*The Company certifies that HSBC Issuer Services Common Depository Nominee (UK) Limited as nominee of HSBC Bank plc acts as common depository for Euroclear and Clearstream.

HSBC Global Asset Management Shariah Committee

The Management Company has entered into a Shariah Compliance Advisory Agreement with HSBC Saudi Arabia Limited under which the latter agrees to appoint the members of the HSBC Global Asset Management Shariah Committee (the "Shariah Committee"). The members of the Shariah Committee are

Dr. Nizam Yaquby - resident in Bahrain and

Dr. Mohamed Ali Elgari - resident in Saudi Arabia

Directors' Report

The board of directors of the Company (each a "Director", together the "Directors" or the "Board") submit their annual report together with the audited financial statements for the financial year ended 31 December 2022 (the "Financial Statements").

Company information

HSBC ETFs PLC (the "Company") was incorporated as an open-ended investment company with variable capital on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "2011 UCITS Regulations") and is also subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), (together "the UCITS Regulations").

The Company is structured as an umbrella fund with segregated liability between sub-funds and comprises separate sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolios of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus of the Company (the "Prospectus") and the relevant sub-fund's supplement (the "Supplement").

As at 31 December 2022, the Company has 50 sub-funds in operation (31 December 2021: 41). The Company has 5 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia's invasion of Ukraine. The sub-fund was closed on 24 March 2023 and was delisted from London Stock Exchange on 29 March 2023. HSBC MSCI SOUTH AFRICA CAPPED UCITS ETF was closed on 21 April 2022 and was delisted from London Stock Exchange on 26 April 2022. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI MALAYSIA UCITS ETF was closed on 7 December 2022 and was delisted from London Stock Exchange on 12 December 2022.

The authorisation of HSBC MSCI SAUDI ARABIA 20/35 CAPPED UCITS ETF was revoked by the Central Bank on 8 December 2021, and as such is not an inactive sub-fund.

Each of the sub-funds, through the listing of their shares on one or more stock exchanges, is an exchange traded fund ("ETF").

The Financial Statements are published on the Company's website. The Directors, together with the Management Company, are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

Directors' Report (continued)

Corporate Governance Statement

The Board is committed to maintaining the highest standards of corporate governance and is accountable to shareholders of the Company (the "Shareholders") for the governance of the Company's affairs.

The Company's corporate governance practices comply with the following:

- i) The European Communities (Directive 2006/43/EC) Regulations (CA 2014 S.1373) which requires the inclusion of a corporate governance statement in the Directors' Report;
- ii) The Companies Act 2014;
- iii) The Articles of Association of the Company which are available for inspection at the registered office of the Company and at the Companies Registration Office in Ireland;
- iv) The UCITS Regulations;
- v) The Financial Conduct Authority Listing Rules (the "**FCA Listing Rules**") as they apply to overseas open-ended investment funds under Chapter 16A of the FCA Listing Rules; and
- vi) The Irish Funds' Corporate Governance Code for Collective Investment Schemes and Management Companies (December 2011) (the "**IF Code**").

The Company is not subject to the European Communities (Takeover Bids (Directive 2004/25/EC)) Regulations 2006.

Compliance with the IF Code

The Directors have adopted the IF Code with effect from 31 December 2012. The Directors have reviewed and assessed the measures included in the IF Code and consider the corporate governance practices and procedures since the adoption of the IF Code as consistent therewith. The Board considers that the Company has complied with the IF Code throughout this accounting year and that it complies with the various other corporate governance requirements prescribed by the legislation noted above.

Internal controls and risk management systems

The Directors in conjunction with the Management Company are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors in conjunction with the Management Company have procedures in place designed to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and interim financial statements. The annual and interim financial statements of the Company are required to be approved by the Directors and filed with the Central Bank. The annual financial statements are required to be audited by an independent auditor who reports annually to the Board of Directors on their findings. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Directors' Report (continued)

Internal controls and risk management systems (continued)

The Management Company has established processes regarding internal control and risk management systems designed to ensure their effective oversight of the financial reporting process. These include appointing the Administrator to maintain adequate accounting records of the Company independently of the Investment Manager and the Depository. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

The Management Company also periodically reviews the Administrator's financial accounting and reporting routines along with the independent auditor's performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

The Directors receive regular presentations and review reports from the Management Company, the Depository, the Investment Manager and the Administrator. The Directors also have an annual process to consider and address any shortcomings identified and measures recommended by the independent auditor.

Dealings with Shareholders

The Shareholders invest in sub-funds to gain exposure to the expertise of the Investment Manager and investment strategies. The Company has appointed the Distributor who is tasked with actively managing the relationship between the Company and Shareholders. The Distributor provides the Board with quarterly updates which form the primary information source for the Directors to understand the views of major Shareholders. A senior representative of the Distributor attends each Board meeting and presents a report providing the Directors with additional information on the ongoing Shareholder relationships.

The Company also communicates with Shareholders through the annual and interim Financial Statements which aim to provide Shareholders with a full understanding of the Company's activities and its results. Additional information is also available on the Company's website at www.etf.hsbc.com.

The convening and conduct of Shareholders' meetings are governed by the Articles of Association of the Company and the Companies Act 2014, as amended (the "Companies Act"). Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors must convene an annual general meeting of the Company within fifteen months of the date of the previous annual general meeting. Extraordinary general meetings of the Company may also be convened by holders of Subscriber Shares. Not less than twenty-one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to Shareholders.

One Shareholder present either in person or by proxy constitutes a quorum at a general meeting. Subject to any special rights or restrictions for the time being attached to any series or class of shares of the Company, each Shareholder is entitled to such number of votes as is produced by dividing the aggregate net asset value of that Shareholder's holding (expressed or converted into US Dollars and calculated as of the relevant record date) by one. The shareholders of the Subscriber Shares and the shareholders of the Capitalisation Shares have one vote for each Subscriber Share or Capitalisation Share held respectively, as defined in the Company's Articles of Association.

At any general meeting, a resolution put to the vote of the meeting will be decided on a poll. On a poll, every member in person or by proxy has such number of votes as is calculated in accordance with the methodology set out above.

The rights attached to any class of shares in the capital of the Company may only (unless otherwise provided by the terms of the issue of the shares of that class) be varied or abrogated with the consent in writing of the holders of three-fourths of the issued shares of that class, or with the sanction of a resolution passed by a majority of three-quarters of the votes cast by the members of that class who attend at a separate general meeting of the holders of the shares of the relevant class.

Directors' Report (continued)

Composition and operation of the Board of Directors

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors shall not be less than two. Currently the Board of Directors is composed of six Directors, being those listed in General Information section of these Financial Statements. The Directors meet at least quarterly. The Board has also established an audit committee comprising of three Directors.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are, by the Companies Act or by the Articles of Association of the Company, required to be exercised by the Company in a general meeting. A Director may, and the Secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the Chairperson of the Board has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The principal responsibility of the Directors is oversight of the business affairs of the Company and consistent with these oversight responsibilities the Directors have delegated management functions and responsibilities to duly qualified service providers. Such service providers are subject to ongoing oversight by the Directors.

Accounting Records

The Directors believe that they have complied with the requirements of the Companies Act with regard to accounting records by engaging the services of the Administrator, who employs personnel with appropriate expertise and adequate resources, appropriate systems and procedures to provide the Company's finance function. The accounting records are retained at the office of the Administrator at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland.

Directors and secretary

The names of the persons who were Directors at any time during the financial year ended 31 December 2022 are set out in General Information section of these Financial Statements. All the Directors serve in a non-executive capacity. Goodbody Secretarial Limited held the office of secretary (the "Secretary") throughout the financial year.

Directors' and Secretary's interests

None of the Directors nor the Secretary or their respective families held any interest, beneficial or otherwise, in the share capital of the Company during or at the end of the financial year.

The Board of Directors is not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest at any time during the year ended 31 December 2022, other than those described in Note 11, 'Related parties'.

Employees

The governance framework of the Company reflects the fact that, as a collective investment scheme, it has no employees and outsources investment management and administration. The Management Company is responsible on a day-to-day basis, under the supervision of the Directors, for providing administration, marketing, investment management and advice services in respect of all sub-funds. The Management Company employs a number of staff across different categories of staff including senior management to oversee their responsibilities.

Directors' Report (continued)

Review of performance, risks, uncertainties and future developments

The Company's overall risk management policy focuses on the agreed risk management mechanisms and techniques that are used by the Investment Manager to measure, manage and report the relevant risks which the sub-funds of the Company are or might be exposed to. The main risks arising from investment in the Company include, but are not limited to, the risks referred to in Note 4 of these Financial Statements. Geopolitical risks (e.g Russia's invasion of Ukraine, impact of pandemics, withdrawal of the UK from the EU) are outlined below.

The Company's business activities and performance during the year together with the factors likely to affect its future development, are set out in the Investment Manager's Report. The performance review within the Investment Manager's Report encompasses tracking error and tracking difference disclosures which are key metrics as to how well the sub-funds of the Company have performed and how they have been managed against their benchmark indices.

The Company will continue its investment objective as set out in each relevant sub-fund's Supplement.

Key performance indicators

The key performance indicators monitored for each sub-fund include the performance and the financial position of the sub-funds. The financial position of the Company is described in the Financial Statements on page 223.

Segregated liability

The Company has segregated liability between its sub-funds and accordingly any liability incurred on behalf of or attributable to any sub-fund shall be discharged solely out of the assets of that sub-fund. As of the date of the financial year end the Directors are not aware of any unrecognised existing or contingent liability of any sub-fund of the Company.

Climate Change Risks

The Directors acknowledge that climate change is an emerging risk impacting the global economy and will continue to be of interest to all stakeholders. However, having considered such factors relating to climate change, the Directors have determined that there are no direct or immediate impacts of climate change on the business operations of the Company. Given this, there is no basis on which to provide extended information of analysis relating to climate change risks on the business operations of the Company. Furthermore, the Directors conclude that at present there is no material impact to the fair value of assets and liabilities of the Company. The Directors recognise that governmental and societal responses to climate change risks are still developing and the future impact cannot be predicted. Therefore, the future fair value of assets and liabilities may fluctuate as the market responds to climate change policies, physical events and changes in societal behaviours.

Directors' Report (continued)

Significant events during the financial year

1. Effective 1 January 2022, facilities for investors for dealing in shares of the sub-funds related to Article 92 (b-e) of the Directive 2009/65/EC (as amended by the Directive (EU) 2019/1160), are available from HSBC Investment Funds (Luxembourg) S.A., 16, Boulevard d'Avranches, L-1160 Luxembourg via <https://eifs.lu/hsbc-asset-management>.

- HSBC USA SUSTAINABLE EQUITY UCITS ETF USD(DIST) Class
- HSBC WORLD ESG BIODIVERSITY SCREENED EQUITY UCITS ETF USD(ACC) Class

Directors' Report (continued)

Significant events during the financial year (continued)

Impact of pandemics

Pandemics can impact global markets in several ways, including: (i) adding ongoing uncertainty to global markets as there is no clarity as to how long a pandemic will continue; (ii) impeding regular business operations across many different businesses, including manufacturers and service providers; and (iii) slowing down or stopping international, national, and local travel. By way of an example, all of these factors and more have been seen in recent years with the global outbreak of the Coronavirus ("COVID-19"). Notwithstanding that COVID-19 continues, the initial impact on global markets on certain industries has started to lessen however, the financial impact of the outbreak to date, and whether or not any new variant will give rise to further challenges, cannot be estimated reliably. The Board continues to monitor the situation and receives regular updates from the Management Company. As at 31 December 2022, to our knowledge, the impact of COVID-19 has not affected the Investment Manager's ability to execute the investment strategy of the sub-funds, nor has there been interruption to key service providers engaged by the Company.

Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia, including, among other actions;

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, including any which include (but are not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, may continue to adversely impact the Russian economy. This, in turn, may result in the further decline of the value and liquidity of Russian securities, a continued weakening of the rouble and continued exchange closures, and may have other adverse consequences on the Russian economy that could impact the value of Russian investments and impair the ability of the sub-funds to buy, sell, receive or deliver those securities. Moreover, these events have, and could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the sub-funds' investments beyond any direct exposure to Russian issuers.

They also give rise to material uncertainty and risk with respect to markets globally and the performance of the sub-funds and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted.

HSBC MSCI RUSSIA CAPPED UCITS ETF was temporarily suspended from trading from 2 March 2022 following Russia's invasion of Ukraine and closed on 24 March 2023 and was delisted from London Stock Exchange on 29 March 2023. Shareholder notices were sent to the relevant Shareholders notifying them of the closure.

Based on the unprecedented market circumstances, the Investment Manager's Pricing and Valuation Committee advised the Management Company to write down all Russian Ruble (RUB) denominated Russian Government Bonds and any associated coupons to zero in HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF on 2 March 2022 and all local RUB denominated Russian equities to zero in HSBC EMERGING MARKETS SUSTAINABLE EQUITY UCITS ETF, HSBC MULTI FACTOR WORLDWIDE EQUITY UCITS ETF and HSBC MSCI EMERGING MARKETS UCITS ETF on 10 March 2022.

Directors' Report (continued)

Significant events during the financial year (continued)

Withdrawal of the UK from the EU

Following the end of the transition period all cross-border passporting rights to the UK for EU funds have ceased however, the UK's introduction of a Temporary Marketing Permissions Regime enables all funds that have registered into the regime to continue to be distributed in the UK and purchased by UK domiciled investors. The UK Government has brought forward domestic legislation to streamline the process to allow overseas (including EU) investment funds to be sold in the UK post-Brexit.

It is becoming increasingly clear that there will be more divergence between UK and EU regulations which may limit the cross-border activities that can take place. As at the date of the Financial Statements, the sub-funds continue to be recognised by the FCA and can be marketed to UK investors. The UK is continuing to consider regulatory changes post-Brexit. The nature and extent of such changes still remains uncertain, but may be significant.

There were no other significant events during the financial year.

Significant events since the financial year end

Significant events since the financial year end are disclosed in Note 18.

Connected Persons transactions

The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 require that any transaction carried out with the Company by the Management Company or Depositary to the Company and the delegates or sub-delegates of the Management Company or Depositary (excluding any non-group company sub-custodians appointed by the Depositary) and any associated or group companies of the Management Company, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and must be in the best interests of the Shareholders .

The board of directors of the Management Company is satisfied that there are arrangements, evidenced by written procedures, in place to ensure that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

The board of directors of the Management Company is satisfied that all transactions with a Connected Person entered into during the year complied with the requirements that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

Auditor

KPMG Chartered Accountants were appointed as statutory auditor on 6 November 2015 and pursuant to section 383 (2) will continue in office.

Directors' compliance statement

The Directors, in accordance with Section 225 (2) of the Companies Act, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act and Tax laws ("relevant obligations"). The Directors confirm that:

- a compliance policy document has been drawn up that sets out policies, that in our opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
- appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
- a review has been conducted, during the financial year, of those arrangements and structures.

Directors' Report (continued)

Statement of relevant audit information

In discharging their responsibilities under Section 225 of the Companies Act, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

The Directors believe that they have complied with the requirements of Section 330 of the Companies Act as follows:

- So far as each person who is a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditors are unaware; and
- Having made enquiries of fellow Directors and the Company's auditor, each Director has taken all the steps that he/she is obliged to take as a Director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of the information.

Audit Committee

The Audit Committee currently comprises three independent Non-Executive Directors – Feargal Dempsey as a chair of the Audit Committee, Eimear Cowhey and Peter Blessing.

Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income. The Board of Directors may declare at its discretion, dividends in respect of each distribution share class of each sub-fund. Dividend distributions during the financial year are set out in Note 10 of these Financial Statements.

Going concern

Accounting standards require the Board of Directors to make an assessment of the Company's ability to continue as a going concern, taking into account all available information about the future, which is at least, but is not limited to, twelve months from the date the accounts are approved. The Board's going concern assessment must be updated to consider all relevant information available up to the date of this assessment.

Having assessed the Company's core activities, the financial position, the principal risks and the other matters affecting the future performance of the Company included in connection with the Financial Statements, the Directors consider it appropriate to adopt the going concern basis in preparing the Financial Statements. The Directors have arrived at this opinion by considering, among other matters:

- the Company's investments comprise readily realisable securities which can be expected to be sold to meet funding requirements if necessary;
- the Company has no material borrowings;
- the Company is in a position to meet all current and future expenses. If any of the sub-funds' expenses will exceed the TER in relation to operating the sub-funds, the Management Company will cover any shortfall from its own assets; and
- the Investment Manager consolidated its ETF strategy in 2021 as a provider of sustainable, thematic and Emerging Market strategies. The Investment Manager further invested in its ETF infrastructure, including the ETF offering with product launches focused on these strategies both in the equity and fixed income space.

Diversity report

The Board acknowledges the importance of diversity to enhance its operation. During the selection process for new Directors, the Board is committed to selecting those with diversity of age, gender and educational and professional background and candidates for appointment are selected based on these attributes. The Board's policy is that selection decisions are based on merit and objective criteria, that recruitment is fair and non-discriminatory and within this context promote diversity of gender, social and ethnic backgrounds, cognitive and personal strengths. The Board has not set specific targets in respect of diversity but acknowledges its importance and currently has female representation of 33%, 3 different nationalities and Directors with a wide variety of skills and experience.

Directors' Report (continued)

Diversity report (continued)

The objective of the Board Diversity and Inclusion Policy is to ensure diversity and inclusion is taken into consideration in the succession planning, selection, nomination, operation and evaluation of the Board.

The Board notes the diversity and inclusion policy of HSBC Group (the "Group"), which is focused on building a more diverse and inclusive workforce, regards diversity and inclusion as a critical component to developing a sustainable and successful business within the Group and is informed by the Group's deep roots in many geographical regions and its international approach. In particular, it is noted that the Group policy is particularly focused on:

- improving the diversity of its workforce;
- fostering open, inclusive and, where appropriate, challenging discussion; and
- leveraging diversity of thought.

The Board is conscious of its regulatory obligations in relation to Board composition. In considering Board diversity, the Board will also take into account the following non-exhaustive factors:

1. the obligation to have two Directors resident in Ireland on the Board;
2. the obligation for the Company to comply with the Central Bank's Fitness and Probity Regime;
3. the Board's existing arrangements with current Directors;
4. the nature, scale and complexity of the Company and its activities;
5. the obligation to act in the best interests of investors, including in relation to costs; and
6. market sentiment, which may favour the capture of a diverse range of perspectives, insights and challenge on a Board, so as to support good decision-making.

Taking into account the objectives of this Company's policy and the factors listed above, new appointments to the Board will be made on merit, taking account of the specific skills and experience, independence and knowledge needed to ensure a rounded Board and the diversity benefits that each candidate can bring to overall Board composition.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare Financial Statements for each financial year. Under that law the Directors have elected to prepare the Financial Statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Under Company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its change in net assets attributable to holders of Redeemable Participating Shares for that financial year. In preparing the Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the EU;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

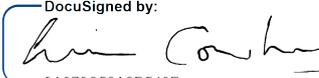

Directors' Report (continued)

Statement of Directors' Responsibilities (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that the Financial Statements comply with the Companies Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They are responsible for such internal controls as they determine is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to the Depository for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The Directors are also responsible for preparing a Directors' report that complies with the requirements of the Companies Act. The Companies Act require Directors to ensure that the annual report and Financial Statements, taken as a whole, are fair, balanced, understandable and provide the information necessary to assess the Company's performance and strategy. The audit committee of the Board considers whether the annual report and Financial Statements fulfill these requirements and advises the Board accordingly. As a result, the Directors have concluded that the annual report and Financial Statements for the financial year ended 31 December 2021, taken as a whole, are fair, balanced and understandable and provide the information necessary for Shareholders to assess the Company's position and performance, business model and strategy.

Investment Manager's Report

for the year ended 31 December 2022

Market Commentary

Global equities had a challenging start to the year, as inflation, the resulting interest rate hikes and Russia's invasion of Ukraine weighed on investor sentiment. Government bond yields rose sharply while corporate bonds underperformed, with spreads widening over the quarter. Commodities rallied strongly in the first quarter, driven by energy prices, as investors grew concerned over supply issues, amongst other potential impacts arising from the Russian invasion of Ukraine. This further exacerbated concerns over already existing inflationary pressures going into 2022. Elsewhere, lockdowns in China, also weighed on investor sentiment in the region.

Global equities continued to struggle in the second quarter of the year, as the impact of inflation and the expectations of higher rates dampened consumer sentiment and economic activity across most regions. Major central banks continued their hawkish rhetoric, with the US Federal Reserve (the "Fed") and Bank of England hiking rates on the back of record high inflation readings. Meanwhile, the European Central Bank (the "ECB") also signalled its intentions to increase rates and end its asset purchase programme. In the fixed income world, government bond yields increased. Emerging market bonds were particularly hit as a strengthening US dollar also created additional headwinds late in the period. Corporate bonds were down, with spreads broadly widening. Commodities were mixed, with energy leading the way for the second consecutive quarter, while other major components fell.

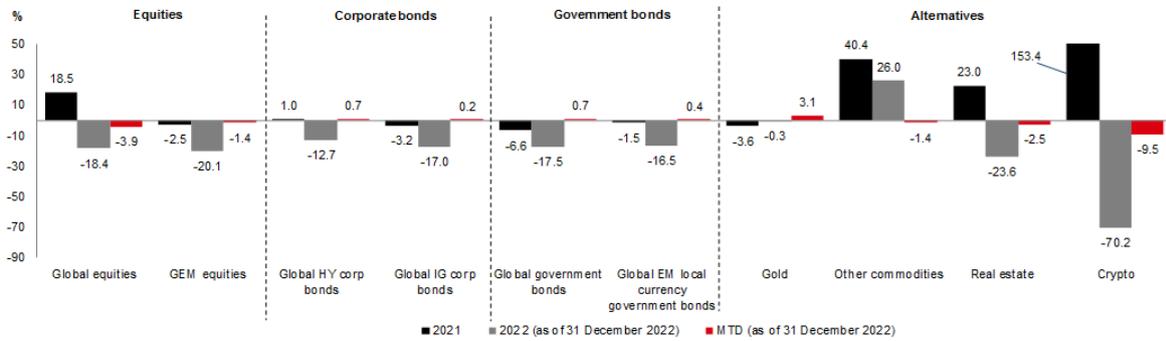

Global equities showed signs of recovery early in the third quarter but ended the quarter in negative territory. With the aim of curbing still high inflation, most major central banks continued to hike interest rates. Investor sentiment was further dampened on the back of a possible recession as global growth showed signs of a slowdown, coupled with continued geopolitical uncertainties, with the Russia-Ukraine crisis seeing no sight of resolution. On the fixed income side, both government and corporate bonds were down over the quarter. UK fixed income markets were particularly volatile as the newly elected prime minister released a mini budget which was received poorly by the markets. Additionally, Sterling also fell sharply. Commodities moved lower, driven by weakness in energy and industrial and precious metals.

Equities recovered in the fourth quarter as inflation and economic activity across major economies showed signs of cooling and investors expected central banks to slow down their pace of policy tightening. Both the ECB and Fed pared down their rate hikes in December and indicated that policy would continue to tighten given the economic backdrop. Investor sentiment was buoyed by China's relaxation of COVID-19 policies and support package announced for its struggling real estate sector. In the fixed income world, yields were broadly mixed through the quarter, but witnessed some easing early on in the period, while increasing in December as investors digested relatively softer inflation data. Corporate bonds saw positive returns and tighter spreads, as investors priced in a more moderate pace of rate hikes on the back of slowing inflation. UK Gilts and corporate bonds were up over the quarter, as investor sentiment recovered from the turbulence caused by former prime minister Liz Truss's 'mini budget'. Elsewhere, the Bank of Japan surprised markets by widening its yield curve control band by 25 basis points in its meeting in December, leaving markets uncertain about the future of its ultra-loose monetary policy. Commodities were up in the fourth quarter, driven by higher prices, while the US dollar weakened.

for the year ended 31 December 2022

Tracking Error

A realised tracking error is an annualised standard deviation of the difference in daily returns between a sub-fund and its benchmark index. The tracking error shows the consistency of returns relative to the benchmark index over a defined financial period of time.

An anticipated tracking error is based on the expected volatility of differences between the returns of a sub-fund and the returns of its benchmark index.

For physically replicating sub-funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights presented in the benchmark index.

For non-replicating sub-funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The aim is to generate a return which is as close as practicable to the total return of the index net of transaction costs and gross of fees and other costs.

The primary drivers represent where the impact makes a material difference to the sub-fund's performance to deviate from the underlying index. The primary drivers impacting tracking difference include withholding tax, accrued capital gains tax, securities lending, transaction costs from rebalancing, holding a proxy future, as a result of HSBC Group policy to exclude banned weapon stocks, sampling techniques and holding ADR and GDRs. These impacts can be either positive or negative depending on the underlying circumstances.

The table below and the relevant footnotes indicate the primary drivers impacting tracking difference gross of the total expense ratio and where realised tracking difference is greater than the anticipated tracking error.

.

E: Active Quant Management Style. Exposure to styles contributed significantly to performance and within alpha styles, our exposure to the value factor, which was well protected in the hawkish and inflationary environment in 2022, contributed the most to performance. Our exposures to the industry momentum and quality factors also contributed to performance while our exposures to size and low risk weighed on performance.

(2) sub-funds with less than 3 year performance are reported since inception.

Tracking differential and tracking error are different calculations. Tracking differential is simply the compound differential between the fund return and the index return. Ex-post tracking error is calculated as the annualised standard deviation of the daily arithmetic difference between the sub-fund's return and the index' return.

^{^^}The share class was launched on 13 July 2022. As a result, YTD performance rate is not available.

^{^*}The gross percentage is calculated on a daily basis by dividing the latest daily NAV against its most recent daily NAV and the resulting answer is then deducted by one. The resulting answer is multiplied by the corresponding daily change in the index to arrive at the daily gross return percentage. The accumulation of all the daily return percentages gives the yearly gross performance percentage. The performance percentages disclosed are not deemed to be directly reconcilable to the Financial Statements. Also it allows the users to understand the relevance and reliability of the amounts quoted.

^{^^*}Calculation of tracking error is explained in detail on page 32.

During the course of the year, regulation around sustainability-related disclosures continued to evolve, through the SFDR and the EU Taxonomy Regulation and their associated regulatory technical standards and available guidance. Additional disclosure requirements under SFDR Level 2 are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the sub-funds can be found in the Other Additional Disclosures of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the Other Additional Disclosures of this report should consequently be read and understood in light of these continuing challenges. With the assistance of the Management Company and the Investment Manager, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Annual Depository Report to the Shareholders

Re: HSBC ETFs plc (the "Company")

We, HSBC Continental Europe, Ireland, appointed Depository to HSBC ETFs plc (the "Company") provide this report solely in favour of the Shareholders of the Company for the year ended 31 December 2022 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations - European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depository obligation as provided for under the Regulations, we have enquired into the conduct of the Company for the Accounting Period, and we hereby report thereon to the Shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

Yours sincerely,

**For and on behalf of
HSBC Continental Europe, Ireland**

Ireland

HSBC Continental Europe
1 Grand Canal Square, Grand Canal Harbour, Dublin 2, D02 P820, Ireland
Tel: +353-1-635-6000 Website: www.hsbc.ie

HSBC Continental Europe has a registered branch in Ireland (registration number 908966) having its registered office at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, D02 P820 and is regulated and supervised by the Central Bank of Ireland as a depository for Irish authorised investment funds and otherwise regulated by the Central Bank of Ireland for conduct of business rules. HSBC Continental Europe is a company incorporated under the laws of France as a société anonyme (registered number 775 670 284 RCS Paris), having its registered office at 38 Avenue Kléber, 75116 Paris, France. HSBC Continental Europe is supervised by the European Central Bank, as part of the Single Supervisory Mechanism, the French Prudential Supervisory and Resolution Authority (l'Autorité de Contrôle Prudentiel et de Résolution) as the French National Competent Authority and the French Financial Markets Authority (l'Autorité des Marchés Financiers) for the activities carried out over financial instruments or in financial markets

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC

Report on the audit of the Financial Statements

Opinion

We have audited the Financial Statements of HSBC ETFs plc (the "Company") for the year ended 31 December 2022, which comprise the Statement of Financial Position, Statement of Comprehensive income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flow, and related notes, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards ("IFRS") as adopted by the European Union.

In our opinion:

- the Financial Statements give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2022 and of its decrease in net assets attributable to holders of redeemable participating shares for the year then ended;
- the Financial Statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the Financial Statements have been properly prepared in accordance with the requirement of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities section of our report. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were appointed as auditor by the directors on 6 November 2015. The period of total uninterrupted engagement is the eight years ended 31 December 2022. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with, ethical requirements applicable in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority ("IAASA") as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

Conclusions relating to going concern

In auditing the Financial Statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the Financial Statements is appropriate.

Our evaluation of the directors' assessment of the entity's ability to continue to adopt the going concern basis of accounting included our knowledge of the Company and the asset management industry to identify the inherent risks to the Company's business model and analysing how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the Company's available financial resources over this period related to the Investment Manager's intention to continue to manage the portfolio, the Directors' assessment of the operational resilience of the Company, and the valuation of financial assets including market volatility, interest rate and currency risks, and counterparty risks.

We also considered less predictable but realistic second order impacts that could affect the Company such as implications of the conflict between Russia and Ukraine.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC (continued)

We considered whether the going concern disclosure in the Financial Statements gives an appropriate description of the directors' assessment of going concern, including the identified risks and dependencies.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the Financial Statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the Financial Statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the Directors. In addition, our risk assessment procedures included:

- Inquiring with the directors and other management as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of the directors and the audit committee, as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of the directors and the audit committee regarding their assessment of the risk that the Financial Statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board and audit committee minutes.
- Performing planning analytical procedures to identify any usual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the Company is subject to laws and regulations that directly affect the Financial Statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related Financial Statement's items, including assessing the Financial Statement's disclosures and agreeing them to supporting documentation when necessary.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the Financial Statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 and certain aspects of company legislation recognising the financial and regulated nature of the Company's activities.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC (continued)

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management's override of controls. On this audit we do not believe there is a fraud risk related to revenue recognition. In response to the fraud risks, we also performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation.
- Assessing the disclosures in the financial statements.

As the Company is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the Company operates and gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the Financial Statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the Financial Statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the Financial Statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In arriving at our audit opinion above, there was one key audit matter as follows (unchanged from 2021):

Accuracy, valuation and ownership of financial assets at fair value through profit or loss USD 18.1 billion (2021: USD 19.4 billion).

Refer to note 2 of the Financial Statements (Significant accounting policies) and note 4 (Financial instruments and associated risk).

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC (continued)

The key audit matter

The Company's financial assets make up 99.02% (2021: 98.94%) of the net asset value ("NAV") and are considered to be the key driver of the Company's results. While the nature of the Company's financial assets do not require a significant level of judgement because they comprise mainly of liquid, quoted investments, due to their significance in the context of the Financial Statements as a whole, the accuracy valuation and ownership of the calculation of financial assets at fair value through profit or loss was identified as the matter which had the greatest effect on our overall audit strategy and allocation of resources in planning and completing our audit.

How the matter was addressed in our audit

Our procedures included but were not limited to:

- Documenting the process in place to value the portfolio of investments;
- With the assistance of our valuation specialists, agreeing the valuation of 99.99% of the financial asset portfolio to prices published by independent pricing sources; and
- Obtaining independent external confirmation of all positions held in the investment portfolio from the depositary/broker and reconciling them to the Company's records.

No material misstatements were identified by our audit procedures over the accuracy, valuation and ownership of the calculation of financial assets at fair value through profit or loss.

Our application of materiality and an overview of the scope of our audit

Materiality for the Financial Statements as a whole was set at USD 91 million (2021: USD 98 million), determined with reference to a benchmark of the Company's NAV, of which it represents 50 basis points as at 31 December 2022 (2021: 50 basis points).

We have selected NAV as the most appropriate benchmark given the circumstances and nature of the Company's business as an investment fund. In determining the percentage to be applied to the benchmark, we considered a number of factors, i.e. concentration of ownership and stability of the business environment in which the Company operates. In line with our audit methodology, our procedures on individual account balances and disclosures were performed to a lower threshold, performance materiality, so as to reduce to an acceptable level the risk that individually immaterial individual account balances add up to a material amount across the financial statements as a whole.

Performance materiality for the Financial Statements as a whole was set at USD 68 million (2021: USD 71 million), determined with reference to a benchmark of the Company's NAV, of which it represents 75% of materiality (2021: 75%). We determined 75% was an appropriate level for performance materiality because in our judgement a normal level of aggregation risk is present.

We reported to the audit committee and Board of Directors any corrected or uncorrected identified misstatements exceeding USD 4.5 million (2021: USD 4.9 million), in addition to other identified misstatements that warranted reporting on qualitative grounds.

We applied materiality and performance materiality to assist us to determine what risks were significant risks and the procedures to be performed.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin.

Other information

The Directors are responsible for the other information presented in the Annual Report together with the Financial Statements. The other information comprises the information included in the General Information, HSBC Global Asset Management Shariah Committee, Directors' report, Investment Manager's Report, Annual Depositary Report to the Shareholders, Portfolio Changes (unaudited), Other Additional Disclosures (unaudited) and Appendix - SFDR Disclosures.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC (continued)

The Financial Statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the Financial Statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our Financial Statements' audit work, the information therein is materially misstated or inconsistent with the Financial Statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;
- in our opinion, the information given in the directors' report is consistent with the Financial Statements;
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

Corporate governance statement

In addition, we report, in relation to information given in the Corporate Governance Statement on page 18, that:

- based on knowledge and understanding of the Company and its environment obtained in the course of our audit, no material misstatements in the information identified above have come to our attention; and
- based on the work undertaken in the course of our audit, in our opinion:
 - the description of the main features of the internal control and risk management systems in relation to the process for preparing the Financial Statements is consistent with the Financial Statements and has been prepared in accordance with the Companies Act 2014;
 - information relating to voting rights and other matters required by the European Communities (Takeover Bids (Directive 2004/EC)) Regulations 2006 and specified for our consideration, is consistent with the financial statements and has been prepared in accordance with the Act;
 - the Corporate Governance Statement contains the information required by the Companies Act 2014; and
 - the Directors' report contains the information required by the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017.

Our opinions on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the Financial Statements to be readily and properly audited and the Financial Statements are in agreement with the accounting records.

We have nothing to report on other matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF HSBC ETFs PLC (continued)

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 28, the directors are responsible for: the preparation of the Financial Statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's Shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's Shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's Shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

for the year ended 31 December 2022

1. Reporting entity

HSBC ETFs plc (the “Company”) was incorporated in Ireland, as an open-ended investment company with variable capital and segregated liability between sub-funds on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the “UCITS Regulations 2011”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”), (together the “UCITS Regulations”).

The Company has been structured as an umbrella fund with segregated liability between sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolio of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the Prospectus and the relevant supplement of the Prospectus (the “Supplement”).

The objective of the Company is the collective investment in transferable securities and other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

As at 31 December 2022, the Company has 50 sub-funds in operation (31 December 2021: 41).

The Company has 5 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI SOUTH AFRICA CAPPED UCITS ETF was closed on 21 April 2022 and was delisted from London Stock Exchange on 26 April 2022. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI MALAYSIA UCITS ETF was closed on 7 December 2022 and was delisted from London Stock Exchange on 12 December 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia’s invasion of Ukraine. The sub-fund was closed on 24 March 2023 and was delisted from London Stock Exchange on 29 March 2023.

HSBC MSCI SAUDI ARABIA 20/35 CAPPED UCITS ETF was revoked by the Central Bank on 8 December 2021.

The Company appointed HSBC Investment Funds (Luxembourg) S.A. as Management Company and HSBC Investment Funds (Luxembourg) S.A. appointed HSBC Global Asset Management (UK) Limited to act as Investment Manager for all of the sub-funds.

2. Significant accounting policies

(a) Basis of accounting

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted for use in the European Union, and applied in accordance with the Companies Act 2014 and the UCITS Regulations.

The comparative figures included in the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flows relate to the balances at and for the year ended 31 December 2021.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(b) Basis of measurement

The Financial Statements have been prepared on a going concern basis, applying the historical cost convention, except for the non-derivative financial instruments valued at fair value through profit or loss and derivative financial instruments which have been valued at fair value through profit or loss.

HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI SOUTH AFRICA CAPPED UCITS ETF was closed on 21 April 2022 and was delisted from London Stock Exchange on 26 April 2022. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI MALAYSIA UCITS ETF was closed on 7 December 2022 and was delisted from London Stock Exchange on 12 December 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia's invasion of Ukraine. The sub-fund was closed on 24 March 2023 and was delisted from London Stock Exchange on 29 March 2023. As a result, the Russian assets of all sub-funds have been written down to zero. The Financial Statements of these five sub-funds have been prepared on non-going concern basis.

HSBC MSCI SAUDI ARABIA 20/35 CAPPED UCITS ETF was revoked by the Central Bank on 8 December 2021.

(c) Functional and presentation currency

(i) Functional and presentation currency of the Company

Items included in the Financial Statements are measured using the primary economic environment in which the Company operates. This is the US Dollars, which is the currency of the primary economic environment in which it operates (the "functional currency"). The Company's presentation currency is the same as its functional currency.

(ii) Functional and presentation currency of the sub-funds

Functional currency is the currency of the primary economic environment in which the sub-funds operate. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The majority of each sub-fund's investments and transactions are denominated in one of the following: Euro, US Dollar, Pound Sterling or Hong Kong Dollar. Similarly, subscriptions and redemptions are determined based on the net asset value, and received and paid in Euro, US Dollar, Pound Sterling or Hong Kong Dollar. The functional currency of the sub-funds, which is in each case is the Euro, US Dollar, Pound Sterling or Hong Kong Dollar, is shown in the Statement of Financial Position of each sub-fund. The Company has also adopted these functional currencies as the presentation currency of each sub-fund.

(iii) Translation and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the Statement of Financial Position date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(c) Functional and presentation currency (continued)

(iii) Translation and balances (continued)

Foreign exchange gains and losses relating to the financial assets and liabilities carried at fair value through profit or loss are presented in the Statement of Comprehensive Income within net gain/(loss) on financial assets and liabilities at fair value through profit or loss and foreign exchange.

(iv) Presentational translation

For the purpose of presenting the Financial Statements of the Company:

- the Statement of Financial Position of the sub-funds with functional currencies other than US Dollar were translated to US Dollars at the exchange rate ruling at 31 December 2022; and
- the Statement of Comprehensive Income, proceeds from Redeemable Participating Shares issued, redemptions of Redeemable Participating Shares, equalisation and Statement of Cash Flows of the sub-funds with functional currencies other than US Dollar were translated at the US Dollar average monthly rates where those rates represent a reasonable approximation of actual rates.

The translation method resulted in a foreign currency translation amount of USD (121,317,310) (31 December 2021: USD (52,284,527) due to the use of average rates as referred to above and the movement of closing exchange rates between 31 December 2022 and 31 December 2021. This has no impact on the net asset value per share of each of the sub-funds.

(d) Judgement and estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU, requires the Board to make judgements, estimates and assumptions which affects the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the financial period in which the estimates are revised and in any future periods affected.

Judgements

The Company has concluded that there are no significant judgements within the Financial Statements. Information about judgements made in applying accounting policies that have effects on the amounts recognised in the Financial Statements is included in Note 2 (c i and ii).

Assumptions and estimation uncertainties

The determination of what constitutes an active market and what inputs are “observable” requires judgment by the Directors. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 31 December 2022 and 31 December 2021 is included in Note 4 (d).

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(e) New standards, amendments and interpretations effective from 1 January 2022

New or amended standards	Impact on Financial Statements
Onerous Contracts - Cost of Fulfilling a Contract (Amendments to IAS 37)	The application of the Amendment resulted in no significant changes to the Company's Financial Statements.
Reference to the Conceptual Framework with amendments to IFRS 3 'Business Combinations'	The application of the Amendment resulted in no significant changes to the Company's Financial Statements.

(f) New standards, amendments and interpretations effective for future reporting financial periods that have not been early adopted

A number of new standards are effective for annual periods beginning after 1 January 2023 and earlier application is permitted, however the Company has not adopted the new or amended standards early in preparing these Financial Statements.

The following amended standards and interpretations are not expected to have a significant impact on the Company's Financial Statements:

- IFRS 17 Insurance Contracts - effective 1 January 2023;
- Classification of Liabilities as Current or Non-current - Amendments to IAS 1 - effective 1 January 2024;
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28 - no effective date yet;
- Definition of Accounting Estimates (Amendments to IAS 8) - effective 1 January 2023;
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) – effective 1 January 2023;
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to IAS 12 - effective 1 January 2023.

(g) Financial assets and liabilities at fair value through profit or loss

(i) Classification and measurement of financial assets and financial liabilities

On initial recognition the Company classifies financial assets as measured at amortised cost or fair value through profit or loss ("FVTPL").

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(g) Financial assets and liabilities at fair value through profit or loss (continued)

Business model assessment:

In making an assessment of the objective of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the Investment Manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

The Company has determined that it has two business models:

- Held-to-collect business model: this includes cash and cash equivalents, due from brokers, due from shareholders, dividend receivable, interest receivable and other receivables. These financial assets are held to collect contractual cash flow; and
- Other business model: this includes transferable securities and financial derivative instruments. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

None of the Company's assets qualify for measurement at fair value through other comprehensive income.

Financial instruments such as cash and cash equivalents, due to/from broker and other short-term receivables and payables are measured at amortised cost. All other assets of the Company are debt securities, equity investments and derivatives, and required to be measured at FVTPL.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(g) Financial assets and liabilities at fair value through profit or loss (continued)

(i) Classification and measurement of financial assets and financial liabilities (continued)

Purchases and sales of investments are recognised on the trade date - the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at FVTPL are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

Subsequent measurement

Financial assets at FVTPL are subsequently measured at fair value and financial assets at amortised cost are subsequently measured at amortised cost using the effective interest method.

Financial Liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

(ii) Impairment of financial assets

The Company assesses on a forward-looking basis the expected credit loss ("ECL") associated with its financial assets carried at amortised cost. Significantly, all of the Company's financial assets measured at amortised cost are short term assets. Therefore, as the term length of these assets is less than one year, the Company in effect measures loss allowances based on their lifetime ECLs. When estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort, such as counterparty credit ratings.

Write off

The gross carrying amount of financial assets is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

Amortised Cost Measurement

The 'amortised cost' of a financial instrument is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter financial period) to the carrying amount of the financial asset or liability.

When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(g) Financial assets and liabilities at fair value through profit or loss (continued)

(iii) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire or it transfers the rights to receive contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risk and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the profit or loss. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired.

(iv) Fair value measurement principles

Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments where quoted in an active market is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. The Company utilises the last traded market price for both financial assets and financial liabilities where the bid-ask spread is narrow.

If an active quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the Statement of Financial Position date applicable to an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the Statement of Financial Position date.

(v) Offsetting of financial assets and liabilities

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where the Company currently has a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liabilities simultaneously. Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(h) Cash and cash equivalents

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value and are used by the Company in management of short-term commitments, other than cash collateral provided in respect of derivatives. As at 31 December 2022 and at 31 December 2021, all cash and overdraft balances are held with HSBC Bank plc. Details of overdraft facility are disclosed in Note 7.

(i) Due from/to brokers

Amounts due to/from brokers relate to margin cash and cash collateral which is held by or due to brokers for open futures contracts and represents the exchange traded futures contracts' margin deposits held with brokers. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is restricted and reported separately to the unrestricted cash on the sub-funds' Statement of Financial Position.

Broker cash balances (restricted cash) held with HSBC Bank plc at 31 December 2022 amounted to USD 28,906,682 (31 December 2021: USD 28,720,484). None of these balances were withdrawable. Broker cash balances relate to balances due to/from brokers with respect to open futures contracts.

(j) Payables for securities purchased/receivables for securities sold

Payables for securities purchased and receivables for securities sold represent purchases and sales that have been contracted for but not yet delivered by the end of the financial period. These accounts are measured at amortised cost and presented in the Statement of Financial Position as part of other assets and other liabilities.

(k) Other assets and other liabilities

In the Statement of Financial Position, receivables for securities sold, due from shareholders, dividend receivable, interest receivable and any other miscellaneous receivable amounts are included in other assets figure. Other liabilities figure in the Statement of Financial Position is consisted of payables for securities purchased, due to shareholders, management fee payable and other miscellaneous payable amounts.

(l) Income

Interest income is shown gross of any non-recoverable withholding taxes and is disclosed under "Net gain on financial assets and liabilities at fair value through profit or loss and foreign exchange" in the Statement of Comprehensive Income.

Interest income is recognised in the Statement of Comprehensive Income for all instruments and financial assets at amortised cost using the effective interest method.

Dividend income on financial assets at FVTPL is credited to the Statement of Comprehensive Income on the date on which the relevant securities are listed as "ex-dividend". Dividend income, which is disclosed separately in the Statements of Comprehensive Income, is shown gross of any non-recoverable withholding taxes.

Stock lending commission income from securities lending transactions is recognised in the Statement of Comprehensive Income under other income.

(m) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis and as the related services are performed.

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(n) Dividend Distributions

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as finance costs when declared (i.e. the decision has been through the final required approval stage and cannot be reversed).

(o) Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund's net asset value.

(p) Withholding Tax Expense

The Company may be liable to taxes (including withholding taxes) in countries other than Ireland on dividend, interest income earned and capital gains arising on its investments. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as tax expense. The Company may not be able to benefit from a reduction in the rate of such foreign tax by virtue of the double taxation treaties between Ireland and other countries. The amount of tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to withholding taxes. The Company may not, therefore, be able to reclaim any foreign withholding tax suffered by it in particular countries.

(q) Capital Gains Tax

Realised and unrealised gains on disposals of assets of the Company may be subject to capital gains tax imposed by an assets' country of origin. Tax on such realised and unrealised gains is recognised as a tax expense in the Statement of Comprehensive Income.

(r) Income tax expense

Interpretation 23 – Uncertainty over Income Tax Treatments

The IFRS Interpretations Committee (“IFRIC”) published a new interpretation IFRIC 23 ‘Uncertainty over Income Tax Treatments’, specifying how entities should reflect uncertainty in accounting for income taxes. IFRIC 23 addresses the previous lack of guidance in IAS 12 ‘Income Taxes’, which specifies how to account for current and deferred tax, but not how to reflect the effects of uncertainty. The Management Company evaluated the effect of IFRIC 23 and deemed that it did not have a significant impact on the Financial Statements since substantially all of the Company's financial instruments are, in the opinion of the Management Company, not subject to material uncertain tax treatment.

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. As such, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares.

No Irish tax will arise on the Company regarding chargeable events.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

2. Significant accounting policies (continued)

(r) Income tax expense (continued)

Interpretation 23 – Uncertainty over Income Tax Treatments (continued)

A Chargeable Event does not include:

- (i) any transaction in relation to Shares held in a recognised clearing system;
- (ii) any exchange by a Shareholder effected by way of a bargain made at arm's length by the Company, of Shares in the Company for other Shares in the Company;
- (iii) certain transfers of Shares between spouses or civil partners and former spouses or former civil partners;
- (iv) an exchange of Shares arising on a qualifying amalgamation or reconstruction of the Company with another Irish investment undertaking; or
- (v) the cancellation of Shares in the Company arising from an exchange in relation to a scheme of amalgamation.

Income, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

(s) Equalisation

Equalisation is operated in connection with the issue and redemption of shares. It represents the income element included in the price for the issue and redemption of shares. Equalisation arrangements are intended to ensure that the income per share is not affected by changes in the number of shares in issue during the financial period.

The buying/selling price of each share contains an amount called equalisation. This is equivalent to the net income less expenses accrued in the Company at the time of purchase/sale. For distributing sub-funds, equalisation attributable to subscriptions in the sub-funds form part of the distributions to those shareholders who subscribed to the sub-funds during the distribution period. The equalisation element of the distributions is not reported to shareholders separately from the net income distributed. The equalisation attributable to redemptions from the respective sub-funds, if any, is disclosed in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

(t) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs include fees and commissions paid to brokers and counterparties. Transaction costs are expensed on an accrual basis and are recorded in the Statement of Comprehensive Income as part of other expenses. Transaction costs incurred during the financial period by each sub-fund are detailed in Note 3(e).

(u) Securities lending

Securities which are lent out as part of the securities lending agreement continue to be recognised as financial assets and liabilities in the balance sheet. Securities lending constitutes temporary transfer of ownership and would not have any impact on the sub-funds holdings in the Statement of Financial Position when securities are lent. Further information on securities lending and the breakdown of this amount is detailed in Note 8 to the Financial Statements.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

3. Fees and expenses

(a) Management fee

The Company has a fee structure where, in respect of each of the sub-funds, all of the fees and expenses (except for transaction costs and taxes or duty charges for portfolio re-balancing that are paid separately out of the assets of the relevant sub-funds) are paid as one single fee. This is referred to as the "Total Expense Ratio" or "TER" in the Prospectus and is being disclosed in these Financial Statements as the "Management fee".

The Management fee is paid to the Management Company, and the Management Company is then responsible for the payment of all other operational expenses of the Company. This includes, but is not limited to, fees and expenses of the Directors, the Management Company, Investment Manager, distributors, the Depositary, the Administrator, the Registrar and Transfer Agent, the Auditors, the Secretary and such other person as the Management Company may determine at its discretion, and the operating administrative and services expenses as referred to below.

The Management fee covers all of the fees and expenses, except transaction charges and taxes or duty charges for portfolio re-balancing (which are classified as "other expenses" in the Statement of Comprehensive Income), all of which will be paid separately out of the assets of the relevant sub-fund.

The following list is indicative but not exhaustive of the types of services that the Management fee covers:

- (i) all establishment costs of the Company;
- (ii) the cost of listing and maintaining a listing of shares on any stock exchange;
- (iii) registration fees;
- (iv) financial index licencing fees;
- (v) the cost of convening and holding Directors' and shareholders' meetings;
- (vi) professional fees and expenses for legal, auditing and other consulting services;
- (vii) the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and semi-annual reports and other documents to current and prospective shareholders;
- (viii) the costs and expenses of any investment adviser appointed by the Investment Manager;
- (ix) for currency hedged classes, fees to third parties to cover the execution of the share class currency hedging policy. An additional fee for this service will apply to currency hedged classes as detailed in the relevant sub-fund's Supplement; and
- (x) such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any sub-fund.
- (xi) interest on the overdraft facility as per note 7.

The Management fee is calculated and accrued daily at a rate ranging from 0.05% to 0.60% from the net asset value (Total Expense Ratio section) of each sub-fund and payable monthly in arrears. The Management fee for each sub-fund is decided based on, among other things, its investment strategy and return potential. Management fee of each sub-fund of the Company is listed in the relevant sub-fund's Supplement.

If any of the sub-funds' expenses exceeded the Management fee outlined above in relation to operating the funds, the Management Company will cover any shortfall from its own assets.

The Management fee is not expected to exceed the amounts disclosed above. However, the Directors are of the view that if an increase in a sub-fund's Management fee is required, that decision will require prior approval by shareholders of the relevant sub-fund, which must be approved by a majority vote at a meeting of shareholders or by written resolution of all shareholders.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

3. Fees and expenses (continued)

(a) Management fee (continued)

The Management fee for the financial year amounted to USD 30,375,637 (31 December 2021: USD 29,815,971) of which USD 2,686,486 (31 December 2021: USD 3,775,847) was payable at the financial year end.

(b) Administrator's and Depositary's Fees

The Management Company is responsible for the payment to the Administrator and Depositary out of the Management fee, an annual fee, payable monthly in arrears at a rate ranging from 0.50 basis points to 3.25 basis points of the net monthly average assets of the sub-funds, subject to a minimum flat annual fee of EUR 1,070,000. The Administrator's and Depositary's fee payable by the Management Company out of the Management fee for the financial year ended 31 December 2022 is USD 5,778,699 (31 December 2021: USD 5,489,935) of which USD 987,445 (31 December 2021: USD 2,022,057) is payable at 31 December 2022.

(c) Directors' fees and expenses

The maximum amount of each Director's fees is Euro 50,000 per annum per Director and will not exceed that amount without the approval of the Board (with each Director abstaining on any resolution relating to their own remuneration).

The Directors' fees which are paid out of Management fee for the financial year ended 31 December 2022 amounted to USD 131,444 (31 December 2021: USD 119,809). The Directors' out of pocket expenses for the financial year ended 31 December 2022 was USD 712 (31 December 2021: USD Nil).

(d) Auditor's fees

Fees for the statutory auditors, KPMG Ireland, in respect of the financial year 31 December 2022, relate entirely to the audit of the Financial Statements of the Company. Auditors' fees for the financial year end amounted to USD 288,682 (31 December 2021: USD 203,524) excluding VAT. The Auditors out of pocket expenses excluding VAT for the year end amounted to USD 6,387 (31 December 2021: USD 5,928). All payments for the statutory auditor are met from the TER charge detailed above and levied by the Management Company.

(e) Transaction costs

The table below provides an analysis of the total transaction costs on the purchase and sale of transferable securities such as equities and derivative instruments for each of the Company's sub-funds. For the year ended 31 December 2022 and 31 December 2021.

(f) Dividend Purification

The Shariah Committee has issued guidelines to quantify the annual amount of income of the Company that should be donated to charity, being derived from companies eligible for investment pursuant to the investment objective, policy and restrictions set out in the Supplement for each sub-fund, but that are engaged in an activity or activities of a marginal nature which is or are proscribed by the Shariah Committee and which is not or are not screened out by the investment restrictions. Such amount will be calculated on an annual basis, based on the purification ratios, expressed as a percentage of each company's dividend. The purification ratios will be provided by the relevant index provider for each sub-fund, for all companies in which the sub-funds have invested. For companies, whose purification ratios are not provided by the index provider, purification ratios will be calculated based on the financial information of these companies received from the Investment Manager. Such income will be disbursed as a charitable donation to one or more worthy causes approved by the Shariah Committee.

For the year ended ended 31 December 2022, incurred dividend purification was EUR 18.61 in HSBC MSCI EUROPE ISLAMIC ESG UCITS ETF, USD 49.48 in HSBC MSCI USA ISLAMIC ESG UCITS ETF and USD 75.52. in HSBC MSCI WORLD ISLAMIC ESG UCITS ETF. As the amounts are negligible, they will be accrued and paid for the year ended 31 December 2023. The Shariah Committee will issue an annual Shariah compliance certificate for the Company for the year ended 31 December 2023.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments

The Company's investment activities expose it to a variety of financial risks: market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management process focuses on the unpredictability of financial markets and seeks to mitigate potential adverse effects on the Company's financial performance.

Certain of the Company's sub-funds will seek to replicate the performance of a financial index while minimising as far as possible the tracking error between the sub-funds' performance and that of the relevant financial index. Certain sub-funds will seek to achieve this objective by holding a portfolio of securities that constitute the respective financial index.

The securities in which certain of the sub-funds invest will be traded or dealt in on a regulated market (a multilateral system operated and/or managed by a market operator, which brings together or facilitates the bringing together of multiple third-party buying and selling interests in financial instruments in the system).

The sub-funds also have Derivative Instruments ("FDIs") for efficient portfolio management of its assets and for investment purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the sub-funds with an appropriate level of risk, taking into account the risk profile of the sub-funds and the general provisions of the UCITS Regulations. In particular, FDIs may be used for the purpose of minimising tracking error i.e. the risk that the sub-funds return varies from the respective benchmark financial index.

Changes to the composition and/or weighting of the securities constituting the financial index which is tracked by a sub-fund will ordinarily require that sub-fund to make corresponding adjustments or rebalancing to its investments in order to seek to track the financial index. The Investment Manager will accordingly seek to rebalance the composition and/or weighting of the securities held by a sub-fund from time to time to the extent practicable and possible to conform to changes in the composition and/or weighting of securities that constitute the respective financial index. Other re-balancing measures may be taken from time to time to seek to maintain the correspondence between the performance of a sub-fund and the performance of the financial index.

The Company uses the commitment approach to calculate the sub-funds' global exposure. The commitment approach is a methodology which aggregates the underlying market or notional values of derivatives to determine the exposure of the sub-fund to derivatives.

The Management Company employs a risk management process in respect of each sub-fund which enables it, together with the Investment Manager, to accurately measure, monitor and manage the various risks associated with FDI. A statement of this risk management process has been prepared and submitted to the Central Bank in accordance with the Central Bank requirements. Any FDI not included in the risk management process in respect of the Company will not be utilised until such time as a revised risk management process has been submitted to the Central Bank. The Management Company will, on request, provide supplementary information to shareholders relating to the risk management methods employed including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investment.

When using FDI as part of efficient portfolio management techniques and instruments, a relevant sub-fund may incur operational costs and such costs are paid by the relevant sub-fund to the counterparty with which the Company has entered into a relevant agreement. The Company ensures that all revenues arising from efficient portfolio management techniques, net of direct and indirect costs, are returned to the relevant sub-fund. The exposure obtained through efficient portfolio management and the identity of the counterparties are in Note 5.

The Company does not currently use total return swaps.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(a) Market risk

Market risk is the risk that changes in market prices such as interest rates, foreign exchange rates or equity and credit spreads will affect the sub-funds' income or the fair value of its holdings of financial instruments.

(i) Price risk

Price risk is the risk that the value of instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Company's financial instruments principally comprise equity investments. The Investment Manager attempts to mitigate this risk through the construction of a well-diversified portfolio in accordance with the respective sub-fund's investment objective. In accordance with the Company's policies and procedures, the Investment Manager monitors the Company's overall other price risk on a daily basis, and the Board reviews it on a quarterly basis.

The investment concentrations within the portfolio for each sub-fund are disclosed in the Schedule of Investments by investment type.

The below table provides an analysis of the effect on net assets and profit/(loss) of the respective sub-funds due to a change in market indices, with all other variables held constant.

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(i) Price risk (continued)

The majority of sub-funds employ an investment strategy of full replication of the respective underlying benchmark index, therefore a Beta of 1 was assumed in the calculation of the above sensitivity analysis. The methodology utilised above is based on historical data and cannot take account of the fact that future market price movement and correlations between markets in conditions of market stress may bear no relation to historical patterns. The only sub-funds that do not employ a full replication strategy are HSBC MSCI World UCITS ETF and HSBC MSCI Emerging Markets UCITS ETF, which both utilise an optimisation strategy instead, and HSBC Multi Factor Worldwide Equity UCITS ETF, which is actively managed and does not track a benchmark.

(ii) Currency risk

Currency risk is the risk that the fair value of a financial instrument as determined in a sub-fund's functional currency will fluctuate because of changes in foreign exchange rates. Each sub-fund may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, each sub-fund is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Company's assets or liabilities

To the extent that each sub-fund may invest in foreign currency-denominated securities, it may also invest in currency exchange rate agreements. The sub-funds may use such FDI's (which will be based only on underlying assets or sectors which are permitted under the investment policy of the sub-funds): (i) to hedge a currency exposure, (ii) as a substitute for taking a position in the underlying asset where the Investment Manager determines that an FDI exposure to the underlying asset represents better value than a direct exposure; (iii) to tailor each sub-fund's interest rate exposure to the Investment Manager's outlook for interest rates; and/or (iv) to gain an exposure to the composition and performance of a particular index (provided always that each sub-fund may not have an indirect exposure through an index to an instrument, issuer or currency to which it cannot have a direct exposure) which will improve the efficiency of the management of sub-funds.

The sub-funds may buy and sell foreign currency futures and may engage in foreign currency transactions either on a spot or forward basis, to reduce the risks of adverse market changes in exchange rates.

Monetary items are units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency. Monetary assets and liabilities included cash and cash equivalents, trade receivables and payables including due to/from brokers, and amounts due to/from brokers.

All assets and liabilities that do not meet the definition of monetary items are classified as non-monetary. Marketable equity investments are considered non-monetary assets. The sub-funds, in line with the securities comprising their underlying indices, are exposed to the currency risk of the respective reference index/strategy. The currency risk associated with equities is included in other price risk. Net assets attributable to holders of Redeemable Participating Shares are non-monetary.

As at 31 December 2022 and 31 December 2021, none of the sub-funds had any significant monetary assets or liabilities that are exposed to currency risk since majority of the monetary assets are in the denomination of the sub-funds' currency.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Notes to the Financial Statements (continued)
for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

The majority of the Company's financial assets and liabilities are non-interest bearing. Interest bearing financial assets and liabilities include cash at bank which matures or reprices in the short-term, no longer than 3 months.

As a result, the Company is subject to limited exposure to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates.

Only HSBC BLOOMBERG EUR SUSTAINABLE CORPORATE BOND UCITS ETF, HSBC BLOOMBERG USD SUSTAINABLE CORPORATE BOND UCITS ETF and HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF sub-funds held fixed income securities i.e. bonds as at year ended 31 December 2022 which are exposed to interest rate risk.

HSBC BLOOMBERG EUR SUSTAINABLE CORPORATE BOND UCITS ETF Fund as at 31 December 2022

	Interest bearing EUR	Non-interest bearing EUR	Total EUR
Assets			
Financial assets at fair value through profit or loss	34,235,580	600	34,236,180

Other liabilities	-	516,782	516,782
Liabilities	-	518,137	518,137
Interest sensitivity gap	34,349,503		

The following tables detail the effect on net assets should interest rates have increased/decreased by 75 basis points (bps) with all other variables remaining constant, assuming that a 75bps increase/decrease in the base interest rate would result in a correlating 75bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 75bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

Liabilities			
Financial liabilities at fair value through profit or loss	-	115,221	115,221
Other liabilities	-	4,442,159	4,442,159
Liabilities	-	4,557,380	4,557,380
Interest sensitivity gap	15,575,529		

The following tables detail the effect on net assets should interest rates have increased/decreased by 50 basis points (bps) with all other variables remaining constant, assuming that a 50bps increase/decrease in the base interest rate would result in a correlating 50bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 50bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the interest bearing assets of the sub-fund is of fixed rate nature and therefore interest income received would not be affected by the fluctuation of interest.

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(b) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk is generally higher when a non-exchange traded financial instrument is involved because the counterparty for non-exchange traded financial instruments is not backed by an exchange clearing house. Exchange clearing houses benefit both parties in a transaction as they bear most of the credit risk. If two individuals deal with one another, the buyer bears the credit risk of the seller, and vice versa. When an exchange clearing house is used, the credit risk that is held against both buyer and seller is passed on to the exchange clearing house.

Credit risk associated with investing activities is managed by the Investment Manager as part of the overall investment process. To reduce the Company's counterparty credit exposures, securities trading is primarily conducted on recognised exchanges and on a delivery-versus-payment basis. The risk of default is considered minimal, as delivery of securities on a settled trade is simultaneous with the Depository receiving payment. Payment is made on a purchase simultaneous with the securities being received by the Depository. The trade will fail if either party fails to meet its obligation.

The assets of the Company held by the Depository will be segregated from the assets of either the Depository or its agents or both. The Company is subject to credit risk to the extent that this institution may be unable to fulfil its obligations either to return the Company's securities or repay amounts owed. The Investment Manager does not anticipate any losses as a result of this concentration.

The ECL is not material and hence not included in the Statement of Comprehensive Income.

All of the cash of the Company held by the Depository is placed on deposit with an affiliate of the Depository, HSBC Bank plc with credit rating of AA- (31 December 2021: AA-) by Fitch and credit rating of A+ (31 December 2021: A+) by Standard and Poor's. The Company's future contracts and related collateral amounts were held with HSBC Bank plc. The Company's Contracts for Difference ("CFD") and related collateral amounts were held with Goldman Sachs rated as A by Fitch and BBB+ by Standard and Poor's as at 31 December 2021. No CFDs held in the sub-funds as at 31 December 2022. These institutions are highly rated by prominent credit rating agencies.

The Company will rank as a general creditor in the event of bankruptcy or insolvency of HSBC Bank plc. Cash held by HSBC Bank plc is not held in a segregated client account. HSBC Bank plc complies with the FSA capital requirements in the event of insolvency of HSBC Bank plc.

The Company's credit risk exposure is represented by the carrying amounts of cash at bank and due from or to brokers as disclosed on the Statement of Financial Position on the respective pages of each sub-fund. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating.

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to daily cash redemptions of Redeemable Participating Shares and monitors this activity to ensure that funds are available to meet the redemption requirements.

The Company's investments are considered to be readily realisable as they are all traded on regulated markets. The Company has therefore limited exposure to liquidity risk.

The Company's financial instruments also comprise investments in derivative contracts traded over-the-counter, which are not traded in an organised public market and which generally may be illiquid. As a result, the Company may not be able to liquidate quickly some of its investments in these instruments at an amount close to its fair value in order to meet its liquidity requirements, or to respond to specific events such as a deterioration in the credit worthiness of any particular issuer. This risk is mitigated by restricting the exposure to any particular instrument.

The Company has also obtained overdraft facilities in order to manage its short term liquidity requirements. Details of the Company's overdraft facility are outlined in Note 7.

In accordance with the Company's policies and procedures in place and ESMA's guidelines on liquidity stress testing in UCITS and alternative investment funds, the Investment Manager monitors the Company's overall liquidity risk on at least a monthly basis, and the Board reviews it on a quarterly basis.

Substantially all of the Company's financial liabilities included in the Statement of Financial Position at 31 December 2022 and 31 December 2021 on the respective pages of each sub-fund, are payable within one month.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities

IFRS 13 requires disclosures of financial instruments measured at fair value to be based on a three-level fair value hierarchy that reflects the significance of the inputs in such fair value measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
Level 2	Inputs other than unadjusted quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
Level 3	This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires judgement by the Directors.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors.

The Directors consider observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Directors' perceived risk of that instrument.

Transferable securities

Transferable securities with values based on quoted market prices in active markets are classified within Level 1. These include active listed equities and debt securities. Transferable securities that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. Transferable securities classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 investments in equity securities are disclosed in Note 4(d).

Derivative instruments

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as contracts for difference and futures contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

Notes to the Financial Statements (continued)
for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

The financial instruments as at 31 December 2022 and 31 December 2021 were classified as follows:

Equities	Level 1/2/3
Futures contracts	Level 1/2
Debt Securities	Level 1/2
Warrants	Level 2
Contract for differences	Level 2
Forward contracts	Level 2

The following table presents the fair value hierarchy of the Company's financial assets and liabilities measured at 31 December 2022 and 31 December 2021.

At 31 December 2022

Financial assets at FVTPL	Level 1	Level 2	Level 3	Total
Equities	17,857,733,759	58,029,046	1,484,669	17,917,247,474
Debt Securities	71,086,377	97,455,584	-	168,541,961
Transferable securities	17,928,820,136	155,484,630	1,484,669	18,085,789,435

Notes to the Financial Statements (continued)
for the year ended 31 December 2022 (continued)

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

A reconciliation of movements in Level 3 assets and liabilities for the year ended 31 December 2022 and for the year ended 31 December 2021 is set out below.

	31 December 2022	31 December 2021
	USD	USD
Opening balance	2,791,347	215,983
Purchases	1,650,384	2,027,731
Sales	(2,377,118)	(120,087)
Realised (losses)/gains	(1,435,182)	739
Unrealised losses	(63,531,084)^	(1,041,772)
Transfers into Level 3*	67,064,354	1,734,815
Transfers out of level 3*	(2,725,063)	(19,469)
FX gains/(losses) on level 3	47,031	(6,593)
Closing balance	1,484,669	2,791,347

^Mainly consisted of the cost of the L3 securities transferred into the sub-funds during the year.

*All transfers are taken at the end of the financial year.

Cash and cash equivalents include cash in hand and other short term deposits with original maturities of three months or less, net of bank overdrafts and are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Redeemable Participating Shares are redeemable at the shareholder's options and are classified as financial liabilities. The Company issues the redeemable shares at the amount equal to the proportionate share of net assets of the Company at the time of the redemption, calculated on a basis consistent with that used in these Financial Statements. Accordingly, the carrying amount of net assets attributable to holders of redeemable shares approximates their fair value. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund's net asset value. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

At 31 December 2022 and 31 December 2021, had the unobservable inputs such as last traded prices and average cost used in the fair value measurement categorised within level 3 of the fair value hierarchy increased or decreased by 5% with all other variables held constant, the decrease or increase in the net assets attributable to holders of Redeemable Participating Shares of each sub-fund is shown below.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

5. Derivative Contracts

Futures contracts

Futures contracts are commitments either to purchase or sell a specific financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily through cash margin accounts.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Company may enter into forward foreign exchange contracts to manage the currency risk arising from the Company's investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies.

For the year ended 31 December 2022, HSBC MSCI WORLD UCITS ETF held forward contracts (2021: No sub-funds held).

Contracts for difference

CFDs are agreements between the Company and third parties which allow the Company to acquire an exposure to the price movement of specific securities without actually purchasing the securities. Upon entering into a CFD, the Company is required to deposit with a broker initial cash margin equal to a certain percentage of the contract amount. Variation margin payments are made or received by the Company depending upon the fluctuation in the value of the underlying securities. The changes in contract values are recorded as unrealised gains or losses and the Company recognises a realised gain or loss when the contract is closed or when the contract is re-set. CFDs are fair valued as the change in market value of the underlying security applied to the notional amount of the CFD held at the end of the financial period, representing the unrealised gain or loss on these CFDs. The market value of the underlying security is determined by reference to the quoted market price available on a recognised stock exchange.

All income accruing to the underlying securities in the CFDs and the financing charges associated with the CFD trading are accrued by the Company on an accruals basis and is recognised in the Statement of Comprehensive Income as part of the net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss.

For the year ended 31 December 2022, no sub funds held CFDs (31 December 2021: CFDs held in HSBC MSCI CANADA UCITS ETF).

Warrants

A warrant is a financial instrument which is usually issued along with a bond or preferred stock, entitling the holder to buy a specific amount of securities at a specific price, usually above the current market price at the time of issuance, for a specified or unspecified period. The listed warrants are traded on recognised exchanges and all warrants are valued at fair value. Realised and change in unrealised gains and losses are recorded in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

5. Derivative Contracts (continued)

Offsetting assets and liabilities

As at 31 December 2022 and 31 December 2021, the sub-funds are subject to master netting arrangements with the counterparties to the futures, forwards and CFDs. No financial assets or liabilities, subject to enforceable master netting arrangements or similar arrangements, are presented on a net basis in the Statement of Financial Position of the Company at the 31 December 2022 or as at 31 December 2021. The gross amounts of unrealised gains and losses on futures and CFDs, by counterparty, are disclosed in the Schedule of Investments of the sub-funds. Margin is posted by the sub-funds with the derivative counterparties when the previously held margin falls below the minimum margin requirement. At the 31 December 2022 and 31 December 2021, the sub-funds do not have any material amounts of unrealised losses on open futures, forwards or CFDs by counterparty as shown below:

Calculation of Global Exposure

Global exposure is a measure designed to limit either the incremental exposure and leverage generated by the Company through the use of FDI (including embedded derivatives) or the market risk of the sub-funds' portfolio.

In calculating global exposure, the Company adopts a commitment approach in managing risks. The commitment approach will be applied to all positions in FDI, whether used as part of the sub-funds' general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management.

^{^^^} This sub-fund was closed on 7 December 2022 and was delisted from London Stock Exchange on 12 December 2022.

^{^*} NVAC represents 10% of the NVAC with the Depository. To the extent that the facility is drawn down, the assets and cash balances held by the Depository are held as collateral for the overdraft facilities.

An overdraft fee is charged on the facility at the HSBC Bank plc's base lending rate plus 2%, calculated on a per annum basis. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. As at 31 December 2022, overdraft facility was drawn by HSBC MSCI EM FAR EAST UCITS ETF and HSBC MSCI MALAYSIA UCITS ETF (31 December 2021: Nil).

For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a 'payment settlement limit' that is in place to manage the overdrafts.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

8. Securities Lending

Securities lending is used by the sub-funds to generate additional income from the securities held by the sub-funds. Further disclosures pertaining to securities lending are disclosed in Other Additional Disclosures.

Securities lent by a sub-fund are not derecognised from the sub-fund's balance sheet and securities lent can be sold at any time. The sub-funds listed below engaged in securities lending as at 31 December 2022 and 31 December 2021.

Cash collateral and securities collateral for securities lending are mainly held by third parties (Tri-party collateral agents) and by HSBC Bank plc and would not have any impact in the Statement of Financial position of the sub-funds. Securities Lending Agent, HSBC Bank plc is the custodian of the collaterals.

The proportion of collateral held in the sub-funds is segregated in full and never pooled

The securities lending commission is allocated to the following parties:

75% of the gross revenue on securities lending is allocated to the relevant sub-fund.

10% of the gross revenue on securities lending is allocated to the Management Company.

15% of the gross revenue on securities lending is allocated to the Securities Lending Agent, HSBC Bank plc.

Direct costs from securities lending include 15% of the gross revenue due to the Securities Lending Agent which is USD 689,776 (31 December 2021: USD 456,349) and 10% of the gross revenue due to the Management Company which is USD 459,851 (31 December 2021: USD 304,237) as shown in the table below.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

9. Share capital and Redeemable Participating Shares

The authorised share capital of the Company is 500,000,300,002 shares of no par value divided into: 2 subscriber shares of no par value (the "Subscriber Shares"); 300,000 capitalisation shares of no par value (the "Capitalisation Shares"); and 500,000,000,000 shares of no par value (the "Redeemable Participating Shares").

Capital Management

The Subscriber Shares, which are held by the Investment Manager and its nominees, entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The holders of Subscriber Shares shall have one vote for each Subscriber Share held. The Subscriber Shares do not form part of the net asset value of the Company. They are thus disclosed in the Financial Statements by way of this note only. Subscriber Shares were issued at EUR1.00 each. The Capitalisation Shares entitle the holder or holders to attend and vote at general meetings of the Company. It does not entitle the holders to participate in the profits or assets of the Company except for a return of paid-up capital on redemption or on a winding-up of the Company.

The Redeemable Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of each sub-fund.

The list of share classes in issue as at 31 December 2022 are as follows:

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

10. Distributions

The Directors intend to declare and pay dividends on the shares of each of the sub-funds in respect of each financial year in which the total income of the relevant sub-funds exceeds the fees and expenses by more than a de-minimis as determined by the Directors (the "Net Investment Income") except as set out below. Dividends will ordinarily be paid twice annually in January/February and July/August. For HSBC MSCI WORLD UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC FTSE 250 UCITS ETF, HSBC FTSE EPRA/NAREIT Developed UCITS ETF, HSBC MSCI EMERGING MARKETS UCITS ETF, HSBC MULTI FACTOR WORLDWIDE EQUITY UCITS ETF, HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF, HSBC DEVELOPED WORLD SUSTAINABLE EQUITY UCITS ETF, HSBC MSCI AC FAR EAST EX JAPAN UCITS ETF and HSBC MSCI CHINA A UCITS ETF dividends will be paid quarterly in January/February, April/May, July/August and October/November.

Distributions made are also subject to equalisation. Equalisation is operated in connection with the issue and redemption of shares. It represents the income element included in the price for the issue and redemption of shares as detailed in Note 2(s).

The Company paid the following dividends during the financial year ended 31 December 2022:

11. Related parties

(a) Transactions with key management personnel

The Company has appointed, HSBC Investment Fund (Luxembourg) S.A. as the Management Company as disclosed in note 3 (a). The Management Company is therefore considered to be a related party. The Management Company, Investment Manager, the Swiss Representative, the Switzerland Paying Agent, the Administrator and the Depository are all wholly owned subsidiaries of HSBC Holdings plc and are therefore considered as related parties to the Company. HSBC Holdings plc is the parent company of the above parties and therefore considered as a related party to the Company. Fees and charges to these parties are disclosed in Note 3(a) to the Financial Statements. As at 31 December 2022, two Subscriber Shares are held by the Investment Manager and its nominee.

Key management personnel include the Directors of the Company. Directors' fees paid to the independent Directors of the Company are disclosed in Note 3(c).

The Directors had no direct or indirect interest in any shares in issue by the Company as at 31 December 2022 (31 December 2021: Nil).

(b) Other related party transactions

The Company receives fees from HSBC Bank plc in the form of duties and charges, direct dealing cash transaction fees, in-kind transaction fees and share conversion transaction fees, where applicable to cover expenses incurred by the Company in processing creations and redemptions. HSBC Bank plc also acts as an Authorised Participant of the Company and pays for the transaction fees for subscriptions and redemptions which are subsequently charged to the investors. Transaction fees received by the Company during the financial year from HSBC Bank plc amounted to USD 6,525,518 (31 December 2021: 3,973,812) and are included in the Statement of Comprehensive Income under the heading "Net gain/(loss) on financial assets and liabilities at fair value through profit or loss".

An overdraft fee is charged on the facility at the HSBC Bank plc's base lending rate plus 2%, calculated on a per annum basis. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a 'payment settlement limit' that is in place to manage the overdrafts.

The Company entered into a securities lending agreement with HSBC Bank plc from 2 March 2021 and details of the securities lending transactions are set out in Note 8. The Company holds cash margin, cash on deposit and has obtained credit facilities with HSBC Bank plc as detailed in Note 2(h), 2(i) and Note 7. HSBC Bank plc is considered to be a related party being a subsidiary of HSBC Holdings plc.

Notes to the Financial Statements (continued)

11. Related parties (continued)

(b) Other related party transactions (continued)

HSBC DEVELOPED WORLD SUSTAINABLE EQUITY UCITS ETF, HSBC EUROPE SUSTAINABLE EQUITY UCITS ETF, HSBC FTSE 100 UCITS ETF, HSBC MSCI EUROPE CLIMATE PARIS ALIGNED UCITS ETF, HSBC MSCI EUROPE UCITS ETF, HSBC MSCI WORLD UCITS ETF, HSBC UK SUSTAINABLE EQUITY UCITS ETF, HSBC WORLD ESG BIODIVERSITY SCREENED EQUITY UCITS ETF, HSBC BLOOMBERG EUR SUSTAINABLE CORPORATE BOND UCITS ETF, HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE

1-3 YEAR BOND UCITS ETF and HSBC BLOOMBERG USD SUSTAINABLE CORPORATE BOND UCITS ETF hold investments in HSBC Holdings plc as disclosed in the Schedules of Investments. HSBC Client Holdings Nominee (UK) Limited and HSBC Global Custody Nominee (UK) Limited held shares at period end as a nominee account and are held on behalf of the beneficial owners. HSBC Global Markets acts as an Authorised Participant to the sub-funds.

(c) Authorised participants

HSBC Global Markets is the Authorised Participant which is the only related party to the sub-funds. The Company does not make any other payments to HSBC Global Markets.

Morgan Stanley, Bank of America Merrill Lynch, Susquehanna Europe, RBC Capital Markets, Optiver VOF, Societe Generale, Jane Street Financial, Flow Traders B.V., Virtu Financial, Goldman Sachs International, DRW Global Markets Ltd, Citigroup Global Markets, BNP Paribas Arbitrage SNC, UBS AG London Branch, GHCO, JP Morgan Securities, Old Mission and Bluefin Europe LLP are Authorised Participants to the sub-funds which are significant contracts and are not related parties to the sub-funds.

The Company does not make any other payments to the Authorised Participants. During the year, Authorised Participants helped maintain the liquidity of the sub-funds by subscribing for and redeeming shares. There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2022 (31 December 2021: None).

(d) Investment transactions with related parties

In their purchases and sales of investments, the sub-funds utilise the services such as brokerage, clearing and settlement of members of HSBC Group. Details of such transactions executed during the year ended 31 December 2022 and 31 December 2021 are shown below:

31 December 2022		Total aggregate gross value of such transactions for the year	Percentage of such transactions in value to total transactions for the year	Commission paid for the year	Average rate of commission

13. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a “chargeable event”.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight-year financial period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations; and
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as ICSD) will not constitute a chargeable event. It is the current intention of the Directors that all shares in the Company will be held in ICSD or another recognised clearing system.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

13. Taxation (continued)

The Company may be subject to withholding taxes and capital gains tax imposed on realised and unrealised gains on securities for certain foreign countries in which the Company invests. The foreign tax expense, if any, is recorded on an accrual basis and is included in capital gains taxes in the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in the capital gains tax payable in the Statement of Financial Position. For the year ended 31 December 2022 and 31 December 2021, there were capital gains tax charges on the below sub-funds.

Sub-Funds	Currency	Capital Gains Tax	
		31 December 2022	31 December 2021
HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF	USD	449,954	209,103

HSBC MSCI AC ASIA PACIFIC EX JAPAN CLIMATE PARIS ALIGNED UCITS ETF	USD	857	-
HSBC MSCI EMERGING MARKETS SMALL CAP ESG UCITS ETF	USD	35	-

^Due to a daily unrealised Indian capital gain tax accrual movement on the sub-funds. This will be offset with any future gains.

Tax Risk Disclaimer for Taxation in the People's Republic of China ("PRC")

PRC withholding tax has been enforced on payment of dividends to Qualified Foreign Institutional Investors ("QFIIs") from PRC listed companies at the rate of 10%. However, PRC Tax authorities have, since 2014, provided a temporary exemption from withholding tax on capital gains realised by QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities seek to remove the temporary exemption on capital gains realised QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities may seek to remove the temporary exemption on capital gains realised as well as future gains. In such a case, the sub-funds might be adversely impacted.

14. Directed Brokerage Services

There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2022 (31 December 2021: Nil).

15. Operating segments

Operating segments are the components of the Company whose results are regularly reviewed by the Company's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance. Various sub-fund revenues are disclosed in the respective Statement of Comprehensive Income of the sub-funds. The Board, which is considered to be the CODM, managed the Company on the basis of business divisions determined with reference to market focus, geographical focus, investment funding model and the Company's management hierarchy. It is the opinion of the CODM that each sub-fund can be treated as a segment as the return on each sub-fund is linked to a different benchmark. Revenue generated from each sub-fund is presented in the Statement of Comprehensive Income of the relevant sub-fund.

Notes to the Financial Statements (continued)

for the year ended 31 December 2022 (continued)

15. Operating segments (continued)

Geographical areas.

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each sub-fund's revenue may be considered as being attributed to the region stated in its investment objective.

16. Major customers

The Company regards the holders of redeemable shares as customers, because it relies on their funding for continuing operations and meeting its objectives. See Note 12, 'Significant Shareholders' for details on number of shareholders who held more than 10% of the Company's net asset value attributable to holders of redeemable shares

17. Charges

HSBC Bank plc holds a number of charges over assets held in custody by the sub-funds as security for obligations under uncommitted overdraft facilities that HSBC Bank plc provides to the sub-funds.

18. Significant events since the financial year end

Notes to the Financial Statements (continued) for the year ended 31 December 2022 (continued)

18. Significant events since the financial year end (continued)

2. HSBC MSCI EMERGING MARKETS ISLAMIC ESG UCITS ETF launched on 12 January 2023. The sub-fund was listed on London Stock Exchange on 13 January 2023.
3. Dealing in HSBC MSCI Turkey UCITS ETF was suspended on 6 February 2023 after the Turkish Stock Exchange had been unavailable to trade due to the earthquake.
4. Dealing in HSBC MSCI Turkey UCITS ETF was suspended on 8 February 2023 after the Turkish Stock Exchange had announced halt in trading of stocks, index futures and single stock futures following the triggering of two market-wide circuit breakers due to the Turkish equity market experiencing sharp drops.
5. HSBC MSCI Russia Capped UCITS ETF was closed on 24 March 2023 and was delisted from London Stock Exchange on 29 March 2023.
7. The Company held negligible equity positions in Signature Bank, SVB Financial Group and Credit Suisse and negligible bond positions in Credit Suisse. SVB Financial Group and Signature Bank were not used as counterparties by the Company. Credit Suisse which is a counterparty to a number of securities lending transactions as at 31 December 2022 is a subsidiary of Credit Suisse Group AG which UBS Group AG plan to acquire in the post year end period as announced on 19 March 2023.

There were no other significant events since the financial year end.

19. Approval of Financial Statements

The Financial Statements were approved by the Board on 18 April 2023.

Portfolio Turnover Rate^{*^}

The Portfolio Turnover Rate (“PTR”) is calculated by totalling purchases and sales and deducting it from the total of subscriptions and redemptions. The result is divided by the yearly average total net assets and is multiplied by 100 to arrive at percentage terms. The PTR for each sub-fund for the financial year ended from 1 January 2022 to 31 December 2022 is as follows:

Sub-Funds	Financial Year ended 31 December 2022	Financial Year ended 31 December 2021

Securities Lending

The Securities Financing Transaction Regulation (“SFTR”) Disclosure

A Securities Financing Transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2022 and 31 December 2021, The below sub-funds had securities out on loan. The Depository is HSBC Continental Europe and the Securities Lending Agent is HSBC Bank plc. The securities issued on loan are on open basis and can be recalled at any time.

The amount of securities on loan as a proportion of lendable assets (calculated as Total Assets less cash and cash equivalents) were as follows:

31 December 2022

Sub-Funds	Functional Currency	Securities issued on loan	Lendable assets	Securities on loan as a percentage of lendable assets
HSBC EURO STOXX 50 UCITS ETF	EUR	61,246,508	376,504,480	16.27%
HSBC FTSE 100 UCITS ETF	GBP	39,372,879	476,709,523	8.26%

Total annual return not presented for periods less than a year.

Past performance is not an indication of current or future performance and the performance data does not take account of commissions and costs incurred on the creation and redemption of shares.

The Prospectus, Supplements and key investor information documents in respect of the sub-funds, Articles of Association of the Company, annual and semi-annual reports of the Company, as well as a list of the purchases and sales on the account of the sub-funds can be obtained free of charge by Swiss investors from the representative of the Company in Switzerland, HSBC Global Asset Management (Switzerland) AG, Gartenstrasse 26, CH-8002 Zurich, Switzerland.

UK Reporting Fund status

All share classes issued by the sub-funds in operation at 31 December 2022 have UK Reporting Fund status, either from 1 January 2010 or the launch of the relevant share class concerned.

As and when new sub-funds are launched, UK Reporting Fund applications will be made to HM Revenue & Customs ("HMRC") accordingly.

Details of the distributing share classes that have UK Reporting Fund status can be found on the HMRC website at www.hmrc.gov.uk. At the date of these Financial Statements the precise location of this HMRC report is: <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

The Company made available to shareholders the reportable income information for the financial year ended 31 December 2022 that they require for their UK tax returns at www.etf.hsbc.com by 31 December 2022. If investors do not have access to the internet they can apply in writing for a copy of this information to HSBC ETFs PLC, 25/28 North Wall Quay, IFSC, Dublin 1, Ireland.

Plan d'Epargne en Actions ("PEA") Eligibility

For the purpose of eligibility requirements of Article L-221-31 of the French Monetary and Financial Code, the relevant sub-funds must at all times during the financial year ended 31 December 2022 and 31 December 2021 be invested in more than 75% of PEA eligible assets. PEA eligible assets are defined as equity or equity equivalent securities, which have their registered office in a country which is a member of the EU or the European Economic Area. In the context of the Brexit, the French government decided that, until 30 September 2021, UK securities would remain eligible to make up the aforementioned 75% ratio. From 1st October 2021, the sub-funds HSBC FTSE 100 UCITS ETF, HSBC FTSE 250 UCITS ETF and HSBC MSCI EUROPE UCITS ETF were no longer eligible to the PEA wrapper.

As at 31 December 2022, only HSBC EURO STOXX 50 UCITS ETF sub-fund satisfied the criteria for PEA Eligibility:

Sub-Funds	% PEA Eligible Assets		
	31 December 2022	30 September 2021	31 December 2021
HSBC EURO STOXX 50 UCITS ETF	98.04%	99.09%	99.02%
HSBC FTSE 100 UCITS ETF	-	93.11%	-
HSBC FTSE 250 UCITS ETF	-	89.22%	-

Management Company's Remuneration Policy

The Management Company has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by the Management Company's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and instrument of incorporation of the Company nor impair compliance with the Management Company's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at www.global.assetmanagement.hsbc.com/luxembourg, or on request from the Management Company.

Total amount of remuneration paid by the Management Company to its staff during the financial year ending 31 December 2022 is as follows:

Fixed remuneration EUR 3,163,733

Variable remuneration EUR 1,569,599

Number of beneficiaries 30

of which, the fixed and variable remuneration of senior management is:

Fixed remuneration EUR 1,759,691

Variable remuneration EUR 1,412,649

Number of beneficiaries 14

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Neither the Management Company nor the Company pay any remuneration to the identified staff of any delegate.

Appendix - SFDR.Disclosures

as at 31 December 2022

Information regarding the environmental and/or social characteristics promoted by the Article 8 SFDR Funds and how they intend to invest in environmentally sustainable investments contributing to the environmental objectives of the Taxonomy Regulation is shown in the following pages. The list of Article 8 SFDR sub-funds are shown in Investment Manager's Report.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.4% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Asia Pacific ex Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	3.54	3.06
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	195.26	374.60
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	2,511.63	4,448.87

Broad Market Index - FTSE Asia Pacific Ex Japan

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider’s website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	7.50%	Taiwan, Province of China
BHP GROUP LTD	Materials	6.13%	Australia
INFOSYS LTD	Information Technology	5.41%	India

MEITUAN-CLASS B	Consumer Discretionary	0.97%	China
MACQUARIE GROUP LTD	Financials	0.91%	Australia

Cash and derivatives were excluded

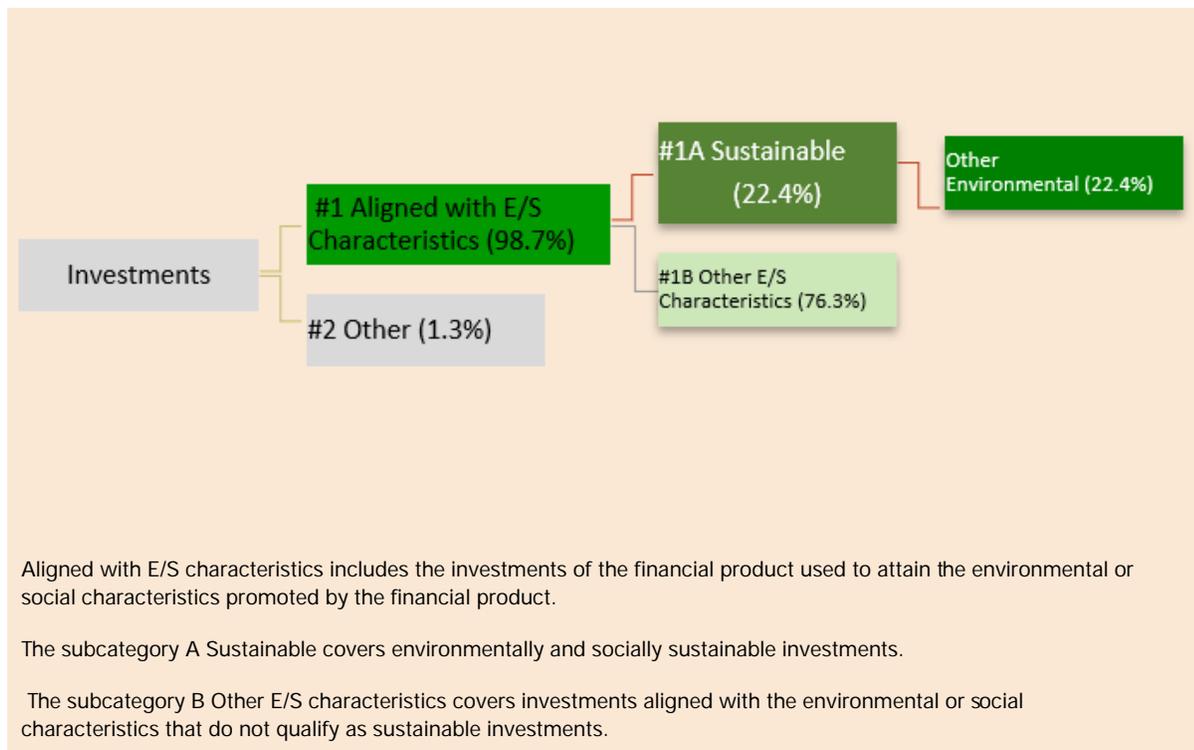

What was the proportion of sustainability-related investments?

22.4% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

● **In which economic sectors were the investments made?**

Sector	% Assets
Financials	27.69%
Information Technology	26.47%
Materials	13.65%
Consumer Discretionary	8.50%
Consumer Staples	5.15%
Industrials	4.71%
Health Care	4.51%
Real Estate	4.00%
Communication Services	2.87%
Energy	1.11%
Utilities	1.06%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

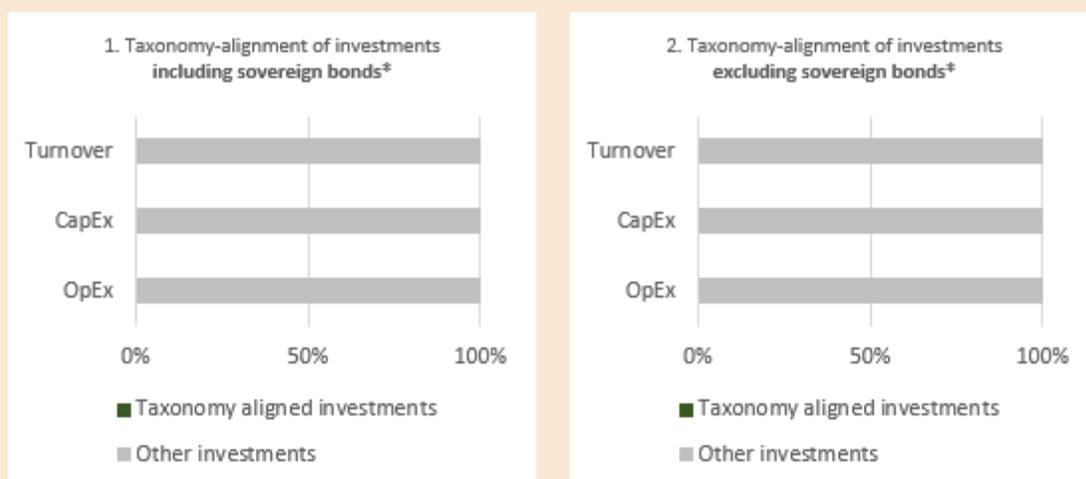

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

22.4%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy - Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund’s performance and that of the Index.

How does the reference benchmark differ from a broad market index?

The Index is a subset of the FTSE Asia Pacific ex Japan Index and aimed to measure the performance of companies in emerging and developed countries in Asia Pacific ex-Japan as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weights companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The investment objective of the Fund was to replicate the performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund’s performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
FTSE ESG Score	3.54	3.54
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	195.26	195.94
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	2,511.63	2,526.17

Reference Benchmark - FTSE Asia Pacific ex Japan ESG Low Carbon Select Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
FTSE ESG Score	3.54	3.06
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	195.26	374.60
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	2,511.63	4,448.87

Broad Market Index - FTSE Asia Pacific Ex Japan

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p> <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.6% of sustainable investments </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with a social objective </p> <p> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Bloomberg MSCI Euro Corporate SRI Carbon ESG-Weighted (EUR Unhedged) Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions compared to the Bloomberg Euro Aggregate Corporate Index (the "Parent Index"); and
- An improvement of the MSCI ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.80	7.37
Carbon Emissions as measured as Carbon Intensity (CO2e/USDm revenue)	55.71	129.86

Broad Market Index - Bloomberg Euro Aggregate Corporate Total Return Index Value Unhedged EUR

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and an improvement of the MSCI ESG Rating against that of the Parent Index . By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction. The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective. Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in Thermal coal mining and generation, Oil & Gas, were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index is calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporates was the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporated was MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which are also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
ACAFP 1.875 12/20/26 EMTN	Financials	0.80%	France

Cash and derivatives were excluded

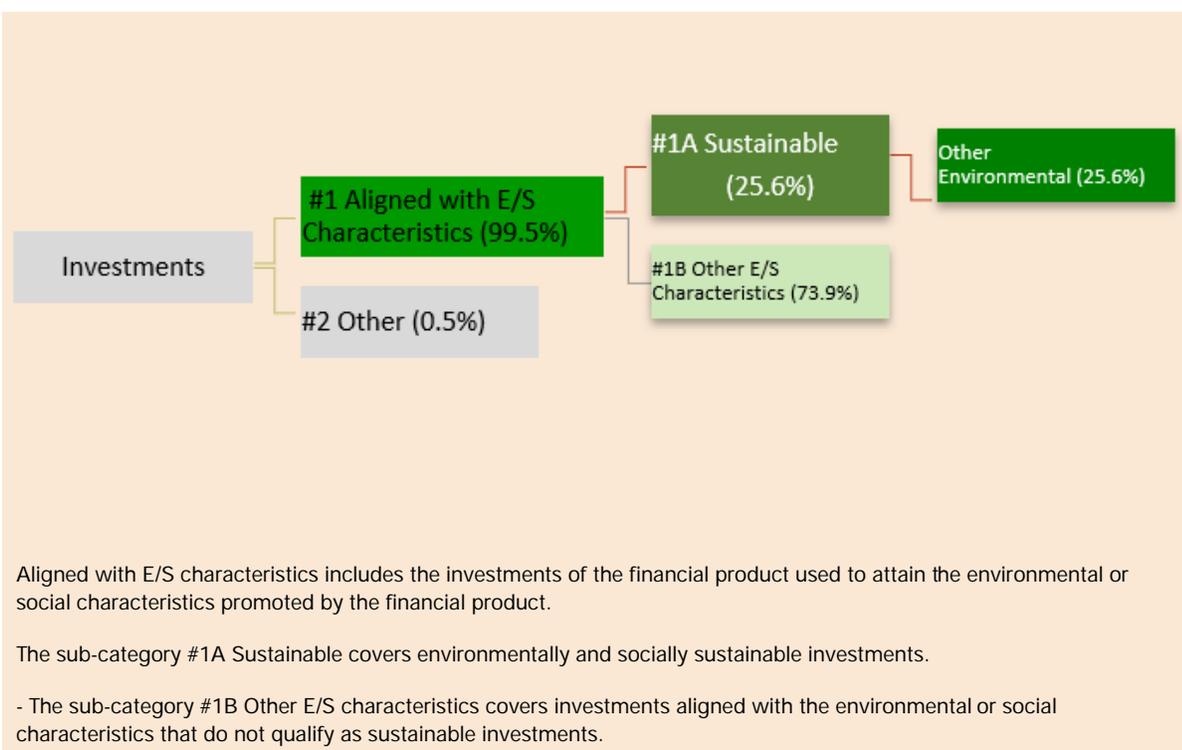

What was the proportion of sustainability-related investments?

25.6% of the portfolio was invested in sustainable assets.

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

Sector	% Assets
Banking	33.45%
Consumer Non Cyclical	15.89%
Communications	9.77%
Consumer Cyclical	7.68%
Capital Goods	4.89%
Insurance	4.43%
Electric	4.37%
Transportation	4.31%
Technology	3.68%
Natural Gas	2.99%
Financial Other	2.94%
REITs	2.60%
Basic Industry	2.02%
Industrial Other	0.27%
Treasuries	0.25%
Brokerage Asset Managers Exchanges	0.25%
Cash	0.21%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

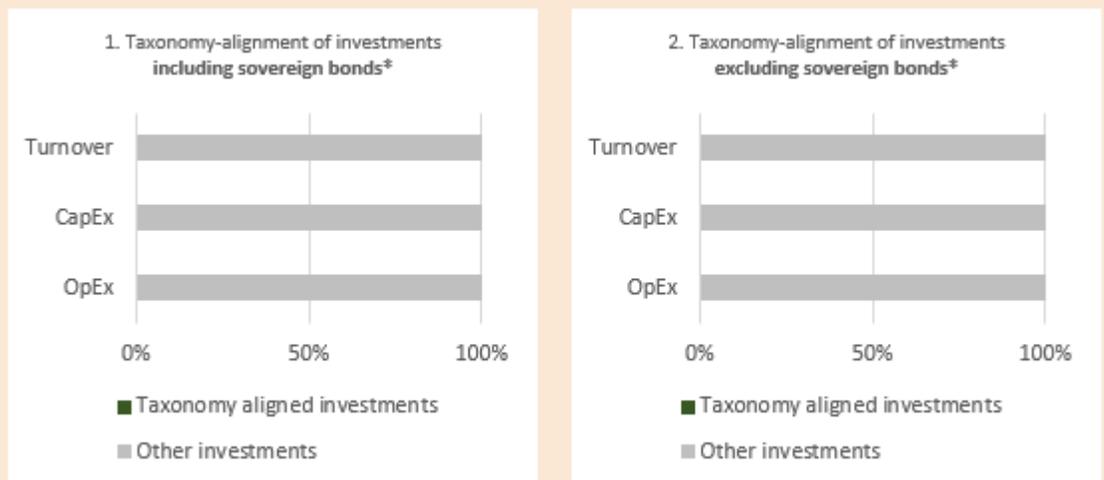

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.6%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Fund used optimisation techniques which took into account tracking error and trading costs when constructing a portfolio.

The Index sought to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI Euro Corporate SRI Carbon ESG-Weighted (EUR Unhedged) Index.

● **How does the reference benchmark differ from a broad market index?**

The Index sought to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg Euro Aggregate Corporate Index.

The Index achieved this by removing, on a monthly basis, securities based on sustainability exclusionary criteria. The following types of issuers were removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

MSCI ESG Rating

Business Involvement Screens

Issuers with a "red" MSCI ESG Controversy score (i.e. less than 1).

The weight of each constituent issuer was adjusted by a fixed multiplier, as set out in the Index methodology, which was determined by its MSCI ESG Rating. Each constituent was capped at 2% by market value.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI Euro Corporate SRI Carbon ESG-Weighted (EUR Unhedged) Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

The Index was rebalanced on a monthly basis in order to account for the eligibility criteria.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	7.80	7.76
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	55.71	59.86

Reference Benchmark - Bloomberg MSCI Euro Corporate SRI Carbon ESG-Weighted (EUR Unhedged)

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.80	7.37
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	55.71	129.86

Broad Market Index - Bloomberg Euro Aggregate Corporate Total Return Index Value Unhedged EUR

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p> <input checked="" type="radio"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.0% of sustainable investments </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input checked="" type="radio"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with a social objective </p> <p> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions compared to the Bloomberg Global Aggregate 1-3 Year Index (the "Parent Index"); and
- An improvement of the MSCI ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.37	5.98
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	216.27	282.80

Broad Market Index - Bloomberg Global Agg 1-3 Year Total Return Index

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and an improvement of the MSCI ESG Rating against that of the Parent Index. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in Thermal coal mining and generation, Oil & Gas, were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporated is the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in GHG Emissions and Intensity, Fossil fuels, Carbon and Energy, (PAI 1, 2, 3, 4) were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country

Cash and derivatives were excluded

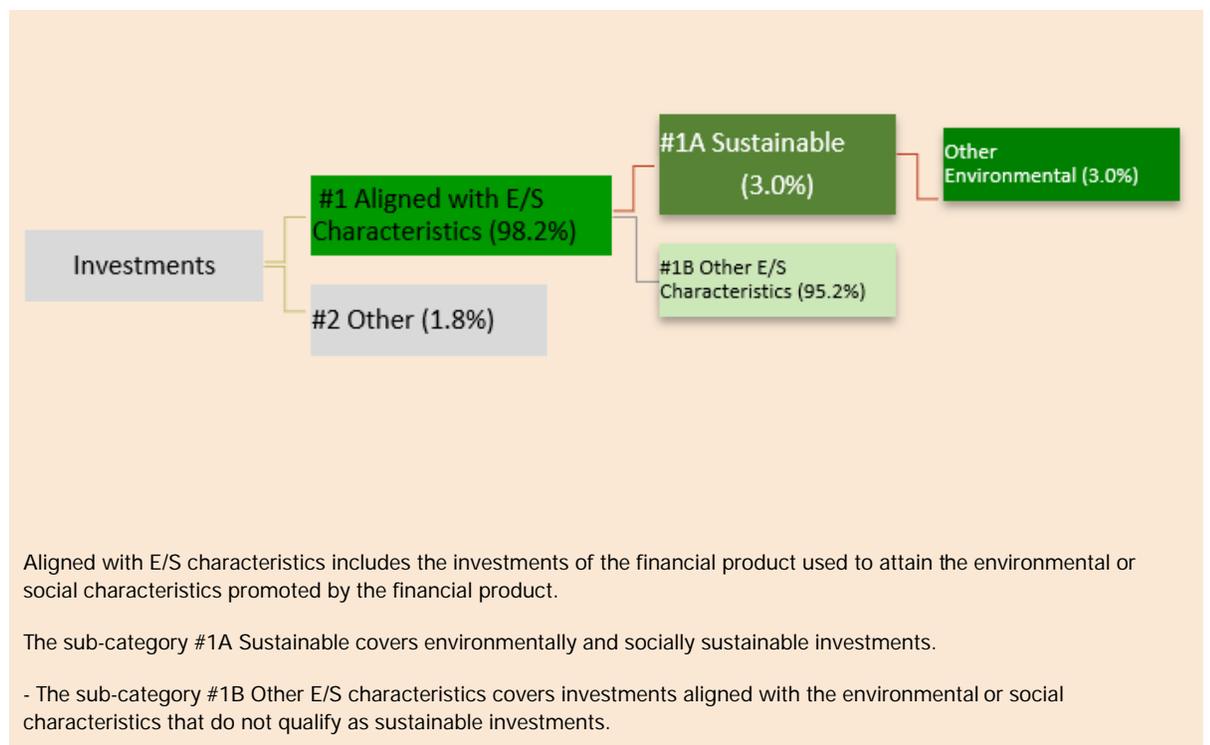

What was the proportion of sustainability-related investments?

3.0% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	% Assets
Treasuries	67.93%
Financial Institutions	11.50%
Supranational	4.56%
Agencies	4.24%
Covered	3.17%
Local Authority	1.88%
Consumer Non Cyclical	1.51%
Consumer Cyclical	1.36%
Technology	0.86%
Sovereign	0.85%
CMBS	0.61%
Capital Goods	0.40%
Communications	0.37%
ABS	0.36%
Cash	0.31%
Transportation	0.06%
Energy	0.05%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

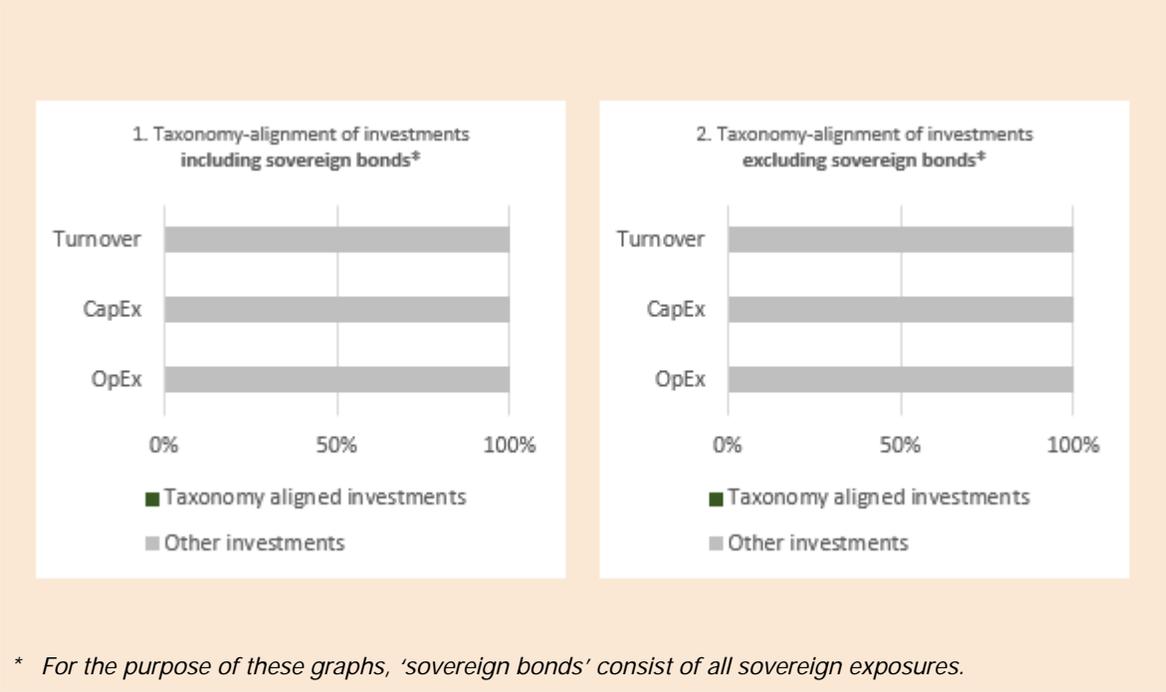

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
N/A - the Fund is not investing in transitional or enabling activities.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
As this is the first reporting period for the fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**
3.0%

 **What was the share of socially sustainable investments?**
N/A. The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**
Other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**
The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Fund used optimisation techniques which took into account tracking error and trading costs when constructing a portfolio.
The Index sought to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index.

● **How does the reference benchmark differ from a broad market index?**

The Index sought to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg Global Aggregate 1-3 Year Index.

The Index achieved this by removing, on a monthly basis, securities based on sustainability exclusionary criteria. The following types of issuers were removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

- MSCI ESG Rating
- Business Involvement Screens
- Issuers with a "red" MSCI ESG Controversy score (i.e. less than 1).

The weight of each constituent issuer was adjusted by a fixed multiplier, as set out in the Index methodology, which was determined by its MSCI ESG Rating. Each constituent was capped at 2% by market value.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

The Index was rebalanced on a monthly basis in order to account for the eligibility criteria.

- ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.37	6.38
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	216.27	216.75

Reference Benchmark - Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index

- ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.37	5.98
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	216.27	282.80

Broad Market Index - Bloomberg Global Agg 1-3 Year Total Return Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.1% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Bloomberg MSCI US Corporate SRI Carbon ESG-Weighted (USD Unhedged) Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions compared to the Bloomberg US Aggregate Corporate Index (the "Parent Index"); and
- An improvement of the MSCI ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.98	6.56
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	106.08	251.70

Broad Market Index - Bloomberg US Corporate Total Return Value Unhedged USD

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and an improvement of the MSCI ESG Rating against that of the Parent Index . By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in Thermal coal mining and generation, Oil & Gas, were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index is calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporates was the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in GHG Emissions and Intensity, Fossil fuels, Carbon and Energy, (PAI 1, 2, 3, 4) were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

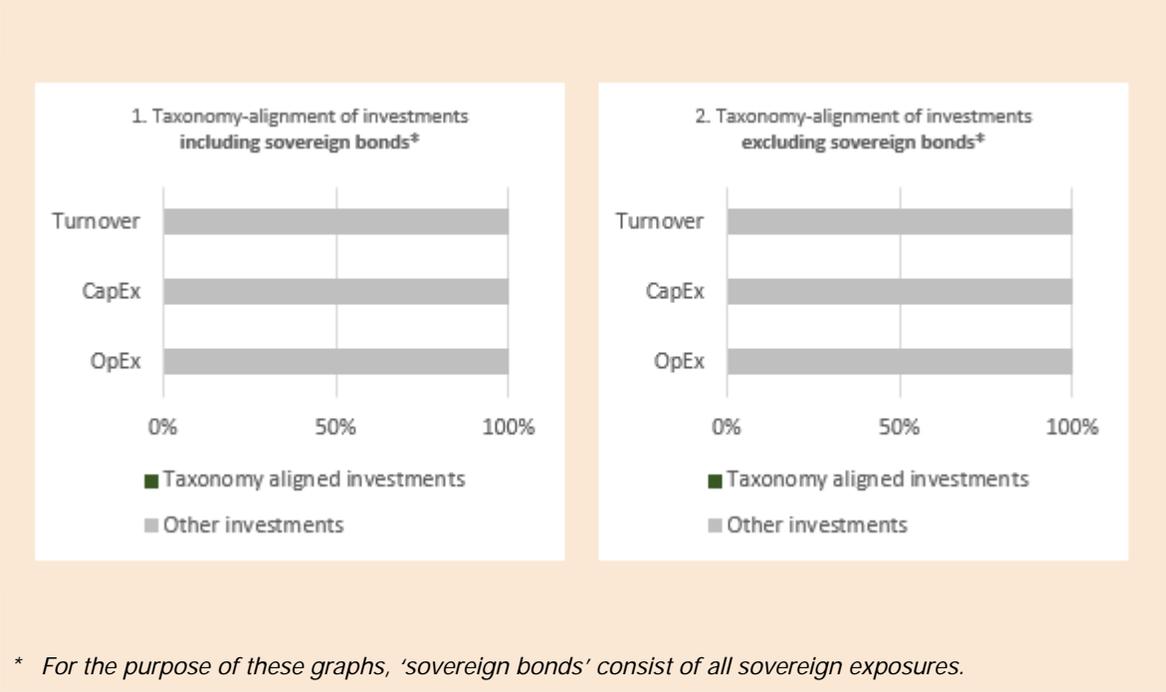

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
N/A - the Fund is not investing in transitional or enabling activities.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
As this is the first reporting period for the fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**
20.1%

 **What was the share of socially sustainable investments?**
N/A. The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**
Other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**
The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Fund used optimisation techniques which took into account the tracking error and trading costs when constructing a portfolio.
The Index sought to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI US Corporate SRI Carbon ESG-Weighted (USD Unhedged) Index.

● ***How does the reference benchmark differ from a broad market index?***

The Index sought to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg US Aggregate Corporate Index.

The Index achieved this by removing, on a monthly basis, securities based on sustainability exclusionary criteria. The following types of issuers were removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

MSCI ESG Rating

Business Involvement Screens

Issuers with a "red" MSCI ESG Controversy score (i.e. less than 1).

The weight of each constituent issuer was adjusted by a fixed multiplier, as set out in the Index methodology, which was determined by its MSCI ESG Rating. Each constituent was capped at 2% by market value.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The investment objective of the Fund was to replicate the performance of the Bloomberg MSCI US Corporate SRI Carbon ESG-Weighted (USD Unhedged) Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index was rebalanced on a monthly basis in order to account for the eligibility criteria.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.98	6.96
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	106.08	105.86

Reference Benchmark - Bloomberg MSCI US Corporate SRI Carbon ESG-Weighted (USD Unhedged)

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.98	6.56
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	106.08	251.70

Broad Market Index - Bloomberg US Corporate Total Return Value Unhedged USD

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<div style="display: flex; align-items: center; justify-content: center;"> ●● <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> Yes </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It made sustainable investments with an environmental objective: _____% </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It made sustainable investments with a social objective: _____% </div>	<div style="display: flex; align-items: center; justify-content: center;"> ●○ <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> No </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.1% of sustainable investments </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> with a social objective </div> <div style="margin-top: 10px;"> <input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </div>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and improved the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.06	3.43
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	79.44	161.34
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	650.91	1,339.63

Broad Market Index - FTSE Developed

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
MICROSOFT CORP			United States of America

Cash and derivatives were excluded

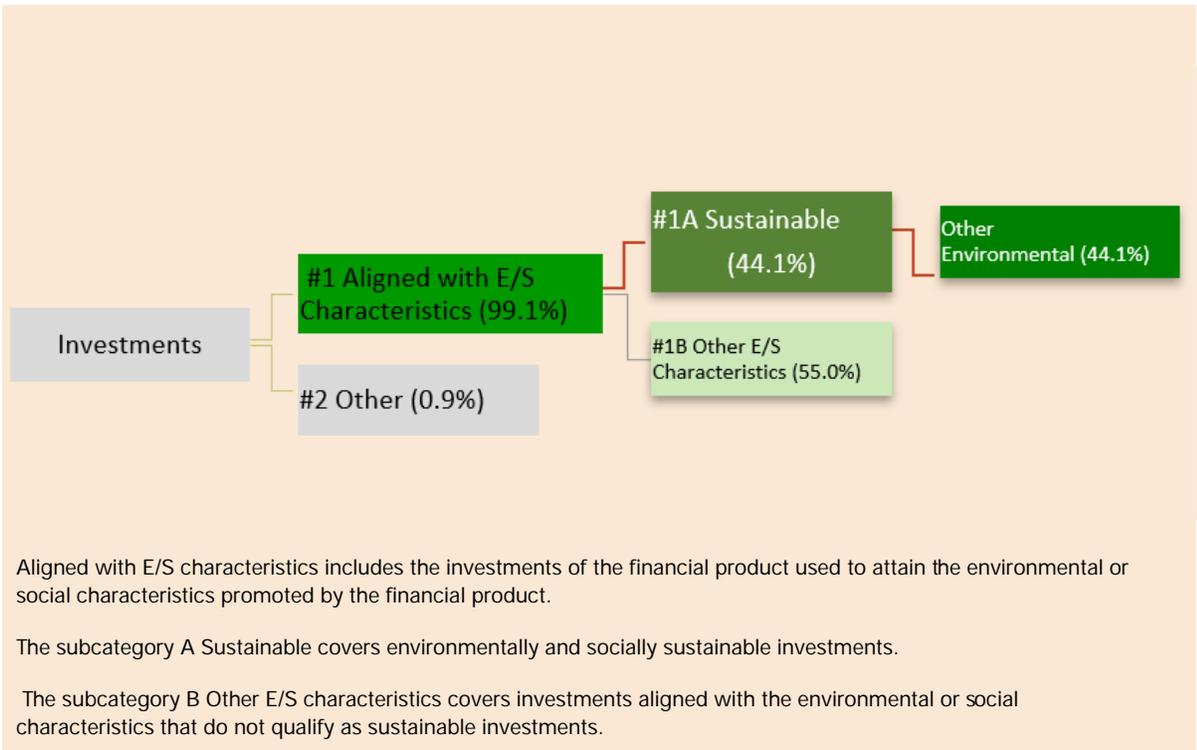

What was the proportion of sustainability-related investments?

44.1% of the portfolio was invested in sustainable assets.

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	% Assets
Information Technology	26.36%
Financials	19.35%
Health Care	16.30%
Consumer Staples	11.36%
Consumer Discretionary	7.99%
Industrials	5.41%
Materials	4.10%
Communication Services	4.06%
Energy	2.11%
Utilities	1.90%
Real Estate	1.03%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

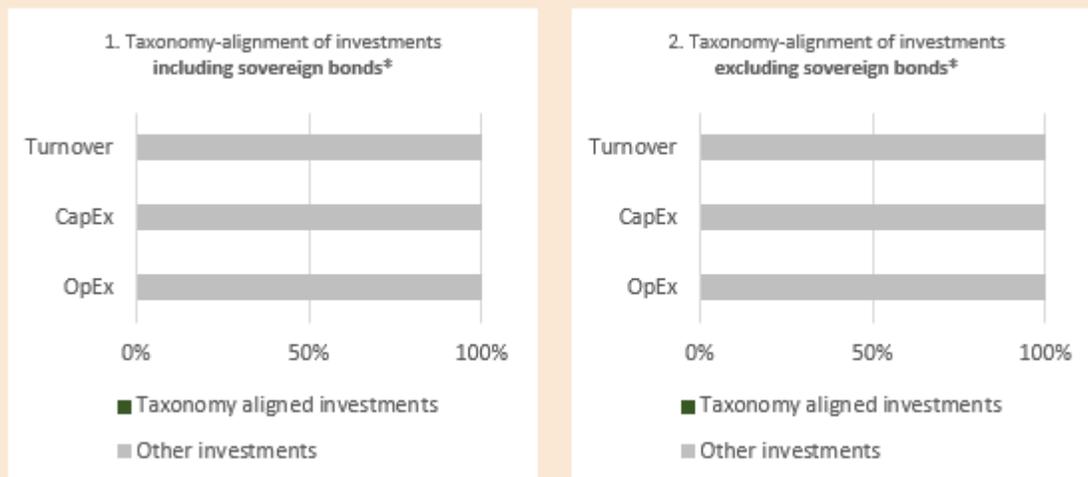

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

44.1%

 **What was the share of socially sustainable investments?**

N/A. The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and sought to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy - Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues range from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We have a dedicated stewardship team with engagement specialists. Engagement is also integral to the fundamental research process. Our analysts and portfolio managers engage with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE Developed ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE Developed Index and aimed to measure the performance of companies in developed countries as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weights companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the FTSE Developed ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
FTSE ESG Score	4.06	4.06
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	79.44	79.68
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	650.91	658.87

Reference Benchmark - FTSE Developed ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.06	3.43
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	79.44	161.34
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	650.91	1,339.63

Broad Market Index - FTSE Developed

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="padding-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 26.6% of sustainable investments </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with a social objective </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Emerging ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Emerging Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	3.31	2.86
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	229.88	453.73
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	3,263.97	5,855.76

Broad Market Index - FTSE Emerging

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

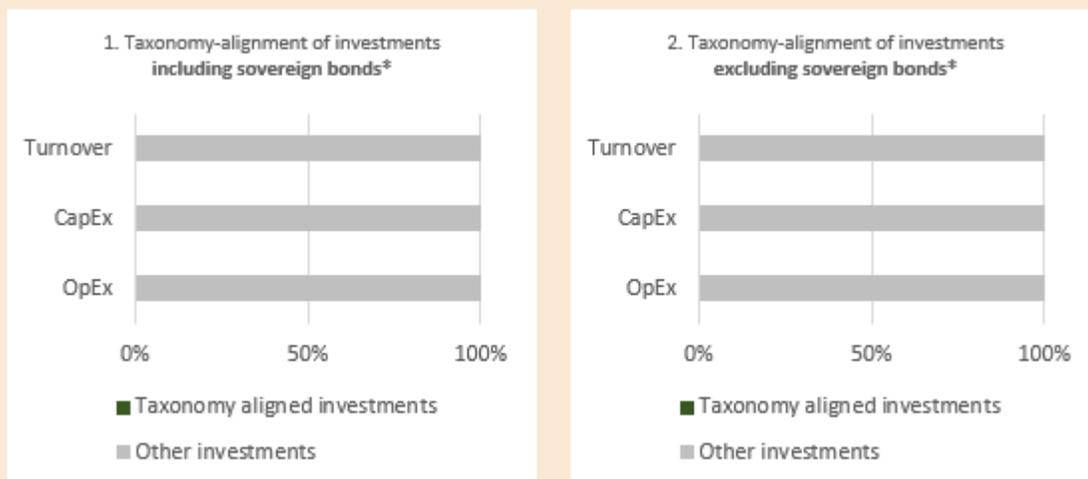

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.6%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

Broad Market Index - FTSE Emerging

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.5% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed Europe ex UK ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe ex UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.40	3.85
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	68.33	140.76
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	577.86	1,177.56

Broad Market Index - FTSE Europe Ex UK

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
NESTLE SA-REG	Consumer Staples	8.84%	Switzerland

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

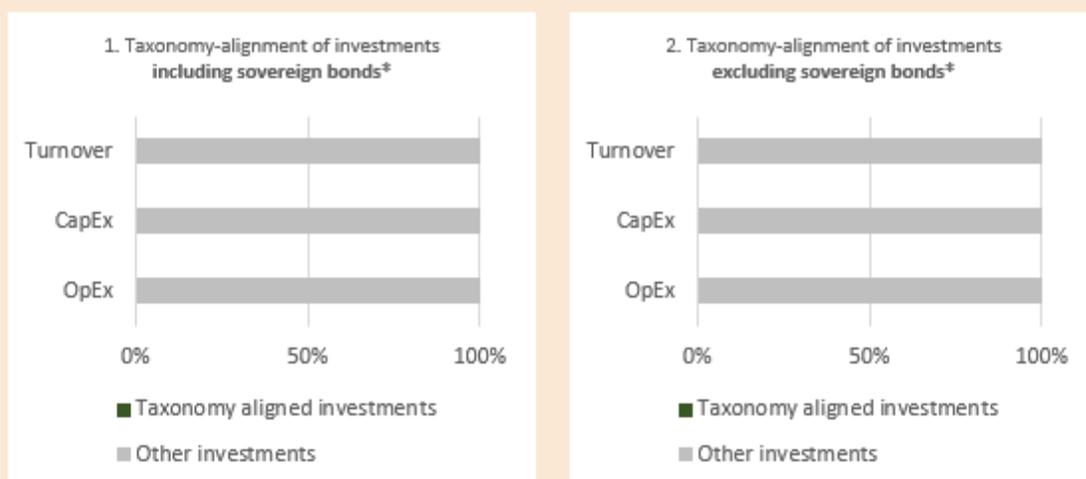

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

51.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieves this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy - Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We have a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE Developed Europe ex UK ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE Developed Europe ex UK Index and aimed to measure the performance of companies in developed countries in Europe ex UK as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weights companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell environmental, social and governance ("ESG") ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the FTSE Developed Europe ex UK ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
FTSE ESG Score	4.40	4.40
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	68.33	68.30
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	577.86	579.27

Reference Benchmark - FTSE Developed Europe ex UK ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.40	3.85
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	68.33	140.76
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	577.86	1,177.56

Broad Market Index - FTSE Europe Ex UK

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p> <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.0% of sustainable investments </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="margin-left: 20px;"> <input type="checkbox"/> with a social objective </p> <p> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed Europe ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.40	3.89
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	68.08	125.00
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	1,363.44	2,587.01

Broad Market Index - FTSE Developed Europe

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Broad Market Index - FTSE Developed Europe

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<div style="display: flex; align-items: center; justify-content: center;"> ●● <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> Yes </div>	<div style="display: flex; align-items: center; justify-content: center;"> ●○ <input style="width: 30px; height: 20px; margin-right: 10px;" type="checkbox"/> No </div>
<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.8% of sustainable investments
<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> It made sustainable investments with a social objective: _____%	<input style="width: 30px; height: 20px; margin-bottom: 10px;" type="checkbox"/> with a social objective
<input style="width: 30px; height: 20px;" type="checkbox"/>	<input style="width: 30px; height: 20px;" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Japan ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.01	3.38
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	46.51	95.51
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	225.01	497.04

Broad Market Index - FTSE Japan

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
TOYOTA MOTOR CORP	Consumer Discretionary	8.82%	Japan
SONY GROUP CORP	Consumer Discretionary	4.54%	Japan
KDDI CORP	Communication Services	3.89%	Japan
DAIICHI SANKYO CO LTD	Health Care	3.85%	Japan
SOFTBANK CORP	Communication Services	3.50%	Japan
TAKEDA PHARMACEUTICAL CO LTD	Health Care	3.27%	Japan
ITOCHU CORP	Industrials	3.22%	Japan
mitsubishi UFJ FINANCIAL GRO	Financials	3.07%	Japan
ASTELLAS PHARMA INC			Japan
SEVEN & I HOLDINGS CO LTD	Consumer Staples	2.12%	Japan
SUMITOMO MITSUI FINANCIAL GR	Financials	1.96%	Japan
RECRUIT HOLDINGS CO LTD	Industrials	1.93%	Japan
CANON INC	Information Technology	1.86%	Japan
FAST RETAILING CO LTD	Consumer Discretionary	1.61%	Japan
MITSUI & CO LTD	Industrials	1.57%	Japan

Cash and derivatives were excluded

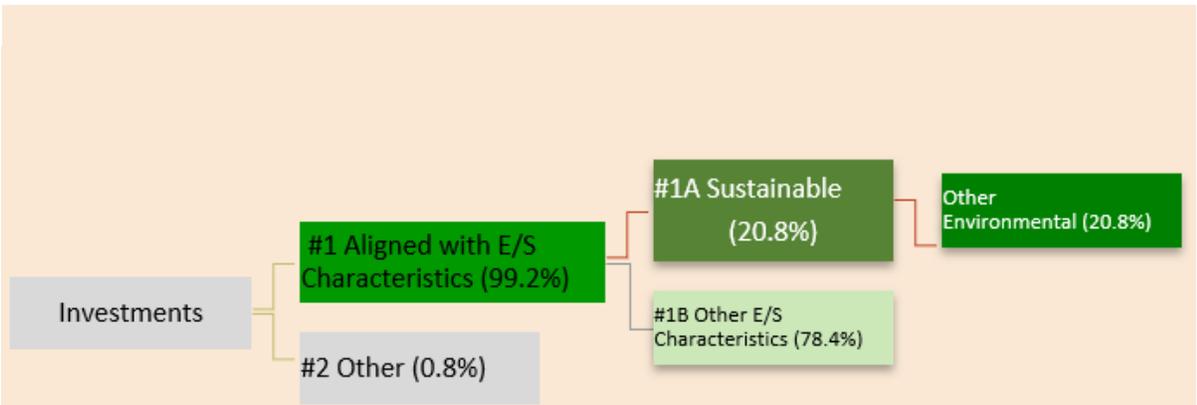

What was the proportion of sustainability-related investments?

20.8% of the portfolio was invested in sustainable assets.

● *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The subcategory A Sustainable covers environmentally and socially sustainable investments.

The subcategory B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	21.05%
Industrials	19.55%
Health Care	14.07%
Financials	11.57%
Information Technology	11.31%
Communication Services	9.43%
Consumer Staples	7.46%
Real Estate	3.16%
Materials	2.11%
Utilities	0.18%
Energy	0.11%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

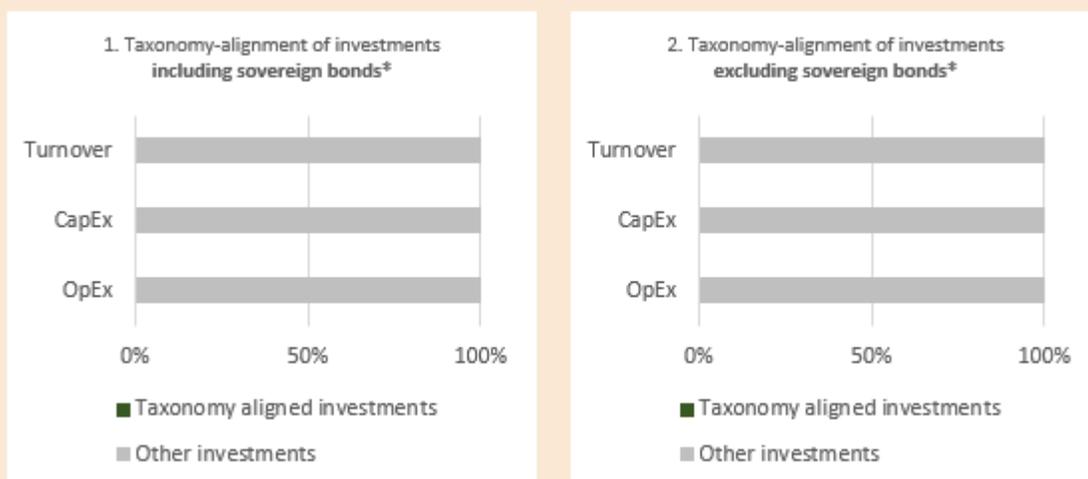

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.8%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy - Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE Japan ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE Japan Index and aimed to measure the performance of companies in Japan as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the FTSE Japan ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
FTSE ESG Score	4.01	4.01
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	46.51	46.66
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	225.01	226.70

Reference Benchmark - FTSE Japan ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.01	3.38
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	46.51	95.51
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	225.01	497.04

Broad Market Index - FTSE Japan

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.0% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI AC Asia Pacific ex Japan Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.19	5.94
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	124.42	343.77

Broad Market Index - MSCI AC Asia Pacific Ex Japan

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that have very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	5.99%	Taiwan, Province of China
TENCENT HOLDINGS LTD	Communication Services	4.15%	China

HANWHA SOLUTIONS CORP	Materials	1.16%	South Korea

Cash and derivatives were excluded

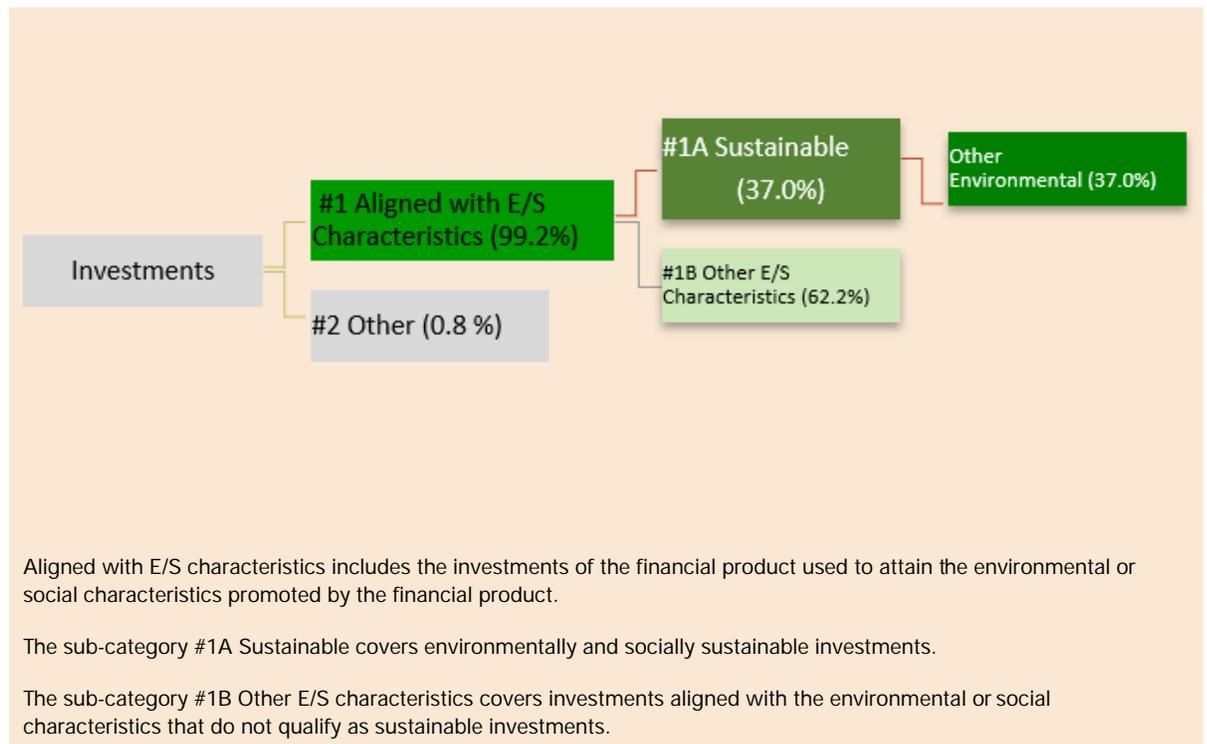

What was the proportion of sustainability-related investments?

37.0% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	24.44%

Financials	23.38%
Consumer Discretionary	13.22%
Industrials	8.94%
Communication Services	7.78%
Health Care	5.78%
Real Estate	5.45%
Utilities	4.76%
Consumer Staples	3.59%
Materials	2.64%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

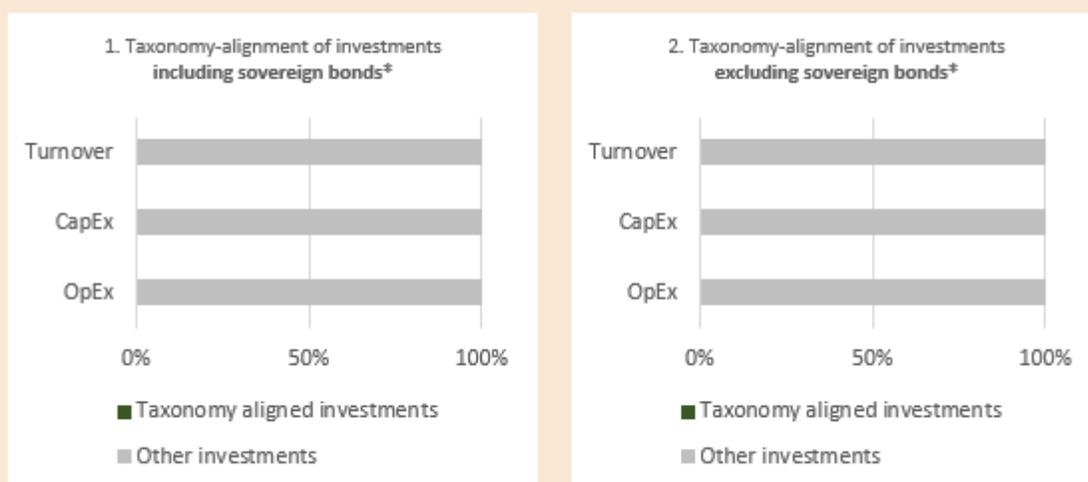

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

37.0%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI AC Asia Pacific ex Japan Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI AC Asia Pacific ex-Japan Index, and includes companies from certain Developed and Emerging Market countries in the Asia Pacific region (excluding Japan), as determined by the Index provider.

The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.19	6.18
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	124.42	124.34

Reference Benchmark - MSCI AC Asia Pacific ex Japan Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.19	5.94
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	124.42	343.77

Broad Market Index - MSCI AC Asia Pacific Ex Japan

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.5% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Emerging Markets Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	5.62	5.43
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	181.68	378.16

Broad Market Index - MSCI Emerging Markets

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	6.59%	Taiwan, Province of China
TENCENT HOLDINGS LTD	Communication Services	4.47%	China
SAMSUNG ELECTRONICS CO LTD	Information Technology	3.16%	South Korea
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	3.04%	China
SAMSUNG SDI CO LTD	Information Technology	2.19%	South Korea
DELTA ELECTRONICS INC	Information Technology	1.68%	Taiwan, Province of China
MEITUAN-CLASS B	Consumer Discretionary	1.55%	China
SAMSUNG ELECTRO-MECHANICS CO	Information Technology	1.37%	South Korea
HANWHA SOLUTIONS CORP	Materials	1.25%	South Korea
INFOSYS LTD	Information Technology	1.23%	India
GRUPO AEROPORT DEL PACIFIC-B	Industrials	1.18%	Mexico
AL RAJHI BANK	Financials	1.15%	Saudi Arabia
CHINA CONCH VENTURE HOLDINGS	Industrials	1.10%	China
ICICI BANK LTD	Financials	1.03%	India
HOUSING DEVELOPMENT FINANCE	Financials	1.03%	India

Cash and derivatives were excluded

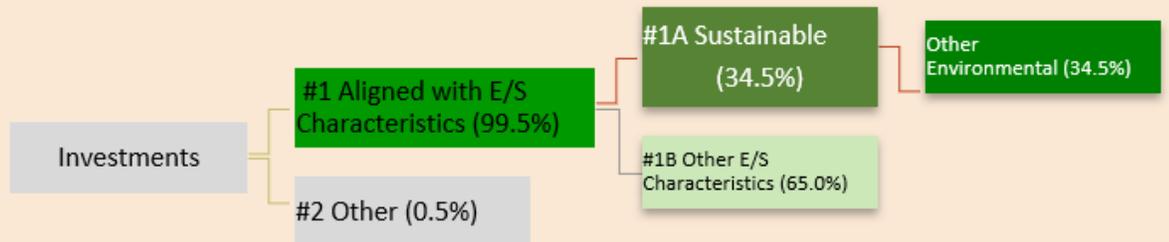

What was the proportion of sustainability-related investments?

34.5% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	24.35%

Financials	21.07%
Consumer Discretionary	13.27%
Industrials	10.81%
Communication Services	8.54%
Consumer Staples	5.64%
Materials	4.92%
Health Care	4.44%
Utilities	3.90%
Real Estate	3.06%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

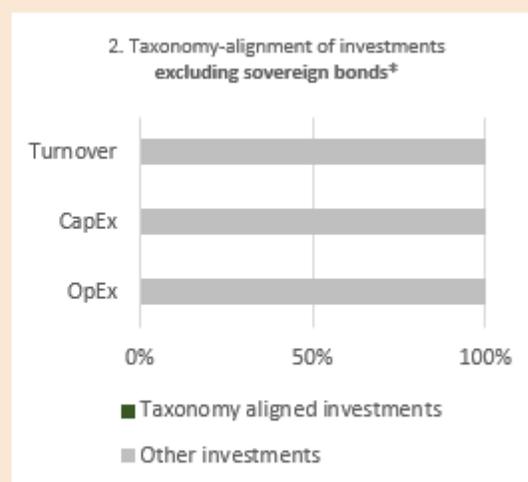

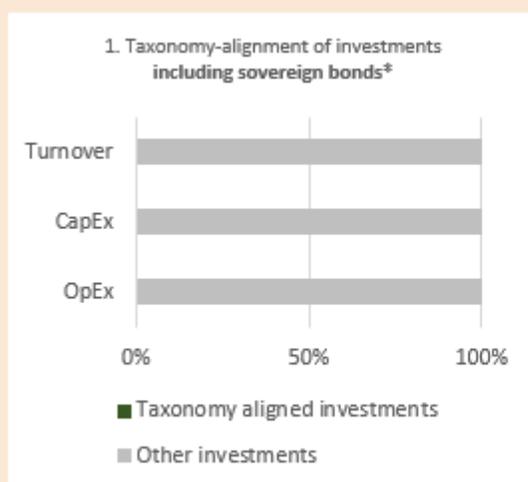

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

34.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI Emerging Markets Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI Emerging Markets Index, and includes large and mid-cap securities across Emerging Market (EM) countries, as determined by the Index provider.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	5.62	5.62
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	181.68	181.36

Reference Benchmark - MSCI Emerging Markets Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	5.62	5.43
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	181.68	378.16

Broad Market Index - MSCI Emerging Markets

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.5% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Emerging Markets Small Cap SRI ESG Universal Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement of the ESG rating against that of the MSCI Emerging Markets Index (the "Parent Index")

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	4.81	4.07

Broad Market Index - MSCI EM Small Cap

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and weighting of companies to improve the exposure to companies with favourable ESG ratings .

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which are also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9).

In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

In addition securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
AKESO INC - B	Health Care	1.24%	China

TIME DOTCOM BHD	Communication Services	0.59%	Malaysia

Cash and derivatives were excluded

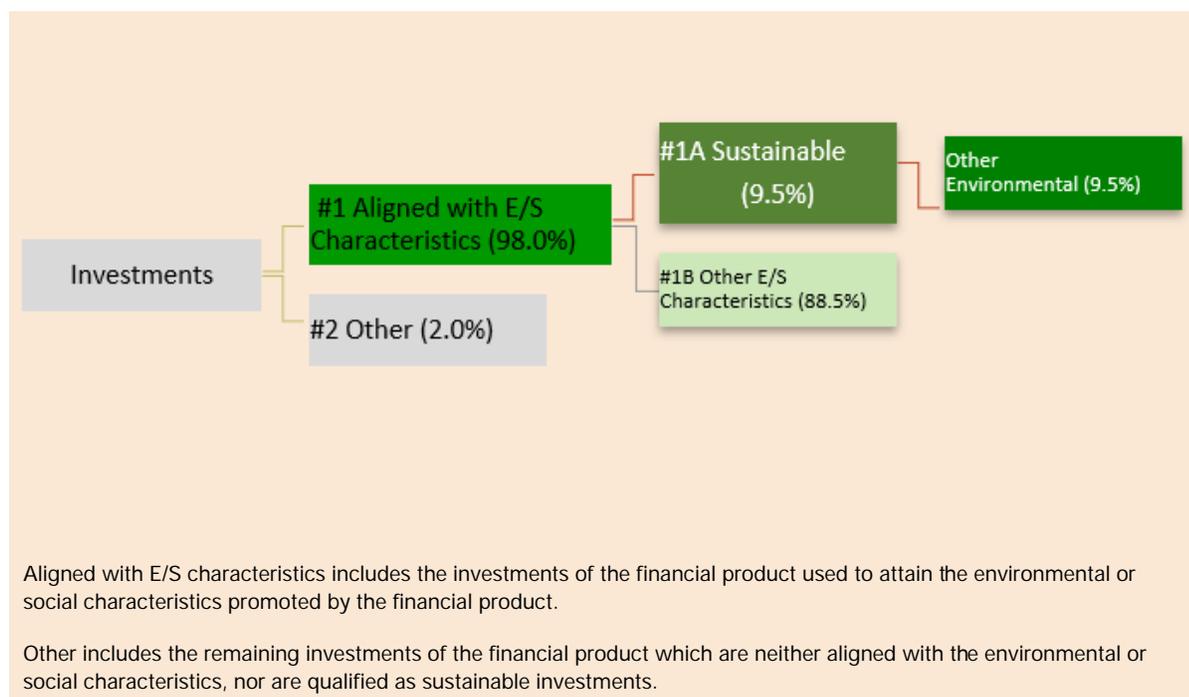

What was the proportion of sustainability-related investments?

9.5% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	14.54 %
Financials	14.46 %
Information Technology	13.05 %
Health Care	11.23 %
Consumer Discretionary	10.78 %
Materials	10.73 %
Real Estate	7.68 %
Consumer Staples	6.23 %
Communication Services	5.62 %
Utilities	3.49 %
Energy	2.00 %

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

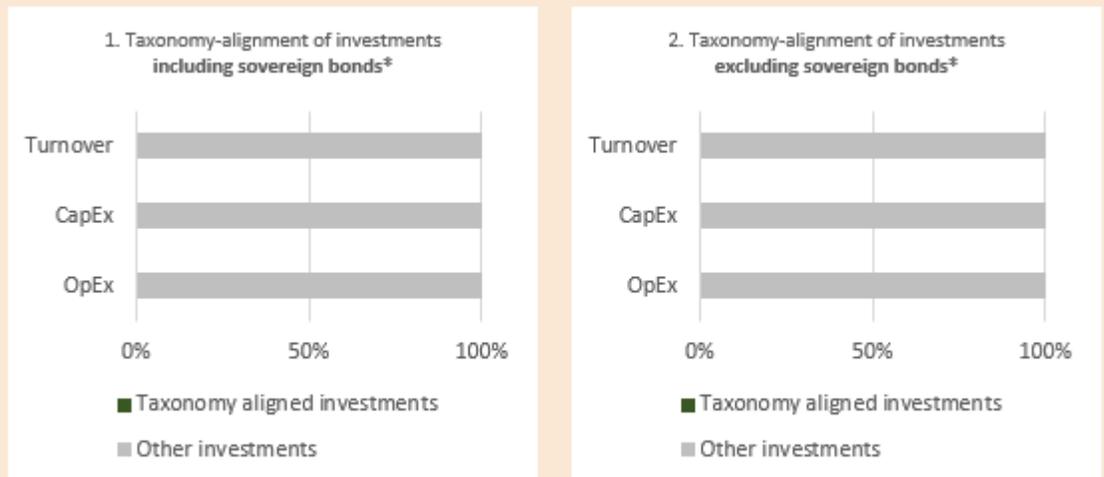

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The Index applies the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective by re-weighting free-float market cap weights based upon certain ESG metrics, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How PAI indicators were considered will be included in the Fund's year-end report and accounts. Further information is available on request.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The investment objective of the Fund was to replicate the performance of the MSCI Emerging Markets Small Cap SRI ESG Universal Select Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI Emerging Markets Small Cap Index, which offered a representation of emerging markets equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider's criteria on free-float adjustment, size & liquidity.

The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index applied the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective.

To achieve this, the Index provider applied the following steps: (i) the Index provider excludes the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defines an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weights securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	4.81	4.82

Reference Benchmark - MSCI Emerging Markets Small Cap SRI ESG Universal Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	4.81	4.07

Broad Market Index - MSCI EM Small Cap

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18.2% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Emerging Markets Value SRI ESG Target Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics

- An improvement of the ESG rating against that of the MSCI Emerging Markets Index (the "Parent Index")

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and improved the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.44	5.11

Broad Market Index - MSCI EM Enhanced Value

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and to improve the exposure to companies with favourable ESG ratings .

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index is calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9).

In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

In addition securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	6.19%	Taiwan, Province of China
CHINA CONSTRUCTION BANK-H	Financials	3.16%	China
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	2.87%	China
NASPERS LTD-N SHS	Consumer Discretionary	2.79%	South Africa
TENCENT HOLDINGS LTD	Communication Services	2.45%	China
POSCO HOLDINGS INC	Materials	2.26%	South Korea
HINDUSTAN UNILEVER LTD	Consumer Staples	2.22%	India
MAHINDRA & MAHINDRA LTD	Consumer Discretionary	2.17%	India
FOMENTO ECONOMICO MEXICA-UBD	Consumer Staples	2.15%	Mexico
WUXI BIOLOGICS CAYMAN INC	Health Care	2.15%	China
KIA CORP	Consumer Discretionary	2.06%	South Korea
UNITED MICROELECTRONICS CORP	Information Technology	2.02%	Taiwan, Province of China
SAMSUNG ELECTRONICS CO LTD	Information Technology	1.84%	South Korea
ASE TECHNOLOGY HOLDING CO LT	Information Technology	1.75%	Taiwan, Province of China
IMPALA PLATINUM HOLDINGS LTD	Materials	1.56%	South Africa

Cash and derivatives were excluded

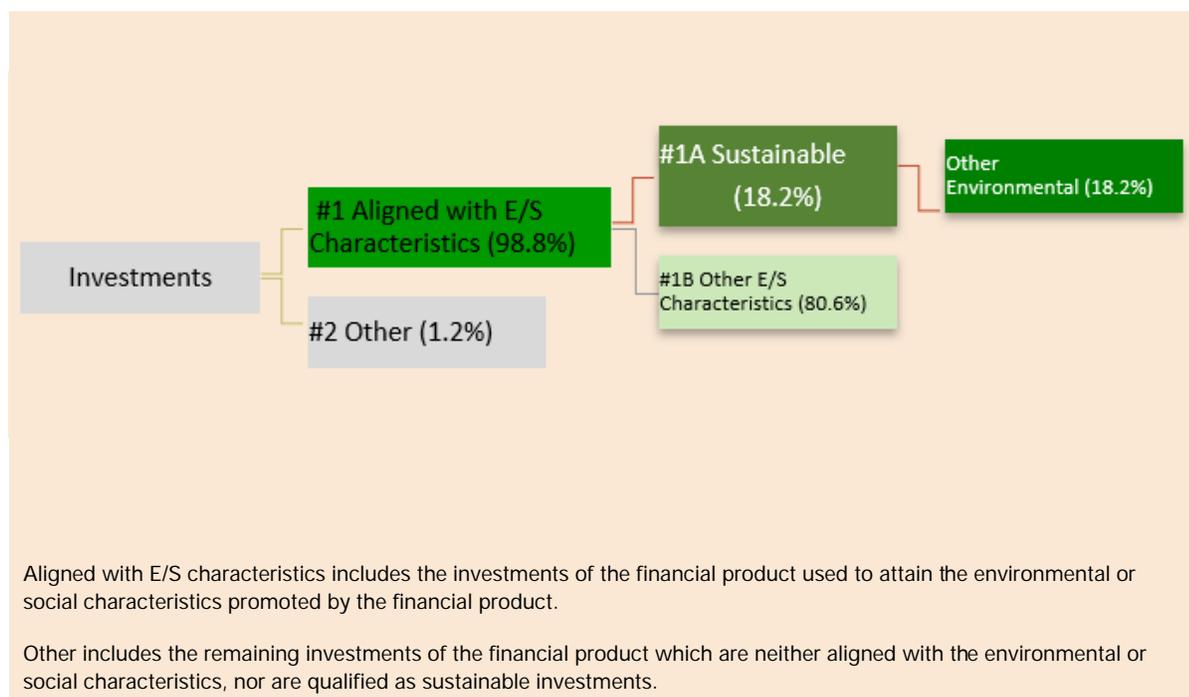

What was the proportion of sustainability-related investments?

18.2% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	23.10%
Financials	17.95%
Consumer Discretionary	15.90%
Consumer Staples	11.14%
Communication Services	10.01%
Health Care	9.05%
Materials	6.70%
Industrials	4.27%
Utilities	1.66%
Real Estate	0.22%
Energy	0.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

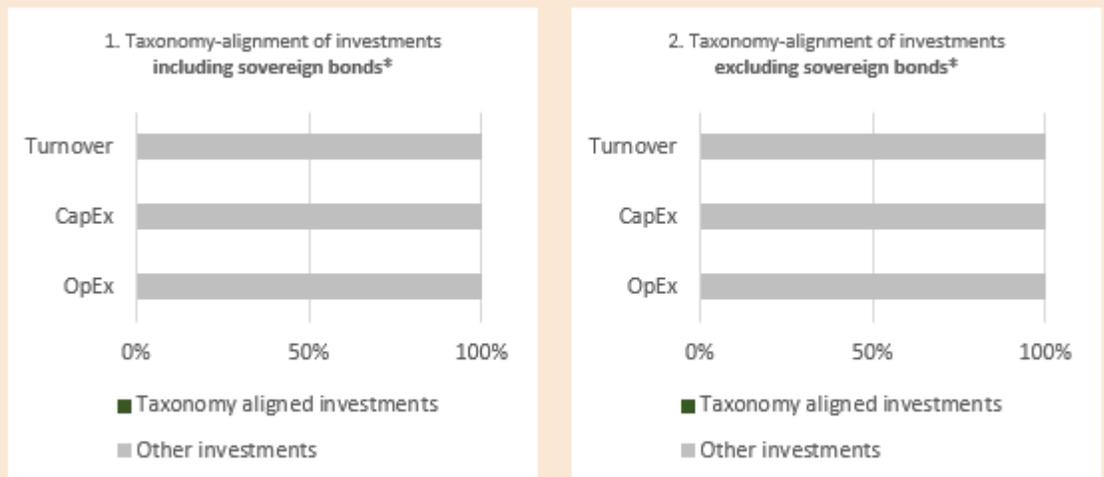

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

18.2%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The Index applies the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI Emerging Markets Value SRI ESG Target Select Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI Emerging Markets Index, which represented emerging markets equity markets worldwide, as determined by the Index provider.

The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index.

In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index. The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprised those securities providing maximum exposure to the Value Factor.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.44	6.44

Reference Benchmark - MSCI Emerging Markets Value SRI ESG Target Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.44	5.11

Broad Market Index - MSCI EM Enhanced Value

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="padding-left: 20px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.3% of sustainable investments </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with a social objective </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Europe Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.29	7.88
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	51.13	125.42

Broad Market Index - MSCI Europe

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

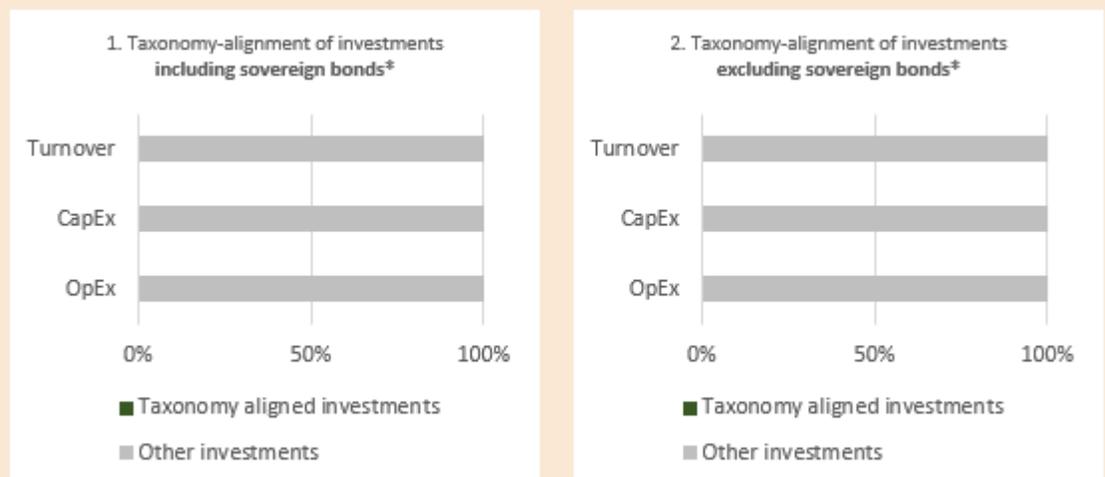

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

47.3%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI Europe Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI Europe Index, and includes large and mid-cap securities across 15 Developed Markets in Europe.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	8.29	8.29
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	51.13	51.16

Reference Benchmark - MSCI Europe Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.29	7.88
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	51.13	125.42

Broad Market Index - MSCI Europe

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> ü No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53.3% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Europe Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics

- An improvement on the ESG rating against that of the MSCI Europe Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.08	7.67

Broad Market Index - MSCI Europe Islamic

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and weighting of companies to improve the exposure to companies with favourable ("ESG") ratings . By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact (“UNGC”) Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
NOVARTIS AG-REG	Health Care	5.14%	Switzerland
SHELL PLC	Energy	4.80%	United Kingdom
SAP SE	Information Technology	4.78%	Germany
L'OREAL	Consumer Staples	4.54%	France
TOTALENERGIES SE	Energy	4.11%	France
SCHNEIDER ELECTRIC SE	Industrials	4.00%	France
GSK PLC	Health Care	3.71%	United Kingdom
SANOFI	Health Care	3.61%	France
BP PLC	Energy	2.84%	United Kingdom
ESSILORLUXOTTICA	Health Care	2.77%	France
ANGLO AMERICAN PLC	Materials	2.61%	United Kingdom
ABB LTD-REG	Industrials	2.51%	Switzerland
RIO TINTO PLC	Materials	2.07%	United Kingdom
AIR LIQUIDE SA	Materials	1.95%	France
LONZA GROUP AG-REG	Health Care	1.92%	Switzerland

Cash and derivatives were excluded

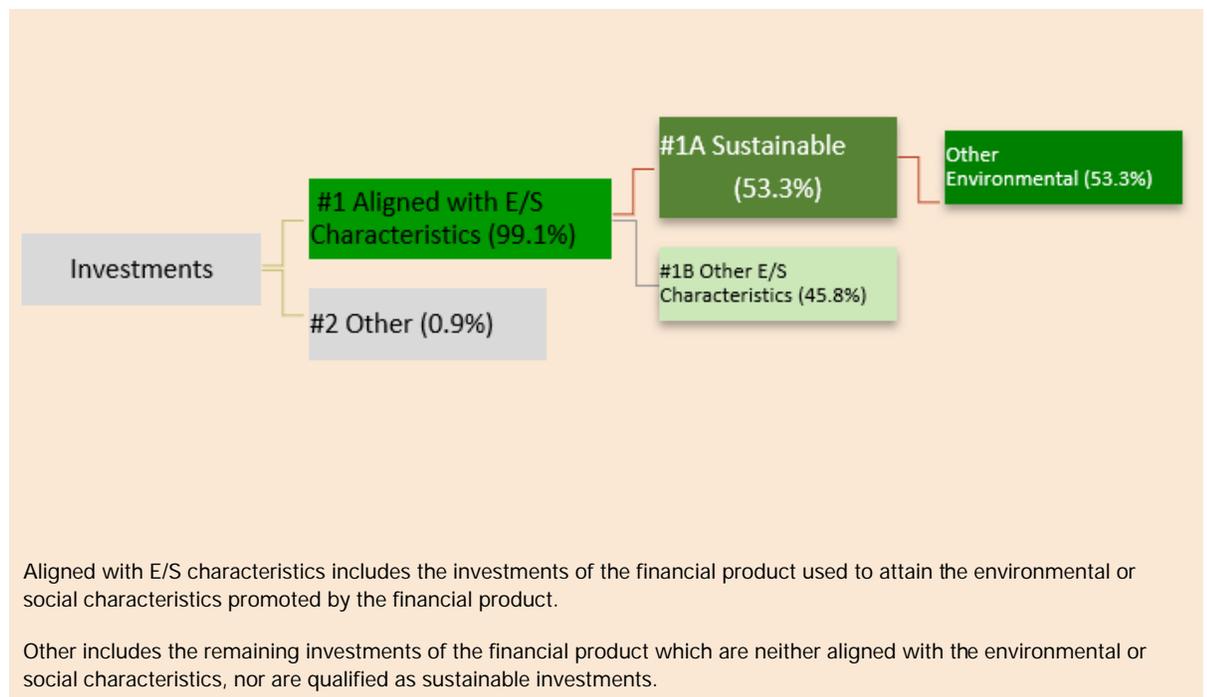

What was the proportion of sustainability-related investments?

53.3% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Health Care	22.32%
Materials	18.39%
Industrials	17.31%
Energy	14.14%
Information Technology	8.42%
Consumer Staples	7.59%
Consumer Discretionary	6.79%
Utilities	3.56%
Communication Services	1.21%
Real Estate	0.22%
Financials	0.06%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

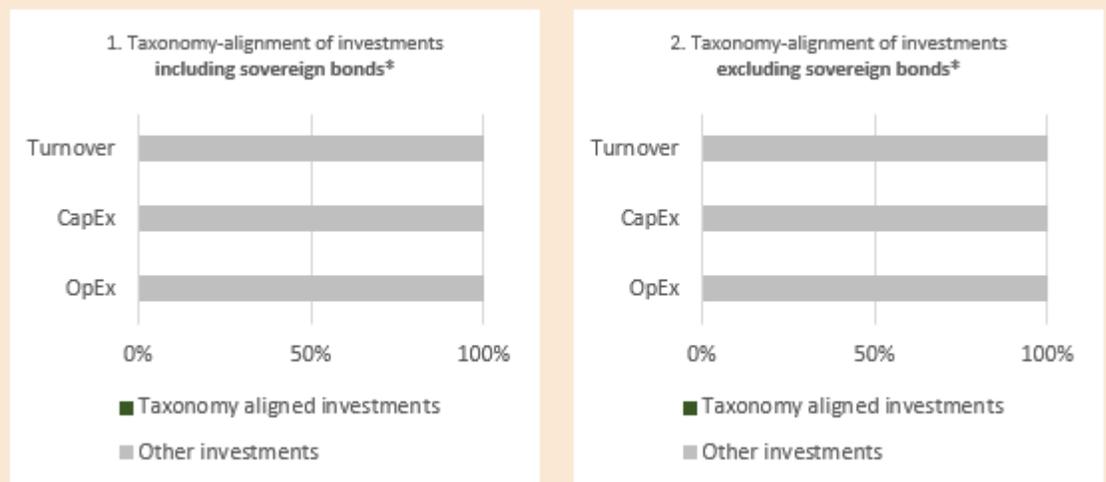

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

53.3%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may be used for liquidity and hedging purposes in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics.
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually. How PAI indicators were considered will be included in the Fund's year-end report and accounts. Further information is available on request.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The investment objective of the Fund was to replicate the performance of the MSCI Europe Islamic ESG Universal Screened Select Index.

- **How does the reference benchmark differ from a broad market index?** The Index is an equity index based on the MSCI Europe Islamic Index and which reflected Shariah investment principles and included large and mid-cap securities across 15 Developed Markets (DM) countries, as determined by the Index provider.

The Index was constructed from the Parent Index by applying the following values- and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology):

Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.

To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defined an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index. Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

- **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	8.08	8.08

Reference Benchmark - MSCI Europe Islamic Universal ESG Screened Index (EUR unhedged, Total Net Return)

- **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.08	7.67

Broad Market Index - MSCI Europe Islamic

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.2% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Japan Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.93	7.09
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	49.40	81.16

Broad Market Index - MSCI Japan

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

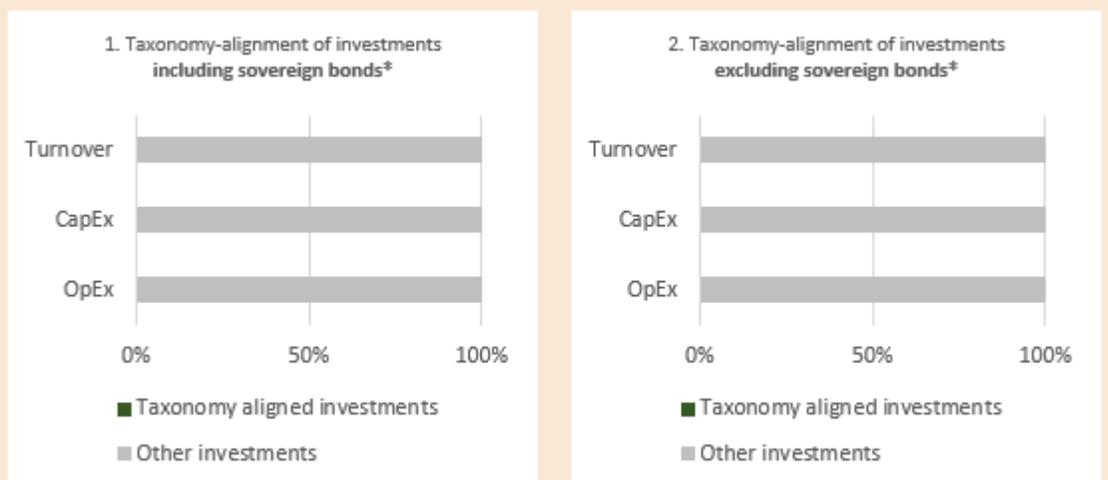

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

34.2%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI Japan Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI Japan Index, and includes large and mid-cap securities of the Japanese equity markets, as determined by the Index provider.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.93	6.93
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	49.40	49.41

Reference Benchmark - MSCI Japan Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.93	7.09
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	49.40	81.16

Broad Market Index - MSCI Japan

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> ü No</p> <p><input type="checkbox"/> ü It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.3% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> ü with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI USA Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.77	6.64
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	37.45	162.46

Broad Market Index - MSCI USA

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applies overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
APPLE INC	Information Technology	7.02%	United States of America
MICROSOFT CORP	Information Technology	5.90%	United States of America
HONEYWELL INTERNATIONAL INC	Industrials	2.48%	United States of America
AMAZON.COM INC	Consumer Discretionary	2.30%	United States of America
UNITEDHEALTH GROUP INC	Health Care	1.65%	United States of America
TESLA INC	Consumer Discretionary	1.43%	United States of America
VISA INC-CLASS A SHARES	Information Technology	1.37%	United States of America
ALPHABET INC-CL C	Communication Services	1.35%	United States of America

MCDONALD'S CORP	Consumer Discretionary	1.18%	United States of America
XYLEM INC	Industrials	1.17%	United States of America

Cash and derivatives were excluded

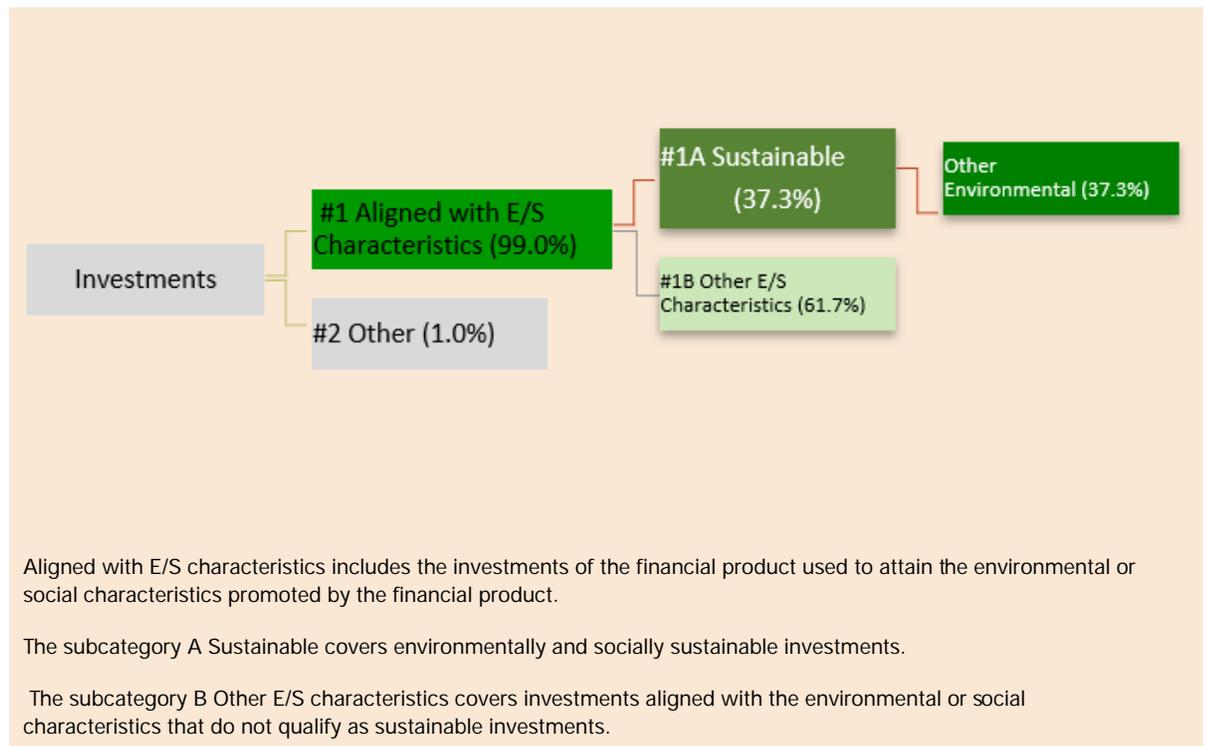

What was the proportion of sustainability-related investments?

37.3% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	30.98%

Health Care	17.34%
Industrials	12.44%
Financials	11.01%
Consumer Discretionary	10.31%
Real Estate	6.96%
Communication Services	5.62%
Consumer Staples	2.47%
Materials	1.60%
Utilities	1.27%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

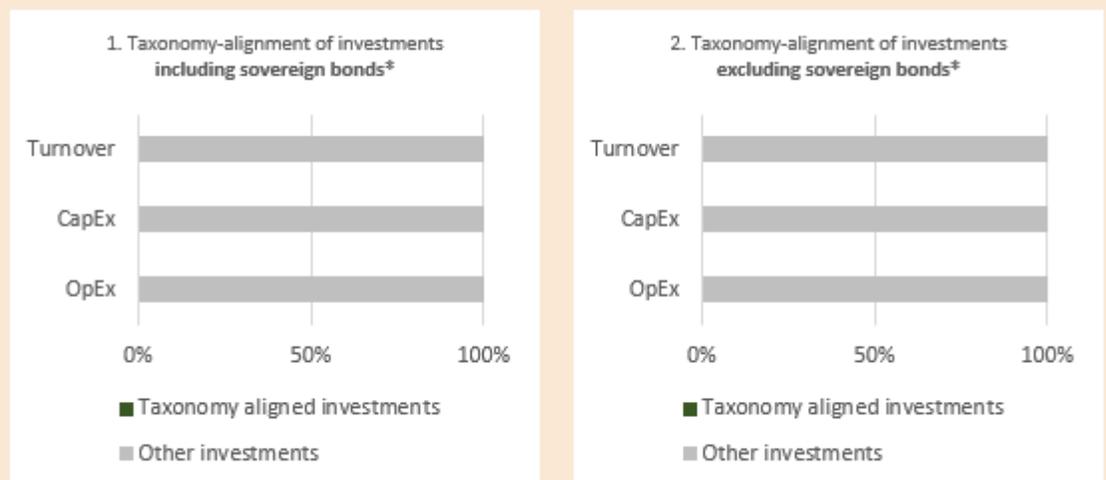

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

37.3%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI USA Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI USA Index, and includes large and mid-cap securities of the U.S. equity markets.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	6.77	6.77
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	37.45	37.39

Reference Benchmark - MSCI USA Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.77	6.64
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	37.45	162.46

Broad Market Index - MSCI USA

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.5% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI USA Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI USA Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.86	7.48

Broad Market Index - MSCI USA Islamic

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and weighting of companies to improve the exposure to companies with favourable ("ESG") ratings . By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact (“UNGC”) Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights cover. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

Cash and derivatives were excluded

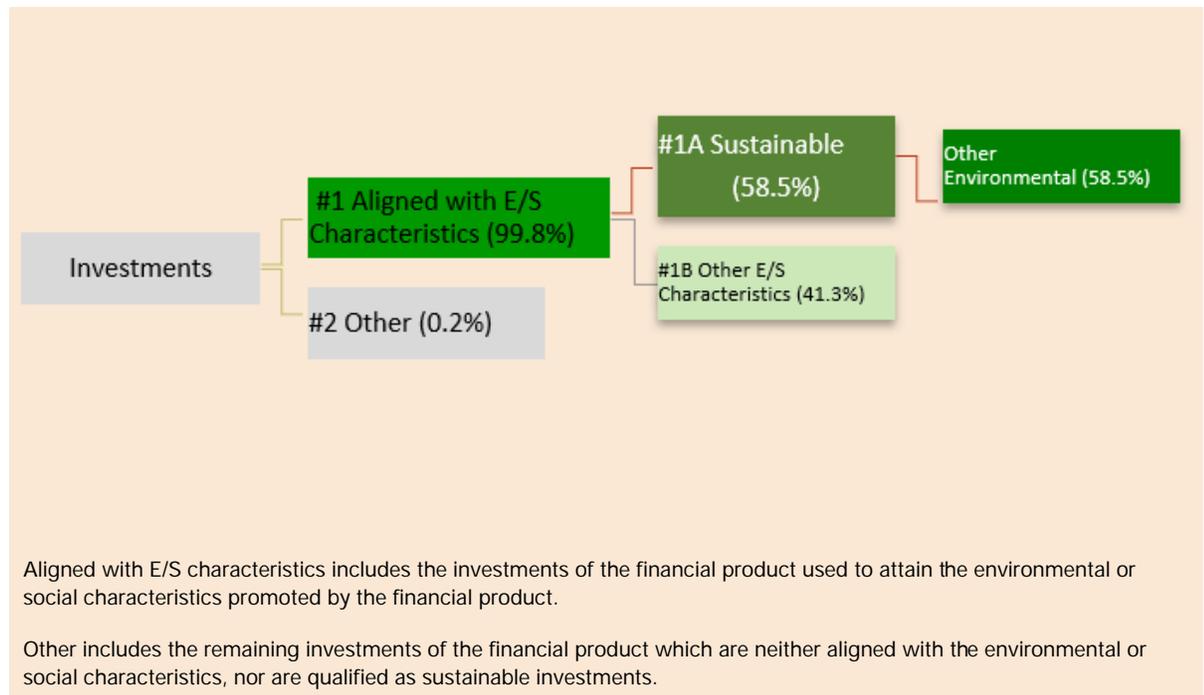

What was the proportion of sustainability-related investments?

58.5% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	41.87%
Health Care	27.34%
Consumer Staples	7.31%
Industrials	7.04%
Materials	6.77%
Consumer Discretionary	5.22%
Energy	2.34%
Real Estate	0.97%
Communication Services	0.86%
Utilities	0.29%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

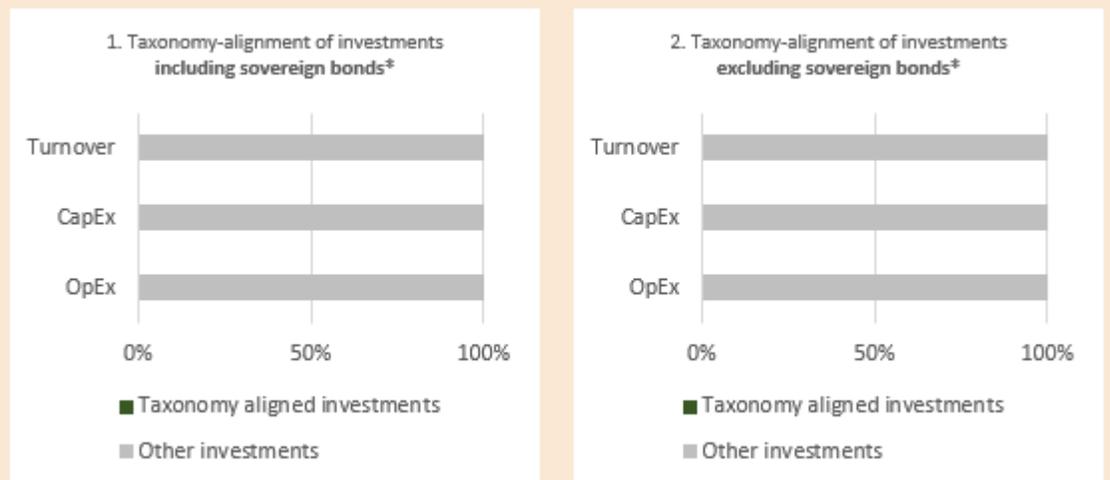

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

58.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may be used for liquidity and hedging purposes in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics.
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we have the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually. How PAI indicators were considered will be included in the Fund's year-end report and accounts. Further information is available on request.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI USA Islamic ESG Universal Screened Select Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI USA Islamic Index and which reflected Shariah investment principles and included large and mid-cap securities of the US equity markets as determined by the Index provider.

The Index was constructed from the Parent Index by applying the following values- and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology):

Each of the exclusionary criteria may apply thresholds which were defined by the Index provider and set out in the Index methodology and which may be amended from time to time.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.

To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index. Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	7.86	7.86

Reference Benchmark - MSCI USA Islamic ESG Universal Screened Index (USD unhedged, Total Net Return)

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.86	7.48

Broad Market Index - MSCI USA Islamic

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="padding-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input checked="" type="radio"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.8% of sustainable investments</p> <p style="padding-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input checked="" type="radio"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.16	6.94
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	41.48	160.86

Broad Market Index - MSCI World

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was seek to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements; incorporate the Task Force on Climate-related Financial Disclosures recommendations; and exceed the minimum standards of the EU Paris-Aligned Benchmark.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
APPLE INC	Information Technology	4.53%	United States of America
MICROSOFT CORP	Information Technology	3.78%	United States of America
AMAZON.COM INC	Consumer Discretionary	1.51%	United States of America
ALPHABET INC-CL C	Communication Services	1.41%	United States of America

VISA INC-CLASS A SHARES	Information Technology	0.79%	United States of America
TESLA INC	Consumer Discretionary	0.78%	United States of America

Cash and derivatives were excluded

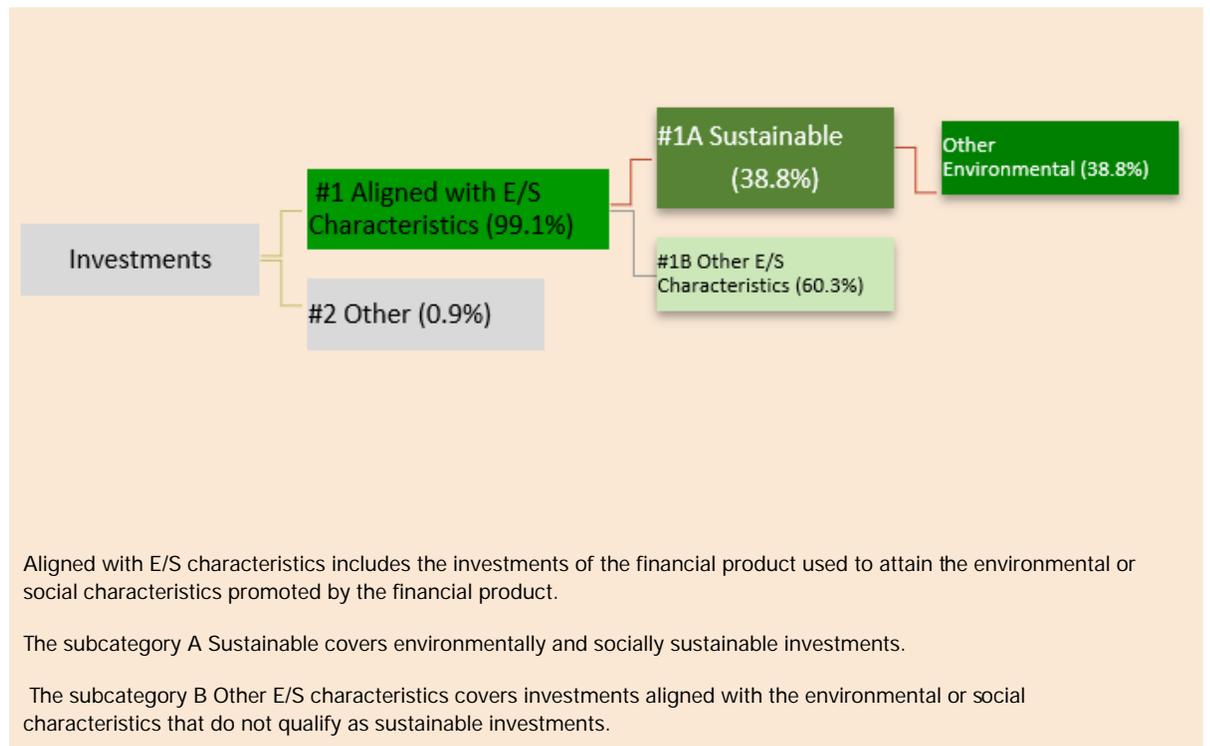

What was the proportion of sustainability-related investments?

38.8% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	24.46%

Financials	16.12%
Health Care	15.42%
Industrials	13.79%
Consumer Discretionary	8.95%
Communication Services	5.37%
Real Estate	5.14%
Consumer Staples	4.38%
Utilities	3.32%
Materials	2.87%
Energy	0.17%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

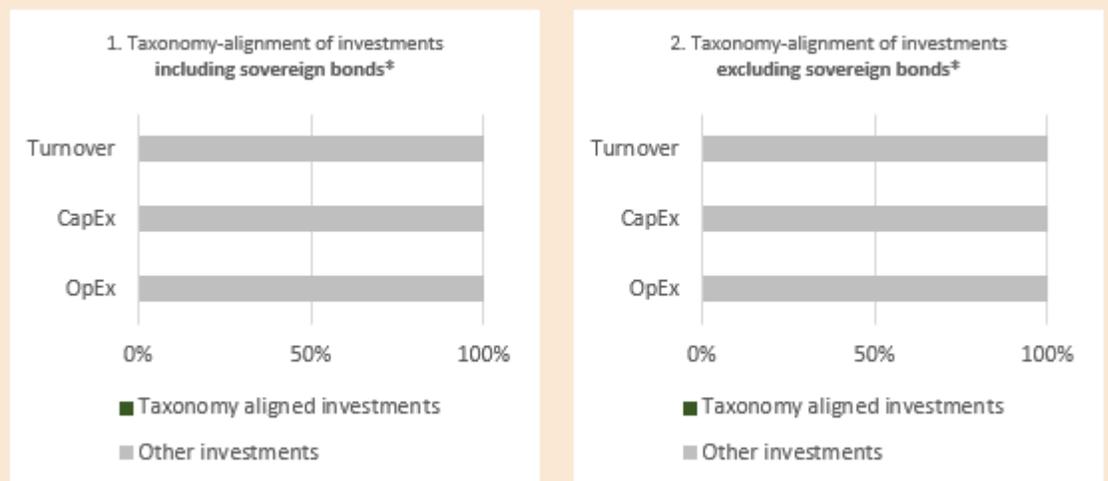

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

38.8%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI World Climate Paris Aligned Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI World Index, and includes large and midcap securities across 23 Developed Markets countries

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures “TCFD” recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act ;
- align with the recommendations of the TCFD ;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year;
- reduce the Index’s exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	7.16	7.16
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	41.48	41.57

Reference Benchmark - MSCI World
Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.16	6.94
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	41.48	160.86

Broad Market Index - MSCI World

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> ü No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.5% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI World Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.89	7.46

Broad Market Index - MSCI World Islamic

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and weighting of companies to improve the exposure to companies with favourable ("ESG") ratings . By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact (“UNGC”) Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	13.19%	United States of America
JOHNSON & JOHNSON	Health Care	3.60%	United States of America
MERCK & CO. INC.	Health Care	3.49%	United States of America
SHELL PLC	Energy	2.52%	United Kingdom
CISCO SYSTEMS INC	Information Technology	2.45%	United States of America
NOVARTIS AG-REG	Health Care	2.43%	Switzerland
DANAHER CORP	Health Care	2.28%	United States of America
PROCTER & GAMBLE CO/THE	Consumer Staples	2.25%	United States of America
PFIZER INC	Health Care	2.23%	United States of America
TESLA INC	Consumer Discretionary	2.04%	United States of America
ADOBE INC	Information Technology	1.95%	United States of America
SALESFORCE INC	Information Technology	1.64%	United States of America
ABBOTT LABORATORIES	Health Care	1.49%	United States of America
INTEL CORP	Information Technology	1.34%	United States of America
SAP SE	Information Technology	1.34%	Germany

Cash and derivatives were excluded

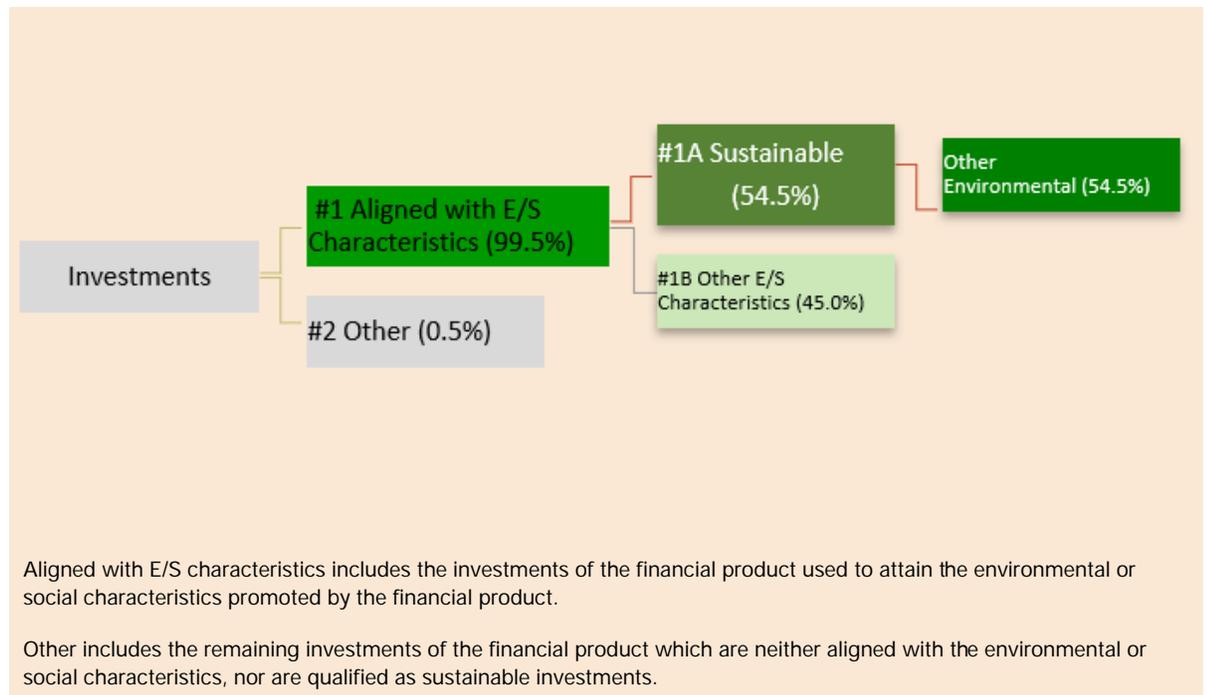

What was the proportion of sustainability-related investments?

54.5% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	29.95%
Health Care	24.21%
Industrials	11.32%
Materials	11.00%
Energy	7.24%
Consumer Staples	6.78%
Consumer Discretionary	5.68%
Real Estate	1.72%
Utilities	1.14%
Communication Services	0.94%
Financials	0.02%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

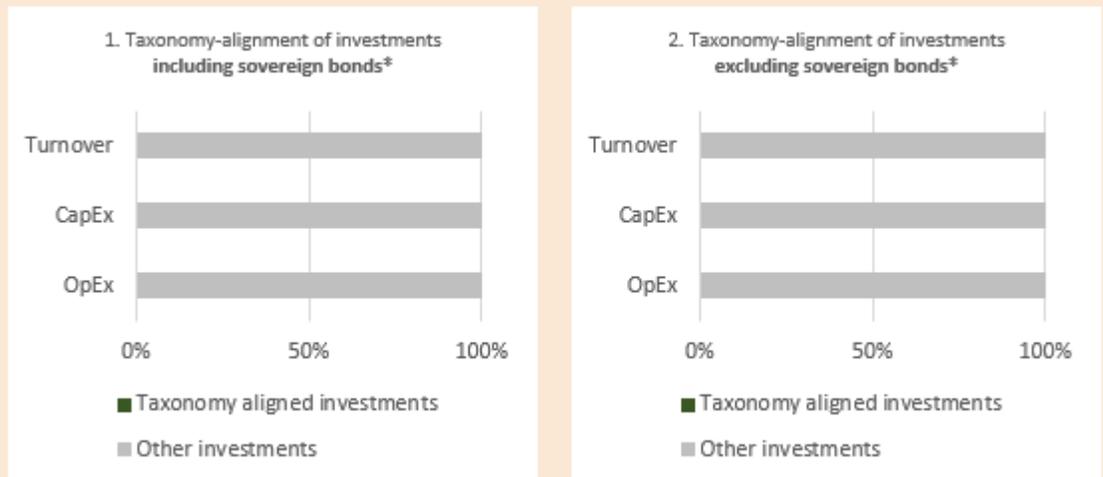

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

54.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may be used for liquidity and hedging purposes in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics.
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually. How PAI indicators were considered will be included in the Fund's year-end report and accounts. Further information is available on request.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI World Islamic ESG Universal Screened Select Index.

● **How does the reference benchmark differ from a broad market index?** The

Index is an equity index based on the MSCI World Islamic Index and which reflected Shariah investment principles and included large- and mid-cap securities across 23 Developed Markets countries as determined by the Index provider.

The Index was constructed from the Parent Index by applying the following values- and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology):

Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.

The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defined an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index. Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a semi-annual basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	7.89	7.89

Reference Benchmark - MSCI World Islamic Universal ESG Screened Index (USD unhedged, Total Net Return)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
MSCI ESG Score	7.89	7.46

Broad Market Index - MSCI World Islamic

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p>	<p><input checked="" type="radio"/> <input type="radio"/> ü No</p>
<p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.5% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Small Cap SRI ESG Universal Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics

- An improvement of the ESG rating against that of the MSCI World Index (the "Parent Index")

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which selected companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	6.90	5.63

Broad Market Index - MSCI World Small Cap

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and selection of companies to improve the exposure to companies with favourable ESG ratings.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9).

In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

In addition securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

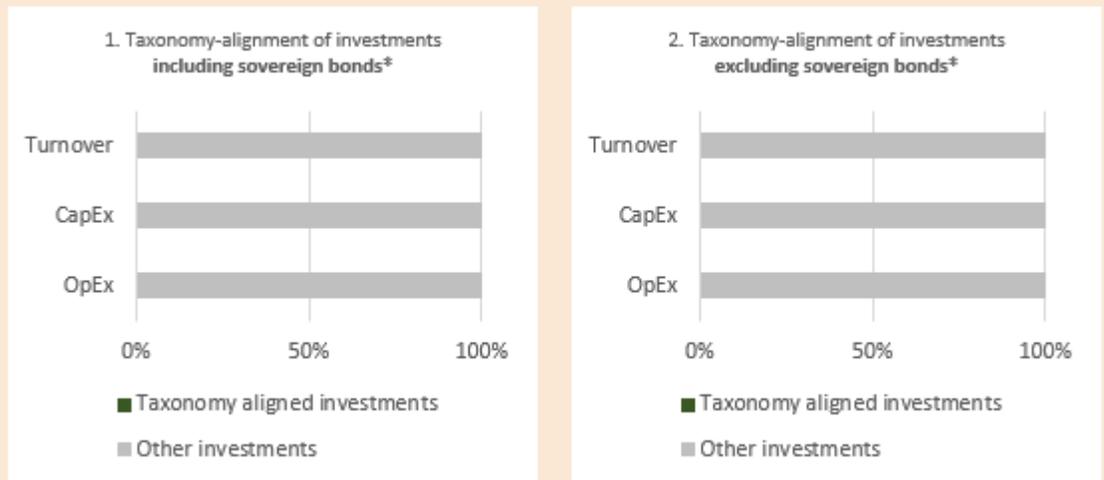

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.5%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The Index applies the MSCI ESG Leaders methodology (which is available on the Index provider's website) to achieve its ESG objective by only selecting companies that have the highest MSCI ESG Ratings, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as

part of the investment process and covered relevant ESG issues in their research and discussions. We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI World Small Cap SRI ESG Leaders Select Index.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI World Small Cap Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider's criteria on free-float adjustment, size & liquidity. The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time): Furthermore, the Index applied the MSCI ESG Leaders methodology (which is available on the Index provider's website) to achieve its ESG objective.

To achieve this, the Index provider applied the following steps:

i. After application of exclusionary criteria, securities are then weighted and ranked on the basis of their ESG score (as determined by the MSCI ESG Leaders scoring system);

iii. Securities are then selected in the following order until the target 50% coverage of the sectors included in the Parent Index is reached;

a. Firstly, securities in the top 35% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 35%; b. then, 'AAA' and 'AA' rated securities in the top 50% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 50%; c. then, current Index constituents in the top 65% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 65% if that security is a current Index constituent; and d. lastly, the remaining eligible securities in the ranked universe.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="padding-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.0% of sustainable investments </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 40px;"> <input type="checkbox"/> with a social objective </p> <p style="padding-left: 20px;"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Value SRI ESG Target Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics

- an improvement of the ESG rating against that of the MSCI World Index (the "Parent Index")

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and improved the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.28	6.86

Broad Market Index - MSCI World Enhanced Value

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and to improve the exposure to companies with favourable ESG ratings .

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlights each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlights each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9).

In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

In addition securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

Large Investment	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	5.86%	United States of America
APPLE INC	Information Technology	3.03%	United States of America
ADOBE INC	Information Technology	2.40%	United States of America
ELEVANCE HEALTH INC	Health Care	2.36%	United States of America

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

MERCK & CO. INC.	Health Care	2.33%	United States of America
CIGNA CORP	Health Care	2.30%	United States of America
PFIZER INC	Health Care	2.22%	United States of America
HOME DEPOT INC	Consumer Discretionary	2.16%	United States of America
CVS HEALTH CORP	Health Care	2.14%	United States of America
SONY GROUP CORP	Consumer Discretionary	2.12%	Japan
GILEAD SCIENCES INC	Health Care	2.04%	United States of America
CISCO SYSTEMS INC	Information Technology	2.04%	United States of America
INTEL CORP	Information Technology	2.03%	United States of America
BRISTOL-MYERS SQUIBB CO	Health Care	2.01%	United States of America
CITIGROUP INC	Financials	1.90%	United States of America

Cash and derivatives were excluded

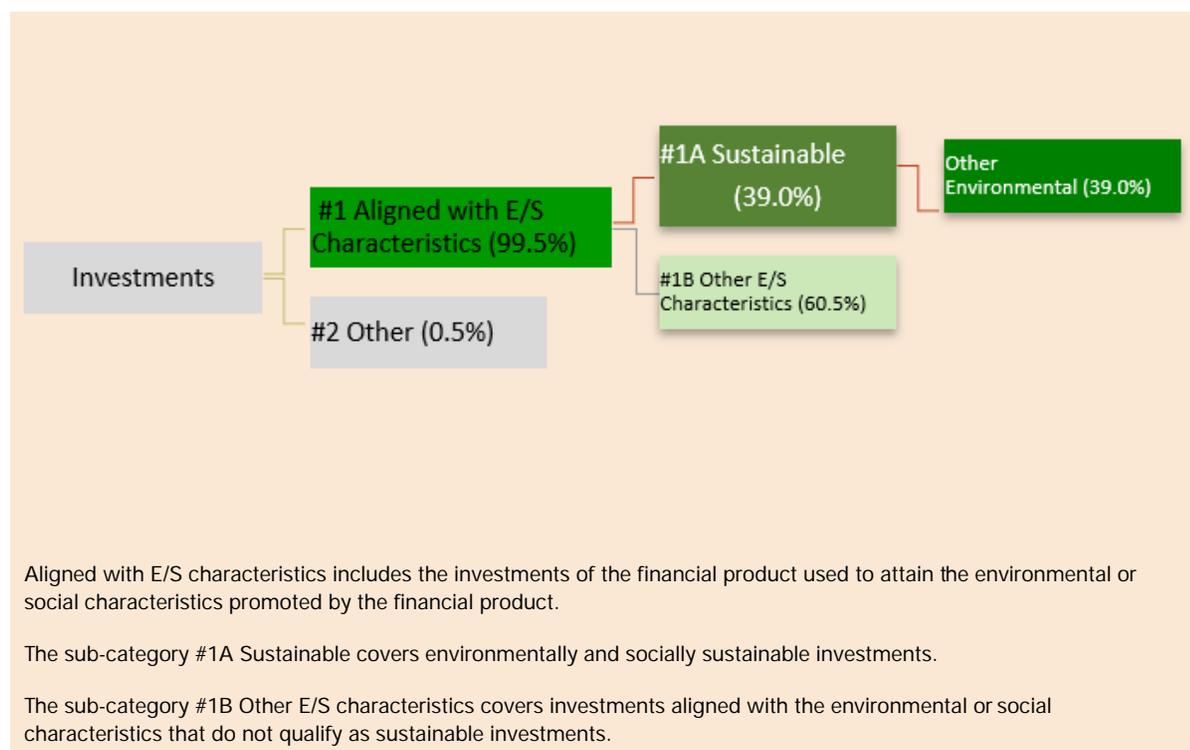

What was the proportion of sustainability-related investments?

39.0% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	24.92%
Health Care	19.77%
Financials	13.95%
Consumer Discretionary	13.02%
Industrials	10.63%
Consumer Staples	6.73%
Communication Services	3.68%
Materials	3.28%
Real Estate	2.05%
Energy	1.33%
Utilities	0.64%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

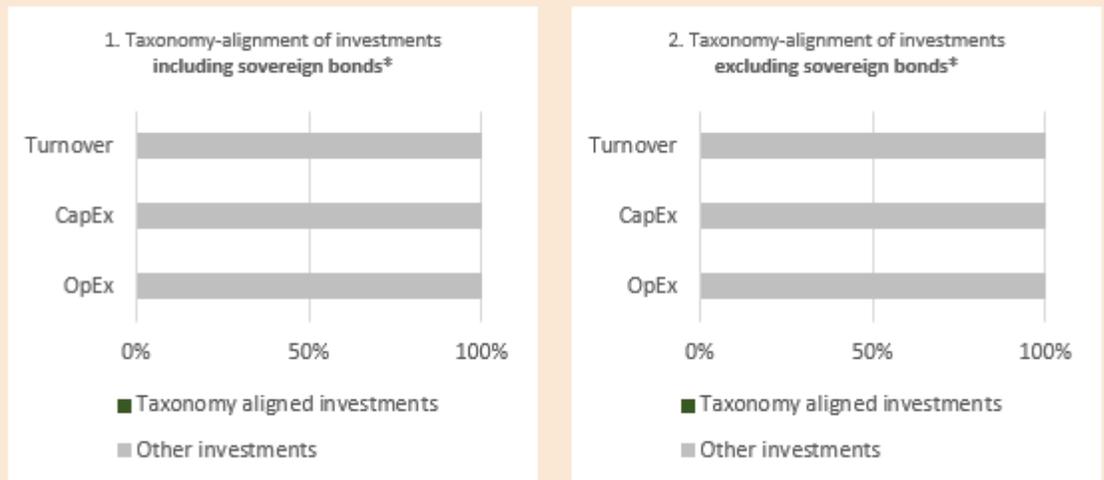

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A - the Fund is not investing in transitional or enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reporting period for the fund, no comparison is required.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

39.0%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The Index applies the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.

Furthermore, active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was

also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The investment objective of the Fund was to replicate the performance of the MSCI World Value SRI ESG Target Select Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider.

The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).

Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index.

In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index. The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprises those securities providing maximum exposure to the Value Factor.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund has been investing in the constituents of the Index in generally the same proportions in which they are included in the Index. The composition of the Index is rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by MSCI Inc.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
MSCI ESG Score	8.28	8.28

Reference Benchmark - MSCI World Value SRI ESG Target Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
MSCI ESG Score	8.28	6.86

Broad Market Index - MSCI World Enhanced Value

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> ü No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input checked="" type="radio"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.2% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="radio"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE UK ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.34	3.97
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	75.02	127.73
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	4,051.70	6,782.73

Broad Market Index - FTSE UK

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
GSK PLC	Health Care	10.40%	United Kingdom
DIAGEO PLC	Consumer Staples	9.67%	United Kingdom
BARCLAYS PLC	Financials	9.61%	United Kingdom
LONDON STOCK EXCHANGE GROUP	Financials	8.44%	United Kingdom
UNILEVER PLC	Consumer Staples	6.75%	United Kingdom
GLENCORE PLC	Materials	5.50%	Switzerland
RECKITT BENCKISER GROUP PLC	Consumer Staples	4.81%	United Kingdom
BURBERRY GROUP PLC	Consumer Discretionary	4.12%	United Kingdom
VODAFONE GROUP PLC	Communication Services	4.11%	United Kingdom
ASTRAZENECA PLC	Health Care	3.65%	United Kingdom

Cash and derivatives were excluded

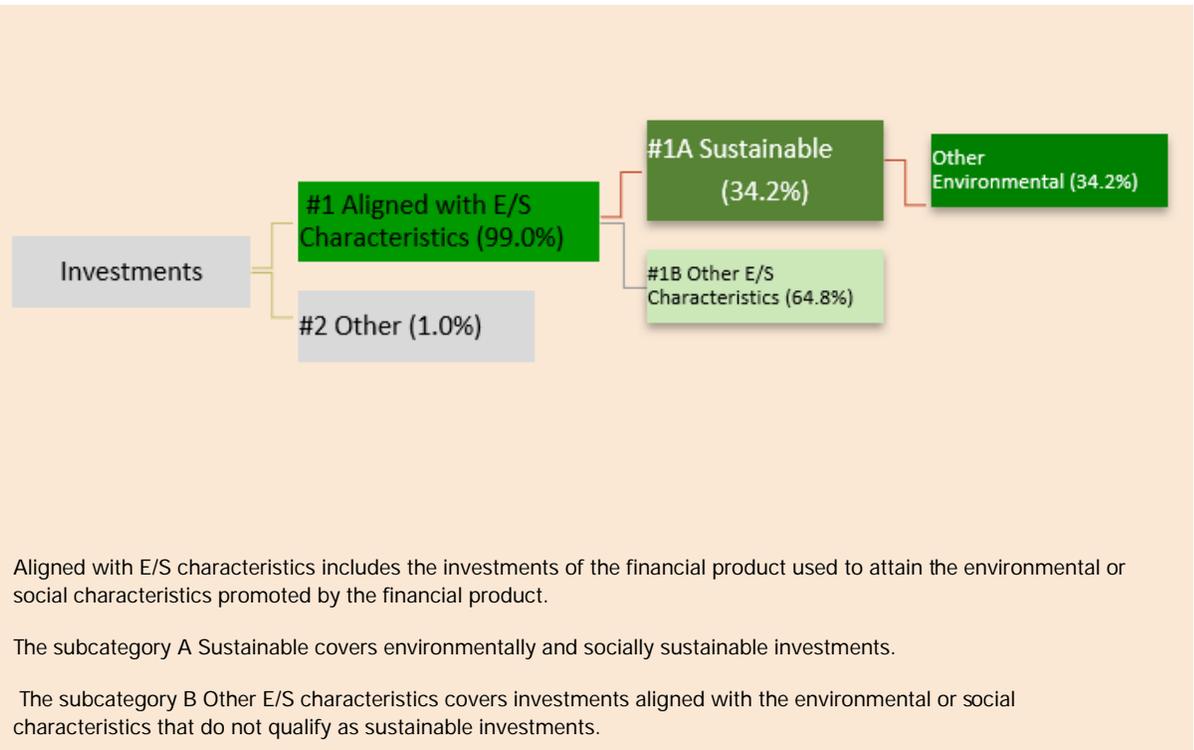

What was the proportion of sustainability-related investments?

34.2% of the portfolio was invested in sustainable assets.

● *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The subcategory A Sustainable covers environmentally and socially sustainable investments.

The subcategory B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Staples	23.54%
Financials	20.67%
Health Care	14.18%
Materials	13.55%
Consumer Discretionary	10.08%
Communication Services	8.22%
Information Technology	3.62%
Industrials	2.53%
Real Estate	2.40%
Utilities	0.84%
Energy	0.36%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

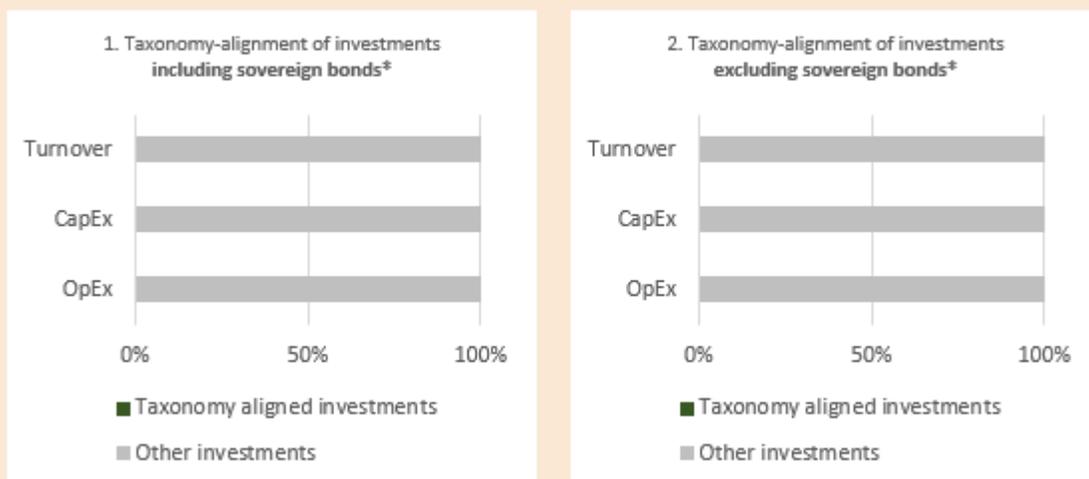

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

34.2%

 **What was the share of socially sustainable investments?**

N/A. The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy - Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE UK ESG Low Carbon Select Index while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE UK Index and aimed to measure the performance of companies in the United Kingdom as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the FTSE UK ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
FTSE ESG Score	4.34	4.34
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	75.02	75.05
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	4,051.70	4,089.80

Reference Benchmark - FTSE UK ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	4.34	3.97
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	75.02	127.73
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	4,051.70	6,782.73

Broad Market Index - FTSE UK

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.6% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE USA ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE USA Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	3.94	3.31
Carbon Emissions as measured as Carbon Intensity (CO2e/USDmn revenue)	79.78	161.78
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	243.95	505.04

Broad Market Index - FTSE USA

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria. By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts ("PAI") metrics and were used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics against the Parent Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider’s website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sustainable investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
JOHNSON & JOHNSON			United States of America
MICROSOFT CORP	Information Technology	9.15%	United States of America
APPLE INC	Information Technology	6.12%	United States of America
VISA INC-CLASS A SHARES	Information Technology	3.39%	United States of America

COCA-COLA CO/THE	Consumer Staples	1.24%	United States of America
VERIZON COMMUNICATIONS INC	Communication Services	1.12%	United States of America

Cash and derivatives were excluded

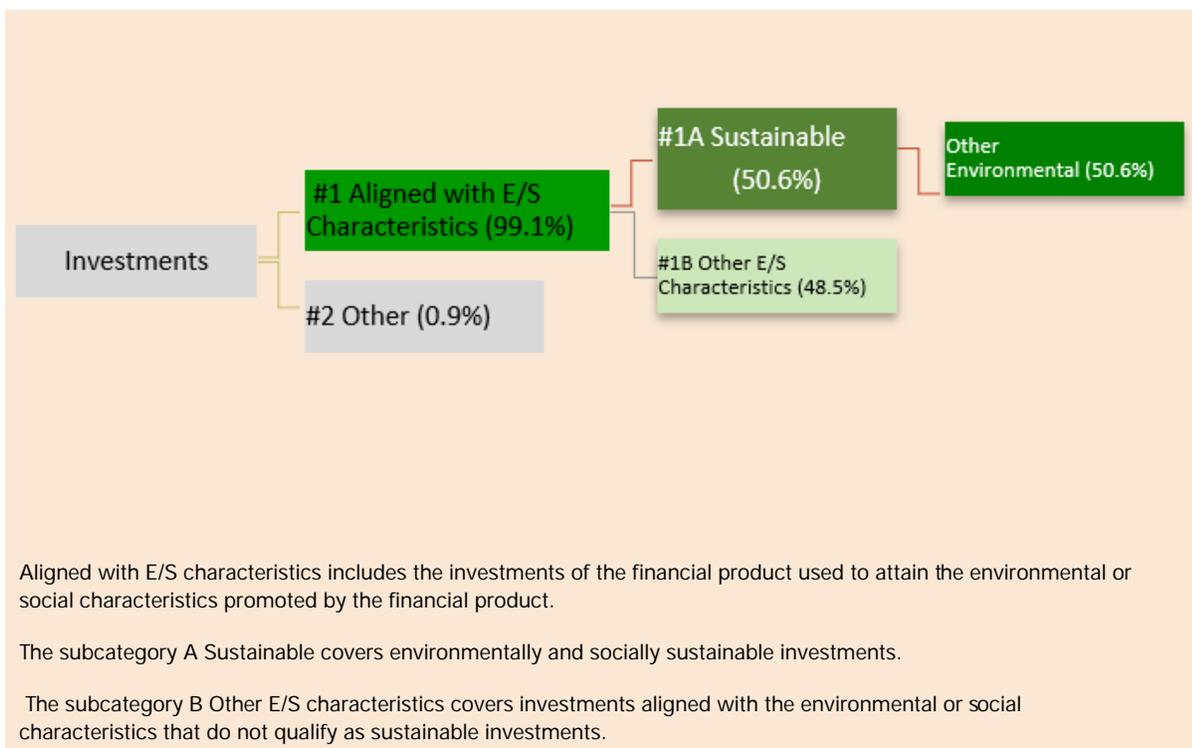

What was the proportion of sustainability-related investments?

50.6% of the portfolio was invested in sustainable assets.

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	% Assets
Information Technology	34.55%
Health Care	21.12%
Financials	12.84%
Consumer Discretionary	7.39%
Consumer Staples	7.39%
Communication Services	4.54%
Industrials	4.03%
Energy	3.23%
Materials	2.98%
Real Estate	1.34%
Utilities	0.57%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

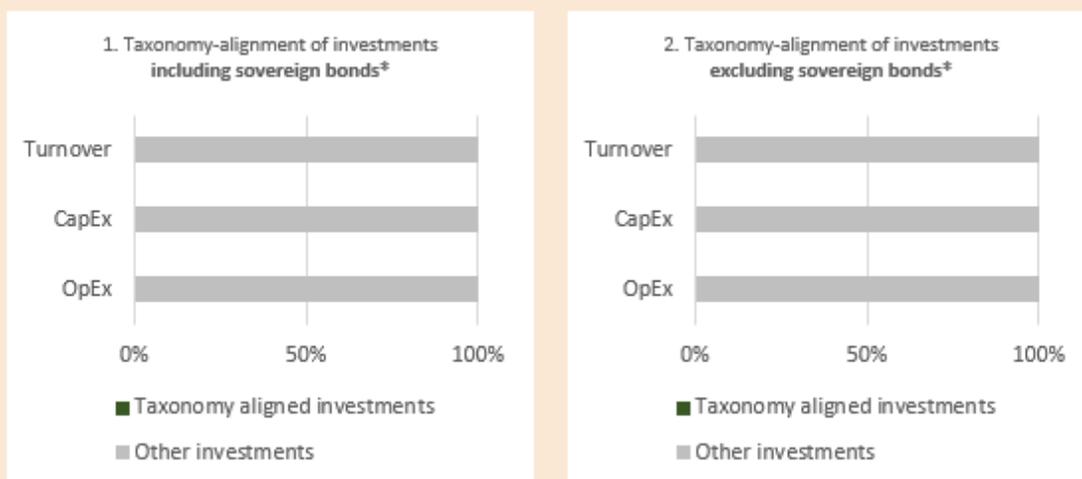

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

50.6%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had a clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the FTSE USA ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE USA Index and aimed to measure the performance of companies in the United States as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the FTSE USA ESG Low Carbon Select Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
FTSE ESG Score	3.94	3.94
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	79.78	79.84
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	243.95	246.34

Reference Benchmark - FTSE USA ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
FTSE ESG Score	3.94	3.31
Carbon Emissions as measured as Carbon Intensity (CO ₂ e/USDmn revenue)	79.78	161.78
Fossil Fuel Reserves Intensity (mn tonnes/ USDmn Market Cap)	243.95	505.04

Broad Market Index - FTSE USA

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> Yes </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It made sustainable investments with an environmental objective: _____% </p> <p style="padding-left: 20px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It made sustainable investments with a social objective: _____% </p>	<p style="text-align: center;"> <input checked="" type="radio"/> <input type="radio"/> No </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 26.3% of sustainable investments </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </p> <p style="padding-left: 20px;"> <input type="checkbox"/> with a social objective </p> <p style="padding-left: 10px;"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments </p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Euronext ESG Biodiversity Screened World USD Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Biodiversity; and
- ESG

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

● **How did the sustainability indicators perform?**

Indicator	Fund	Broad Market Index
Sustainalytics ESG Score	17.30	21.56
Biodiversity Score	-1,058.93	-6,533.48

Broad Market Index - Euronext World Index

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes
2. Companies that demonstrated qualitative alignment and/or convergence with UNSDGs or sustainable themes (e.g. Circular Economy)
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives)
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds)

The Fund replicated the performance of the Index, the focus of which was to exclude companies which were deemed to have the worst impact on biodiversity, within their sector and remove companies with the worst 25% ESG Risk score rating against that of the Parent Index.

By replicating the performance of the Index, the investments of the Fund contributed to these sustainable objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis was completed by the Index provider as part of the Index construction.

The Index was re-balanced periodically during the reporting period; prior to the re-balance of the Index the indicators referred to below were incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund did not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring screened for any investments that caused significant harm to the objectives and which could have resulted in divestment by the Investment Manager ahead of the index re-balancing.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators were used in the assessment of business activities of the initial universe of securities prior to the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Index was constructed using data on each security's business involvement. The data was aligned to quantified environmental pressures: Climate Change, Land use, Air pollution and Water pollution. This along with mean species abundance, as a measure of biodiversity, created a Corporate Biodiversity Footprint ("CBF") score. The Index removed securities that had a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score aligned to PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8). Additional screens covering controversial and conventional weapons (PAI 14), Pesticide production, Thermal coal mining and generation, Oil & Gas, were also applied before the final Index was calculated. The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens are being adhered to.

Further information on the Fund's CBF score is available on request.

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

As per the below, through the Index's norms based screening, Global Standard Screening, a broad range of international norms and standards were covered, including: UNGC, UN Guiding Principles on Business and Human Rights (UNGPs), OECD Guidelines for Multinational Enterprises and Related Conventions.

Further information on benchmark, data and standards used can be found on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using data on each security business involvement. The data was aligned to quantified environmental pressures: Climate Change, Land use, Air pollution and Water pollution.

This along with mean species abundance, as a measure of biodiversity, created a Corporate Biodiversity Footprint (CBF) score.

The Index removed securities that have a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score considered PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact (“UNGC”) principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8).

Additional screens covering controversial and conventional weapons (PAI 14), Emissions to water (PAI 8), Thermal coal mining and generation, Oil & Gas, were also applied before the final Index is calculated.

The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens were being adhered to.

Information on the Fund’s CBF score is available on request.

Further information relating to Iceberg Data Lab’s Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Large Investment	Sector	% Assets	Country
UNITEDHEALTH GROUP INC	Health Care	3.14%	United States of America

Cash and derivatives were excluded

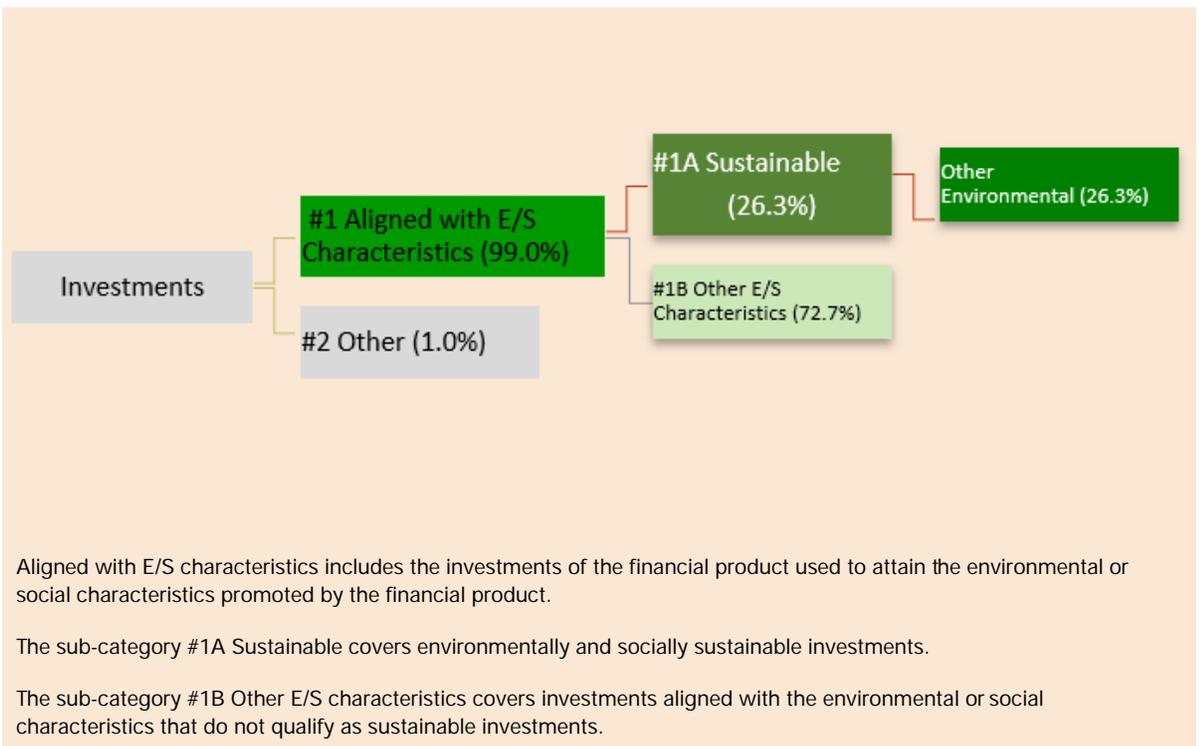

What was the proportion of sustainability-related investments?

26.3% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.44%

Financials	21.11%
Industrials	12.94%
Consumer Discretionary	7.71%
Communication Services	7.43%
Health Care	6.61%
Real Estate	5.43%
Consumer Staples	2.44%
Materials	2.21%
Utilities	1.71%
Energy	0.95%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the fund did not make sustainable investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

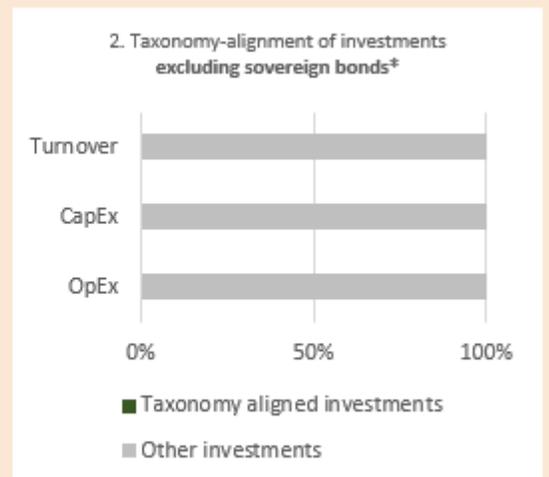

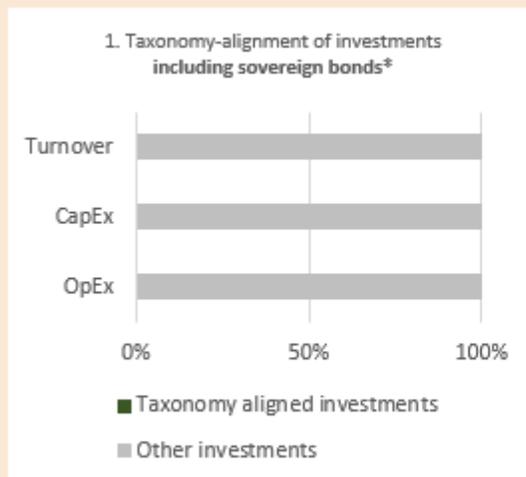

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the Fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this is the first reporting period for the fund, no comparison is required.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.3%

What was the share of socially sustainable investments?

N/A. The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

There are no minimum environmental or social safeguards for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed. The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In replicating the performance of the Index, the Fund promoted certain environmental, social and/or governance characteristics and had been categorised as an Article 8 fund for the purpose of SFDR.

The Index was an equity index based on the Parent Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity within their sector (listed below).

The remaining companies in the Parent Index after the application of the above exclusionary criteria were eligible for inclusion in the Index. The eligible companies were ranked by free float market capitalisation, with the 500 highest ranked companies being selected for the Index. In case less than 500 companies were eligible after the eligibility screenings, all remaining companies are selected for the Index.

Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request.

Furthermore active ownership, through engagement and global proxy voting, was a key pillar of our approach to responsible investments. Our stewardship activity was focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we had the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We had a dedicated stewardship team with engagement specialists. Engagement was also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and covered relevant ESG issues in their research and discussions.

We were fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How did this financial product perform compared to the reference benchmark?

The Fund aimed to replicate the net total return performance of the Euronext ESG Biodiversity Screened World USD Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the Euronext World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity, within their sector.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index. The composition of the Index was rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by Euronext Paris. Further information about the Index, its components, its rebalancing frequency and its performance is available at: live.euronext.com.
