02	Report of the Authorised Corporate Director (the "Manager")*
	Invesco American Investment Series (the "Company")

* These collectively comprise the Authorised Corporate Director's Report.

The Company

The Invesco American Investment Series is an openended investment company with variable capital ("ICVC"), incorporated in England and Wales on 8 May 2003 under registered number IC224.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority ("FCA") authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 August 2023, the Company consisted of two Funds:

Invesco Emerging Markets ex China Fund (UK) Invesco US Equity Fund (UK)

Accounting Periods

Annual accounting date31 AugustInterim accounting date28 FebruaryDistribution payable on31 October

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Launch of New 'M' Share Classes

New share classes, M Accumulation shares and M Income shares were launched at 200p per share for the Invesco Emerging Markets ex China Fund (UK) on 24 March 2023.

Further details can be obtained from the most up to date relevant fund and share class specific Key Investor Information Document(s).

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority ("ESMA") Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2022, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS Schemes it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS Schemes it manages. The Remuneration Policy is available within the Corporate Policies section of our website (www.invesco.com/ uk). Paper copies of the Remuneration Policy can also be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2022 to 31 December 2022) is £49.51m of which £30.39m is fixed remuneration and £19.12m is variable remuneration. The number of beneficiaries apportioned to UK UCITS activities is 255.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2022 to 31 December 2022) is £14.91m of which £3.62m is paid to Senior Management and £11.29m is paid to other Identified Staff. Please note that remuneration for UK UCITS Schemes Identified Staff includes remuneration for staff employed by delegates.

Accumulation shares Accumulation shares (No Trail) Z Accumulation shares Y Accumulation shares M Accumulation shares Income shares Income shares (No Trail) Z Income shares Y Income shares M Income shares

Invesco US Equity Fund (UK)

Accumulation shares Accumulation shares (No Trail) Z Accumulation shares Y Accumulation shares

The prices of shares will appear on our website (www.invesco.com/uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

Managing the risks presented by the Russia-Ukraine conflict

Financial markets have been impacted since February 2022, due primarily to geopolitical tensions arising from Russia's incursion into Ukraine and the impact of a subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. On 28 February 2022, Invesco Fund Managers Limited suspended the purchase of all Russian securities in its funds. As at 31 August 2023, no Funds held any Russian securities. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Silicon Valley Bank, Signature Bank and Credit Suisse

Following the closure of Silicon Valley Bank ("SVB"), the possession of Signature Bank and the recent economic turmoil involving Credit Suisse, the Manager has assessed the impact on the net asset value of the Funds as immaterial.

As at 31 August 2023, none of the Funds were invested in SVB, Signature Bank or Credit Suisse.

Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Reports

For each Fund, we publish a Task Force on Climaterelated Financial Disclosures ("TCFD") Portfolio Report which provides detailed climate-related information on the Fund. You can access these reports directly on our website via the following link: www.invesco.com/uk/icvctcfd. These reports, in conjunction with our group-level TCFD report https:// www.invesco.com/content/dam/invesco/emea/en/ pdf/2022_IVZ_Global_TCFD_Report.pdf, provide a detailed overview of our approach to climate-related governance, strategy and risk management as well as metrics and targets. We encourage all investors in the Funds to review these reports to gain a deeper understanding of our commitment to managing climate-related risks and opportunities.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Funds' performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Funds. The Manager, however, will ensure that the use of derivatives within the Funds does not materially alter the overall risk profile of the Funds.

The Invesco Emerging Markets ex China Fund (UK) invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

Although the Invesco Emerging Markets ex China Fund (UK) does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Fund may carry a higher degree of risk than a Fund which invests in a broader range of companies or takes smaller positions in a relatively large number of holdings.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Value Assessment (Unaudited)

The Manager conducted an assessment of value for each Fund. The assessment of value report will be made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website https://www.invesco.com/uk/en/globalfooter/corporate-policies.html. The latest Value Assessment as at 31 December 2022 was published in May 2023.

Holdings in other Funds of the Company

As at 31 August 2023, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

Liability continued

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Director - Rene Marston

Director - Matthieu Grosclaude

12 December 2023

Risk and Reward Profiles

for the year 1 September 2022 to 31 August 2023

Invesco Emerging Markets ex China Fund (U						
Lower Risk	Higher Risk					
Typically lower rewards	Typically higher rewards					

1	2	3	4	5	6	7

Invesco US Equity Fund (UK)

Lower Ris	sk			Hi	igher Risk	
Typically	Typically lower rewards			Туріса	ally highe	r rewards
1	2	3	4	5	6	7

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents ("KIIDs"), which are available at www.invesco.com/uk or by contacting us.

Securities Lending (Unaudited)

for the year 1 September 2022 to 31 August 2023

Securities Lending

Securities lending transactions entered into by the Funds, including transfer of collateral received in exchange for securities lent, are subject to a written legal agreement between Invesco Asset Management Limited (the "investment adviser", on behalf of the Funds); Citibank UK Limited (the "Depositary"); and The Bank of New York Mellon, London Branch (the "Securities Lending Agent").

Collateral received is segregated from the assets belonging to the Depositary or the Securities Lending Agent.

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and Net Asset Value ("NAV") as at 31 August 2023. The income earned from securities lending is also shown for the year ended 31 August 2023. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan

Fund	% of lendable assets	% of NAV	£'000
Invesco Emerging Markets ex China Fund (UK)	2.29	1.65	2
Invesco US Equity Fund (UK)	0.95	0.92	38

The Funds entered into the securities lending programme on 10 February 2021.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

The following table details the value of securities on loan and associated collateral received, analysed by counterparty as at 31 August 2023.

	Securities Lending					
Counterparty	Counterparty's country of establishment	Amount on loan £'000	Collateral received £'000			
Invesco Emerging Markets ex China Fund (UK)						
HSBC Bank	UK	1,586	1,768

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and exchange traded funds ("ETFs") received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 August 2023, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds (or through its delegates).

Securities Lending (Unaudited) for the year 1 September 2022 to 31 August 2023

Collateral continued

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Funds by way of the title transfer collateral arrangement across securities lending transactions as at 31 August 2023.

1 Accounting Policies

	Basis of preparation
	The financial statements have been prepared on a going concern basis, under the historical cost
	convention as modified by the revaluation of certain financial assets and liabilities held at fair
	value through profit and loss. The financial statements have also been prepared in accordance
	with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within
	the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice
	'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment
	Management Association (now known as the Investment Association) in May 2014 and updated
	in June 2017, the COLL and the Company's Instrument of Incorporation and Prospectus.
b)	Recognition of revenue
i)	Dividends on quoted ordinary shares and preference shares are recognised when the securities
1)	are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when
•••	they are declared.
ii)	Interest on bank balances and deposits is recognised on an accruals basis.
iii)	Revenue arising on debt securities is accreted or amortised over the life of such securities and
	recognised at a consistent rate over the life of the instrument (effective yield accounting).
	Future cash flows on all debt securities are considered when calculating revenue on an effective
	yield basis and where purchase costs are considered to reflect incurred credit losses, such losse
	are taken into account so that interest is recognised at a reasonably expected commercial rate.
	Accrued interest purchased and sold on interest-bearing securities is excluded from the capital
	cost of these securities and dealt with as part of the revenue of the Company.
iv)	All revenue is recognised at a gross amount that includes any withholding taxes but excludes an
	other taxes, such as attributable tax credits.
v)	US REIT dividend revenue is accounted for partly as revenue and partly as capital, depending or
,	the underlying REIT distribution. All REIT dividend revenue is recognised on an accruals basis
	and the allocation between income and capital is estimated when the security goes ex-dividend.
	US REITs issue information on the revenue/capital split of these dividends on an annual basis
	based on the calendar year. When this information is received, then the estimated allocation is
	adjusted accordingly.
vi)	Income earned from securities lending transactions is split between the relevant Fund and the
,	Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities
	lending revenues generated as compensation for its securities lending services and the Fund
	shall be entitled to the remainder of such net securities lending revenues.
c)	Stock dividends
	Ordinary stock dividends are recognised wholly as revenue and are based on the market value o
	the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the
	amount by which the market value of the shares on the date they are quoted ex-dividend
	exceeds the cash dividend is taken to capital.
d)	Special dividends and share buy-backs
u)	The underlying circumstances behind both special dividends and the proceeds from share
	buybacks are reviewed on a case by case basis in determining whether the amount is capital or
	revenue in nature. Amounts recognised as revenue will form part of the Fund's distribution. Any
	tax treatment thereon will follow the accounting treatment of the principal amount.
e)	Underwriting commission
	Underwriting commission is wholly recognised as revenue when the issue takes place, except
	where the Company is required to take up all or some of the shares underwritten, in which case
f)	an appropriate proportion of the commission received is deducted from the cost of those share: Expenses
f)	an appropriate proportion of the commission received is deducted from the cost of those share
F)	an appropriate proportion of the commission received is deducted from the cost of those share Expenses All expenses, except for those relating to the purchase and sale of investments are charged
f)	an appropriate proportion of the commission received is deducted from the cost of those share. Expenses
·	an appropriate proportion of the commission received is deducted from the cost of those share Expenses All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis. Revenue allocation to share classes
·	an appropriate proportion of the commission received is deducted from the cost of those share Expenses All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis. Revenue allocation to share classes Revenue is allocated each day pro rata to the capital value of assets attributable to each class
·	an appropriate proportion of the commission received is deducted from the cost of those share Expenses All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis. Measurement basis The measurement basis used in preparing the financial statements is fair value for investments

Invesco American Investment Series (the "Company") Notes applicable to the financial statements of all Funds

1 Accounting Policies continued i) Basis of valuation of investments continued All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. j) **Exchange rates** Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments. k) Taxation and deferred taxation Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on an accruals basis. 1) **Efficient portfolio management** Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Interest payable and similar charges' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value **Dilution adjustment** m) The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco American Investment Series: - where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or - where the Manager considers it necessary to protect the interests of the Shareholders of the Company. On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question. Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as dividend distributions.

Invesco American Investment Series (the "Company") Notes applicable to the financial statements of all Funds

2 Distribution Policies continued

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

3 Shareholders' Funds

The Manager's entry charge and Fund Management Fee ("FMF") are as follows:

		Entry charge %	Fund Management Fee %
Invesco Emerging Markets ex China Fund (UK)	- Trail classes	0.0	1.75
	 No Trail classes 	0.0	1.25
	- Z classes	0.0	1.00
	- Y classes	0.0	0.95
	- M classes	0.0	0.65
Invesco US Equity Fund (UK)	- Trail classes	0.0	1.50
	 No Trail classes 	0.0	1.00
	- Z classes	0.0	0.75
	- Y classes	0.0	0.70

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each share class are shown in the comparative tables of each Fund. These can be found on:

Invesco Emerging Markets ex China Fund (UK)	pages 19 to 23
Invesco US Equity Fund (UK)	pages 38 to 39

Each share class has the same rights on a winding up of the Company.

4 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from their operations. Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty's operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm's trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Currency exchange risk

The Funds' assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Interest rate risk

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise. Conversely, bond prices generally rise as interest rates fall. Specific bonds differ in their sensitivity to changes in interest rates depending on their individual characteristics. One measure of this sensitivity is called duration. The longer the duration of a particular bond, the greater its price sensitivity is to interest rate. Similarly, a longer duration portfolio of securities has greater price sensitivity. Falling interest rates may also prompt some issuers to refinance existing debt, which could affect the Fund's performance.

Investing in a concentrated portfolio

Certain Funds may have concentrated portfolios (holding a limited number of investments and/or large positions in relatively small number of stocks). If one or more of those investments decline or are otherwise adversely affected, it may have a more pronounced effect on the Fund's net asset value than if a larger number of investments were held or if the Fund had fewer larger positions. Accordingly they may carry a higher degree of risk and NAV volatility than a Fund which invests in a broad range of companies and/or does not take large positions in a relatively small number of stocks.

Investment in Emerging Markets

Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets. The following is a brief summary of some of the more common risks associated with emerging markets investment:

Lack of Liquidity

The acquisition and disposal of securities may be more expensive, time-consuming and generally more difficult than in more developed markets. Many emerging markets are small, have low trading volumes, low liquidity and significant price volatility.

Settlement and Custody Risks

Settlement and custody systems in emerging markets are not as well developed as those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. As a result there may be a risk that settlement could be delayed and that cash or securities could be disadvantaged.

- Investment and Remittance Restrictions

In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Fund because the maximum permitted number of or investment by foreign Shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval and there can be no guarantee that additional restrictions will not be imposed.

- Accounting

Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to companies in emerging markets differ from those applicable in more developed markets in respect of the nature, quality and timeliness of the information disclosed to investors and, accordingly, investment possibilities may be difficult to properly assess.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

Issuer risk

The Funds are subject to the risk that issuers of bonds or other fixed income securities do not make payments on such securities. A lowering of the credit rating of the issuer of a bond or of the bond itself may cause volatility in the price or reduce the security's liquidity, making it more difficult to sell.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk ("VaR") for the assessment of the global exposure of each Fund.

Value-at-Risk ("VaR") is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) ("ESMA Guidelines").

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UK UCITS Scheme)/(2^* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

Calculation methods of the Risk Exposure continued

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 August 2023, as well as the daily average level of leverage for each Fund during the one year period ending 31 August 2023.

5 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

Invesco Emerging Markets ex China Fund (UK) Invesco US Equity Fund (UK) page 17 page 36

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Funds in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Funds. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

6 Functional Currency

The Company's functional and presentational currency is Sterling. The financial statements are presented to the nearest $\pounds'000$.

7 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

Invesco American Investment Series (the "Company") Notes applicable to the financial statements of all Funds

8 Transactions and Balances with Related Parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Fund. Management fee rebates are disclosed in note 2 and note 3 within each Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Fund.

All issued and redeemed shares transacted with the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and balances due from and to the ACD are shown in notes 8 and 10 to the financial statements of each Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Funds:

	Held at 31.8.23	Change in year	Held at 31.8.22
Invesco Emerging Markets ex China Fund (UK) Accumulation shares	4,175,214	-	4,175,214
Invesco Emerging Markets ex China Fund (UK) Y Accumulation shares	434,690	-	434,690

Invesco US Equity Fund (UK) Accumulation shares	4,753,503	-	4,753,503
Invesco US Equity Fund (UK) Z Accumulation shares	150,829	-	150,829
Invesco US Equity Fund (UK) Y Accumulation shares	6,864,253	-	6,864,253

9 Post Balance Sheet Events

The net asset value in pence per share at the balance sheet date and the latest practicable date prior to the publication of the report has been shown in the table below. The % increase/(decrease) is a reflection of market fluctuations during this period. It is likely markets will continue to be much more volatile than normal over the next few months until the Russia-Ukraine conflict impact passes.

	Net Asset Value	Net Asset Value	Increase/
	31.8.23	8.12.23	Decrease
	(pence per share)	(pence per share)	%
Invesco Emerging Markets ex China Fund (UK)	223.02	234.85	5.30
Invesco US Equity Fund (UK)	692.49	704.34	1.71

The net asset value in pence per share is based on the Z Accumulation shares.

Investment report for the year

The Investment Objective and Policy of the Invesco Emerging Markets ex China Fund (UK)

The Fund aims to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in Emerging Markets excluding China. The Fund typically holds a concentrated portfolio of 35-45 stocks. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non-emerging market companies), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 August 2023.

This standardised past performance information is updated on a quarterly basis. Standardised rolling 12 month performance data for the years 30 June 2018 to 30 June 2022 are not available due to the investment policy being in existence less than 12 months.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 20 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 20 is based on the close of business bid price. MSCI EM ex China 10/40 Index (Net Total Return)¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 8.2% over the twelve month period to the end of August 2023, outperforming the MSCI EM ex China 10/40 Index (Net Total Return) which returned -3.1%.

Fund and sector performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Stock selection in India was a key driver of performance with Shriram Finance and Aurobindo Pharma adding value. Holdings in Korea and Taiwan also performed well, with gains led by Wiwynn, Samsung Fire & Marine Insurance and SK Hynix. The Fund's exposure to Latin America had a positive impact too with Fomento Economico Mexicano, ERO Copper and Regional delivering healthy returns. By sector, stock selection in information technology and financials contributed significantly.

Weighed down by weakness in Astra International and Telkom Indonesia Persero, stock selection in Indonesia had a negative impact on performance. EPAM Systems was the biggest detractor after the technology consultant revised its guidance downwards due to economic headwinds.

In terms of positioning, the Fund is tilted towards Korea across a number of different sectors. We believe Korea's equity market is undervalued, with improvements in corporate governance and dividend pay-outs being underappreciated by the market. We also favour Mexico and Brazil. In Mexico this is due to stock-specific considerations. In Brazil, we believe the equity market is at a discount to its historic average due to concerns around elevated interest rates, a weakening economy and political uncertainty. Having said that we are finding several ideas that we think are significantly undervalued. By contrast, the Fund has an underweight position in the Middle East (versus its benchmark weighting) due to relative high valuations in the region. However, these markets have been correcting in the last year and we have started new positions in Saudi Telecom and Saudi National Bank.

From a sector perspective, the Fund has significant exposure to dominant semiconductor companies in Taiwan and Korea. There is currently some excitement around the launch of artificial intelligence (Al) chatbots, but it seems to us that the level of semiconductor demand required to support the growth of Al has not been fully priced into the mega cap Asian technology stocks. Within the Fund's investable universe, we expect most Al opportunities are likely to emerge in semiconductor design and manufacturing, technology hardware and, to a lesser extent, internet businesses. During the review period we added several new stocks including SK Hynix (Korean semiconductor manufacturer); Wiwynn (Taiwanese data centre server design manufacturer for Microsoft, Meta and Amazon); Galp Energia SGPS (a Portuguese oil and gas company with production assets in Brazil); Hoa Phat JSC (largest steel producer in Vietnam); Delhivery (Indian third-party logistics company) and Singapore's Grab (a provider of on-demand services such as ride hailing and food delivery across South-East Asia). Following outperformance we sold Larsen & Toubro, Hon Hai Precision Industry, POSCO, ERO Copper and Richwave Technology.

Lowest share price	201.07 214.71	172.26	146.39

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

¹ M Accumulation shares and M Income shares were issued at 200p on 24 March 2023. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 31 August 2023. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

1

Notes to the financial statements

6 Taxation	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000
a) Analysis of charge for the year Overseas tax	508	301
Overseas capital gains taxpaid	79	-
Total tax charge	587	301

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000
Net revenue before taxation	3,216	4,676
Corporation tax at 20% (2022 - 20%)	643	935
Effects of: Capitalised income subject to tax Movement in unrecognised tax losses Overseas capital gains tax paid Overseas tax Prior year adjustment to excess management expenses Relief on overseas tax expensed Revenue not subject to tax	(16) 153 79 508 - (19) (761)	- 66 - 301 19 (24) (996)
Total tax charge	587	301

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of $\pounds 22,901,000$ (2022 - $\pounds 22,137,000$). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of $\pounds 4,580,000$ (2022 - $\pounds 4,427,000$) has not been recognised.

7 Distributions	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 16. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £54,585,000 (2022 - £35,407,000) and amounts paid in respect of purchases in the accounting year of £56,621,000 (2022 - £36,379,000) are included within the figures disclosed in note 14. Amounts received in respect of dividends in the accounting year is £95,000 (2022 - £6,000). Amounts due at the end of the accounting year for Fund Management Fees of £150,000 (2022 - £91,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 11 to 15.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2022 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

b) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.23		
Level 1: Quoted prices	154,355	-
Level 2: Observable market data	3.008	-

Level 2: Observable market data	972	-
Level 3: Unobservable data	-	-
	82,276	-

13 Generic Risk factors continued

b) Valuation of financial instruments continued

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 relate to daily priced open-ended funds. These instruments are valued at their fair value as at noon of the last business day prior to the Fund's year end.

14 Portfolio transaction costs

for the year 1 September 2022 to 31 August 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	99,168	60	0.06	38	0.04
Total purchases	99,168	60		38	
Total purchases including transaction costs	99,266				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	28,900	15	0.05	34	0.12
Collective investment schemes	3,305	1	0.03	-	-
Total sales	32,205	16		34	
Total sales net of transaction costs	32,155				
Derivative transaction costs		-		-	
Total transaction costs		76		72	
Total transaction costs as a % of average net assets		0.07%		0.07%	

14 Portfolio transaction costs continued

for the year 1 September 2021 to 31 August 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	91,533	37	0.04	14	0.02
Collective investment schemes	3,279	1	0.03	-	-
Total purchases	94,812	38		14	
Total purchases including transaction costs	94,864				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments Collective investment schemes	111,404 333	52	0.05	33	0.03
Total sales	111,737	52		33	
Total sales net of transaction costs	111,652				
Derivative transaction costs		-		-	
Total transaction costs		90		47	
Total transaction costs as a % of average net assets		0.11%		0.06%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.19% (2022 - 0.27%).

Group 1: shares purchased prior to 1 September 2022

Group 2: shares purchased on or after 1 September 2022

¹ Share classes launched 24 March 2023.

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco US Equity Fund (UK)

The Fund aims to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the US. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non-US companies), money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 August 2023.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 39 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 39 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

Strategy, review and outlook

The Fund returned 4.4% over the twelve months to the end of August 2023, whereas the Fund's benchmark, the IA North America Sector provided a return of 4.0%.

Fund and sector performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

US equity markets were volatile during the reporting period but delivered positive returns. The overall US economy has proven to be resilient despite various headwinds, including elevated interest rates, inflation that remains above the Federal Reserve's 2% target, banking system turmoil, and other ongoing global challenges. The much anticipated recession has not arrived, as the US has seen continuing positive labor market and GDP growth. Large technology companies have been among the leaders in US equities.

During the trailing 12-month period, the Fund outperformed its benchmark. The outperformance was mainly due to stock selection in the information technology, health care, and financials sectors. Partially offsetting that was negative stock selection in the information technology and industrials sectors.

The largest individual contributors to relative performance included Netflix, Meta Platforms, and Eli Lilly. Netflix and Meta's stocks have seen notable rebounds in 2023 amid strength in large cap tech stocks. Netflix has seen improved investor sentiment about its subscriber growth prospects. Meta outperformed as it returned to revenue growth and benefited from steps taken to optimize its cost structure and improve execution. Eli Lilly has outperformed on the back of strong sales growth from existing drugs, notably those treating breast cancer and diabetes, as well as various promising drug candidates with encouraging trials results.

The largest individual detractors to relative performance included United Parcel Service (UPS), Charles Schwab, and Dominion Energy. UPS was impacted by underwhelming earnings including demand weakness in Asia, as well as investor uncertainty around its labour force contract negotiations. Management reduced full year sales and operating margin guidance. Charles Schwab was negatively affected by the banking crises and was heavily scrutinized for unrealized losses in its securities portfolio. Dominion Energy was challenged in a period that saw poor returns within the utilities sector, along with investor pessimism around Dominion's strategy and asset sales. Though economic risks remained elevated, US equity markets seem to have become more comfortable with the higher interest rate regime as evidenced by the federal funds rates being seen as near a peak and investor sentiment that has delivered strong returns in 2023. Inflation remains elevated but has generally eased in developed economies, largely driven by moderation in the goods component of inflation. There is growing belief that the US is likely to avoid a substantial broad-based recession, although uncertainty surrounding the recovery path of global economies stand to serve as a headwind.

We continue to maintain our discipline around valuation and focus on companies with competitive advantages and skilled management teams that are out-executing peers as what we believe is evidenced by high returns on invested capital, consistently strong pricing power, and/or rising market share. We believe this disciplined approach is essential to generating attractive long-term performance.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 11, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

Notes to the financial statements

6 Taxation	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000
a) Analysis of charge for the year		
Overseas tax	457	686
Total tax charge	457	686

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2022 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000
Net revenue before taxation	740	518
Corporation tax at 20% (2022 - 20%)	148	104
Effects of: Movement in unrecognised tax losses Overseas tax Relief on overseas tax expensed Revenue not subject to tax	417 457 (21) (544)	780 686 (12) (872)
Total tax charge	457	686

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £94,796,000 (2022 - £92,712,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £18,959,000 (2022 - £18,542,000) has not been recognised.

7 Distributions	01.9.22 to 31.8.23 £'000	01.9.21 to 31.8.22 £'000
Accumulations paid 31 October 2023	469	366
Amounts deducted on redemption of shares	(24)	(239)
Amounts received on issue of shares	1	44
	446	171
The distributable amount has been calculated as follows:		
Net revenue/(expense) after taxation	283	(168)
Equalisation on conversions	14	3
Add: Shortfall transferred to capital	148	330
US REIT capital gain retention	1	6
	446	171
8 Debtors	31.8.23 £'000	31.8.22 £'000
Accrued revenue	233	341
Amounts receivable for issue of shares	591	347
Foreign currency contracts awaiting settlement	765	2
Sales awaiting settlement	445	726
	2,034	1,416
9 Cash and bank balances	31.8.23	31.8.22
	£'000	£'000
Cash and bank balances	540	592

10 Other creditors	31.8.23 £′000	31.8.22 £'000
Accrued expenses	204	242
Amounts payable for redemption of shares	2,262	404
Foreign currency contracts awaiting settlement	766	2
Purchases awaiting settlement	400	725
	3,632	1,373

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 16. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £106,658,000 (2022 - £107,571,000) and amounts paid in respect of purchases in the accounting year of £110,617,000 (2022 - £109,746,000) are included within the figures disclosed in note 14. Amounts received in respect of dividends in the accounting year is £142,000 (2022 - £14,000). Amounts due at the end of the accounting year for Fund Management Fees of £204,000 (2022 - £242,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The value of investments and income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies. As this Fund has a concentrated number of holdings, investors should be prepared to accept higher risk.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 11 to 15.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2022 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

b) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.23		
Level 1: Quoted prices	197,233	-
Level 2: Observable market data	6,134	-
vel 3: Unobservable data	-	-
	203,367	-
31.8.22		
Level 1: Quoted prices	219,970	-
Level 2: Observable market data	2,175	-
Level 3: Unobservable data	_	-
	222,145	-

13 Generic Risk factors continued

b) Valuation of financial instruments continued

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 relate to daily priced open-ended funds. These instruments are valued at their fair value as at noon of the last business day prior to the Fund's year end.

14 Portfolio transaction costs

for the year 1 September 2022 to 31 August 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	152,541	14	0.01	_	-
Total purchases	152,541	14		-	
Total purchases including transaction costs	152,555				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	182,321	15	0.01	3	0.00
Total sales	182,321	15		3	
Total sales net of transaction costs	182,303				
Derivative transaction costs		-		-	
Total transaction costs		29		3	
Total transaction costs as a % of average net assets		0.02%		0.00%	

14 Portfolio transaction costs continued

for the year 1 September 2021 to 31 August 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	169,140	15	0.01	-	-
Total purchases	169,140	15		-	
Total purchases including transaction costs	169,155				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	344,616	32	0.01	4	0.00
Total sales	344,616	32		4	
Total sales net of transaction costs	344,580				
Derivative transaction costs		-		-	
Total transaction costs		47		4	
Total transaction costs as a % of average net assets		0.02%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.02% (2022 - 0.03%).

15 Share movement

for the year 1 September 2022 to 31 August 2023

	Accumulation	Accumulation	Z Accumulation	Y Accumulatior
	shares	shares (No Trail)	shares	shares

The Fund's post balance sheet events are set out on page 16.

Invesco US Equity Fund (UK) Distribution table

Distribution table

for the year 1 September 2022 to 31 August 2023

Distribution paid 31 October 2023	Net revenue pence per share	Equalisation pence per share	Net distribution paid 31.10.23 pence per share	Net distribution paid 31.10.22 pence per share
Accumulation shares				
Group 1	0.0000	-	0.0000	0.0000
Group 2	0.0000	0.0000	0.0000	0.0000
Accumulation shares (No Trail)				
Group 1	1.7029	-	1.7029	1.2626
Group 2	0.7547	0.9482	1.7029	1.2626
Z Accumulation shares				
Group 1	4.0263	-	4.0263	3.3945
Group 2	1.1442	2.8821	4.0263	3.3945
Y Accumulation shares				
Group 1	3.2307	-	3.2307	2.7581
Group 2	1.3980	1.8327	3.2307	2.7581

Group 1: shares purchased prior to 1 September 2022

Group 2: shares purchased on or after 1 September 2022

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco American Investment Series (the "Company") Regulatory statements

Statement of the Manager's Responsibilities

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/ 1228) (the "OEIC Regulations"), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary's Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Citibank UK Limited London 12 December 2023

Independent auditors' report to the Shareholders of Invesco American Investment Series

Report on the audit of the financial statements

In our opinion, the financial statements of Invesco American Investment Series (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 31 August 2023 and of the net revenue and the net capital gains/(losses) on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco American Investment Series is an Open Ended Investment Company ('OEIC') with two subfunds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the Balance Sheets as at 31 August 2023; the Statements of Total Return and the Statements of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution Tables; and the notes applicable to the financial statements of all Funds, which include a description of the significant accounting policies; and the notes to the financial statements for each Fund.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director's Report

In our opinion, the information given in the Report of the Authorised Corporate Director for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent auditors' report to the Shareholders of Invesco American Investment Series continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager's Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual subfund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of noncompliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/ industry, we identified that the principal risks of noncompliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's Shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Independent auditors' report to the Shareholders of Invesco American Investment Series continued

Other required reporting Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.

PricewaterhouseCoopers LLP Chartered Accountants and Statutory Auditors Edinburgh 12 December 2023
