating expansion from contraction. As of the end of February 2023, a majority of forecasters on Bloomberg were predicting a recession in the year ahead.

Shortly after the end of the reporting period, several regional banks ran into financial difficulties, leading investors to start worrying about the impact of a potential credit crunch on an already slowing economy.

### Performance – Held back by our financial holdings...

This was a disappointing 12-month period for the fund, which fell by 3.3% while its benchmark, the S&P 500 index, returned 2.3%. The main reason for this underperformance was our stock selection in financials, namely our holdings in Signature Bank, SVB Financial Group and First Republic Bank.

Signature Bank is a New York-based bank, primarily involved in real estate lending, but which had expanded through hiring groups of bankers outside of its core region to achieve some geographic diversification. It also provided facilities, through an internal blockchain, for traders in cryptocurrencies to exchange their crypto into or out of dollars outside of normal banking hours. To facilitate this business, crypto exchanges lodged deposits with the bank. As interest rates rose, trading in cryptocurrencies fell sharply and so did the deposits held at Signature Bank. While not directly implicated in any of the broader controversies about cryptocurrencies, the stock underperformed significantly and we sold our position in early March (after this reporting period ended) just before its sudden bankruptcy.

We sold Silicon Valley Bank (SVB Financial Group) after it reported disappointing quarterly results in October 2022. It had underperformed because of its close ties with technology and venture capital, both areas fell as interest rates rose.

First Republic Bank weakened towards the end of 2022 because its high-net-worth clients were responding quickly to changes in interest rates by switching their deposits elsewhere to maximise their yields. While we retained our position, we reduced the position size when First Republic found itself caught up in the general crisis in confidence in the banking sector in March.

### The market turns away from growth companies

During the period there was a switch in the market away from 'growth'<sup>2</sup> and 'quality'<sup>3</sup> companies trading on higher-than-average valuations. This affected a number of our holdings. One example was Upstart Holdings, as its innovative way of assessing consumer credit worthiness did not perform as well as expected in the rising interest rate environment. We sold our holding after some underperformance, but before a further (and quite significant) fall in the share price.

Examples of high-quality holdings with higher-than-average valuations include SAIA and Pool Corporation. Both are companies we have known for some time and which we believe have the ability to significantly outperform their sectors from a fundamental point of view over the coming years. As a consequence, while we understood that the valuations of these companies would fall as interest rates rose, we took the view that we still wanted to own these companies and so retained our holdings. While the stocks underperformed over the year, our patience has been validated: they have performed well since the start of 2023.

---

Past performance is not a guide to the future.

<sup>1</sup>Artemis/Lipper Limited, class I accumulation GBP. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class. Benchmark is S&P 500 TR GBP Index.

<sup>2</sup> Growth companies are expected to keep increasing their sales more quickly than the average stock.

<sup>3</sup> Quality companies are those with low debt and sustainable earnings. The hope is that they can be relied on not to spring any unpleasant surprises.

## ARTEMIS US SELECT FUND

---

### Our defensive holdings performed well

Our holding in Pacific Gas and Electric (PG&E) made a useful contribution. Under the guidance of its new, highly impressive management team, this Californian utility company is shedding its pariah status. Where it once had a poor fire-safety record, the California Public Utilities Commission estimates that the extensive investments made by the new management team have reduced the possibility of wildfires by 90%. It is now becoming a trusted partner in developing renewable and carbon-free energy.

In addition, the company proposed a significant investment plan to put approximately 10,000 miles of electricity-transmission cables in areas at high risk of wildfire underground. The capital cost of this plan is about \$7 billion and will be met, over time, by the company's customers. However, this capital investment programme will save approximately \$1 billion annually in vegetation management, providing value for money for its customers.

Late in the calendar year, PG&E was readmitted to the S&P 500 utility index, another sign of the company's rehabilitation. It still trades at a significant discount to the average utility and is likely to deliver a faster earnings growth than many (initially 10%) and when it re-institutes its dividend this year will be able to attract new shareholders.

Other defensive holdings that performed strongly for us included Cigna and Elevance Healthcare. These healthcare insurance companies perform a key role in managing consumption and cost of healthcare for the people who are insured under their various programmes.

It was encouraging to see that some of our holdings that should benefit from President Biden's significant infrastructure investment programmes performed well. Specifically, Linde the industrial gases company and Clean Harbors, which controls a large part of US hazardous incineration capacity.

### Adding to technology stocks...

Having for some time had rather less invested in the technology sector than the market average, we began to add to the sector towards the end of the period. This reflected the fact that we were increasingly finding stocks that looked attractive on our risk / reward framework. Chief amongst them was Meta (formerly Facebook). This had dramatically underperformed for two broad reasons. First, Apple made changes to its operating system so that consumers were able to stop Facebook tracking what they were doing in other apps. This initially reduced Facebook's ability to present advertisements relevant to consumers' current interests and needs, although due to constant innovation it soon adapted its technology to glean this information in a different way. Second, Meta had embarked on a very significant investment plan centred around the 'metaverse'. Investors are sceptical about when they might see returns from this huge investment.

While the company's ability to make money from the metaverse is still open to question, we were very encouraged by Meta's attitude to cost management when it announced layoffs towards the end of the calendar year. There is no doubt that Meta – like many technology companies – hired too many staff during the pandemic. We remain confident that its management can run the business more efficiently while still investing in new projects. The key to our investment was that the most negative views seem to be reflected in the stock price, thereby giving a high degree of downside protection but with some potential upside from better expense management and ad targeting.

### ...and to healthcare

We added another new holding in healthcare, Avantor. It provides a wide range of components for the pharmaceutical and biotechnology industries, such as chemicals, reagents and laboratory supplies. The company benefited from a high level of demand during the pandemic, which resulted in its customers ordering too much as they feared they would run out of supplies. However, when their customers' businesses returned to a more normal demand pattern after the Covid boom, they found that they had far too much inventory of the products that Avantor supplies. This resulted in some disappointing quarterly sales and its share price fell. We think this provides an opportunity: customers are using up their excess inventory and returning to a more normal ordering pattern in an industry which grows between 3% to 5% every year.

### AI will be a significant area of investment

Towards the end of the reporting period, AI became the buzzword on everyone's lips. Microsoft and Alphabet (the parent company of Google) both presented how they thought their businesses would evolve with the help of AI. While we do not know who the winners in this battle to use AI will be, we are confident that in order to crunch very significant amounts of data, more and more powerful semiconductors will be at the heart of the process. So we bought a holding in Nvidia and increased our holding in AMD, both of which we expect to benefit not just from AI investment but from more normalised demands in their own markets.

**Cormac Weldon and Chris Kent**  
Fund managers

# NOTES TO THE FINANCIAL STATEMENTS

---

## 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period. Where a sub-fund invests in markets that are closed for trading at the sub-fund's valuation point, the ACD will allow for the Net Asset Value to be adjusted (based on movements of index futures or other suitable proxies in markets closed at the sub-fund valuation point, since the last market close), to reflect more accurately the fair value of the sub-fund's investments. Listed investments are valued at fair value which is deemed to be the bid or SETS price. The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers.

Open forward currency contracts are shown in the Portfolio Statement at market value and the net gains/(losses) are reflected within forward currency contracts under net capital gains in the Notes to the financial statements.

**(e) Revenue.** Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/ stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## ARTEMIS US SELECT FUND

### 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation. Gains and losses on non-derivative investments and forward currency contracts, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

### 3. Net capital (losses)/gains

|                                   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

During the year the sub-fund incurred £nil (2022: £nil) in capital transaction charges.

#### Dealing spread

As at the balance sheet date the average portfolio dealing spread was 0.02% (2022: 0.05%). This spread represents the difference between the bid and offer prices of each underlying investment of the sub-fund expressed as a percentage of the value determined by reference to its offer price.

## 5. Revenue

|                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------|---------------------------|---------------------------|
| Overseas dividends   | 23,518                    | 21,196                    |
| Bank interest        | 820                       | 17                        |
| <b>Total revenue</b> | <b>24,338</b>             | <b>21,213</b>             |

## 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 15,530                    | 19,592                    |
| Administration fees  | 2,071                     | 2,612                     |
| <b>Total expenses</b>  | <b>17,601</b>             | <b>22,204</b>             |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £9,650 (2022: £8,800). This fee is paid by the manager.

## 7. Interest payable and similar charges

| <b>Effects of:</b>                                      |                           |                           |
| Unutilised management expenses                          | 3,315                     | 4,437                     |
| Irrecoverable overseas tax                              | 3,258                     | 2,977                     |
| Overseas withholding tax expensed                       | (7)                       | -                         |
| Non-taxable overseas dividends                          | (4,655)                   | (4,239)                   |
| <b>Tax charge for the year (note 8a)</b>                | <b>3,258</b>              | <b>2,977</b>              |

### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £16,541,000 (2022: £13,225,000) arising as a result of having unutilised management expenses of £82,703,000 (2022: £66,126,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

### 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Final dividend distribution                                     | 3,208                     | -                         |
| Add: amounts deducted on cancellation of shares                 | 338                       | -                         |
| Deduct: amounts added on issue of shares                        | (71)                      | (7)                       |
| <b>Distributions</b>  | <b>3,475</b>              | <b>(7)</b>                |
| <b>Movement between net revenue/(expense) and distributions</b> |                           |                           |
| Deficit transferred to capital                                  | -                         | 3,961                     |
| Net revenue/(expense) after taxation                            | 3,475                     | (3,968)                   |
|   | <b>3,475</b>              | <b>(7)</b>                |

The distributions takes account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distributions per share are set out in the distribution tables on page 160.

### 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 – Investments with unadjusted quoted prices in an active market;

Level 2 – Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 – Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |                      | 28 February 2022 |                      |
|--------------|------------------|----------------------|------------------|----------------------|
|              | Assets<br>£'000  | Liabilities<br>£'000 | Assets<br>£'000  | Liabilities<br>£'000 |
| Level 1      | 1,770,368        | -                    | 2,311,349*       | -                    |
| Level 2      | 247              | -                    | 7                | -                    |
| <b>Total</b> | <b>1,770,615</b> | <b>-</b>             | <b>2,311,356</b> | <b>-</b>             |

\* Level 1 includes fair value adjustment based on movement of futures in markets closed at the sub-fund valuation point, since the last market close.

### 16. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, derivatives, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub-fund's operations. The sub-fund only executes derivative contracts where both the derivative instrument and the counterparty have been approved by the ACD.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk, arises mainly from uncertainty about future values of financial instruments in the sub-fund's portfolio statement. The sub-fund, in order to meet its investment objective and policy, invests predominantly in equities and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund disclosed in the balance sheet.

#### (i) Interest rate risk

Changes in interest rates or changes in expectations of future interest rates may result in an increase or decrease in the market value of the investments held. As the majority of the sub-fund's financial assets are non-interest bearing, the sub-fund is only subject to limited exposure to fair value interest rate risk due to fluctuations in levels of market interest rates and therefore no sensitivity analysis has been provided.

## ARTEMIS US SELECT FUND

### (ii) Currency risk

A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. Therefore, the ACD may decide that a proportion of the investments that are not priced in sterling, may be covered by forward currency contracts, so that the sub-fund's exposure to currency risk is reduced. The loss on forward currency contracts for the year was £7,454,000 (2022: loss of £3,307,000).

Revenue received in foreign currencies is converted into sterling on or near the date of receipt. For hedged share classes, the hedging is undertaken with regard to managing the currency movement risk on accrued revenue.

The exposure to each currency is shown in the tables below.

| Currency                | Investments<br>£'000 | Net other assets/<br>(liabilities)<br>£'000 | Forward currency<br>contracts<br>£'000 | Total<br>£'000 |
|-------------------------|----------------------|---|--|----------------|
| <b>28 February 2023</b> |                      |   |  |                |
| US Dollar               | 1,770,369            | 44,743                                      | (28,350)                               | 1,786,762      |
| Sterling                | -                    | (11,188)                                    | 28,624                                 | 17,436         |
| <b>28 February 2022</b> |                      |   |  |                |
| US Dollar               | 2,311,349            | 64,725                                      | (29,367)                               | 2,346,707      |
| Sterling                | -                    | (2,934)                                     | 29,374                                 | 26,440         |

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of increasing the return and net assets by £89,338,000 (2022: £117,335,000). A five percent decrease would have an equal and opposite effect.

| US Dollar               | 29,022               | 813   | (29,367)                               | 468            |

### (iii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those relating to interest rate risk, currency risk and credit and counterparty risk), whether caused by factors specific to an investment or wider issues affecting the market generally. The value of equities is dependent on a number of factors, arising from the performance of the company itself and matters arising in the wider market (for example the state of the underlying economy and current government policy). The portfolio is invested in securities domiciled in a number of countries and will be exposed to market movements in the relevant country arising from changes in the local economy and government decisions. As part of the continuing review of the portfolio, the ACD monitors and reviews these factors. A five per cent increase in the value of the sub-fund's portfolio would have the effect of increasing the return and net assets by £88,531,000 (2022: £115,568,000). A five per cent decrease would have an equal and opposite effect.

### (iv) Leverage risk

Leverage is defined as any method by which the sub-fund can increase its exposure by borrowing cash or securities or from leverage that is embedded in derivative positions. The ACD is required to calculate and monitor the level of leverage of the sub-fund, expressed as a percentage of the exposure of the sub-fund and its net asset value under the 'sum of the notionals' and 'commitment' method.

The sub-fund can use cash borrowing and financial derivatives (subject to the restrictions as set out in its Prospectus and COLL) as sources of leverage. A result of 100% indicates that no leverage has been used.

As at 28 February 2023 and 28 February 2022 the leverage ratios of the sub-fund were:

|                                   | 28 February 2023<br>% | 28 February 2022<br>% |
|-----------------------------------|-----------------------|-----------------------|
| Sum of the notional<br>Commitment | 101.6<br>100.5        | 101.4<br>100.5        |

## (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis. The largest counterparty risk is with JPMorgan Chase Bank N.A. ('JPMorgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JPMorgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JPMorgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit worthiness of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages with. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirements stipulated in COLL and the Prospectus. Aside from the custodian, and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

## Counterparty and collateral exposure

The types of derivatives held at the balance sheet date were forward currency contracts. Details of the individual contracts are disclosed separately in the portfolio statement and the total position by counterparty and the collateral pledged, at the balance sheet date, were as follows:

|                         | Forward currency<br>contracts<br>£'000 | Total gross<br>exposure<br>£'000 | Net collateral<br>held<br>£'000 |
|-------------------------|--|----------------------------------|---------------------------------|
| <b>28 February 2023</b> |  |                                  |                                 |
| JPMorgan                | 247                                    | 247                              | 74                              |
| UBS AG                  | 28                                     | 28                               | -                               |
| <b>28 February 2022</b> |  |                                  |                                 |
| JPMorgan                | 7                                      | 7                                | 239                             |

Only cash collateral is pledged or held by the sub-fund. The balance includes cash held at brokers.

## ARTEMIS US SELECT FUND

---

### (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each sub-fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the sub-funds and investor base. This includes but is not limited to what percentage of the sub-fund can be liquidated within certain redemption horizons, whether the largest investors in the sub-fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered. There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

### 17. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 148 and Notes 6, 9, 11 and 13 on pages 151 to 153 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £10,476,000 (2022: due from the ACD £13,140,000).

### 18. Share classes

The annual management charge on each share class is as follows:

|                                 |       |
|---------------------------------|-------|
| I distribution GBP              | 0.75% |
| I accumulation GBP              | 0.75% |
| I accumulation GBP (NAV hedged) | 0.75% |

The net asset value per share and the number of shares in each class are given in the comparative tables on page 158. The distribution per share class are given in the distribution tables on page 157. All classes have the same rights on winding up.

### 19. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This fund pays annual dividend distributions.

The following table sets out the details of the distribution periods.

| Distribution period | Start        | End              | Ex-dividend date | Pay date      |
|---------------------|--------------|------------------|------------------|---------------|
| Final               | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

## RISK AND REWARD PROFILE

- The sub-fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the sub-fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

**The risk indicator may not fully take into account the following risks and the following may affect sub-fund performance:**

- Market volatility risk:** The value of the sub-fund and any income from it can fall or rise because of movements in stock markets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Currency risk:** The sub-fund's assets may be priced in currencies other than the sub-fund base currency. Changes in currency exchange rates can therefore affect the sub-fund's value.
- Concentration risk:** The sub-fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.
- Smaller companies risk:** Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.

There was no change to the risk indicator in the 12 months ended 28 February 2023.

Please refer to the sub-fund's prospectus for full details of these and other risks which are applicable to this sub-fund.

# ARTEMIS US SMALLER COMPANIES FUND

## INVESTMENT REVIEW

- The fund underperformed the index, returning (5.1)% in sterling terms versus a return of 4.2% from the Russell 2000 index<sup>1</sup>.
- Higher growth stocks suffered.
- We are focused on companies that we believe can deliver in a tougher economic background.

### Rising inflation and higher interest rates drove the market

Inflation and interest rates were the dominant theme in the market over the reporting period. Spurred on by disruptions to commodity markets caused by the tragic events in Ukraine, inflation increased from 7% at the start of the year, peaking at around 9% in June. The Federal Reserve responded by raising rates. Initially, this was somewhat tentative – with a hike of 0.25% in March followed by one of 0.50% in May. But it then delivered four back-to-back hikes of 0.75%.

Unsurprisingly, these moves were keenly felt in interest-rate sensitive sectors of the economy such as housing:

- US 30-year mortgage rates started 2022 at a little over 3% but peaked in November at around 7.3%.
- Housing starts declined by about a quarter from peak to trough.
- Homebuilders and related stocks (as measured by the S&P Homebuilding Index) fell by around 42% from December 31 2021 to the middle of June 2022.

While overall real economic growth remained positive, recession concerns intensified over the course of the year. Manufacturing and services surveys both showed deterioration through 2022, with both crossing the threshold separating expansion from contraction. As of the end of February 2023, a majority of forecasters on Bloomberg were predicting a recession in the year ahead.

Shortly after the end of the reporting period, several regional banks ran into financial difficulties, leading investors to start worrying about the impact of a potential credit crunch on an already slowing economy.

### Performance – Held back by our high-growth stocks

Over the 12 months to February 2023 the fund underperformed the index. The fund declined by 5.1% in sterling terms, with the Russell 2000 index delivering a positive return of 4.2%.

Early in the period, some of our higher-quality, higher-growth companies were still trading at a premium valuation to the market. They suffered poor performance as the market awarded them lower valuations than it has done over the past couple of years. We decided to reduce or sell some of these holdings to limit our underperformance.

One example is Kornit Digital, which was a large detractor from returns for the year. Kornit's disruptive technology addresses some of the environmental damage caused by the clothing industry. Using the company's digital printing machines, clothing can be printed much closer to the source of demand and in smaller batches. This reduces the significant wastage of printing very large volumes (to reduce the unit costs), which is usually done in markets with very low labour costs. In addition to reducing textile wastage and the cost of transport, Kornit's technology also significantly cuts the use of water.

Maravai LifeSciences was also disappointing, and we sold the full position. We had liked the company's exposure to further innovation in mRNA-based drugs but a post-Covid overhang and the impact of rising rates on higher-growth businesses weighed on its shares.

### Infrastructure-related stocks did well

Stocks that are exposed to infrastructure spending contributed positively to the fund's returns over the period. Infrastructure is an important theme for us; a range of infrastructure across the US now requires significant investment.

The most significant area of investment relates to power generation amid the transition away from fossil fuels. We bought Constellation Energy, which is a pure play on producing electricity using nuclear power. We believe such sources of carbon-free energy have become increasingly vital. Valmont Industries is involved in a number of different aspects of infrastructure and also provides the manpower and know-how to connect sources of renewable energy to the existing grid. It should also benefit from increased spending by the agricultural sector.

Clean Harbors was another positive contributor within our infrastructure theme. The company has two primary businesses. First, its incinerators are used to dispose of hazardous waste. The Biden government has been more enthusiastic about enforcing environmental legislation, which has benefited this part of the business. The second part of Clean Harbors is called Safety-Kleen. It collects used motor oil from garages which it then recycles, removing contaminants. Both businesses are performing strongly.

Past performance is not a guide to the future.

<sup>1</sup> Artemis/Lipper Limited, class I accumulation GBP to 28 February 2023. Our benchmark is the Russell 2000 Index NR. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

## Adding to consumer-facing companies

In the latter part of the period, we increased our exposure to consumer-facing companies. We believe the market is too focused on shorter-term issues and is ignoring positive longer-term trends.

We bought back into Burlington Stores, the discount retailer. We have liked this business for quite some time. It performed extremely well in the initial phase of the pandemic as its lower-income customers benefited disproportionately from stimulus payments from the government. However, business suffered when these payments stopped – which happened to coincide with severe disruption to supply chains. We felt that these issues were largely in the past and that the positive fundamentals of Burlington's business would begin to reassert themselves. This dynamic has begun to play out and Burlington has been a strong performer for us since purchase.

We also bought Builders FirstSource. We believe its share price is fully discounting shorter-term headwinds in the housing industry but we now see the prospect of attractive growth in the longer term. It has contributed positively to performance since purchase.

We do not believe interest rates will return to the extreme lows of the pandemic era. As such, companies that can demonstrate growth, while also generating healthy cashflow and earnings should be able to beat the market. We expect that interest rates that are materially higher than they have been over the past five to 10 years will have a detrimental impact on 'zombie companies' which have been kept alive by extremely low interest rates. We believe this will benefit our portfolio's bias to quality stocks – those with predictable, growing earnings and high free cashflows.

**Cormac Weldon and Olivia Micklem**  
Fund managers

## NOTES TO THE FINANCIAL STATEMENTS

---

### 1. Accounting policies

**(a) Basis of accounting.** The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in accordance with FRS 102, the SORP and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). The financial statements have been prepared on a going concern basis. There are no material events that have been identified that may cast significant doubt about the sub-fund's ability to continue as a going concern for a period of twelve months from the date the financial statements are authorised for issue. The ACD believes that the sub-fund has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

**(b) Valuation of investments.** All investments have been valued at 12 noon on the last working day of the accounting period. Where a sub-fund invests in markets that are closed for trading at the sub-fund's valuation point, the ACD will allow for the Net Asset Value to be adjusted (based on movements of index futures or other suitable proxies in markets closed at the sub-fund valuation point, since the last market close), to reflect more accurately the fair value of the sub-fund's investments. Listed investments are valued at fair value which is deemed to be the bid or SETS price. The last valuation point in the accounting period has been used for the purposes of preparing the report and financial statements and in the ACD's opinion there have been no material movements in the sub-fund between the last valuation point and close of business on the balance sheet date.

**(c) Foreign exchange rates.** Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12 noon on the last working day of the accounting period. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

**(d) Derivatives.** Where appropriate, certain permitted transactions such as derivatives or forward currency contracts are used for investment purposes and efficient portfolio management. Derivatives are valued at 12 noon on the last working day of the accounting period. Over-the-counter derivatives are priced at fair values using valuation models or data sourced from market data providers. Interest on margin accounts held with brokers is included in the revenue return. All other gains/losses and cash flows from derivatives are included in the capital return. Open forward currency contracts are shown in the Portfolio Statement at market value and the net gains/(losses) are reflected within forward currency contracts under net capital (losses)/ gains in the Notes to the financial statements.

**(e) Revenue.** Dividends receivable from equity and non-equity shares, including Real Estate Investment Trusts, are credited to revenue, net of attributable tax credits, when the security is quoted ex-dividend. Dividends received as shares (scrip/ stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. Special dividends are reviewed on a case by case basis when determining if the dividend is to be treated as revenue or capital. It is likely that where a special dividend results in a significant reduction in the capital value of a holding, then the dividend will generally be treated as capital, otherwise this will be recognised as revenue. Bank interest is recognised on an accruals basis.

**(f) Expenses.** All expenses (other than those relating to the purchase and sale of investments) are charged against revenue on an accruals basis.

**(g) Taxation.** Corporation tax is charged at a rate of 20% on the excess taxable revenue of the sub-fund. In general, the tax accounting treatment follows that of the principal amount. Deferred tax is provided for all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences. Deferred tax is provided for at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

**(h) Dilution adjustment.** The sub-fund is priced on a single price basis and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions and redemptions in and out of the sub-fund. This is known as "dilution". Under certain circumstances dilution may have a material adverse effect on the existing/continuing shareholders' interest in the sub-fund. In order to counter this and to protect shareholders' interests, the ACD will apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the sub-fund will make adjustments to counter the impact of dealing and other costs on occasions when these are deemed to be significant. In the usual course of business a dilution adjustment will be applied systematically and on a consistent basis.

## ARTEMIS US SMALLER COMPANIES FUND

### 2. Distribution policy

The distribution policy of the sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue and taxation.

Gains and losses on non-derivative investments and forward currency contracts, whether realised or unrealised, are taken to capital and are not available for distribution. With the exception of the ACD's annual management charge, which is directly attributable to each share class, all income and expenses are apportioned to each share class pro-rata to the value of the net assets of the relevant share class on the day that the income or expense is recognised.

For accumulation shares this revenue is not distributed but automatically reinvested in the sub-fund and is reflected in the value of these shares.

Distributions which have remained unclaimed by shareholders for six years are credited to the capital property of the sub-fund.

### 3. Net capital losses

|                            | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |

During the year the sub-fund incurred £nil (2022: £nil) in capital transaction charges.

## Dealing spread

As at the balance sheet date the average portfolio dealing spread was 0.07% (2022: 0.11%). This spread represents the difference between the bid and offer values of each underlying investment of the sub-fund expressed as a percentage of its offer price.

## 5. Revenue

|                      | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|----------------------|---------------------------|---------------------------|
| Overseas dividends   | 10,048                    | 10,068                    |
| Bank interest        | 473                       | 8                         |
| <b>Total revenue</b> | <b>10,521</b>             | <b>10,076</b>             |

## 6. Expenses

|  | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|--|---------------------------|---------------------------|
| <b>Payable to the ACD, associates of the ACD and agents of either of them:</b> |                           |                           |
| Annual management charge   | 8,336                     | 9,614                     |
| Administration fees  | 1,334                     | 1,538                     |
| <b>Total expenses</b>  | <b>9,670</b>              | <b>11,152</b>             |

All expenditure stated above is inclusive of irrecoverable VAT where applicable.

The audit fee (excluding VAT) accrued during the year was £9,650 (2022: £8,800). This fee is paid by the manager.

## 7. Interest payable and similar charges

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Interest payable                                  | 3                         | 4                         |

| <b>b) Factors affecting the tax charge for the year</b> |                           |                           |
| Net revenue/(expense) before taxation                   | 848                       | (1,080)                   |
| Corporation tax at 20% (2022: 20%)                      | 170                       | (216)                     |
| <b>Effects of:</b>                                      |                           |                           |
| Unutilised management expenses                          | 1,447                     | 2,081                     |
| Irrecoverable overseas tax                              | 1,308                     | 1,394                     |
| Overseas withholding tax expensed                       | (69)                      | (26)                      |
| Non-taxable overseas dividends                          | (1,548)                   | (1,839)                   |
| <b>Tax charge for the year (note 8a)</b>                | <b>1,308</b>              | <b>1,394</b>              |

### c) Provision for deferred tax

No provision for deferred tax has been made in the current or prior accounting year.

### d) Factors that may affect future tax charges

The sub-fund has not recognised a deferred tax asset of £5,973,000 (2022: £4,526,000) arising as a result of having unutilised management expenses of £29,865,000 (2022: £22,629,000). It is unlikely that the sub-fund will obtain relief for these in the future so no deferred tax asset has been recognised.

## ARTEMIS US SMALLER COMPANIES FUND

### 9. Distributions

|   | 28 February 2023<br>£'000 | 28 February 2022<br>£'000 |
|---|---------------------------|---------------------------|
| Add: amounts deducted on cancellation of shares       | -                         | 1                         |
| Deduct: amounts added on issue of shares              | -                         | (33)                      |
| <b>Distributions</b>                                  | -                         | (32)                      |
| <b>Movement between net expense and distributions</b> |                           |                           |
| Net (expense)/revenue after taxation                  | (460)                     | (2,474)                   |
| Expenses paid from capital                            | 460                       | 2,442                     |
|   | -                         | (32)                      |

The distributions take account of amounts added on the issue of shares and amounts deducted on the cancellation of shares. Details of the distribution per share are set out in the distribution tables on page 174.

### 10. Fair value hierarchy

All investments are designated at fair value through profit or loss on initial recognition. The following table provides an analysis of these investments based on the fair value hierarchy in accordance with FRS 102 which reflects the reliability and significance of the information used to measure their fair value.

The disclosure is split into the following categories:

Level 1 - Investments with unadjusted quoted prices in an active market;

Level 2 - Investments whose fair value is based on inputs other than quoted prices that are either directly or indirectly observable;

Level 3 - Investments whose fair value is based on inputs that are unobservable (i.e. for which market data is unavailable).

|              | 28 February 2023 |                      | 28 February 2022 |                      |
|--------------|------------------|----------------------|------------------|----------------------|
|              | Assets<br>£'000  | Liabilities<br>£'000 | Assets<br>£'000  | Liabilities<br>£'000 |
| Level 1      | 1,021,879*       | -                    | 1,236,649*       | -                    |
| Level 2      | 58               | -                    | 3                | -                    |
| <b>Total</b> | <b>1,021,937</b> | <b>-</b>             | <b>1,236,652</b> | <b>-</b>             |

\* Level 1 includes fair value adjustment based on movement of futures in markets closed at the sub-fund valuation point, since the last market close.

### 11. Debtors

### 16. Risk disclosures

In pursuing its investment objectives, the sub-fund may hold a number of financial instruments. These financial instruments comprise equities, cash balances and liquid resources, which include debtors and creditors that arise directly from the sub-fund's operations.

The ACD has a risk management policy. The processes detailed within are designed to monitor and measure at any time the risk of the sub-fund's positions and their contribution to the overall risk profile of the sub-fund. In addition, our Investment Committee and Risk and Compliance Committee meet monthly and quarterly respectively, and as required to evaluate risk across each of our funds. These policies have been consistent for both the current and prior period to which these financial statements relate.

In the normal course of business, the sub-fund's activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests. These financial risks: market risk (comprising currency risk, interest rate risk and other market price risk), credit and counterparty risk and liquidity risk and the approach to the management of these risks, are set out below and remain unchanged from the previous accounting year. For a detailed explanation of these and further risks involved in investing in the sub-fund, reference should be made to the Prospectus.

#### (a) Market risk

Market risk, which includes interest rate risk, currency risk, other price risk and leverage risk arises mainly from uncertainty about future values of financial instruments in the sub-fund's investment portfolio. The sub-fund, in order to meet its investment objective and policy, invests predominantly in equities and maintains an appropriate spread of investments in accordance with COLL and the Prospectus to seek to reduce the risks arising from factors specific to a particular company or sector. The ACD's investment strategy is to select investments for their fundamental value. Stock selection is therefore based on disciplined accounting, market and sector analysis, with the emphasis on long-term investments. There is no material difference between the carrying values and the fair values of the financial assets and liabilities of the sub-fund disclosed in the balance sheet.

#### (i) Interest rate risk

Changes in interest rates or changes in expectations of future interest rates may result in an increase or decrease in the market value of the investments held. As the majority of the sub-fund's financial assets are non-interest bearing, the sub-fund is only subject to limited exposure to fair value interest rate risk due to fluctuations in levels of market interest rates and therefore no sensitivity analysis has been provided.

## ARTEMIS US SMALLER COMPANIES FUND

### (ii) Currency risk

A portion of the net assets of the sub-fund are denominated in currencies other than sterling, and therefore the balance sheet and total return can be affected by currency movements. Therefore, the ACD may decide that a proportion of the investments that are not priced in sterling, may be covered by forward currency contracts, so that the sub-fund's exposure to currency risk is reduced. The loss on forward currency contracts for the year was £2,108,000 (2022: loss of £2,719,000).

Revenue received in foreign currencies is converted into sterling on or near the date of receipt. The exposure to each currency is shown in the tables below.

| Currency                | Investments<br>£'000 | Net other assets/<br>(liabilities)<br>£'000 | Forward currency<br>contracts<br>£'000 | Total<br>£'000 |

| <b>28 February 2022</b> |                      |   |  |                |
| US Dollar               | 1,205,638            | 53,029                                      | (12,790)                               | 1,245,877      |
| Canadian Dollar         | 31,011               | -   | -                                      | 31,011         |
| Sterling                | -                    | 1,246                                       | 12,793                                 | 14,039         |

A five percent increase in the value of the sub-fund's foreign currency exposure would have the effect of increasing the return and net assets by £51,603,000 (2022: £63,844,000). A five percent decrease would have an equal and opposite effect.

### (iii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those relating to interest rate risk, currency risk and credit and counterparty risk), whether caused by factors specific to an investment or wider issues affecting the market generally. The value of equities is dependent on a number of factors, arising from the performance of the company itself and matters arising in the wider market (for example the state of the underlying economy and current government policy). The portfolio is invested in securities domiciled in a number of countries and will be exposed to market movements in the relevant country arising from changes in the local economy and government decisions. As part of the continuing review of the portfolio, the ACD monitors and reviews these factors. A five per cent increase in the value of the sub-fund's portfolio would have the effect of increasing the return and net assets by £51,097,000 (2022: £61,833,000). A five per cent decrease would have an equal and opposite effect.

### (iv) Leverage risk

Leverage is defined as any method by which the sub-fund can increase its exposure by borrowing cash or securities or from leverage that is embedded in derivative positions. The ACD is required to calculate and monitor the level of leverage of the sub-fund, expressed as a percentage of the exposure of the sub-fund and its net asset value under the 'sum of the notionals' and 'commitment' method.

The sub-fund can use cash borrowing (subject to restrictions as set out in its Prospectus and COLL) and financial derivatives as sources of leverage. A result of 100% indicates that no leverage has been used.

As at 28 February 2023 and 28 February 2022 the leverage ratios of the sub-fund were:

|                      | 28 February 2023<br>% | 28 February 2022<br>% |
|----------------------|-----------------------|-----------------------|
| Sum of the notionals | 100.3                 | 100.1                 |
| Commitment           | 100.1                 | 100.0                 |

### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it has entered into with the sub-fund, resulting in a financial loss. From time to time, the sub-fund may be subject to short-term credit risk with counterparties pending settlement of investment transactions. The ACD has a pre-approved list of counterparties it uses for investment transactions, which is reviewed on a regular basis.

The largest counterparty risk is with J.P. Morgan Chase N.A. ('JP Morgan'), the sub-fund's custodian and banker, who holds the sub-fund's investments and maintains the bank accounts. Bankruptcy or insolvency of JP Morgan may cause the sub-fund's rights with respect to securities and cash held by the custodian to be delayed or limited. The depositary receives and reviews a semi-annual report on the internal controls in place at JP Morgan. The sub-fund is also exposed to counterparty risk through holding specific financial instruments.

The ACD is permitted to use one or more separate counterparties for derivative transactions. The sub-fund may enter into transactions in over-the-counter ('OTC') markets that expose it to the credit worthiness of its counterparties and their ability to satisfy the terms of such contracts. Where the sub-fund enters into derivative contracts, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. In the event of bankruptcy or insolvency of a counterparty, the sub-fund could experience delays in liquidating the position and may incur significant losses. There may be a risk that a counterparty will be unable to meet its obligations with regard to the return of the collateral and may not meet other payments due to the sub-fund. To minimise such risk the ACD will assess the creditworthiness of any counterparty that it engages with. On a daily basis the ACD assesses the level of assets with each counterparty to ensure that the exposure is within the defined limits in accordance with the requirements stipulated in COLL and the Prospectus. Aside from the custodian, and brokers where trades are pending settlement, there were no significant concentrations of credit and counterparty risk as at 28 February 2023 or 28 February 2022.

#### Counterparty and collateral exposure

The types of derivatives held at the balance sheet date were forward currency contracts. Details of the individual contracts are disclosed separately in the portfolio statement and the total position by counterparty and the collateral pledged, at the balance sheet date, were as follows:

|                         | Forward currency<br>Contract<br>£'000 | Total gross<br>Exposure<br>£'000 | Net collateral<br>held<br>£'000 |
|-------------------------|---------------------------------------|----------------------------------|---------------------------------|
| <b>28 February 2023</b> |                                       |                                  |                                 |
| JPMorgan                | 58                                    | 58                               | 17                              |
| <b>28 February 2022</b> |                                       |                                  |                                 |
| JPMorgan                | 3                                     | 3                                | 90                              |

#### (c) Liquidity risk

Liquidity risk is the risk that through market liquidity conditions, requests for redemptions from investors cannot be met in an orderly and appropriate manner. Artemis adopts a policy of mitigation and control to manage liquidity risks. Mitigation occurs through maintaining prudent levels of liquidity in each sub-fund and a well-diversified investor base. As a result, redemption requests can be satisfied in all but exceptional circumstances.

Artemis has a dedicated liquidity risk management policy which is owned by the independent investment risk team which reports to the Chief Risk Officer. Its purpose is to ensure the portfolio manager acts in the client's best interest with regards to this liquidity risk. Through the use of 3rd party modeling and assumptions, the investment risk team conduct regular monitoring and analyses of the liquidity profile of the funds and investor base. This includes but is not limited to what percentage of the sub-fund can be liquidated within certain redemption horizons, whether the largest investors in the sub-fund can redeem without affecting the fair treatment of remaining investors, liquidity stress testing and other analysis deemed to cover a risk specific to the strategy considered. There was no significant concentration of liquidity risk as at 28 February 2023 or 28 February 2022.

#### 17. Related party transactions

The ACD is deemed to be a related party. All transactions and balances associated with the ACD are disclosed within the statement of total return, statement of change in net assets attributable to shareholders and the balance sheet on page 165 and notes 6, 9, 11 and 13 on pages 168 to 170 including all issues and cancellations where the ACD acted as principal.

The balance due to the ACD as at 28 February 2023 in respect of these transactions was £1,492,000 (2022: due from the ACD £2,050,000).

## ARTEMIS US SMALLER COMPANIES FUND

---

### 18. Share classes

The annual management charge on each share class is 0.75%

The net asset value per share and the number of shares in each class are given in the comparative tables on page 175. The distributions per share class are given in the distribution tables on page 174. All classes have the same rights on winding up.

### 19. Post balance sheet events

There were no significant post balance sheet events subsequent to the year end.

## DISTRIBUTION TABLES

This sub-fund pays annual dividend distributions.  
The following table sets out the distribution periods.

| Distribution period | Start        | End              | Ex-dividend date | Pay date      |
|---------------------|--------------|------------------|------------------|---------------|
| Final               | 1 March 2022 | 28 February 2023 | 1 March 2023     | 28 April 2023 |

Group 1 shares are those purchased prior to a distribution period and therefore their net revenue rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of net revenue and equalisation. Equalisation applies only to group 2 shares purchased during the period. It is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

\* Direct transaction costs are stated after deducting the amounts collected in relation to estimated dealing costs added to the issue of shares and subtracted from the cancellation of shares.

The operating charges are calculated on an ex-post basis. High and low price disclosures are based on quoted unit prices. Therefore opening and closing NAV prices may fall outside the high/low price threshold.

## Ongoing charges

| Class                           | 28 February 2023 |
|---------------------------------|------------------|
| I accumulation GBP              | 0.87%            |
| I accumulation GBP (NAV Hedged) | 0.87%            |

Ongoing charges shows the annual operating expenses of each share class as a percentage of the average net assets of that class for the preceding 12 months.

Past performance is not a guide to the future.

\* Source: Lipper Limited, class I accumulation GBP from 27 October 2014 to 28 February 2023. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the IA sector benchmark.

\*\* Value at 12 noon valuation point

\*\*\* Value at close of business

Class I accumulation is disclosed as it is the primary share class.

## GENERAL INFORMATION

---

### Investment in the company

Investments in Artemis Investment Funds ICVC are intended to be medium to long term investments and should not be considered a short term investment.

Investors are reminded that past performance is not a guarantee of performance in the future and that the price of shares and the income from them can fall as well as rise. Please refer to the Key Investor Information Document and Prospectus (which are available from the ACD on request) for a full description of the risks involved when investing in the sub-funds.

Shares may be bought and sold by contacting the ACD by telephone, at the address on this page or via the website [artemisfunds.com](http://artemisfunds.com) in the UK. Valuation of the sub-funds takes place each Dealing Day at 12 noon on a forward pricing basis. The current list of non-Dealing Days impacting the sub-funds is published on our website at [www.artemisfunds.com/nondealing-days](http://www.artemisfunds.com/nondealing-days). Investors are reminded that past performance is not a guarantee of performance in the future and that the price of shares and the revenue from them can fall as well as rise.

The information contained within this document should not be construed as a recommendation to purchase or sell stocks.

### Publication of prices

The most recent prices are published on the ACD's website [artemisfunds.com](http://artemisfunds.com), which is the primary method of price publication.

For further details and where to find such prices please contact the ACD. Shares are not quoted on any recognised investment exchange.
