# Report of the Authorised Corporate Director

## Continued

The Authorised Corporate Director (the ACD) and abrdn Investments Limited are wholly owned subsidiaries of Aberdeen Group plc (formerly abrdn plc) ('abrdn'), and are accordingly associates. The investment adviser has responsibility for and full discretion in making all investment decisions in relation to each fund subject to and in accordance with the investment objectives and policies of the funds as varied from time to time, the provisions of the instrument of incorporation, the COLL Rules and any directions or instructions given from time to time by the ACD. The Investment Advisor's fees will be paid by the ACD and will not be charged to the Company. The investment adviser and/or its associates are authorised to enter into stock lending transactions as agent for the funds and arrangements with third parties regarding the use of dealing commission to purchase/receive goods and/or services that relate to the execution of trades or the provision of research and has in fact entered into a number of such arrangements.

The Authorised Corporate Director of the Company is abrdn Fund Managers Limited, a private company limited by shares which was incorporated in England and Wales on 7 November 1962. The ACD is a wholly owned subsidiary of Aberdeen Group plc (formerly abrdn plc) a company incorporated in Scotland.

Financial details and Fund Managers' reviews of the individual funds for the period ended 31 December 2024 are given in the following pages of this report.

Each fund has an individual investment objective and policy and each differs in regard to the extent to which they concentrate on achieving income or capital growth. There may be funds added to the umbrella of abrdn OEIC IV (with consent of the FCA and the Depositary) in the future.

The funds are valued on a mid-price basis and dealt at a single price regardless of whether a purchase or sale is being affected. The daily price for each fund appears on the abrdn website at **abrdn.com**.

The funds are segregated portfolios of assets and, accordingly, the assets of a fund belong exclusively to that fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company, or any other fund, and shall not be available for any such purpose.

Shareholders are not liable for the debts of the Company.

All fees charged by the Investment Adviser will be borne by the ACD.

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events can adversely affect assets of funds and performance thereon. To ensure the fair treatment of investors, abrdn's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and fund, making appropriate adjustments where necessary.

abrdn's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets, making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across abrdn with a wide range of experience in asset pricing.

Effective 12 March 2025 abrdn plc changed name to Aberdeen Group plc.

## Developments and Prospectus Updates Since 1 January 2024

- On 27 February 2024, Martin Kwiatkowski was appointed as a director of abrdn Fund Managers Limited.
- On 15 March 2024, Fraser Tulloch was appointed as a director of abrdn Fund Managers Limited.
- On 18 June 2024, the abrdn World Equity Enhanced Index Fund N Acc was launched.
- On 23 July 2024, the abrdn Global Infrastructure Equity Tracker Fund was launched.
- On 23 July 2024, the registered office address was updated to 1 George Street, Edinburgh, EH2 2LL for abrdn Investments Limited.
- On 2 September 2024, Michael Champion and Philip Wagstaff were appointed as Directors of abrdn Fund Managers Limited.
- On 7 October 2024, settlement cycles were changed from T+3 to T+2 in all sub-funds of OEIC IV.
- On 15 October 2024, the abrdn Global Infrastructure Equity Tracker Fund N Acc and B Acc were launched.
- On 1 November 2024, the abrdn Global REIT Tracker Fund updated the Investment Objective and Policy ("IOP") to reflect a change in Performance benchmark from FTSE EPRA NAREIT Developed Index (Hedged to GBP) to FTSE EPRA Naret Developed Index.
- On 27 November 2024, both Jamie Matheson and Carolan Dobson resigned as a director of abrdn Fund Managers Limited.
- The list of funds managed by the ACD was updated, where appropriate.
- Performance and dilution figures were refreshed, where appropriate.

# Report of the Authorised Corporate Director

## Continued

- The list of sub-custodians was refreshed, where appropriate.
- The list of eligible markets was refreshed, where appropriate.
- The list of sub-investment advisors to the funds was refreshed, where appropriate.
- The risk disclosures in relation to the funds were refreshed, where appropriate.

### Assessment of Value (unaudited)

In 2017 the Financial Conduct Authority (FCA) published the final Asset Management Market Study. This introduced (among other reforms) new governance rules with the aim of enhancing duty of care and ensuring the industry acts in investors' best interests. The rules were outlined in the FCA policy statement PS18/8 and came into effect from 30 September 2019. As a result, abrdn Fund Managers Limited is required to perform a detailed annual assessment, determining whether our funds are "providing value to investors". The resulting findings will be published on a composite basis throughout the year, and can be found on the 'Literature' pages of our website.

### Climate-related Financial Disclosures (unaudited)

The recommendations by the Taskforce for Climate-related Financial Disclosures (TCFD) – initiated by the Financial Stability Board in 2015 and adopted in 2017 – provide organisations with a consistent framework for disclosing financial impacts of climate-related risks and opportunities. The disclosure in line with TCFD recommendations enables external stakeholders to gain a better understanding of the climate-related risks and opportunities (including how they are managed) that are likely to impact the organisation's future financial position as reflected in its income statement, cash flow statement, and balance sheet. The TCFD has developed 11 recommendations which are structured around four thematic areas, notably governance, strategy, risk management and metrics and target. In Policy Statement 21/24 the Financial Conduct Authority (FCA) have created a regulatory framework for asset managers, life insurers and FCA-regulated pension providers to make climate-related disclosures consistent with the recommendations of the TCFD. As a result of the disclosure requirements abrdn OEIC IV is required to perform a detailed annual assessment, determining financial impacts of climate-related risks and opportunities. The resulting findings are published at [Fund literature | abrdn](#).

### Crossholding Information

There were no cross holdings between funds in abrdn OEIC IV as at 31 December 2024 (2023: Nil).

### Global Market Overview

Global stock markets rose strongly over the 12 months. Central banks had previously raised interest rates faster and further than expected to tackle multi-decade-high inflation, which gradually eased throughout 2024. Global economic growth proved more resilient than anticipated, although US recession fears intensified in the latter half of the year before subsiding somewhat. Equities performed well in early 2024, buoyed by strong economic data, but weakened in April as persistent inflation reignited fears that interest rates might remain elevated for longer. By May, renewed optimism about rate cuts and strong corporate earnings provided support for equities. Although equities experienced a sell-off from mid-July to early August amid recession concerns, they recovered after reassuring economic data. Donald Trump's November election win, with its pro-growth agenda, initially lifted equities on expectations of economic stimulus. However, his proposed measures sparked inflationary concerns, leading to weaker equity performance as investors reassessed the pace of future monetary easing.

Across developed markets, the UK stock market, as represented by the FTSE All-Share Index, recorded a gain over the period. The FTSE 100 Index, home to multinational companies, outperformed the FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy. The new Labour government's first Budget featured approximately £40 billion in tax increases aimed at strengthening fiscal stability, along with a commitment to increase borrowing intended to stimulate growth. US share prices, as measured by the broad S&P 500 Index, rose notably over the 12-month period. In particular, there was a strong performance by the technology sector, especially artificial intelligence-related stocks. These are especially sensitive to the end of monetary tightening and the prospect of rate cuts due to the favourable effect on their future discounted earnings. Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the 12-month period. However, concerns about the eurozone economy and political instability in both France and Germany weighed on investor sentiment. The Japanese stock market, as measured by the TOPIX Index, recorded a double-digit gain over the 12-month period. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb higher over the period.

Emerging-market equities rose over the year, but they trailed developed markets. Share-price divergence within countries and sectors characterised emerging-market

# Report of the Authorised Corporate Director

## Continued

performance over the period. Technology companies did well, especially those in Taiwan, riding the wave of the 'Magnificent Seven' stocks in the US. However, markets such as Brazil and Mexico fell sharply due to concerns over fiscal discipline and potentially slowing economic prospects. China saw a late-year surge thanks to a slew of government stimulus measures in September, which signalled a shift towards a pro-growth stance. Meanwhile, the US Federal Reserve (Fed) lowered interest rates for the first time in four years but hinted at a slower pace of easing in 2025. Separately, several major emerging economies held elections in 2024, including India, where the ruling Bharatiya Janata Party lost its parliamentary majority and had to rely on allies to remain in power. In Mexico, the ruling left-wing party won a landslide victory. The year concluded with former President Donald Trump's re-election in the US, raising questions about the implications for emerging markets.

In fixed income, global government bonds had a mostly negative performance. With disinflation underway, the Fed, Bank of England and European Central Bank all started easing policy, with investors looking ahead to further potential rate cuts in 2025. However, most major central banks are now pursuing a data-dependent approach, as they remain wary of lingering inflationary pressures. Moreover, some of Donald Trump's policies are seen as potentially inflationary, leading investors to anticipate a more measured pace of easing from the Fed in the months ahead. Corporate bond prices performed solidly over the 12-month period, with both investment-grade and, especially, riskier high-yield bonds faring well due to the former's higher interest-rate sensitivity (as central banks started easing monetary policy) and the latter's exposure to a more robust economic environment than feared, which supported credit fundamentals. This positive performance was largely driven by investor confidence in the stability of corporate earnings. Also, income-oriented investors were drawn to corporate bonds because of their historically attractive yields.

Total returns for UK commercial real estate were 7.0% over the 12 months to the end of December. The retail sector was the strongest, returning 10.4%, while offices were the weakest, with a return of -0.2%. Segments such as retail and industrial continued to outperform due to structural and thematic drivers, even as market participants closely monitored economic indicators during a period of lacklustre growth. Meanwhile, aside from challenges in some regional and secondary markets, out-of-favour segments noticeably slowed in their value corrections.

# Statement of the Authorised Corporate Director's Responsibilities

The Collective Investment Schemes sourcebook published by the FCA, ("the COLL Rules") require the Authorised Corporate Director ("ACD") to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company and of the net income and net gains on the property of the Company for the period.

In preparing the financial statements the ACD is responsible for:

- selecting suitable accounting policies and then apply them consistently;
- making judgements and estimates that are reasonable and prudent;
- following UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
- complying with the disclosure requirements of the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014;
- keeping proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;
- assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- using the going concern basis of accounting unless they either intend to liquidate the Company or its sub-funds or to cease operations, or have no realistic alternative but to do so; for the reasons stated in the Report of the Authorised Corporate Director, the financial statements of the abrdn UK Equity Index Managed Fund have not been prepared on a going concern basis;
- such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and taking reasonable steps for the prevention and detection of fraud and irregularities.
- taking reasonable steps for the prevention and detection of fraud and irregularities.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, the Prospectus and the COLL Rules.

The ACD is responsible for the maintenance and integrity of the corporate and financial information included on its website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

## Authorised Corporate Director's Statement

In accordance with the requirements of the COLL sourcebook as issued and amended by the Financial Conduct Authority, we hereby certify the report on behalf of abrdn Fund Managers Limited, the Authorised Corporate Director.

# Statement of Depositary's Responsibilities in respect of the Scheme and Report of the Depositary to the Shareholders of abrdn OEIC IV

Statement of the Depositary's Responsibilities in Respect of the Scheme and Report of the Depositary to the Shareholders of the abrdn OEIC IV ("the Company") for the period ended 31 December 2024.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the OEIC Regulations), as amended, (together "the Regulations") the Company's Instrument of Incorporation, and the Prospectus (together "the Scheme Documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors. The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored, and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares of the Company are calculated in accordance with the Regulations,
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Corporate Director ("the ACD"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the ACD:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

**Citibank UK Limited**

26 March 2025

# Independent Auditor's Report to the Shareholders of abrdrn OEIC IV ('the Company')

## Opinion

We have audited the financial statements of the Company for the year ended 31 December 2024 which comprise the Statements of Total Return, the Statements of Change in Net Assets Attributable to Shareholders, the Balance Sheets, the Related Notes and Distribution Tables for each of the Company's sub-funds listed on page 2 and the accounting policies set out on pages 12 to 15.

In our opinion the financial statements:

- give a true and fair view, in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland, of the financial position of each of the sub-funds as at 31 December 2024 and of the net revenue and the net capital gains/net capital losses on the property of each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with the Instrument of Incorporation, the Statement of Recommended Practice relating to Authorised Funds, and the COLL Rules.

## Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Company in accordance with, UK ethical requirements including the FRC Ethical Standard.

We have received all the information and explanations which we consider necessary for the purposes of our audit and we believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

## Emphasis of matter – non going concern basis of preparation

In respect of abrdrn UK Equity Index Managed Fund, we draw attention to the disclosure made in accounting policy (a) "Basis of preparation" to the financial statements which explains that the financial statements of the sub-fund have not been prepared on going concern basis for the reason set out in that note. Our opinion is not modified in respect of this matter.

## Going concern

The Authorised Corporate Director has prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or its sub-funds or to cease their operations, and as they have concluded that the Company and its sub-funds' financial position means that this is realistic except for abrdrn UK Equity Index Managed Fund. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the Authorised Corporate Director's conclusions, we considered the inherent risks to the Company's and its sub-funds' business model and analysed how those risks might affect the Company's and its sub-funds' financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the Authorised Corporate Director's assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the Company's and its sub-funds' ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the Company or its sub-funds will continue in operation.

# Independent Auditor's Report to the Shareholders of abrdn OEIC IV ('the Company')

Continued

## Fraud and breaches of laws and regulations – ability to detect

### Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud;
- Assessing the segregation of duties in place between the Authorised Corporate Director, the Depository, the Administrator and the Investment Adviser.
- Reading Authorised Corporate Director board minutes.

As required by auditing standards, we perform procedures to address the risk of management override of controls, in particular the risk that management may be in a position to make inappropriate accounting entries. On this audit we do not believe there is a fraud risk related to revenue recognition because the revenue is principally non-judgemental and based on publicly available information, with limited opportunity for manipulation. We did not identify any additional fraud risks.

We evaluated the design and implementation of the controls over journal entries and other adjustments and made inquiries of the Administrator about inappropriate or unusual activity relating to the processing of journal entries and other adjustments. We identified and selected a sample of journal entries made at the end of the reporting period and tested those substantively including all material post-closing entries. Based on the results of our risk assessment procedures and understanding of the process, including the segregation of duties between the Directors and the Administrator, no further high-risk journal entries or other adjustments were identified.

### Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the Authorised Corporate Director and the Administrator

(as required by auditing standards) and discussed with the Directors the policies and procedures regarding compliance with laws and regulations.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related authorised fund legislation maintained by the Financial Conduct Authority) and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: money laundering, data protection and bribery and corruption legislation recognising the Company's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Directors and the Administrator and inspection of regulatory and legal correspondence, if any.

Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

### Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

# Independent Auditor's Report to the Shareholders of abrdn OEIC IV ('the Company')

Continued

## Other information

The Authorised Corporate Director (abrdn Fund Managers Limited) is responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the other information; and
- in our opinion the information given in the Report of the Authorised Corporate Director is consistent with the financial statements.

## Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where under the COLL Rules we are required to report to you if, in our opinion:

- proper accounting records for the Company have not been kept; or
- the financial statements are not in agreement with the accounting records.

## Authorised Corporate Director's responsibilities

As explained more fully in the statement set out on page 7 the Authorised Corporate Director is responsible for: the preparation of financial statements that give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or its sub-funds or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at [www.frc.org.uk/auditorsresponsibilities](http://www.frc.org.uk/auditorsresponsibilities).

## The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's shareholders, as a body, in accordance with Rule 4.5.12 of the Collective Investment Schemes sourcebook ('the COLL Rules') issued by the Financial Conduct Authority under the Open-Ended Investment Companies Regulations 2001. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

# Notes to the Financial Statements of abrdrn OEIC IV

For the year ended 31 December 2024

## 1 Accounting Policies for all Funds

### a. Basis of preparation

The financial statements for each of the funds have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Management Association in May 2014 (IMA SORP 2014), Financial Reporting Standard (FRS) 102 and United Kingdom Generally Accepted Accounting Practice.

For all funds apart from abrdrn UK Equity Index Managed Fund, the ACD has undertaken a detailed assessment, and continues to monitor, each fund's ability to meet its liabilities as they fall due, including liquidity, declines in global capital markets and investor redemption levels. Based on this assessment, the funds continue to be open for trading and the ACD is satisfied the funds have adequate financial resources to continue in operation for at least the next 12 months and accordingly it is appropriate to adopt the going concern basis in preparing the financial statements.

abrdrn UK Equity Index Managed Fund was closed on 19 April 2023 as part of an ongoing fund rationalisation project and is therefore not prepared on a going concern basis. No adjustment was required to the financial statements to adjust assets or liabilities to their realisable values or to provide for liabilities arising from the decision to terminate the fund. No liabilities have been recorded for costs of the terminations as the intention is that the ACD will bear any such costs which may arise.

### b. Valuation of investments

Listed investments have been valued at fair value as at the close of business on 31 December 2024. The SORP defines fair value as the market value of each security, in an active market, this is generally the quoted bid price.

Unlisted, unapproved, illiquid or suspended securities are valued at the Authorised Corporate Directors' best estimate of the amount that would be received from an immediate transfer at arm's length. The ACD has appointed a Fair Value Pricing committee to review valuations.

Collective Investment Schemes are valued by reference to their net asset value. Dual priced funds have been valued at the bid price. Single priced funds have been valued using the single price.

Any open positions in derivative contracts or forward foreign currency transactions at the year-end are included in the Balance Sheet at their mark to market value.

### c. Foreign Exchange

Assets and liabilities denominated in foreign currencies are translated into Sterling at the prevailing exchange rates as at the close of business on the reporting date.

Foreign currency transactions are translated at the rates of exchange ruling on the date of such transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

### d. Dilution

In certain circumstances (as detailed in the Prospectus) the ACD may apply a dilution adjustment on the issue or cancellation of shares, which is applied to the capital of the fund on an accruals basis. The adjustment is intended to protect existing investors from the costs of buying or selling underlying investments as a result of large inflows or outflows from the fund.

### e. Revenue

Overseas dividends are grossed up at the appropriate rate of withholding tax and the tax consequences are shown within the tax charge.

Revenue from collective investment schemes is recognised when the investments are quoted ex dividend.

Accumulation distributions from shares held in collective investment schemes are reflected as revenue and form part of the distribution.

Equalisation received from distributions or accumulations on units or shares in underlying investments is treated as capital and deducted from the cost of the investment.

Revenue from offshore funds is recognised when income is reported by the offshore fund operator.

# Notes to the Financial Statements of abrdn OEIC IV

## For the year ended 31 December 2024 continued

Interest on bank deposits is recognised on an accruals basis.

Interest from short-term deposits is recognised on an accruals basis.

Interest on debt securities is recognised on an accruals basis.

Interest from debt securities is recognised as revenue using the effective interest method. The purchase price of the asset, the yield expectation and scheduling of payments, are all part of this calculation. Callable bonds are calculated on a yield to worst expectation generally, which may not match other calculations. Convertible bonds are excluded from a true effective interest calculation owing to the unavailability of option values for the conversion rate.

Stock dividends are recognised as revenue when they are quoted ex dividend. In the case of enhanced stock dividends, the value of the enhancement is recognised as capital.

Special dividends may be treated as repayments of capital or as revenue dependent on the facts of the particular case. Where receipt of a special dividend results in a significant reduction in the capital value of the holding, then the special dividend will be recognised as capital so as to ensure that the matching principle is applied to gains and losses. Otherwise, the special dividends are recognised as revenue.

Underwriting commission is taken to revenue and recognised when the issue takes place, except where the fund or sub-fund or Trust is required to take up all or some of the shares underwritten in which case an appropriate proportion of the commission received is deducted from the cost of the relevant shares.

Distributions from Brazilian corporations may take the form of interest on capital as an alternative to making dividend distributions. Interest on capital distributions are recognised on an accruals basis.

Management fee rebates from collective investment schemes are recognised as revenue or capital on a consistent basis to how the underlying scheme accounts for the management fee. Where such rebates are revenue in nature, the income forms part of the distribution.

For dividends received from US Real Estate Investment Trusts ("REITs"), on receipt of the capital/revenue split from the REITs, the allocation of the dividend is adjusted within the financial statements.

### **f. Expenses**

All expenses other than those relating to the purchase and sale of investments are charged against revenue on an accruals basis in the Statement of Total Return.

Expenses relating to the purchases of investments are charged to the cost of investment and expenses relating to the sales of investments are deducted from the proceeds on sales.

### **g. Taxation**

Provision is made for corporation tax at the current rate on the excess of taxable income over allowable expenses.

UK dividends are disclosed net of any related tax credit.

Overseas dividends are disclosed gross of any foreign tax suffered and the tax element is separately disclosed in the taxation note.

The tax accounting treatment follows that of the principal amount, with charges or reliefs allocated using the marginal basis regardless of any alternative treatment that may be permitted in determining the distribution.

Any windfall overseas tax reclaims received are netted off against irrecoverable overseas tax and therefore the irrecoverable overseas tax line in the taxation note may be negative.

Deferred taxation is provided on all timing differences that have originated but not reversed by the balance sheet date other than those differences regarded as permanent. Any liability to deferred tax is provided at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Deferred tax assets are only recognised to the extent that it is regarded more likely than not that there will be taxable profits against which the reversal of underlying timing differences can be offset.

# Notes to the Financial Statements of abrdrn OEIC IV

## For the year ended 31 December 2024 continued

The following funds do not apply marginal tax relief as permitted in the SORP: abrdrn Global Infrastructure Equity Tracker Fund, abrdrn Global Corporate Bond Screened Tracker Fund, abrdrn Short Dated Sterling Corporate Bond Tracker Fund, abrdrn American Equity Tracker Fund, abrdrn European Equity Tracker Fund, abrdrn Japan Equity Tracker Fund, abrdrn Short Dated Global Inflation-Linked Bond Tracker Fund, abrdrn Short Dated Global Corporate Bond Tracker Fund, abrdrn Emerging Markets Local Currency Bond Tracker Fund, abrdrn Global Inflation-Linked Bond Tracker Fund, abrdrn Asia Pacific ex Japan Equity Tracker Fund, abrdrn Emerging Markets Equity Tracker Fund, abrdrn Sterling Corporate Bond Tracker Fund, abrdrn Global REIT Tracker Fund and abrdrn Global Government Bond Tracker Fund.

### h. Distributions

All of the net revenue available for distribution at the year end will be distributed. Where a fund has accumulation shareholders, this will be reinvested. Where a fund has income shareholders, this will be paid.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. Cash flows associated with derivative transactions are allocated between the revenue and capital property of the sub-funds according to the motives and circumstances of the particular derivative strategy. The investment manager articulates the motives and circumstances underlying the derivative strategy and the ACD assesses these in association with financial reporting constraints enshrined within the SORP to allocate the cash flows accordingly.

### i. Equalisation

Equalisation appears within the fund reports as part of the distribution. This represents the net revenue in the funds share price attached to the issue and cancellation of shares. It will form part of any distributions at the period end attributable to shareholders.

### j. Derivatives

Funds with strategies that permit it, can make use of derivatives. Derivatives can be used to reduce risk or cost, or to generate additional capital or income consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management"). Some strategies may permit use of derivatives with a higher or lower frequency or for investment purposes. The accounting for each derivative is applied consistently in line with the derivative type; the valuation policy and market convention. Market convention for derivatives is often based on total return; however where a fund strategy or derivative type is defined with revenue in mind the accounting treatment can have a revenue element, forming part of the distribution, highlighted in the distribution policy. The Statement of Total Return captures all realised and unrealised gains regardless of nature. The Portfolio Statement will show the individual derivative contracts as net position in line with the valuation policy.

There are three broad transaction types: derivatives create a future asset or liability recognised as unrealised profit or loss until the date of maturity where cash is exchanged; swaps realise amounts of profit or loss in line with an agreed schedule until maturity; options recognise a premium paid or received, with the right or obligation to buy "call" or sell "put" an asset, exercised when the option owner is in the money. These transaction types break into three broad strategies.

Funds with strategies spanning multiple currencies can make use of the following transactions in line with their policy: forward currency exchange contracts (a derivative of the exchange rate); cross currency swaps; currency options and other currency derivatives. These transactions relate to the future expectations of foreign exchange rates. The future expectation is based on the current interest rates projected to a forward date. Currency derivatives exchange one currency for another currency at a future date.

Funds with strategies in debt instruments (bonds) can make use of the following transactions in line with their policy: bond future contracts (a derivative of the bond market or asset); credit default swaps; interest rate swaps; overnight index swaps; inflation swaps; interest rate options; swaptions; total return bond swaps and other bond related derivatives. These transactions relate to the future expectations on debt assets. The future expectations can be based on an individual asset or a market. Bond derivatives can relate to the future credit expectations; interest rate expectations; inflation expectations or a combination of these.

Funds with strategies in equity instruments (shares) can make use of the following transactions in line with their policy: equity future contracts (a derivative of the equity market or asset); variance swaps (differences in

# Notes to the Financial Statements of abrdrn OEIC IV

## For the year ended 31 December 2024 continued

volatility between two assets); equity options; total return equity swaps and other equity related derivatives. These transactions relate to the future expectations on equity assets. The future expectations can be based on an individual asset or a market. Equity derivatives relate to the future expectations in equity markets. Equity markets are subject to the variables found in bond markets, however there is not an explicit relationship to derive a price.

### k. Collateral and margin

Funds undertaking derivative transactions or stock lending exchange investment assets based on legal agreements. In line with collective investment scheme rules and abrdrn policy collateral or margin must be exchanged to limit the exposure to investors should an agreement fail. Collateral is exchanged at an agreement level on a net basis following abrdrn policy at a counterparty level within a sub-fund. Collateral is monitored and where required exchanged daily. Collateral is bilateral in nature exchanged between the two counterparties in a transaction. Margin is similar to collateral limiting the risk for investors. The main difference is the exchange of initial margin, required before a contract is opened. Once opened the exchange of variation margin is monitored and where required exchanged daily. Both collateral and margin do not affect the valuation of the asset they are protecting or the fund unless re-hypothecated (used to buy) into another investment asset. All funds do not re-hypothecate but may use liquidity collective investments to manage cash effectively.

### l. Stock lending

Any income arising from stocklending is treated as revenue on a receipts basis and is disclosed in the notes to the Financial Statements net of directly attributable fees. The value of the collateral must always exceed the value of the stock on loan. The accepted collateral include cash, equities, certain types of bonds and money market instruments as agreed with the Depositary.

## 2. Risk management policies

Generic risks that the abrdrn range are exposed to and the risk management techniques employed are disclosed below. Numerical disclosures and specific risks, where relevant, are disclosed within the financial statements.

The Financial Conduct Authority (FCA) Collective Investment Schemes Sourcebook (COLL) and FCA Funds Sourcebook (FUND) rules require the Management Company to establish, implement and maintain an adequate and documented Risk Management Process (RMP) for identifying the risks they manage, or might be, exposed to. The RMP must comprise of such procedures as are necessary to enable abrdrn to assess the exposure of each fund it manages to market risk, liquidity risk, counterparty risk, operational risk and all other risks that might be material.

abrdrn functionally and hierarchically separates the functions of risk management from the operating units and portfolio management functions, to ensure independence and avoid any potential or actual conflicts of interest. The risk management function has the necessary authority, access to all relevant information, staff and regular contact with senior management and the Board of Directors of the Company. The management of investment risk within abrdrn is organised across distinct functions, aligned to the well-established 'three lines of defence' model.

1. Risk ownership, management and control.
2. Oversight of risk, compliance and conduct frameworks.
3. Independent assurance, challenge and advice.

The risk management process involves monitoring funds on a regular and systematic basis to identify, measure and monitor risk and where necessary escalate appropriately, including to the relevant Board, any concerns and proposed mitigating actions.

The risk team, in line with client expectations and the investment process, develops the risk profiles for the funds in order to set appropriate risk limits. Regulatory limits as well as those agreed, are strictly enforced to ensure that abrdrn does not inadvertently (or deliberately) breach them and add additional risk exposure. In addition, there is an early warnings system of potential changes in the portfolio risk monitoring triggers. Where possible, these are coded into the front office dealing system, in a pre-trade capacity, preventing exposures or breaching limits before the trade is actually executed.

# Notes to the Financial Statements of abrdn OEIC IV

## For the year ended 31 December 2024 continued

### Risk Definitions & Risk Management Processes

i) **Market Risk** is the risk that economic, market or idiosyncratic events cause a change in the market value of Client assets. Market Risk can be broadly separated into two types:

(1) Systematic risk stems from any factor that causes a change in the valuation of groups of assets. These factors may emerge from a number of sources, including but not limited to economic conditions, political events or actions, the actions of central banks or policy makers, industry events or, indeed, investor behaviour and risk appetite.

(2) Specific or Idiosyncratic Risk, which is the part of risk directly associated with a particular asset, outside the realms of, and not captured by Systematic Risk. In other words, it is the component of risk that is peculiar to a specific asset, and may manifest itself in various guises, for example: corporate actions, fraud or bankruptcy. Portfolios are subject to many sub-categories of market risk. Many of these risks are interlinked and not mutually exclusive. Examples of these types of investment risk include: Country risk; Sector risk; Asset-class risk; Inflation/deflation risk; Interest rate risk; Currency risk; Derivatives risk; Concentration risk; and Default risk. Factors that cause changes in market risks include: future perceived prospects (i.e. changes in perception regarding the future economic position of countries, companies, sectors, etc.); shifts in demand and supply of products and services; political turmoil, changes in interest rate/inflation/taxation policies; major natural disasters; recessions; and terrorist attacks.

There are several ways in which to review and measure investment risk. The risk team recognises that each method is different and has its own unique insights and limits, and applies the following measurements for each fund, where relevant:

- **Leverage:** has the effect of gearing a fund's expected performance by allowing it to gain greater exposure to underlying investment opportunities (gains and losses). The higher the leverage the greater the risk (potential loss).
- **Value-at-Risk (VaR) and Conditional VaR (CVaR):** VaR measures with a degree of confidence the maximum the fund could expect to lose in any given time frame. Assuming a normal (Gaussian) distribution, this is a function of the volatility of the fund's returns. The higher the volatility, the higher the VaR, the greater the risk. CVaR calculates the expected tail loss, under the assumption that the VaR has been reached.
- **Volatility, Tracking Error (TE):** Volatility measures the size of variation in returns that a fund is likely to expect. The higher the volatility the higher the risk. TE measures the expected magnitude of divergence of returns between the fund and benchmark over a given time.
- **Risk Decomposition:** Volatility, tracking error and VaR may be broken down to show contribution from market related factors ("Systematic" Risk) and instrument specific (Idiosyncratic Risk). This is not a different measure as such, but is intended to highlight the sources of volatility and VaR.
- **Concentration Risk:** By grouping the portfolio into various different exposures (e.g. country, sector, issuer, asset, etc.), we are able to see where, if any, concentration risk exists.
- **Stress Tests and Scenario Analysis:** This captures how much the current portfolio will make or lose if certain market conditions occur.
- **Back Testing:** This process helps to assess the adequacy of the VaR model and is carried out in line with UCITS regulatory requirements (FCA COLL 6.12). Excessive levels of overshoots and the reasons behind them are reported to the Board.

To generate these risk analytics the risk team relies on third party calculation engines, such as APT, Bloomberg PORT+, RiskMetrics, UBS Delta and Axioma. Once the data has been processed, it is analysed by the risk team, generally reviewing absolute and relative risks, change on month and internal peer analysis. Any issues or concerns that are raised through the analysis prompt further investigation and escalation if required. Breaches of hard limits are also escalated immediately. All client mandated and regulatory risk limits are monitored on a daily basis.

Stress tests are intended to highlight those areas in which a portfolio would be exposed to risk if the current economic conditions were likely to change. An economic event may be a simple change in the direction of interest rates or return expectations, or may take the form of a more extreme market event such as one caused through military conflict. The stress test itself is intended to highlight any weakness in the current portfolio construction that might deliver unnecessary systematic exposure if the market were to move abruptly.

Stress testing is performed on a regular basis using relevant historical and hypothetical scenarios.

# Notes to the Financial Statements of abrdn OEIC IV

## For the year ended 31 December 2024 continued

- ii) **Liquidity risk** is defined as the risk that a portfolio may need to raise cash or reduce derivative positions on a timely basis either in reaction to market events or to meet client redemption requests and may be obliged to sell long term assets at a price lower than their market value. Liquidity is also an important consideration in the management of portfolios: Portfolio Managers need to pay attention to market liquidity when sizing, entering and exiting trading positions.

Measuring liquidity risk is subject to three main dimensions:

- Asset Liquidity Risk – how quickly can assets be sold.
- Liability Risk – managing redemptions as well as all other obligations arising from the liabilities side of the balance sheet.
- Contingency Arrangements or Liquidity Buffers – utilising credit facilities etc.

### **Liquidity Risk Management Framework**

aberdn has a liquidity risk management framework in place applicable to the funds and set out in accordance with its overall Risk Management Process, relative to the size, scope and complexity of the funds. Liquidity assessment and liquidity stress testing is typically performed monthly, monitoring both the asset and liability sides. Asset side stressed scenarios are considered based on the nature of different asset classes and their liquidity risks to demonstrate the effects of a market stress on the ability to sell-down a fund. Liability side analysis includes stress scenarios on the investor profile as well as liabilities on the balance sheet. Any particular concerns noted or liquidity risk limit breaches are escalated to the relevant Committees and Boards, if material.

- iii) **Counterparty credit risk** is the risk of loss resulting from the fact that the counterparty to a transaction may default on its obligations prior to the final settlement of the transaction's cash flow. Credit risk falls into both market risk and specific risk categories. Credit risk is the risk that an underlying issuer may be unable (or unwilling) to make a payment or to fulfil their contractual obligations. This may materialise as an actual default or, or to a lesser extent, by a weakening in a counterparty's credit quality. The actual default will result in an immediate loss whereas, the lower credit quality will more likely lead to mark-to-market adjustment.

Transactions involving derivatives are only entered into with counterparties having an appropriate internal credit rating that has been validated by the credit research team and approved by the relevant credit committee. Appropriate counterparty exposure limits will be set and agreed by these committees and the existing credit exposures will be assessed against these limits.

### **iv) Operational Risk**

Operational risk can be defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk also includes the breakdown of processes to comply with laws, regulations or directives.

### **Operational Risk Management**

An Operational Risk Management Framework is in place to identify, manage and monitor appropriate operational risks, including professional liability risks, to which the Management Company and the funds are or could be reasonably exposed. The operational risk management activities are performed independently as part of one of the functions of the Risk Division.

Aberdeen Group plc (formerly abrdn plc) (the "Group") Risk Management Framework is based upon the Basel II definition of operational risk which is "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events".

The Group's management of operational risk is therefore aimed at identifying risks in existing processes and improving existing controls to reduce their likelihood of failure and the impact of losses. The Group has developed a framework that embodies continuous improvement to internal controls and ensures that the management of risk is embedded in the culture of the Group.

The identification, management, monitoring and resolution of events, risks and controls are facilitated via the Group's risk management system, Shield. The system is designed to facilitate the convergence of governance, risk and compliance programmes and automate a comprehensive review and assessment of operational risks.

# abrdn American Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in North American equities (company shares).

Performance Target: To exceed the return of the S&P 500 Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the S&P 500 Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the Performance Target, the S&P 500 Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the S&P 500 Index over the longer term.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund is otherwise expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the abrdn American Equity Enhanced Index Fund B Accumulation shares increased by 27.11% (net of fees), compared with an increase of 28.01% in the performance target, the S&P 500 Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn\*\*. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn\*\* or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdn means the relevant member of abrdn group, being Aberdeen Group plc (formerly abrdn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

US share prices, as measured by the broad S&P 500 Index, rose strongly over the 12-month period.

In particular, there was a strong performance by the technology sector, especially artificial intelligence-related stocks, such as NVIDIA, Microsoft and Alphabet. These stocks are especially sensitive to the end of monetary tightening and the prospect of rate cuts due to the favourable effect on their future discounted earnings.

Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to maintain a restrictive policy stance for much of the period. However, after a sustained fall in annual inflation and some mixed US economic data, it lowered the target range for the federal funds rate by 50 bps in September, then by 25 bps in both November and December, taking it to 4.25–4.50%.

US equities performed well over the first quarter of 2024 as encouraging inflation trends led to optimism about future interest-rate cuts. However, equities weakened in April on fears of interest rates staying higher for longer. Equities rebounded in May and June, though, due to fresh hopes of interest-rate cuts, as well as better-than-expected corporate earnings. Fears of a US recession caused a sell-off in equities from mid-July to the start of August. However, equities resumed their upward trend towards the end of the period, supported in November by Donald Trump's election win, given his pro-growth agenda of tax cuts, deregulation and increased infrastructure spending. Nevertheless, concerns about interest rates staying higher for longer resurfaced in December, leading to a weak month for equities.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

2024 was a good year for our factor-based approach to managing a US equity portfolio, despite the slight underperformance over the 12 months. The first half of the year contributed very little to the full-year results. Indeed, the fund marginally lagged the index by the halfway point of the year.

During the second half of the period, two of our factors propelled the portfolio in a positive direction, namely quality companies with good momentum in both earnings and price. Companies with notionally attractive measures of market value relative to their fundamentals were out of favour. For example, high dividend yield stocks did not fare well. Counter to that, efficiently run companies with conservative investment practices added positively to the fund's performance, as did those companies with good cashflow characteristics.

As is often the case, the complementary relationship between value and momentum factors also favoured the fund in the second half of the year. Although our valuation metrics faltered, stocks with good and persistent price momentum forged ahead. Effectively, stocks that were already performing well continued to do so throughout the year.

It was a year with some significant geopolitical events and associated news flow that contributed significantly to the overall market volatility. The fund was positioned appropriately for both inflation and interest rates remaining stubbornly elevated. In addition, our view that a Trump presidency would not adversely affect returns was vindicated in the final months of the year.

### Portfolio Outlook and Strategy

With Donald Trump securing his second term, uncertainty around election results has been replaced with policy ambiguity. Deregulation and tax cuts are supportive of GDP growth, but incremental tariffs and immigration restrictions could mute these gains. This combination of looser fiscal policy coupled with potential supply-side shocks raises inflation expectations. As a result, we expect Fed rate cuts to slow in 2025 while we await increased visibility over the policy agenda and its resulting impact on inflation.

Against this backdrop, the outlook for US stocks remains positive. Corporate balance sheets are flush with cash, often triggering merger and acquisition activity. Although interest rates should gradually decline over time, they remain well above pre-pandemic levels, creating structural advantages for higher-quality companies.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>Performance</b>			
Return after charges	27.22%	19.03%	(8.35%)
<b>Other information</b>			
Closing net asset value (£'000)	211,457	271,241	179,186
Closing number of shares	94,148,422	153,639,820	120,806,334
Operating charges	0.11%	0.11%	0.11%
Direct transaction costs	-	0.01%	0.02%
<b>Prices</b>			
Highest share price	229.8	177.8	166.6
Lowest share price	174.6	146.4	139.0

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

# Notes to the Financial Statements

## 1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	95,454	59,226
Derivative contracts	1,789	2,577
Forward currency contracts	389	(596)
Other gains	89	155
Subsidised fees taken from the capital account*	2	1
Transaction charges	(32)	(17)
<b>Net capital gains</b>	<b>97,691</b>	<b>61,346</b>

\* Subsidised fees are paid by the ACD.

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	664	527
Derivative revenue	3	2
Overseas dividends	5,508	5,705
Overseas REIT	397	358
<b>Total revenue</b>	<b>6,572</b>	<b>6,592</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	591	492
General administration charge	43	36
	634	528
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Safe custody fee	17	16
	17	16
<b>Other:</b>		
Subsidised fees*	(28)	(19)
	(28)	(19)
<b>Total expenses</b>	<b>623</b>	<b>525</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

\* Subsidised fees are paid by the ACD.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	856	855
<b>Total taxation (note 4b)</b>	<b>856</b>	<b>855</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>5,947</b>	<b>6,067</b>
Corporation tax at 20% (2023: 20%)	1,190	1,213
Effects of:		
Revenue not subject to taxation	(1,102)	(1,141)
Overseas taxes	856	855
Overseas tax expensed	(12)	(11)
Excess allowable expenses	(76)	(61)
<b>Total tax charge for year (note 4a)</b>	<b>856</b>	<b>855</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £141,000 (2023: £217,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	2,472	2,558
Final distribution	2,072	2,710
	4,544	5,268
Add: Income deducted on cancellation of shares	883	614
Deduct: Income received on issue of shares	(335)	(670)
<b>Total distributions for the year</b>	<b>5,092</b>	<b>5,212</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

## Continued

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	298	416
Amounts receivable from the ACD for the issue of shares	22	358
Expenses reimbursement receivable from the ACD	30	20
Overseas withholding tax recoverable	1	13
<b>Total debtors</b>	<b>351</b>	<b>807</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	197	342
Cash at broker	409	678
	<b>606</b>	<b>1,020</b>
abrdn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	17,713
abrdn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	7,956	-
<b>Net liquidity</b>	<b>8,562</b>	<b>18,733</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	52	49
Accrued expenses payable to the Depositary or associates of the Depositary	3	2
Amounts payable to the ACD for cancellation of shares	2,332	158
<b>Total creditors</b>	<b>2,387</b>	<b>209</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

# Notes to the Financial Statements

## Continued

### 10 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrtn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of derivatives during the year, or in the prior year.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

X Accumulation	730,827	97,946	(211,450)	(82)	617,241

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
<b>Fair value of investment assets</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
US Dollar	385,664	414,230
<b>Total</b>	<b>385,664</b>	<b>414,230</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £19,283,000 (2023: £20,712,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £19,342,000 (2023: £20,642,000).

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	44,571	56	35,587	(84)
Futures	6,398	(105)	18,905	198
<b>Total market exposure</b>	<b>50,969</b>	<b>(49)</b>	<b>54,492</b>	<b>114</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

# Notes to the Financial Statements

## Continued

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(105)	409	-	304	0.08
	<b>(105)</b>	<b>409</b>	<b>-</b>	<b>304</b>	<b>0.08</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	198	678	-	876	0.21
	<b>198</b>	<b>678</b>	<b>-</b>	<b>876</b>	<b>0.21</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

At the balance sheet date the fund had the following positions.

2024	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
<b>Counterparties</b>				
Bank of America Merrill Lynch	(13)	-	-	(13)
Citigroup	(23)	-	-	(23)
HSBC	(3)	-	-	(3)
Royal Bank of Canada	95	-	-	95
<b>Total</b>	<b>56</b>	<b>-</b>	<b>-</b>	<b>56</b>

  

2023	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
<b>Counterparties</b>				
Citigroup	6	-	-	6
Goldman Sachs	(20)	-	-	(20)
HSBC	8	-	-	8
Morgan Stanley	(78)	-	-	(78)
<b>Total</b>	<b>(84)</b>	<b>-</b>	<b>-</b>	<b>(84)</b>

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £2,621,000 (2023: £349,000).

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 – shares purchased prior to 1 January 2024

Group 2 – shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>A Accumulation</b>				
Group 1	1.1756	-	1.1756	1.1260
Group 2	0.5896	0.5860	1.1756	1.1260
<b>B Accumulation</b>				
Group 1	1.9701	-	1.9701	1.8496
Group 2	1.0843	0.8858	1.9701	1.8496
<b>N Accumulation</b>				
Group 1	1.2221	-	1.2221	1.1533
Group 2	0.7712	0.4509	1.2221	1.1533
<b>X Accumulation</b>				
Group 1	2.2801	-	2.2801	2.1328
Group 2	1.0148	1.2653	2.2801	2.1328

## Final dividend distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>A Accumulation</b>				
Group 1	1.1647	-	1.1647	1.1193
Group 2	1.0228	0.1419	1.1647	1.1193
<b>B Accumulation</b>				
Group 1	1.9127	-	1.9127	1.8404
Group 2	1.1293	0.7834	1.9127	1.8404
<b>N Accumulation</b>				
Group 1	1.2379	-	1.2379	1.1696
Group 2	0.6775	0.5604	1.2379	1.1696
<b>X Accumulation</b>				
Group 1	2.3122	-	2.3122	2.1773
Group 2	1.0039	1.3083	2.3122	2.1773

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn American Equity Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the S&P 500 Index.

Performance Target: To match the return of the S&P 500 Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the S&P 500 Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the S&P 500 Index ("tracking error") will be in the region of 0.0 – 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the S&P 500 Index are priced are different. The fund is valued at 12:00, but the S&P 500 Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the S&P 500 Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

Over the review period, the value of abrdn American Equity Tracker Fund B Accumulation shares returned 26.71% (net of fees) compared with the 27.26% increase for its performance target, the S&P 500 Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.03%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn\*\*. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn\*\* or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdn means the relevant member of abrdn group, being Aberdeen Group plc (formerly abrdn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

## Continued

### Market Review

US share prices, as measured by the broad S&P 500 Index, rose notably over the 12-month period. In particular, there was a strong performance by the technology sector, especially artificial intelligence-related stocks, such as NVIDIA, Microsoft and Alphabet. These stocks are especially sensitive to the end of monetary tightening and the prospect of rate cuts due to the favourable effect on their future discounted earnings.

Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to maintain a restrictive policy stance for much of the period. However, after a sustained fall in annual inflation and some mixed US economic data, it lowered the target range for the federal funds rate by 50 basis points (bps) in September, then by 25 bps in both November and December, taking it to 4.25–4.50%. US equities performed well over the first quarter of 2024 as encouraging inflation trends led to optimism about future interest-rate cuts. However, equities weakened in April on fears of interest rates staying higher for longer. Equities rebounded in May and June, though, due to fresh hopes of interest-rate cuts, as well as better-than-expected corporate earnings. Fears of a US recession caused a sell-off in equities from mid-July to the start of August. However, equities resumed their upward trend towards the end of the period, supported in November by Donald Trump's election win, given his pro-growth agenda of tax cuts, deregulation and increased infrastructure spending. Nevertheless, concerns about interest rates staying higher for longer resurfaced in December, leading to a weak month for equities.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the S&P 500 Index. The fund continued to track the S&P 500 Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

With Donald Trump securing his second term, uncertainty around election results has been replaced with policy ambiguity. Deregulation and tax cuts are supportive of GDP growth, but incremental tariffs and immigration restrictions could mute these gains. This combination of looser fiscal policy coupled with potential supply-side shocks raises inflation expectations. As a result, we expect Fed rate cuts to slow in 2025 while we await increased visibility over the policy agenda and its resulting impact on inflation.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>Net assets attributable to shareholders</b>			<b>1,403,113</b>		<b>1,029,735</b>

# Notes to the Financial Statements

## 1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	279,977	144,117
Derivative contracts	5,328	4,791
Forward currency contracts	(886)	(1,043)
Other (losses)/gains	(358)	126
Transaction charges	(38)	(28)
<b>Net capital gains</b>	<b>284,023</b>	<b>147,963</b>

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	1,119	708
Overseas dividends	16,192	14,273
Overseas REIT	770	689
<b>Total revenue</b>	<b>18,081</b>	<b>15,670</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	69	12
General administration charge	128	93
	197	105
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Safe custody fee	52	40
	52	40
<b>Other:</b>		
Administration fees	192	140
	192	140
<b>Total expenses</b>	<b>441</b>	<b>285</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

# Notes to the Financial Statements

### 4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	3	4
Interest payable	15	-
<b>Total interest payable &amp; similar charges</b>	<b>18</b>	<b>4</b>

### 5 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	288	219
Double taxation relief	(117)	(101)
Overseas taxes	2,480	2,132
Total current tax	2,651	2,250
Deferred tax (note 5c)	(1)	1
<b>Total taxation (note 5b)</b>	<b>2,650</b>	<b>2,251</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>17,622</b>	<b>15,381</b>
Corporation tax at 20% (2023: 20%)	3,524	3,076
Effects of:		
Revenue not subject to taxation	(3,238)	(2,854)
Overseas taxes	2,480	2,132
Double taxation relief	(117)	(101)
Revenue taxable in other periods	2	(3)
Deferred Tax	(1)	1
<b>Total tax charge for year (note 5a)</b>	<b>2,650</b>	<b>2,251</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Deferred tax

Deferred tax charge at the start of the year	5	4
Deferred tax charge in statement of total return for year (note 5a)	(1)	1
<b>Provision at the end of the year</b>	<b>4</b>	<b>5</b>

#### (d) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 6 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	6,448	6,208
Final distribution	7,542	6,806
	13,990	13,014
Add: Income deducted on cancellation of shares	1,302	582
Deduct: Income received on issue of shares	(320)	(465)
<b>Total distributions for the year</b>	<b>14,972</b>	<b>13,131</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	14,972	13,130
Overseas deferred capital gains tax on unrealised gains	-	1
<b>Total distributions for the year</b>	<b>14,972</b>	<b>13,131</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	808	875
Amounts receivable from the ACD for the issue of shares	182	1
Overseas withholding tax recoverable	3	7
<b>Total debtors</b>	<b>993</b>	<b>883</b>

### 8 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	491	1,061
Cash at broker	959	259
	<b>1,450</b>	<b>1,320</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	15,085
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	13,300	-
<b>Net liquidity</b>	<b>14,750</b>	<b>16,405</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 9 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Deferred tax payable on accrued income	4	5
<b>Total provisions for liabilities</b>	<b>4</b>	<b>5</b>

### 10 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	23	10
Accrued expenses payable to the Depositary or associates of the Depositary	7	5
Amounts payable to the ACD for cancellation of shares	20	-
Corporation tax payable	88	69
Other accrued expenses	59	40
<b>Total creditors</b>	<b>197</b>	<b>124</b>

### 11 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 12 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 10.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 10.

# Notes to the Financial Statements

X Income	1,000	-	-	1,000

### 15 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
<b>Fair value of investment assets</b>

### 16 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
US Dollar	1,402,332	1,030,016
<b>Total</b>	<b>1,402,332</b>	<b>1,030,016</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £70,117,000 (2023: £51,501,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £70,044,000 (2023: £51,383,000).

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	30,951	87	21,086	(128)
Futures	13,508	(316)	16,825	522
<b>Total market exposure</b>	<b>44,459</b>	<b>(229)</b>	<b>37,911</b>	<b>394</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

# Notes to the Financial Statements

## Continued

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(316)	959	-	643	0.05
	<b>(316)</b>	<b>959</b>	<b>-</b>	<b>643</b>	<b>0.05</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	522	259	-	781	0.08
	<b>522</b>	<b>259</b>	<b>-</b>	<b>781</b>	<b>0.08</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

At the balance sheet date the fund had the following positions.

2024	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
<b>Counterparties</b>				
Bank of America Merrill Lynch	(7)	-	-	(7)
Citigroup	82	-	-	82
Royal Bank of Canada	12	-	-	12
<b>Total</b>	<b>87</b>	<b>-</b>	<b>-</b>	<b>87</b>

  

2023	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
<b>Counterparties</b>				
Citigroup	(101)	-	-	(101)
Goldman Sachs	(23)	-	-	(23)
Royal Bank of Canada	(4)	-	-	(4)
<b>Total</b>	<b>(128)</b>	<b>-</b>	<b>-</b>	<b>(128)</b>

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £575,000 (2023: £275,000).

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 – shares purchased prior to 1 January 2024

Group 2 – shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>B Accumulation</b>				
Group 1	1.1705	-	1.1705	1.1222
Group 2	0.7625	0.4080	1.1705	1.1222
<b>N Accumulation</b>				
Group 1	1.1491	-	1.1491	1.0976
Group 2	0.4601	0.6890	1.1491	1.0976
<b>X Accumulation</b>				
Group 1	1.2311	-	1.2311	1.1712
Group 2	0.8004	0.4307	1.2311	1.1712
<b>X Income</b>				
Group 1	0.9622	-	0.9622	1.7565
Group 2	0.9622	-	0.9622	1.7565

## Final dividend distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.2065	-	1.2065	1.1773
Group 2	0.7506	0.4559	1.2065	1.1773
<b>N Accumulation</b>				
Group 1	1.2047	-	1.2047	1.1495
Group 2	1.1362	0.0685	1.2047	1.1495
<b>X Accumulation</b>				
Group 1	1.2680	-	1.2680	1.2284
Group 2	0.7756	0.4924	1.2680	1.2284
<b>X Income</b>				
Group 1	1.0193	-	1.0193	0.9882
Group 2	1.0193	-	1.0193	0.9882

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Asia Pacific Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in Asia Pacific, excluding Japan equities (company shares).

Performance Target: To exceed the return of the MSCI AC Asia Pacific ex Japan Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the MSCI AC Asia Pacific ex Japan Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdrn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the Performance Target, the MSCI AC Asia Pacific ex Japan Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI AC Asia Pacific ex Japan Index over the longer term.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the abrdrn Asia Pacific Equity Enhanced Index Fund B Accumulation shares increased by 14.48% (net of fees), compared with an increase of 13.35% in the performance target, the MSCI AC Asia Pacific ex Japan Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdrn. Basis: close of business return, income reinvested, gross of expenses.

### Market Review

Stock markets in the Asia Pacific (excluding Japan) region advanced over the 12-month period. Investor sentiment was supported by signs that high annual inflation globally was beginning to subside, with diminishing fears that the world economy could be tipped into a recession by interest-rate hikes. As disinflation became more apparent, investors began anticipating major central banks cutting rates later in 2024, with the ECB leading the way with a rate reduction in June.

Chinese share prices lagged for much of the period. This was due to growing risks in the country's highly indebted property sector, ongoing geopolitical tensions with the US and a regulatory crackdown. As a result, Chinese authorities initially announced various stimulus measures aimed at boosting investor sentiment, which helped to a degree. Chinese equities then surged in September after the People's Bank of China surprisingly announced a raft of planned monetary support measures, including another 50-bp cut to banks' reserve requirement ratios and further reductions in loan prime rates. It also aimed to boost the property market, small business lending and investor sentiment. However, investors were disappointed by the details of the Chinese government's 10 trillion yuan fiscal package, which focused on restructuring local government debt rather than directly stimulating consumer demand or supporting the property sector.

Meanwhile, the Taiwanese stock market performed strongly over the period, supported by its relatively high weighting in the technology sector. While the Indian market fared well as investors were encouraged by the resilience of the local economy, signs of slowing growth weighed on sentiment towards the end of the period.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

2024 was a good year for multi-factor investing as the fund outperformed its benchmark, following up on a positive year in 2023. All three factors drove the positive

performance, as the market favoured efficiently run companies (quality) at attractive prices (valuation) with positive momentum.

Performance was particularly positive in the first quarter of the year as all three factors performed well. Stocks that were forecasted to have improving earnings performed particularly well, and this positive sentiment was complimented by companies with inexpensive valuations. Firms that generated positive free cashflow somewhat disappointed, but this was more than offset by more cyclical measures of valuation demonstrating the benefits of a diversified factor approach.

The second and third quarters were more challenging for the fund, but it still held its own, with positive sentiment continuing its upward trend. This offset some of the underperformance from companies at the quality end of the spectrum. The final quarter of year proved similar to the first quarter, with value, quality and momentum all contributing positively to relative performance. After a poor start to the year, cash-generative firms fared well alongside more cyclical, inexpensive companies. Well-run, quality companies were also in favour as the market preferred profitable companies to help navigate some of the geopolitical uncertainty brought about by the US election and Chinese fiscal policy.

In summary, 2024 was another positive year for the fund relative to the benchmark, thanks to the combination of value, quality and momentum. This demonstrated the benefits of a diversified approach to return generation.

### Portfolio Outlook and Strategy

Sentiment appears volatile around Asia over the short term given the inauguration of Donald Trump as US President on 20 January 2025 and what that might mean regarding tariff risks, especially for China. The implications of Trump 2.0 for the broader region are complex. Trump is likely to drive uncertainty and volatility, which could create opportunities for long-term investors. Higher tariffs and trade barriers are expected, hurting China and prompting aggressive domestic growth efforts. Export markets may face pressure from higher tariffs and limited US rate cuts. Geopolitical tensions remain challenging, with potential shifts in Asia if Trump follows his first-term playbook. However, Asia's diversity means the entire region should not be painted with a broad brush. Economies like India, primarily driven by domestic factors, may benefit from supply diversification away from China, which also benefits ASEAN. Intra-regional trade remains strong, and quality companies should remain well-positioned.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk			
←					→		
1	2	3	4	5	6	7	

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

# Notes to the Financial Statements

## 1 Net Capital Gains/(Losses)

	2024 £'000	2023 £'000
Non-derivative securities	35,654	(2,163)
Derivative contracts	659	833
Forward currency contracts	76	(604)
Other losses	(265)	(338)
Subsidised fees taken from the capital account*	3	6
Transaction charges	(115)	(132)
<b>Net capital gains/(losses)</b>	<b>36,012</b>	<b>(2,398)</b>

\* Subsidised fees are paid by the ACD.

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	1	1
Derivative revenue	1	3
<b>Income from Overseas Collective Investment Schemes</b>		
Franked income	138	-
Overseas dividends	8,618	10,234
Overseas REIT	235	132
Stocklending revenue	6	1
<b>Total revenue</b>	<b>8,999</b>	<b>10,371</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	448	491
General administration charge	30	33
	478	524
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Revenue collection expenses	4	2
Safe custody fee	59	71
	63	73

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
<b>Other:</b>		
Subsidised fees*	(11)	(21)
	(11)	(21)
<b>Total expenses</b>	<b>530</b>	<b>576</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

\* Subsidised fees are paid by the ACD.

## 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	616	857
Overseas capital gains tax	1,415	399
Total current tax	2,031	1,256
Deferred tax (note 4c)	14	586
<b>Total taxation (note 4b)</b>	<b>2,045</b>	<b>1,842</b>

### (b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024	2023
<b>Net revenue before taxation</b>	<b>8,465</b>	<b>9,794</b>
Corporation tax at 20% (2023: 20%)	1,693	1,959
Effects of:		
Revenue not subject to taxation	(1,751)	(2,047)
Overseas taxes	616	857
Overseas tax expensed	(4)	(1)
Excess allowable expenses	62	89
Overseas capital gains tax	1,415	399
Deferred tax	14	586
<b>Total tax charge for year (note 4a)</b>	<b>2,045</b>	<b>1,842</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
<b>(c) Deferred tax</b>		
Deferred tax charge at the start of the year	861	275
Deferred tax charge in statement of total return for year (note 4a)	14	586
<b>Provision at the end of the year</b>	<b>875</b>	<b>861</b>

### (d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £525,000 (2023: £469,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

## 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	3,697	4,748
Final distribution	3,669	3,831
	7,366	8,579
Add: Income deducted on cancellation of shares	581	430
Deduct: Income received on issue of shares	(98)	(72)
<b>Total distributions for the year</b>	<b>7,849</b>	<b>8,937</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	6,420	7,952
Overseas capital gains tax on realised gains	1,415	399
Overseas deferred capital gains tax on unrealised gains	14	586
<b>Total distributions for the year</b>	<b>7,849</b>	<b>8,937</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	276	547
Amounts receivable from the ACD for the issue of shares	27	212
Expenses reimbursement receivable from the ACD	14	27
Overseas withholding tax recoverable	246	259
<b>Total debtors</b>	<b>563</b>	<b>1,045</b>

# Notes to the Financial Statements

## Continued

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	1,744	7,802
Cash at broker	241	233
	<b>1,985</b>	<b>8,035</b>
abrdrn Liquidity Fund (Lux) – Sterling Fund Z3 Inc*	-	5
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	5	-
<b>Net liquidity</b>	<b>1,990</b>	<b>8,040</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Overseas capital gains tax	875	861
<b>Total provisions for liabilities</b>	<b>875</b>	<b>861</b>

### 9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	40	40
Accrued expenses payable to the Depository or associates of the Depository	22	17
Amounts payable to the ACD for cancellation of shares	78	129
Capital gains tax payable	57	-
<b>Total creditors</b>	<b>197</b>	<b>186</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 11 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

# Notes to the Financial Statements

## Continued

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 9.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

Amounts receivable from abrdn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 9.

## 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales

X Accumulation	213,800	5,379,029	(772,627)	4,820,202

## 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

### 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Australian Dollar	40,887	44,709
China Renminbi	9,671	7,450
Hong Kong Dollar	75,326	71,636
Indian Rupee	49,935	39,167
Indonesian Rupiah	4,461	4,893
Malaysian Ringgit	5,072	2,894
New Zealand Dollar	663	1,650
Philippines Peso	1,831	2,258
Singapore Dollar	8,372	12,396
South Korean Won	24,924	39,516
Taiwan Dollar	52,580	47,975
Thai Baht	5,440	6,240
US Dollar	12,363	24,466
<b>Total</b>	<b>291,525</b>	<b>305,250</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £14,576,000 (2023: £15,263,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £14,550,000 (2023: £15,000,000).

# Notes to the Financial Statements

## Continued

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	17,076	(29)	11,004	(113)
Futures	2,356	(75)	8,746	327
<b>Total market exposure</b>	<b>19,432</b>	<b>(104)</b>	<b>19,750</b>	<b>214</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(75)	241	-	166	0.06
	<b>(75)</b>	<b>241</b>	<b>-</b>	<b>166</b>	<b>0.06</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	327	233	-	560	0.18
	<b>327</b>	<b>233</b>	<b>-</b>	<b>560</b>	<b>0.18</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

# Notes to the Financial Statements

Group 2	0.3763	1.4033	1.7796	1.5456

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Asia Pacific ex-Japan Equity Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI AC Asia Pacific ex Japan Index.

Performance Target: To match the return of the MSCI AC Asia Pacific ex Japan Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI AC Asia Pacific ex Japan Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdrn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI AC Asia Pacific ex Japan Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI AC Asia Pacific ex Japan Index are priced are different. The fund is valued at 12:00, but the MSCI AC Asia Pacific ex Japan Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the MSCI AC Asia Pacific ex Japan Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdrn Asia Pacific ex-Japan Equity Tracker Fund X Accumulation shares increased by 11.83% (net of fees) compared with an increase of 12.60% in the performance target, the MSCI AC Asia Pacific ex Japan Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdrn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.19%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

## Continued

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Stock markets in the Asia Pacific (excluding Japan) region advanced over the 12-month period. Investor sentiment was supported by signs that high annual inflation globally was beginning to subside, with diminishing fears that the world economy could be tipped into a recession by interest-rate hikes. As disinflation became more apparent, investors began anticipating major central banks cutting rates later in 2024, with the European Central Bank (ECB) leading the way with a rate reduction in June.

Chinese share prices lagged for much of the period. This was due to growing risks in the country's highly indebted property sector, ongoing geopolitical tensions with the US and a regulatory crackdown. As a result, Chinese authorities initially announced various stimulus measures aimed at boosting investor sentiment, which helped to a degree. Chinese equities then surged in September after the People's Bank of China surprisingly announced a raft of planned monetary support measures, including another 50 basis point (bp) cut to banks' reserve requirement ratios and further reductions in loan prime rates. It also aimed to boost the property market, small business lending and investor sentiment.

However, investors were disappointed by the details of the Chinese government's 10 trillion yuan fiscal package, which focused on restructuring local government debt rather than directly stimulating consumer demand or supporting the property sector.

Elsewhere, the Taiwanese stock market performed strongly over the period, supported by its relatively high weighting in the technology sector. The Indian market fared well as investors were encouraged by the resilience of the local economy, signs of slowing growth weighed on sentiment towards the end of the period.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the MSCI AC Asia Pacific ex Japan Index. The fund continued to track the MSCI AC Asia Pacific ex Japan Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

Sentiment appears volatile around Asia over the short term given the inauguration of Donald Trump as US President on 20 January 2025 and what that might mean regarding tariff risks, especially for China. The implications of Trump 2.0 for the broader region are complex. Trump is likely to drive uncertainty and volatility, which could create opportunities for long-term investors. Higher tariffs and trade barriers are expected, hurting China and prompting aggressive domestic growth efforts. Export markets may face pressure from higher tariffs and limited US rate cuts. Geopolitical tensions remain challenging, with potential shifts in Asia if Trump follows his first-term playbook. However, Asia's diversity means the entire region should not be painted with a broad brush. Economies like India, primarily driven by domestic factors, may benefit from supply diversification away from China, which also benefits ASEAN. Intra-regional trade remains strong, and quality companies should remain well-positioned.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 6 to 5 on 25 April 2024 and then changed from 5 to 6 on 31 July 2024.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Emerging Markets Risk – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>Net capital gains/(losses)</b>	<b>77,286</b>	<b>(6,334)</b>

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	627	421
<b>Income from Overseas Collective Investment Schemes</b>		
Franked income	136	45
Overseas dividends	22,382	18,013
Overseas REIT	721	595
Stocklending revenue	13	2
<b>Total revenue</b>	<b>23,879</b>	<b>19,076</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	83	24
General administration charge	87	67
	170	91
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Revenue collection expenses	6	7
Safe custody fee	172	143
	178	150
<b>Other:</b>		
Administration fees	78	59
	78	59
<b>Total expenses</b>	<b>426</b>	<b>300</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

# Notes to the Financial Statements

## Continued

### 4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	13	11
Interest payable	51	8
<b>Total interest payable &amp; similar charges</b>	<b>64</b>	<b>19</b>

### 5 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	172	143
Double taxation relief	(53)	(43)
Adjustments in respect of prior periods	-	(4)
Overseas taxes	1,520	1,247
Overseas capital gains tax	641	315
Total current tax	2,280	1,658
Deferred tax (note 5c)	2,136	1,376
<b>Total taxation (note 5b)</b>	<b>4,416</b>	<b>3,034</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024	2023
<b>Net revenue before taxation</b>	<b>23,389</b>	<b>18,757</b>
Corporation tax at 20% (2023: 20%)	4,678	3,751
Effects of:		
Revenue not subject to taxation	(4,504)	(3,612)
Overseas taxes	1,520	1,247
Double taxation relief	(53)	(43)
Adjustments in respect of prior periods	-	(3)
Revenue taxable in other periods	(2)	3
Overseas capital gains tax	641	315
Deferred Tax	2,136	1,376
<b>Total tax charge for year (note 5a)</b>	<b>4,416</b>	<b>3,034</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
<b>(c) Deferred tax</b>		
Deferred tax charge at the start of the year	2,946	1,570
Deferred tax charge in statement of total return for year (note 5a)	2,136	1,376
<b>Provision at the end of the year</b>	<b>5,082</b>	<b>2,946</b>

### (d) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

## 6 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	11,018	8,744
Final distribution	12,416	8,892
	23,434	17,636
Add: Income deducted on cancellation of shares	904	418
Deduct: Income received on issue of shares	(2,589)	(639)
<b>Total distributions for the year</b>	<b>21,749</b>	<b>17,415</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	18,973	15,723
Overseas capital gains tax on realised gains	641	315
Tax charge on capital ACD fee rebates	(1)	-
Overseas deferred capital gains tax on unrealised gains	2,136	1,376
Undistributed revenue brought forward	-	1
<b>Total distributions for the year</b>	<b>21,749</b>	<b>17,415</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	943	1,052
Amounts receivable from the ACD for the issue of shares	394	174
Overseas withholding tax recoverable	559	378
<b>Total debtors</b>	<b>1,896</b>	<b>1,604</b>

# Notes to the Financial Statements

## Continued

### 8 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	197	1,710
Cash at broker	2,805	450
	<b>3,002</b>	<b>2,160</b>
abrdn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	10,109
abrdn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	26,201	-
<b>Net liquidity</b>	<b>29,203</b>	<b>12,269</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 9 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Overseas capital gains tax	5,074	2,938
Deferred tax payable	8	8
<b>Total provisions for liabilities</b>	<b>5,082</b>	<b>2,946</b>

### 10 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	20	8
Accrued expenses payable to the Depositary or associates of the Depositary	75	34
Amounts payable to the ACD for cancellation of shares	-	48
Capital gains tax payable	178	-
Corporation tax payable	23	20
Other accrued expenses	24	15
<b>Total creditors</b>	<b>320</b>	<b>125</b>

### 11 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

# Notes to the Financial Statements

## Continued

### 12 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 10.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 10.

### 13 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds, collective investment schemes and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

### 15 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000

### 16 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency exposure	currency exposure
	2024	2023
	£'000	£'000
Australian Dollar	143,954	114,623
China Renminbi	39,175	28,883
Hong Kong Dollar	239,608	160,027
Indian Rupee	175,196	107,328

Thai Baht	13,386	11,643
US Dollar	54,183	34,118
<b>Total</b>	<b>996,029</b>	<b>695,057</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £49,801,000 (2023: £34,753,000).

### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £50,228,000 (2023: £34,796,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	52,341	71	13,015	(98)
Futures	29,477	(719)	13,433	409
<b>Total market exposure</b>	<b>81,818</b>	<b>(648)</b>	<b>26,448</b>	<b>311</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

# Notes to the Financial Statements

## Continued

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(719)	2,805	-	2,086	0.21
	<b>(719)</b>	<b>2,805</b>	<b>-</b>	<b>2,086</b>	<b>0.21</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	409	450	-	859	0.12
	<b>409</b>	<b>450</b>	<b>-</b>	<b>859</b>	<b>0.12</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024	Forwards £'000	Stock on loan £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock £'000	
<b>Counterparties</b>					
Bank of America Merrill Lynch	(7)	-	-	-	(7)
Citigroup	208	-	-	-	208
HSBC	(140)	-	-	-	(140)
Royal Bank of Canada	10	-	-	-	10
<b>Total</b>	<b>71</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>71</b>

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £15,000 (2023: £2,000) and expenses paid to the lending agent, Citibank, are £2,000 (2023: £Nil).

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 – shares purchased prior to 1 January 2024

Group 2 – shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>B Accumulation</b>				
Group 1	1.2230	-	1.2230	1.2609
Group 2	0.7691	0.4539	1.2230	1.2609
<b>N Accumulation</b>				
Group 1	1.2617	-	1.2617	1.2993
Group 2	0.1962	1.0655	1.2617	1.2993
<b>X Accumulation</b>				
Group 1	1.4063	-	1.4063	1.4414
Group 2	1.2978	0.1085	1.4063	1.4414
<b>X Income</b>				
Group 1	1.2976	-	1.2976	1.3655
Group 2	1.1614	0.1362	1.2976	1.3655

## Final dividend distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.3134	-	1.3134	1.2115
Group 2	0.2845	1.0289	1.3134	1.2115
<b>N Accumulation</b>				
Group 1	1.3614	-	1.3614	1.2525
Group 2	0.7073	0.6541	1.3614	1.2525
<b>X Accumulation</b>				
Group 1	1.5122	-	1.5122	1.3914
Group 2	0.7355	0.7767	1.5122	1.3914
<b>X Income</b>				
Group 1	1.3770	-	1.3770	1.2964
Group 2	0.6998	0.6772	1.3770	1.2964

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Emerging Markets Equity Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI Emerging Markets Index.

Performance Target: To match the return of the MSCI Emerging Markets Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI Emerging Markets Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI Emerging Markets Index ("tracking error") will be in the region of 0.0 – 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI Emerging Markets Index are priced are different. The fund is valued at 12:00, but the MSCI Emerging Markets Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the MSCI Emerging Markets Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the year ended 31 December 2024, the value of abrdn Emerging Markets Equity Tracker Fund X Accumulation shares increased by 9.12% (net of fees) compared with an increase of 9.98% in the performance target, MSCI Emerging Markets Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.18%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. # abrdrn Emerging Markets Equity Tracker Fund

## Continued

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Emerging market equities rose over the year, but they trailed developed markets. Share price divergence within countries and sectors marked emerging market performance over the period. Technology companies did well, especially those in Taiwan, riding the wave of the 'Magnificent 7' stocks in the US. However, markets such as Brazil and Mexico fell sharply due to concerns over fiscal discipline and potentially slowing economic prospects. China saw a late-year surge thanks to a slew of government stimulus measures in September, signalling a shift towards a pro-growth stance. Meanwhile, the US Federal Reserve lowered interest rates for the first time in four years but hinted at a slower pace of easing in 2025.

Separately, several major emerging economies held elections in 2024, including India where the ruling Bharatiya Janata Party lost its parliamentary majority and had to rely on allies to remain in power. In Mexico, the ruling leftwing party won a landslide victory. The year concluded with former President Donald Trump's re-election in the US, which raised questions about the implications for emerging markets.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the MSCI Emerging Markets Index. The fund continued to track the MSCI Emerging Markets Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

The outlook for emerging markets is constructive. Structural tailwinds remain intact, as global investment continues to recover, with a corresponding increased focus on the real economy. Emerging market central banks and governments have demonstrated fiscal and monetary discipline for an extended period. Both corporate and country debt levels appear healthy overall, which adds to the resilience of the asset class moving forward.

While Trump's promise of higher tariffs spell uncertainty for emerging markets, particularly China, it could prompt the Chinese government to ramp up domestic economic growth efforts. Already, we have seen a clear policy shift and a pro-growth tone. There remains scope for a sustained recovery for Chinese equities. Meanwhile, India's long-term prospects remain relatively bright, backed by significant transformations in physical and digital infrastructure, a resilient macro backdrop and positive demographics.

South Korea will likely stay in the spotlight after President Yoon's impeachment. While he faces a criminal inquiry, the prime minister, who was named acting president, was also impeached, with the finance minister now taking on the role, albeit with limited political heft at his disposal. Investors are now likely to attach a higher political risk premium to the market as a result.

Overall, emerging market valuations remain attractive, both historically and compared to the US.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 6 to 5 on 25 September 2024.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←						→
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Emerging Markets Risk – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Highest share price	126.9	121.2	131.1
Lowest share price	105.9	107.1	104.6

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

	2024 £'000	2023 £'000
<b>Other:</b>		
Administration fees	19	15
Subsidised fees*	-	(53)
	19	(38)
<b>Total expenses</b>	<b>137</b>	<b>61</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

\* Subsidised fees are paid by the ACD.

## 4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	-	1
Interest payable	6	5
<b>Total interest payable &amp; similar charges</b>	<b>6</b>	<b>6</b>

## 5 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	90	77
Double taxation relief	(43)	(45)
Overseas taxes	464	460
Overseas capital gains tax	135	174
Total current tax	646	666
Deferred tax (note 5c)	638	243
<b>Total taxation (note 5b)</b>	<b>1,284</b>	<b>909</b>

### (b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024 £'000	2023 £'000
<b>Net revenue before taxation</b>	<b>5,928</b>	<b>5,119</b>
Corporation tax at 20% (2023: 20%)	1,186	1,024
Effects of:		
Revenue not subject to taxation	(1,096)	(938)
Overseas taxes	464	460
Double taxation relief	(43)	(45)
Revenue taxable in other periods	-	(9)

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
Overseas capital gains tax	135	174
Deferred tax	638	243
<b>Total tax charge for year (note 5a)</b>	<b>1,284</b>	<b>909</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

### (c) Deferred tax

Deferred tax charge at the start of the year	693	450
Deferred tax charge in statement of total return for year (note 5a)	638	243
<b>Provision at the end of the year</b>	<b>1,331</b>	<b>693</b>

### (d) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

## 6 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	2,744	2,427
Final distribution	2,664	2,196
	5,408	4,623
Add: Income deducted on cancellation of shares	224	252
Deduct: Income received on issue of shares	(214)	(251)
<b>Total distributions for the year</b>	<b>5,418</b>	<b>4,624</b>

### Movement between net revenue and distributions

Net revenue after taxation	4,644	4,210
Overseas capital gains tax on realised gains	135	174
Tax relief on expenses charged to capital	-	(3)
Overseas deferred capital gains tax on unrealised gains	639	243
<b>Total distributions for the year</b>	<b>5,418</b>	<b>4,624</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

## Continued

### 7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	314	424
Amounts receivable from the ACD for the issue of shares	136	38
Expenses reimbursement receivable from the ACD	-	269
Overseas withholding tax recoverable	153	125
<b>Total debtors</b>	<b>603</b>	<b>856</b>

### 8 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	130	244
Cash at broker	344	-
	474	244
<b>Bank overdrafts</b>		
Overdraft at bank	-	(4)
Overdraft at broker	-	(37)
	-	(41)
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	2,597
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	5,148	-
<b>Net liquidity</b>	<b>5,622</b>	<b>2,800</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 9 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Overseas capital gains tax	1,326	688
Deferred tax payable on accrued income	5	5
<b>Total provisions for liabilities</b>	<b>1,331</b>	<b>693</b>

# Notes to the Financial Statements

### 10 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	2	2
Accrued expenses payable to the Depositary or associates of the Depositary	9	45
Amounts payable to the ACD for cancellation of shares	24	-
Capital gains tax payable	44	-
Corporation tax payable	22	32
Other accrued expenses	5	4
<b>Total creditors</b>	<b>106</b>	<b>83</b>

### 11 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 12 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 10.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 10.

Amounts receivable from abrtn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 7 and 10.

### 13 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds, collective investment schemes and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

# Notes to the Financial Statements

## Continued

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

### 15 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

### 16 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Brazilian Real	7,728	10,337
Chilean Peso	874	895
China Renminbi	8,923	7,632
Colombian Peso	210	187
Czech Koruna	285	266
Egyptian Pound	143	202
Euro	998	837
Hong Kong Dollar	46,379	34,248
Hungarian Forint	519	448
Indian Rupee	39,973	28,734
Indonesian Rupiah	3,144	3,306
Kuwaiti Dinar	1,580	1,317
Malaysian Ringgit	3,255	2,335
Mexican Peso	3,733	4,814
Philippines Peso	1,115	1,075
Polish Zloty	1,752	1,718
Qatari Riyal	1,764	1,527
Saudi Riyal	8,782	7,260
South Africa Rand	6,182	5,358
South Korean Won	19,173	22,790
Taiwan Dollar	41,852	28,140
Thai Baht	3,075	3,069
Turkish Lira	1,394	1,078
UAE Dirham	2,894	2,198
US Dollar	11,455	8,906
<b>Total</b>	<b>217,182</b>	<b>178,677</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £10,859,000 (2023: £8,934,000).

# Notes to the Financial Statements

## Continued

### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £10,865,000 (2023: £8,900,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	8,780	35	10,888	(32)
Futures	5,873	(185)	3,568	142
<b>Total market exposure</b>	<b>14,653</b>	<b>(150)</b>	<b>14,456</b>	<b>110</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(185)	344	-	159	0.07
	<b>(185)</b>	<b>344</b>	<b>-</b>	<b>159</b>	<b>0.07</b>
2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	142	(37)	-	105	0.06
	<b>142</b>	<b>(37)</b>	<b>-</b>	<b>105</b>	<b>0.06</b>

Group 1	1.5080	-	1.5080	3.1900
Group 2	1.5080	-	1.5080	3.1900

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Emerging Markets Local Currency Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the JP Morgan GBI-EM Global Diversified Index.

Performance Target: To match the return of the JP Morgan GBI-EM Global Diversified Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in government bonds that make up the JP Morgan GBI-EM Global Diversified Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the JP Morgan GBI-EM Global Diversified Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the JP Morgan GBI-EM Global Diversified Index are priced are different. The fund is valued at 12:00, but the JP Morgan GBI-EM Global Diversified Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the JP Morgan GBI-EM Global Diversified Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the JP Morgan GBI-EM Global Diversified Index.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the year ended 31 December 2024, the value of abrdn Emerging Markets Local Currency Bond Tracker Fund B Accumulation shares returned -1.12% (net of fees) compared with a return of -0.64% in the performance target, the JP Morgan GBI-EM Global Diversified Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 1.96%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

### Market Review

January proved to be a disappointing start to 2024 for emerging market (EM) debt. Geopolitics remained at the fore; attacks by Houthi rebels on commercial ships in the Red Sea were followed by retaliatory strikes from the US and UK. Fears of a broader escalation weighed on risk sentiment and adversely affected hard currency sovereign bonds, particularly those in the Middle East. The tide turned in February, with EM debt doing well, though results were widely dispersed. Within the broader market, risk assets benefitted from hopes of a soft landing, while sovereign bonds lost ground as investors pushed back the timing of future rate cuts given the above-target inflation. In March, EM assets were supported by dovish central bank narratives as yields moved lower. April was a tough month for EM debt as US inflation remained sticky, resulting in hawkish central bank sentiment and higher yields. However, May and June brought a more optimistic outlook, with easing inflation and strong employment data.

In July, EM debt's strong performance was fuelled by negative data surprises in the US. August saw volatility due to concerns over a US economic slowdown, following weaker nonfarm payrolls and a rise in the unemployment rate to 4.3%. In September, dovish central banks impacted the market, with the US Federal Reserve (Fed) cutting rates by 50 basis points (bps) to 4.75%-5.00% after a 14-month hold. Fed Chair Jerome Powell's decision reassured investors, spurring a risk-on rally. In October, the US economy continued to exhibit strength, leading the market to dial back its expectations of interest-rate cuts. This put sovereign bonds under pressure as US Treasury yields moved higher. November was an eventful month for EM debt, as Donald Trump's presidential victory sparked some key concerns for the EM universe. The possibility of a trade war with China looms large, alongside the threat of tariffs on exports to the US, which could severely affect economies dependent on US trade. Elsewhere, Hezbollah and Israel agreed to a ceasefire towards the end of November. This provided a brief respite for the Middle East, although there were claims from both sides that the other had violated it. Also in November, the US allowed Ukraine to fire longer-range missiles at Russian territory for the first time and Ukrainian President Volodymyr Zelenskyy stated that the requirement that Russia return occupied Ukrainian territory would no longer be required for a ceasefire. In December, the Fed cut interest rates by 25bps to

4.25-4.50%, in line with expectations, but otherwise struck a more hawkish tone. Against this backdrop, the 10-year US Treasury yield widened from 3.88% to 4.57% over the period.

### Portfolio Activity and Review

The fund aims to generate income and growth over the long term (five years or more) by tracking the return of the JP Morgan GBI-EM Global Diversified Index. In doing so, the fund will invest at least 90% in government bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

### Portfolio Outlook and Strategy

December proved to be a weaker month for EM debt amid higher US Treasury yields and a stronger US dollar. We continue to see value in the high-yield and frontier markets where spreads and yields look attractive. These are supported by increased market access and continued multilateral support. The biggest risk to the EM asset class is a higher Fed terminal rate due to Trump-related risks of fiscal loosening, tariffs and labour market disruption from deportations. Geopolitical risks have also heightened considerably this year, most recently in the Asia-Pacific region as America's adversaries, such as North Korea and China, test the new Trump administration's resolve. Additionally, the conflicts in the Middle East and Russia-Ukraine continue to rumble on.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- **Tracking Error Risk** – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- **Credit Risk** – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- **Interest Rate Risk** – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	101	103
Double taxation relief	(101)	(103)
Overseas taxes	873	581
Overseas capital gains tax	39	9
<b>Total taxation (note 4b)</b>	<b>912</b>	<b>590</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024 £'000	2023 £'000
<b>Net revenue before taxation</b>	<b>32,799</b>	<b>29,231</b>
Corporation tax at 20% (2023: 20%)	6,560	5,846
Effects of:		
Overseas taxes	873	581
Double taxation relief	(101)	(103)
Distributions treated as tax deductible	(6,459)	(5,743)
Overseas capital gains tax	39	9
<b>Total tax charge for year (note 4a)</b>	<b>912</b>	<b>590</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	6,743	6,937
Second interim distribution	7,927	6,561
Third interim distribution	8,416	7,251
Final distribution	9,382	8,026
	32,468	28,775
Add: Income deducted on cancellation of shares	1,986	1,046
Deduct: Income received on issue of shares	(2,528)	(1,172)
<b>Total distributions for the year</b>	<b>31,926</b>	<b>28,649</b>

	2024 £'000	2023 £'000
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	31,887	28,641
Overseas capital gains tax on realised gains	39	9
Undistributed revenue brought forward	1	-
Undistributed revenue carried forward	(1)	(1)
<b>Total distributions for the year</b>	<b>31,926</b>	<b>28,649</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	9,590	8,311
Amounts receivable from the ACD for the issue of shares	180	97
Overseas withholding tax recoverable	500	759
Sales awaiting settlement	10,736	14,157
<b>Total debtors</b>	<b>21,006</b>	<b>23,324</b>

## 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	36	2,031
	<b>36</b>	<b>2,031</b>
<b>Bank overdrafts</b>		
Overdraft at bank	(22)	-
	<b>(22)</b>	<b>-</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	1,652	-
<b>Net liquidity</b>	<b>1,666</b>	<b>2,031</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

## 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	16	25
Accrued expenses payable to the Depositary or associates of the Depositary	15	18
Purchases awaiting settlement	12,116	14,154
<b>Total creditors</b>	<b>12,147</b>	<b>14,197</b>

# Notes to the Financial Statements

## Continued

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and collective investment schemes during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

	Purchases		Sales	
	2024	2023	2024	2023
Trades in the year	£'000	£'000	£'000	£'000
Bonds	312,756	232,697	217,831	136,646
Collective investment schemes	94,820	94,229	86,315	97,062
<b>Trades in the year before transaction costs</b>	<b>407,576</b>	<b>326,926</b>	<b>304,146</b>	<b>233,708</b>
<b>Commissions</b>				
Collective investment schemes	1	-	-	-
<b>Total commissions</b>	<b>1</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Total transaction costs</b>	<b>1</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Total net trades in the year after transaction costs</b>	<b>407,577</b>	<b>326,926</b>	<b>304,146</b>	<b>233,708</b>

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.25% (2023: 0.25%), this is representative of the average spread on the assets held during the year.

X Income	5,000	-	-	5,000

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	-	597,096	-	-	530,305	-

<b>Total investment assets</b>	<b>12,976</b>	<b>598,748</b>	<b>-</b>	<b>5,457</b>	<b>530,305</b>	<b>-</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

# Notes to the Financial Statements

## Continued

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Argentina Peso	1	1
Brazilian Real	44,386	54,490
Chilean Peso	10,844	10,158
China Renminbi	62,989	51,948
Colombian Peso	23,711	25,205

South Africa Rand	50,996	44,981
Thai Baht	58,817	51,612
Turkish Lira	8,885	4,881
Uruguay Peso	1,018	922
US Dollar	(615)	(1,234)
<b>Total</b>	<b>605,777</b>	<b>533,880</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £30,289,000 (2023: £26,694,000).

### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

# Notes to the Financial Statements

## Continued

The interest rate risk profile of the fund's investments at the year end consists of:

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

# Notes to the Financial Statements

## Continued

2024	Minimum	Maximum	Average
VaR 99% 1 Month	4.10%	4.91%	4.52%

  

2023	Minimum	Maximum	Average
VaR 99% 1 Month	5.00%	5.45%	5.18%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	285,879	46.07
Below investment grade securities	90,397	14.57
Unrated securities	220,820	35.57
<b>Total value of securities</b>	<b>597,096</b>	<b>96.21</b>

  

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	290,135	53.03
Below investment grade securities	86,567	15.82
Unrated securities	153,603	28.11
<b>Total value of securities</b>	<b>530,305</b>	<b>96.96</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

The fund had no exposure to derivatives as at 31 December 2024 (2023: £Nil).

#### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock* £'000	
Barclays	1,812	-	(2,311)	(499)
<b>Total</b>	<b>1,812</b>	<b>-</b>	<b>(2,311)</b>	<b>(499)</b>

# Notes to the Financial Statements

## Continued

SFTR Issuers 2024	Type	Collateral Stock £'000
Netherlands (Govt of)	Bond	(2,311)
		<b>(2,311)</b>

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £2,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £Nil (2023: £Nil).

### 2023

The fund had no counterparty exposure at the year end.

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £12,169,000 (2023: £14,197,000).

# Distribution Tables

Group 1	1.4022	-	1.4022	1.5270
Group 2	1.4022	-	1.4022	1.5270

## Final interest distribution

Group 1 - shares purchased prior to 1 October 2024

Group 2 - shares purchased between 1 October 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.5834	-	1.5834	1.5603
Group 2	0.5101	1.0733	1.5834	1.5603
<b>N Accumulation</b>				
Group 1	1.5851	-	1.5851	1.5621
Group 2	0.6916	0.8935	1.5851	1.5621
<b>X Accumulation</b>				
Group 1	1.6346	-	1.6346	1.6116
Group 2	0.4951	1.1395	1.6346	1.6116
<b>X Income</b>				
Group 1	1.3970	-	1.3970	1.4530
Group 2	1.3970	-	1.3970	1.4530

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn European Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in European equities (company shares).

Performance Target: To exceed the return of the MSCI Europe ex UK Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the MSCI Europe ex UK Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the Index.
- In seeking to achieve the Performance Target, the MSCI Europe ex UK Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI Europe ex UK Index over the longer term.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn European Equity Enhanced Index Fund B Accumulation shares increased by 2.40% (net of fees), compared with an increase of 3.52% in the performance target, the MSCI Europe ex UK Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis forecast or prediction. Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Continental Europe's stock markets, as measured by the MSCI Europe ex UK Index, rose over the 12-month period. However, concerns about the eurozone economy and political instability in both France and Germany weighed on investor sentiment.

As fears of further monetary tightening eased, European equities trended upwards in the first quarter of 2024. While equities weakened in April on fears of prolonged high rates, they rose in May, driven by hopes of rate cuts and robust earnings. French equities suffered a sharp sell-off in June after President Emmanuel Macron called a snap election following his centrist alliance's shock defeat to Marine Le Pen's National Rally in the European Parliament elections. However, markets steadied in July as the National Rally's gains were smaller than expected. European equities faltered again from mid-July to early August on US recession fears but recovered initially. Towards the end of the period, German Chancellor Olaf Scholz lost a no-confidence vote after the collapse of his coalition government, meaning that there will be a federal election in February. Moreover, the French government collapsed after Prime Minister Michel Barnier resigned following a no-confidence vote over his budget proposal aimed at reducing the country's high debt burden. President Emmanuel Macron appointed veteran politician and centrist ally François Bayrou as Barnier's successor. Such political uncertainty caused volatility in European equities near the end of the period.

Encouraged by signs of disinflation, the European Central Bank cut its deposit facility rate by 25 bps in each of June, September, October and December, taking it to 3.00%.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

Overall, the fund had another positive year in absolute terms, thanks to the combined benefits of our risk-controlled, multi-factor approach.

After a tough start to the year in the first quarter, the fund delivered another positive year thanks to its diversified approach to return generation. Efficiently run companies

fared poorly in February and March as did more cyclical names. However, some of this negative performance was offset by firms with positive earnings sentiment and price trends. The negative returns to quality observed in the first quarter of the year turned positive over the next six months as investors looked favourably on companies with efficient capital deployment and improving profitability. Essentially, investors put a premium on stability in an increasingly uncertain macroeconomic and political environment. Firms with positive earnings sentiment continued to perform well after their good start to the year.

The combination of value and momentum proved to be the basis for a solid final quarter for our European portfolio as it performed roughly in line with the benchmark. From our perspective, diversification across valuation metrics proved to be more beneficial than it had been earlier in the year. Strong cash earnings also proved to be in favour as investors chose to focus on companies with measures of intrinsic corporate value that were out of line with the value placed upon them by the market. However, the fund suffered from a hangover of events towards the end of the previous quarter, when talk of Chinese fiscal stimulus caused a relief rally in firms positively exposed to a resurgent Chinese economy. This included the likes of automotives and luxury goods stocks that were out of favour with respect to our momentum factor. Nevertheless, other geopolitical and macroeconomic news flow had little impact on the fund, as it was largely neutral to changes in inflation and interest rates, and did in fact marginally benefit from the result of the US election.

### Portfolio Outlook and Strategy

The outlook for European equities is particularly positive, with the region benefiting from attractive valuations, most acutely relative to the US, and low levels of exposure among global investors. A stable economic backdrop alongside lower discount rates is a favourable combination for high-quality companies based in Europe, following several years of style headwinds. Dispersion is rising across markets and within sectors, and earnings delivery is key. Meanwhile, volatility is set to remain a feature of markets given elevated geopolitical risk and data-dependent central banks, and this is likely to provide opportunities. If inflation proves to be more persistent, then companies with true pricing power will be best placed to deliver sustained margin expansion. Sustainability is also coming back into focus as one of the most compelling enablers of long-term growth for economies and companies. Overall, we see a very attractive environment in which to hold companies with superior earnings growth and strong sustainability credentials in a concentrated portfolio.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	790	584
<b>Total taxation (note 4b)</b>	<b>790</b>	<b>584</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>6,832</b>	<b>6,625</b>
Corporation tax at 20% (2023: 20%)	1,366	1,325
Effects of:		
Revenue not subject to taxation	(1,371)	(1,337)
Overseas taxes	790	584
Overseas tax expensed	-	(1)
Excess allowable expenses	5	13
<b>Total tax charge for year (note 4a)</b>	<b>790</b>	<b>584</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £568,000 (2023: £563,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	4,748	5,163
Final distribution	1,105	766
	5,853	5,929
Add: Income deducted on cancellation of shares	333	263
Deduct: Income received on issue of shares	(144)	(151)
<b>Total distributions for the year</b>	<b>6,042</b>	<b>6,041</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	28	37
Amounts receivable from the ACD for the issue of shares	104	284
Expenses reimbursement receivable from the ACD	6	5
Overseas withholding tax recoverable	1,150	1,349
<b>Total debtors</b>	<b>1,288</b>	<b>1,675</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	118	94
Cash at broker	580	582
	<b>698</b>	<b>676</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	6,558
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	5,929	-
<b>Net liquidity</b>	<b>6,627</b>	<b>7,234</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	33	31
Accrued expenses payable to the Depositary or associates of the Depositary	4	4
Amounts payable to the ACD for cancellation of shares	47	57
<b>Total creditors</b>	<b>84</b>	<b>92</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

# Notes to the Financial Statements

## Continued

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrdn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

## 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of derivatives during the year, or in the prior year.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales

## Continued

	2024 %	2023 %
<b>Total transaction costs expressed as a percentage of net asset value</b>		
Taxes	0.04	0.04

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.05% (2023: 0.04%), this is representative of the average spread on the assets held during the year.

## 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024
A Accumulation	205,753	49,911	(72,214)	-	183,450
B Accumulation	76,560,951	13,014,144	(14,621,009)	(6,383)	74,947,703
N Accumulation	29,518,931	14,795,892	(8,426,234)	8,939	35,897,528
X Accumulation	983,815	60,576	(119,336)	-	925,055

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
<b>Fair value of investment assets</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Danish Krone	10,836	11,823
Euro	135,832	131,066
Norwegian Krone	3,481	3,617
Swedish Krona	16,358	13,182
Swiss Franc	40,187	37,410
US Dollar	1,860	428
<b>Total</b>	<b>208,554</b>	<b>197,526</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £10,428,000 (2023: £9,876,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £10,336,000 (2023: £9,761,000).

# Notes to the Financial Statements

## Continued

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	10,359	(80)	9,524	77
Futures	6,730	(121)	7,592	(44)
<b>Total market exposure</b>	<b>17,089</b>	<b>(201)</b>	<b>17,116</b>	<b>33</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(121)	580	-	459	0.22
	<b>(121)</b>	<b>580</b>	<b>-</b>	<b>459</b>	<b>0.22</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(44)	581	-	537	0.27
	<b>(44)</b>	<b>581</b>	<b>-</b>	<b>537</b>	<b>0.27</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 – shares purchased prior to 1 January 2024

Group 2 – shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>A Accumulation</b>				
Group 1	3.5041	-	3.5041	3.5116
Group 2	0.0955	3.4086	3.5041	3.5116
<b>B Accumulation</b>				
Group 1	4.6424	-	4.6424	4.6449
Group 2	4.3562	0.2862	4.6424	4.6449
<b>N Accumulation</b>				
Group 1	3.4029	-	3.4029	3.3893
Group 2	2.1435	1.2594	3.4029	3.3893
<b>X Accumulation</b>				
Group 1	4.4948	-	4.4948	4.4698
Group 2	3.1056	1.3892	4.4948	4.4698

## Final dividend distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>A Accumulation</b>				
Group 1	0.7666	-	0.7666	0.5382
Group 2	0.3331	0.4335	0.7666	0.5382
<b>B Accumulation</b>				
Group 1	1.0578	-	1.0578	0.7525
Group 2	0.2433	0.8145	1.0578	0.7525
<b>N Accumulation</b>				
Group 1	0.8382	-	0.8382	0.6116
Group 2	0.4133	0.4249	0.8382	0.6116
<b>X Accumulation</b>				
Group 1	1.1465	-	1.1465	0.8734
Group 2	0.1893	0.9572	1.1465	0.8734

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn European Equity Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI Europe ex UK Index.

Performance Target: To match the return of the MSCI Europe ex UK Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI Europe ex UK Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI Europe ex UK Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI Europe ex UK Index are priced are different. The fund is valued at 12:00, but the MSCI Europe ex UK Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the MSCI Europe ex UK Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn European Equity Tracker Fund B Accumulation shares increased by 1.96% (net of fees) compared with a rise of 2.77% in the performance target, the MSCI Europe ex UK Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.03%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdn means the relevant member of abrdn group, being Aberdeen Group plc (formerly abrdn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

# abrdn European Equity Tracker Fund

## Continued

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Continental European stock markets (excluding the UK), as measured by the MSCI Europe ex UK Index, rose in euro terms over the period as inflation appeared to be coming under control and the European Central Bank (ECB) became the first major Western central bank to cut interest rates in the current cycle. Gains were particularly strong in the first half of the 12 months on signs of recovery in the eurozone economy following a period of stagnation towards the end of 2023. However, there were falls in the final three months of 2024 as a result of sluggish economic performance and fears that global central banks may start to slow the pace of interest-rate cuts in 2025. Investors were also concerned about the potential impact of changes to US trade policy under the incoming Trump administration.

Gains in global markets during the period were underpinned by the ongoing resilience of the US economy and hopes that artificial intelligence could drive significant productivity improvements. In particular, major technology stocks in the US continued to outperform. However, geopolitical tensions weighed on investor confidence, with conflict in the Middle East and Ukraine ongoing. Markets around the world initially welcomed Donald Trump's victory in November's US presidential election, but concerns grew about the potentially inflationary impact of the new administration's economic policies.

In economic news, the rate of inflation in the eurozone continued to make progress towards the 2% target, although price pressures appeared to pick up later in the year as costs in the services sector rose. The ECB cut interest rates on four occasions during the 12 months and officials suggested further reductions were likely in 2025. Although eurozone GDP figures for the third quarter of the year came in above expectations, there were signs of sluggish growth and declining employment levels across the bloc in the final three months of 2024.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the MSCI Europe ex UK Index. The fund continued to track the MSCI Europe ex UK Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

The outlook for European equities is particularly positive due to attractive valuations, most acutely relative to the US, and low levels of exposure among global investors. A stable economic backdrop alongside lower discount rates is a favourable combination for companies based in Europe, following several years of style headwinds. However, volatility is set to remain a feature of markets given elevated geopolitical risk and data-dependent central banks.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	1,538	1,139
<b>Total taxation (note 4b)</b>	<b>1,538</b>	<b>1,139</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>12,265</b>	<b>11,228</b>
Corporation tax at 20% (2023: 20%)	2,453	2,245
Effects of:		
Revenue not subject to taxation	(2,453)	(2,250)
Overseas taxes	1,538	1,139
Overseas tax expensed	(2)	(1)
Excess allowable expenses	2	6
<b>Total tax charge for year (note 4a)</b>	<b>1,538</b>	<b>1,139</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £20,000 (2023: £18,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	8,856	8,605
Final distribution	1,895	1,584
	10,751	10,189
Add: Income deducted on cancellation of shares	265	204
Deduct: Income received on issue of shares	(289)	(304)
<b>Total distributions for the year</b>	<b>10,727</b>	<b>10,089</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	4	10
Amounts receivable from the ACD for the issue of shares	116	135
Overseas withholding tax recoverable	1,305	1,300
<b>Total debtors</b>	<b>1,425</b>	<b>1,445</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	106	114
Cash at broker	139	77
	<b>245</b>	<b>191</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	521
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	928	-
<b>Net liquidity</b>	<b>1,173</b>	<b>712</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	4	4
Accrued expenses payable to the Depositary or associates of the Depositary	9	9
Other accrued expenses	10	8
<b>Total creditors</b>	<b>23</b>	<b>21</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024	2023	2024	2023
Trades in the year	£'000	£'000	£'000	£'000

X Income	1,000	-	-	-	1,000

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Danish Krone	21,831	25,833
Euro	248,038	257,928
Norwegian Krone	4,342	5,192
Swedish Krona	23,350	24,722
Swiss Franc	71,784	76,891
US Dollar	4,791	1,362
<b>Total</b>	<b>374,136</b>	<b>391,928</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £18,707,000 (2023: £19,596,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £19,152,000 (2023: £19,826,000).

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

# Notes to the Financial Statements

## Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Futures	1,534	(31)	984	(8)
<b>Total market exposure</b>	<b>1,534</b>	<b>(31)</b>	<b>984</b>	<b>(8)</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(31)	139	-	108	0.02
	<b>(31)</b>	<b>139</b>	<b>-</b>	<b>108</b>	<b>0.02</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(8)	78	-	70	0.02
	<b>(8)</b>	<b>78</b>	<b>-</b>	<b>70</b>	<b>0.02</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had no bilateral positions.

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £14,000 (2023: £7,000) and expenses paid to the lending agent, Citibank, are £2,000 (2023: £1,000).

2023	Collateral (held)/pledged			Net exposure £'000
	Stock on loan*	Cash	Stock*	
<b>Counterparties</b>	<b>£'000</b>	<b>£'000</b>	<b>£'000</b>	
Bank of America Merrill Lynch	288	-	(321)	(33)
UBS	740	-	(835)	(95)
<b>Total</b>	<b>1,028</b>	<b>-</b>	<b>(1,156)</b>	<b>(128)</b>

\* contains the required disclosures for Concentration Data within Securities Financing Transaction Regulation (SFTR) Disclosures.

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 - shares purchased prior to 1 January 2024

Group 2 - shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>B Accumulation</b>				
Group 1	3.5474	-	3.5474	3.3737
Group 2	2.4643	1.0831	3.5474	3.3737
<b>N Accumulation</b>				
Group 1	3.3991	-	3.3991	3.2289
Group 2	1.6463	1.7528	3.3991	3.2289
<b>X Accumulation</b>				
Group 1	3.6177	-	3.6177	3.4344
Group 2	1.1310	2.4867	3.6177	3.4344
<b>X Income</b>				
Group 1	2.7750	-	2.7750	2.8127
Group 2	2.7750	-	2.7750	2.8127

## Final dividend distribution

Group 1 - shares purchased prior to 1 July 2024

Group 2 - shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	0.7159	-	0.7159	0.5602
Group 2	0.4167	0.2992	0.7159	0.5602
<b>N Accumulation</b>				
Group 1	0.7107	-	0.7107	0.5596
Group 2	0.2883	0.4224	0.7107	0.5596
<b>X Accumulation</b>				
Group 1	0.7760	-	0.7760	0.6133
Group 2	0.3152	0.4608	0.7760	0.6133
<b>X Income</b>				
Group 1	0.6020	-	0.6020	2.8200
Group 2	0.6020	-	0.6020	2.8200

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Global Corporate Bond Screened Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Bloomberg Global Corporate Screened Index (Hedged to GBP) (the "Index").

Performance Target: To match the return of the Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in government and sub-sovereign bonds, other funds (including those managed by abrdn), money-market instruments, and cash. These investments may not comply with the exclusions applied by the Index, as described under "Management Process".

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Index are priced are different. The fund is valued at 12:00, but the Index is valued at market close and so therefore the tracking error of the fund at

Valuation Point may appear to be higher than if the fund and the Index were priced at the same time.

- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.
- The Index is composed of a subset of bonds within the Bloomberg Global Aggregate Corporate Index (Hedged to GBP) (the "Parent Index"). Unlike the Parent Index, the Index excludes companies which are involved in certain activities.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Index.
- Derivative usage in the fund otherwise is expected to be very limited.
- The fund may use derivatives which do not comply with the exclusions applied by the Index.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn Global Corporate Bond Screened Tracker Fund B Accumulation shares rose by 3.52% (net of fees) compared with a rise of 3.38% in the performance target, Bloomberg Global Corporate Screened Index (Hedged to GBP).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.31%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

## Market Review

Corporate bonds rose in 2024, in an overall volatile environment for rates and credit. Investors bought bonds amid interest rate cuts from most major central banks, contending with political change in Europe and the inflation threat from the re-election of President Trump in the US.

The first half of 2024 saw conflicting economic data, leading investors to question when interest rates might be cut. Weaker inflation figures and signs of softening employment data were backed up by dovish comments from central banks. There was some volatility in the second quarter of 2024, motivated by geopolitical events and elections, particularly those in France. French risk assets sold off in June, equities dropped by several percent while the spread differential between French OATs and Bunds jumped to the highest level since the pandemic in 2020. The European Central Bank (ECB) made its first rate cut in June, while the Bank of England cut rates in August and the US Federal Reserve's first rate cut came in September. Returns were good in the third quarter of the year as rate cuts came thick and fast. However, the fourth quarter was challenging for credit, mostly due to movements in rates markets. Investors sold government bonds, even as central banks continued cutting interest rates, reacting to hawkish statements and forecasts, particularly in the US.

Nevertheless, demand for credit remained strong, with spreads tightening particularly in riskier, higher yielding segments. There has been some regional variation, with unrest in France causing a sell off French debt. Shorter dated bonds generally performed better than more rate-sensitive, longer dated issues.

## Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the Bloomberg Barclays Global Aggregate Corporate Index (hedged to GBP). In doing so, the fund will invest at least 90% in corporate bonds (loans to companies) that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

## Portfolio Outlook and Strategy

We remain optimistic on the outlook for global corporate bonds, as the recent rise in government yields has increased the asset class's attractiveness. Euro credit spreads are around +100 basis points (bps), which we view as neither expensive nor cheap in our moderate growth scenario. Spreads on US dollar investment grade credit are around +80bps, which we view as expensive. However, with yields at a higher level than recent averages, we believe buyers will continue to be attracted. In the short term, Trump's policy proposals will likely drive macroeconomic momentum, with volatility in interest rates and, to a lesser extent, credit spreads. Tariffs and reduced migration will be inflationary and negative for global growth. However, tax cuts and deregulation are positive for the banking and corporate sectors, which should stimulate US growth.

Regarding central bank expectations, we believe the ECB's rate path remains more predictable, with the market currently pricing in four rate cuts in 2025, as Europe's growth remains sluggish and inflationary pressures are more contained. However, we cannot decouple from the US Treasury markets, which have repriced global rates higher and curves have steepened. While we believe rates may rise further from here, they remain attractive and continue to draw inflows into credit.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.
- ESG Investment Risk - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>A Accumulation</b>	<b>2024</b> pence per share	<b>2023</b> pence per share	<b>2022</b> pence per share
<b>Change in net assets per share</b>			
Opening net asset value per share	105.68	98.09	115.97
Return before operating charges*	3.67	7.82	(17.64)
Operating charges	(0.24)	(0.23)	(0.24)
Return after operating charges*	3.43	7.59	(17.88)
Distributions	(3.85)	(3.06)	(2.44)
Retained distributions on accumulation shares	3.85	3.06	2.44
Closing net asset value per share	109.11	105.68	98.09
* after direct transaction costs of:	-	-	-
<b>Performance</b>			
Return after charges	3.25%	7.74%	(15.42%)
<b>Other information</b>			
Closing net asset value (£'000)	113	114	42
Closing number of shares	103,069	108,219	42,884
Operating charges	0.22%	0.23%	0.24%
Direct transaction costs	-	-	-
<b>Prices</b>			
Highest share price	111.3	106.0	115.6
Lowest share price	103.7	96.99	93.46

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Administration fees	487	866
Professional fees	-	11
Subsidised fees*	(5)	(29)
	482	848
<b>Total expenses</b>	<b>13,313</b>	<b>11,616</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the year, including VAT, was £12,300 (2023: £11,340).

\* Subsidised fees are paid by the ACD.

# Notes to the Financial Statements

## Continued

### 4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	7	15
Interest payable	2	90
<b>Total interest payable &amp; similar charges</b>	<b>9</b>	<b>105</b>

### 5 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	68	56
Double taxation relief	(68)	(56)
Overseas taxes	318	278
<b>Total taxation (note 5b)</b>	<b>318</b>	<b>278</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>296,188</b>	<b>212,012</b>
Corporation tax at 20% (2023: 20%)	59,238	42,402
Effects of:		
Overseas taxes	318	278
Double taxation relief	(68)	(56)
Distributions treated as tax deductible	(59,170)	(42,346)
<b>Total tax charge for year (note 5a)</b>	<b>318</b>	<b>278</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 6 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	65,656	46,722
Second interim distribution	73,449	50,491
Third interim distribution	75,048	55,997
Final distribution	87,057	59,855

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
	301,210	213,065
Add: Income deducted on cancellation of shares	1,551	824
Deduct: Income received on issue of shares	(6,898)	(2,154)
<b>Total distributions for the year</b>	<b>295,863</b>	<b>211,735</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	295,870	211,734
Undistributed revenue brought forward	-	1
Undistributed revenue carried forward	(7)	-
<b>Total distributions for the year</b>	<b>295,863</b>	<b>211,735</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	108,432	78,936
Amounts receivable from the ACD for the issue of shares	1,127	2,883
Expenses reimbursement receivable from the ACD	5	30
Overseas withholding tax recoverable	19	14
<b>Total debtors</b>	<b>109,583</b>	<b>81,863</b>

## 8 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	6,171	4,303
Cash at broker	3,801	-
	<b>9,972</b>	<b>4,303</b>
<b>Bank overdrafts</b>		
Overdraft at broker	-	(1,128)
	<b>-</b>	<b>(1,128)</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	85,501
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	123,747	-
abrdrn Liquidity Fund (Lux) - Euro Fund Z3 Inc*	7,335	4,991
abrdrn Liquidity Fund (Lux) - US Dollar Fund Z1 Inc*	29,297	14,732
<b>Net liquidity</b>	<b>170,351</b>	<b>108,399</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	1,158	935
Accrued expenses payable to the Depositary or associates of the Depositary	43	70
Amounts payable to the ACD for cancellation of shares	-	2,247
Other accrued expenses	275	598
Purchases awaiting settlement	-	184
<b>Total creditors</b>	<b>1,476</b>	<b>4,034</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

### 11 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 9.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

Amounts receivable from abrtn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 7 and 9.

### 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

# Notes to the Financial Statements

## Continued

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Trades in the year				
Bonds	2,701,308	2,237,423	1,019,311	1,586,747
<b>Trades in the year before transaction costs</b>	<b>2,701,308</b>	<b>2,237,423</b>	<b>1,019,311</b>	<b>1,586,747</b>
<b>Total net trades in the year after transaction costs</b>	<b>2,701,308</b>	<b>2,237,423</b>	<b>1,019,311</b>	<b>1,586,747</b>

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.40% (2023: 0.34%), this is representative of the average spread on the assets held during the year.

## 13 Shares in Issue Reconciliation

## 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023

## 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>2024</b>				
<b>Currency</b>				
UK Sterling	129,363	356,712	8,452,422	8,938,497
Australian Dollar	545	55,743	(56,127)	161
Canadian Dollar	3,656	285,821	(288,692)	785
Euro	15,478	2,213,370	(2,235,864)	(7,016)
Japanese Yen	135	34,404	(34,930)	(391)
New Zealand Dollar	69	531	(571)	29
Singapore Dollar	43	1,212	23	1,278
Swiss Franc	125	21,945	(21,874)	196
US Dollar	55,693	5,708,268	(5,773,585)	(9,624)
<b>Total</b>	<b>205,107</b>	<b>8,678,006</b>	<b>40,802</b>	<b>8,923,915</b>

<b>Total</b>	<b>126,544</b>	<b>7,070,947</b>	<b>95,402</b>	<b>7,292,893</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	3.40%	3.96%	3.68%
<b>2023</b>			
VaR 99% 1 Month	3.75%	4.46%	4.12%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

	Market value £'000	Percentage of total net assets %
<b>2024</b>		
Investment grade securities	8,579,369	96.37
Below investment grade securities	96,292	1.03
Unrated securities	37,101	0.23
<b>Total value of securities</b>	<b>8,712,762</b>	<b>97.63</b>
	Market value £'000	Percentage of total net assets %
<b>2023</b>		
Investment grade securities	6,937,775	95.15
Below investment grade securities	124,406	1.75
Unrated securities	26,911	0.31
<b>Total value of securities</b>	<b>7,089,092</b>	<b>97.21</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	26,067,405	(65,666)	20,239,827	14,897
Futures	212,738	(1,430)	152,696	2,696
<b>Total market exposure</b>	<b>26,280,143</b>	<b>(67,096)</b>	<b>20,392,523</b>	<b>17,593</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

# Notes to the Financial Statements

## Continued

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	(1,430)	3,801	-	2,371	0.03
	<b>(1,430)</b>	<b>3,801</b>	<b>-</b>	<b>2,371</b>	<b>0.03</b>

  

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	2,696	(1,128)	-	1,568	0.02
	<b>2,696</b>	<b>(1,128)</b>	<b>-</b>	<b>1,568</b>	<b>0.02</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Stock on loan * £'000	Collateral (held)/pledged		Net exposure £'000

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Global Government Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the JP Morgan GBI Global Index (Hedged to GBP).

Performance Target: To match the return of the JP Morgan GBI Global Index (Hedged to GBP) (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in government bonds that make up the JP Morgan GBI Global Index (Hedged to GBP).
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund may also invest in other funds (including those managed by abrdrn), money-market instruments, and cash.
- 35% or more of the fund's total assets may be invested in bonds issued by a single government issuer.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the JP Morgan GBI Global Index (Hedged to GBP) ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/ outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the JP Morgan GBI Global Index (Hedged to GBP) are priced are different. The fund is valued at

12:00, but the JP Morgan GBI Global Index (Hedged to GBP) is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and JP Morgan GBI Global Index (Hedged to GBP) were priced at the same time.

- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the JP Morgan GBI Global Index (Hedged to GBP).
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdrn Global Government Bond Tracker Fund B Accumulation shares rose by 1.30% (net of fees) compared with an increase of 1.17% in the performance target, the JP Morgan Government Bond Index (GBI) Global Index (hedged to sterling).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdrn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.15%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdrn\*\*. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third-party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdrn means the relevant member of abrdrn group, being Aberdeen Group plc (formerly abrdrn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Early 2024 was challenging for developed-market government bonds. Yields rose for US Treasuries, UK gilts and German bunds as investors reduced their expectations for near-term interest-rate cuts. With US economic data exceeding expectations, market pricing for rate cuts was pushed further back into 2024, and the expected magnitude of cuts was reduced. Global yields followed US yields higher. Moving into April and beyond, there were significant moves in yields each time inflation and labour market data confounded expectations. Towards the end of the quarter, European markets were dominated by political volatility in France. Following the European Parliamentary elections, where President Macron's centrist party was severely beaten by Marine Le Pen's far-right National Rally, Macron called for snap parliamentary elections. This caused European government bond spreads to widen materially.

Global government bonds rallied in the third quarter, boosted by a considerable increase in rate cut expectations. Markets welcomed a dovish shift from the US Federal Reserve (Fed), in particular. This was attributable to weaker US labour market data and signs of further easing of inflation measures. Indeed, much of September was dominated by the debate about to what extent the Fed would reduce interest rates, and this culminated in a larger-than-consensus reduction by 50 basis points (bps). Meanwhile, the European Central Bank cut rates by 25 bps. In the UK, the Bank of England held rates steady at 5%, but Governor Bailey said the bank should be able to reduce rates gradually over time.

However, the final quarter of 2024 brought a reversal of fortunes, as 10-year government bond yields rose, and prices fell. While interest rates from major central banks were on a downward trajectory, messaging from the Fed and others seemed to suggest little hurry to lower rates. Indeed, in December, Fed chairman Powell said it would be appropriate to slow the pace of rate cuts. US data confirmed the persistence of inflation, leading to a sell-off in bonds across the curve. Donald Trump's election as US president is expected to continue to drive nominal US Treasury yields higher, dragging other government bond yields higher too, despite their own domestic economies weakening.

### Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the JP Morgan GBI Global Index (hedged to sterling). In doing so, the fund will invest at least 90% in government bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

### Portfolio Outlook and Strategy

The most recent inflation data shows that while the trend is still expected to be lower in the medium term, inflation still presents concern. For both the Fed and the ECB, headline and core inflation rates are still lingering slightly above the 2% target, with potential price pressures in the pipeline, not least from any new tariffs. It is likely to be a volatile journey before we reach target levels on sustained basis. There is still considerable uncertainty about the impact past policy moves will have on the broad economy and uncertainty around what policies the Trump administration may implement. Central banks will continue to monitor how tight current financial conditions are relative to the perceived neutral rate and, thereby, what will be required of them going forward. The Fed led with a more hawkish tone than expected after the December cut. Chair Powell emphasised the need for further progress on inflation, and this signalled a potential pause in the rate-cutting cycle in 2025.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk			
←			→			
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Total taxation (note 4b)	-	-

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>41,096</b>	<b>30,574</b>
Corporation tax at 20% (2023: 20%)	8,219	6,115
Effects of:		
Distributions treated as tax deductible	(8,219)	(6,115)
<b>Total tax charge for year (note 4a)</b>	<b>-</b>	<b>-</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	19,603	14,359
Final distribution	21,980	17,362
	41,583	31,721
Add: Income deducted on cancellation of shares	3,736	1,573
Deduct: Income received on issue of shares	(4,224)	(2,721)
<b>Total distributions for the year</b>	<b>41,095</b>	<b>30,573</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	41,096	30,574
Undistributed revenue brought forward	1	-
Undistributed revenue carried forward	(2)	(1)
<b>Total distributions for the year</b>	<b>41,095</b>	<b>30,573</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	10,581	8,588
Amounts receivable from the ACD for the issue of shares	1,635	557
Sales awaiting settlement	19,372	14,860
<b>Total debtors</b>	<b>31,588</b>	<b>24,005</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	280	734
	<b>280</b>	<b>734</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	3,483	3,039
abrdrn Liquidity Fund (Lux) - Euro Fund Z3 Inc*	15	5
abrdrn Liquidity Fund (Lux) - US Dollar Fund Z1 Inc*	730	5
<b>Net liquidity</b>	<b>4,508</b>	<b>3,783</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	51	29
Accrued expenses payable to the Depositary or associates of the Depositary	9	9
Amounts payable to the ACD for cancellation of shares	7	443
Purchases awaiting settlement	19,292	6,842
<b>Total creditors</b>	<b>19,359</b>	<b>7,323</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

# Notes to the Financial Statements

## Continued

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

Trades in the year	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Bonds	728,171	662,364	609,602	407,035
Trades in the year before transaction costs	728,171	662,364	609,602	407,035
Total net trades in the year after transaction costs	728,171	662,364	609,602	407,035

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.09% (2023: 0.05%), this is representative of the average spread on the assets held during the year.

### 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024
B Accumulation	116,793,385	149,704,751	(16,584,451)	(495,592)	249,418,093

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	1,348,224	115,194	-	1,288,687	117,878	-
Collective Investment Schemes	-	4,228	-	-	3,049	-
Derivatives	-	10,724	-	-	4,788	-
<b>Total investment assets</b>	<b>1,348,224</b>	<b>130,146</b>	<b>-</b>	<b>1,288,687</b>	<b>125,715</b>	<b>-</b>
<b>Fair value of investment liabilities</b>						
Derivatives	-	(10,894)	-	-	(11,993)	-
<b>Total investment liabilities</b>	<b>-</b>	<b>(10,894)</b>	<b>-</b>	<b>-</b>	<b>(11,993)</b>	<b>-</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

US Dollar	61	680,711	(674,751)	6,021
<b>Total</b>	<b>3,783</b>	<b>1,406,565</b>	<b>9,098</b>	<b>1,419,446</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

# Notes to the Financial Statements

## Continued

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	3.10%	3.45%	3.29%

  

2023	Minimum	Maximum	Average
VaR 99% 1 Month	3.25%	3.91%	3.46%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	1,463,418	98.97
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>1,463,418</b>	<b>98.97</b>

  

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	1,406,565	99.09
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>1,406,565</b>	<b>99.09</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	4,303,222	(170)	3,974,184	(7,205)
<b>Total market exposure</b>	<b>4,303,222</b>	<b>(170)</b>	<b>3,974,184</b>	<b>(7,205)</b>

# Notes to the Financial Statements

## Continued

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depository. At the year end the fund had no exposure at the end of the current or prior year.

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000

<b>X Income</b>				
Group 1	1.5012	-	1.5012	1.2482
Group 2	1.5012	-	1.5012	1.2482

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdr Global Inflation-Linked Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Bloomberg World Government Inflation-Linked Index (Hedged to GBP).

Performance Target: To match the return of the Bloomberg World Government Inflation-Linked Index (Hedged to GBP) (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in government bonds that make up the Bloomberg World Government Inflation-Linked Index (Hedged to GBP).
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange traded funds.
- The fund may also invest in other funds (including those managed by abrdr), money-market instruments, and cash.
- 35% or more of the fund's total assets may be invested in securities issued by a single government issuer.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Bloomberg World Government Inflation-Linked Index (Hedged to GBP) ("tracking error") will be in the region of 0.0 – 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Bloomberg World Government

Inflation-Linked Index (Hedged to GBP) are priced are different. The fund is valued at 12:00, but the Bloomberg World Government Inflation-Linked Index (Hedged to GBP) is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Bloomberg World Government Inflation-Linked Index (Hedged to GBP) were priced at the same time.

- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Bloomberg World Government Inflation-Linked Index (Hedged to GBP).
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdr Global Inflation-Linked Bond Tracker Fund B Accumulation shares fell by 0.67% (net of fees), compared with a fall of 0.65% in the performance target, Bloomberg World Government Inflation Linked (Hedged to GBP).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdr. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.44%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

## Market Review

Global inflation-linked bonds fell in 2024. Markets were volatile as investors watched for signs of action by central banks in the face of falling inflation.

Early 2024 was challenging for developed-market government bonds. Yields rose for US Treasuries, UK gilts and German bunds as investors reduced their expectations for near-term interest-rate cuts. With US economic data exceeding expectations, market pricing for rate cuts was pushed further back into 2024, and the expected magnitude of cuts was reduced. Global yields followed US yields higher. Moving into April and beyond, there were significant moves in yields each time inflation and labour market data confounded expectations. Towards the end of the quarter, European markets were dominated by political volatility in France. Following the European Parliamentary elections, where President Macron's centrist party was severely beaten by Marine Le Pen's far-right National Rally, Macron called for snap parliamentary elections. This caused European government bond spreads to widen materially.

Global government bonds rallied in the third quarter, boosted by a considerable increase in rate cut expectations. Markets welcomed a dovish shift from the US Federal Reserve (Fed), in particular. This was attributable to weaker US labour market data and signs of further easing of inflation measures. Indeed, much of September was dominated by the debate about to what extent the

Fed would reduce interest rates, and this culminated in a larger-than-consensus reduction by 50 basis points (bps). Meanwhile, the European Central Bank cut rates by 25 bps. In the UK, the Bank of England held rates steady at 5%, but Governor Bailey said the bank should be able to reduce rates gradually over time.

However, the final quarter of 2024 brought a reversal of fortunes, as 10-year government bond yields rose, and prices fell. While interest rates from major central banks were on a downward trajectory, messaging from the Fed and others seemed to suggest little hurry to lower rates. Indeed, in December, Fed chairman Powell said it would be appropriate to slow the pace of rate cuts. US data confirmed the persistence of inflation, leading to a sell-off in bonds across the curve. Donald Trump's election as US president is expected to continue to drive nominal US Treasury yields higher, dragging other government bond yields higher too, despite their own domestic economies weakening.

## Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the Bloomberg Barclays World Government Inflation Linked Index (Hedged to GBP). In doing so, the fund will invest at least 90% in government bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

## Portfolio Outlook and Strategy

The most recent inflation data shows that while the trend is still expected to be lower in the medium term, inflation still presents concern. For both the Fed and the ECB, headline and core inflation rates are still lingering slightly above the 2% target, with potential price pressures in the pipeline, not least from any new tariffs. It is likely to be a volatile journey before we reach target levels on sustained basis. There is still considerable uncertainty about the impact past policy moves will have on the broad economy and uncertainty around what policies the Trump administration may implement. Central banks will continue to monitor how tight current financial conditions are relative to the perceived neutral rate and, thereby, what will be required of them going forward. The Fed led with a more hawkish tone than expected after the December cut. Chair Powell emphasised the need for further progress on inflation, and this signalled a potential pause in the rate-cutting cycle in 2025.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Total taxation (note 4b)	-	-

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>45,342</b>	<b>33,867</b>
Corporation tax at 20% (2023: 20%)	9,068	6,774
Effects of:		
Distributions treated as tax deductible	(7,738)	(5,761)
UK Indexation relief	(1,330)	(1,013)
<b>Total tax charge for year (note 4a)</b>	<b>-</b>	<b>-</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
First interim distribution	11,343	5,922
Second interim distribution	10,564	8,748
Third interim distribution	9,821	11,354
Final distribution	13,593	10,736
	45,321	36,760
Add: Income deducted on cancellation of shares	2,060	212
Deduct: Income received on issue of shares	(2,039)	(3,105)
<b>Total distributions for the year</b>	<b>45,342</b>	<b>33,867</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	2,879	2,341
Amounts receivable from the ACD for the issue of shares	1,694	1,230
Overseas withholding tax recoverable	43	45
Sales awaiting settlement	8,805	4,208
<b>Total debtors</b>	<b>13,421</b>	<b>7,824</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	464	485
	<b>464</b>	<b>485</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	2,159
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	1,901	-
<b>Net liquidity</b>	<b>2,365</b>	<b>2,644</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	13	9
Accrued expenses payable to the Depositary or associates of the Depositary	4	5
Amounts payable to the ACD for cancellation of shares	5	8
Other accrued expenses	14	23
Purchases awaiting settlement	5,019	5,352
<b>Total creditors</b>	<b>5,055</b>	<b>5,397</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

# Notes to the Financial Statements

## Continued

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

Trades in the year	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Bonds	361,585	514,153	272,017	107,838
Trades in the year before transaction costs	361,585	514,153	272,017	107,838
Total net trades in the year after transaction costs	361,585	514,153	272,017	107,838

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.15% (2023: 0.21%), this is representative of the average spread on the assets held during the year.

### 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	864,578	42,451	-	798,855	40,180	-
Collective Investment Schemes	-	1,901	-	-	2,159	-
Derivatives	-	1,759	-	-	2,947	-
<b>Total investment assets</b>	<b>864,578</b>	<b>46,111</b>	<b>-</b>	<b>798,855</b>	<b>45,286</b>	<b>-</b>

<b>Total investment liabilities</b>	<b>-</b>	<b>(6,673)</b>	<b>-</b>	<b>-</b>	<b>(2,280)</b>	<b>-</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

# Notes to the Financial Statements

## Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>Currency</b>			
UK Sterling	190,305	721,904	912,209
Australian Dollar	8,014	(8,090)	(76)
Canadian Dollar	14,589	(14,669)	(80)
Danish Krone	1,696	(1,702)	(6)
Euro	184,099	(184,052)	47
Japanese Yen	19,139	(19,227)	(88)
New Zealand Dollar	3,609	(3,697)	(88)
Swedish Krona	5,337	(5,428)	(91)
US Dollar	482,606	(481,692)	914
<b>Total</b>	<b>909,394</b>	<b>3,347</b>	<b>912,741</b>

2023	Floating rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>Currency</b>			
UK Sterling	182,186	664,768	846,954
Australian Dollar	9,415	(8,801)	614
Canadian Dollar	14,257	(13,680)	577
Danish Krone	1,302	(1,252)	50
Euro	162,320	(163,396)	(1,076)
Japanese Yen	21,514	(21,501)	13
New Zealand Dollar	4,265	(4,067)	198
Swedish Krona	6,114	(6,010)	104
US Dollar	440,306	(443,118)	(2,812)
<b>Total</b>	<b>841,679</b>	<b>2,943</b>	<b>844,622</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

# Notes to the Financial Statements

## Continued

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	4.38%	5.62%	5.09%

  

2023	Minimum	Maximum	Average
VaR 99% 1 Month	5.53%	6.88%	6.05%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	907,029	99.37
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>907,029</b>	<b>99.37</b>

  

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	839,035	99.33
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>839,035</b>	<b>99.33</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

# Notes to the Financial Statements

## Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	2,220,275	(4,914)	1,950,446	667
<b>Total market exposure</b>	<b>2,220,275</b>	<b>(4,914)</b>	<b>1,950,446</b>	<b>667</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
Bank of America Merrill Lynch	(60)	-	-	(60)

<b>X Accumulation</b>				
Group 1	1.5038	-	1.5038	1.2926
Group 2	0.5948	0.9090	1.5038	1.2926

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Global Infrastructure Equity Tracker Fund

For the period 23 July 2024 to 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of MSCI World Core Infrastructure Index.

Performance Target: To match the return of the MSCI World Core Infrastructure Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI World Core Infrastructure Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund may also invest in other funds (including those managed by abrdrn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI World Core Infrastructure Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI World Core Infrastructure Index are priced are different. The fund is valued at 12:00, but the MSCI World Core Infrastructure Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if

the fund and the MSCI World Core Infrastructure Index were priced at the same time.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Market Review

Global stock markets rose strongly over the review period, supported by easing inflation and renewed optimism about economic growth. Central banks had previously raised interest rates faster and further than expected to tackle multi-decade-high inflation, which eased gradually over the course of 2024. Global economic growth held up better than anticipated, though fears of a US recession heightened over the period before subsiding somewhat towards the end. Therefore, although equities sold off from mid-July to early August on US recession fears, they recovered after reassuring economic data, which highlighted the resilience of consumer spending. Renewed hopes of further rate cuts supported equity markets, as investors became more optimistic about ongoing monetary easing. Improving corporate earnings through the six months to the end of December further buoyed sentiment, helping equities regain ground after earlier volatility. Donald Trump's November election win, with its pro-growth agenda, initially boosted equities on hopes of economic stimulus. However, equities delivered a weaker performance in December as investors reassessed the pace of monetary easing in light of potential inflationary pressures and the likelihood of interest rates remaining higher for longer.

## Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the MSCI World Core Infrastructure Index. The fund continued to track the MSCI World Core Infrastructure Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

# abrdn Global Infrastructure Equity Tracker Fund

## Continued

### Portfolio Outlook and Strategy

US President Donald Trump took office in late January, and investors will be keeping a keen eye on any policies he introduces regarding tax cuts, deregulation and trade tariffs – as these are likely to affect global market dynamics. Investors will also be monitoring how Trump's policies affect US inflation and how this influences the US Federal Reserve (Fed)'s rate-cutting cycle in 2025.

In Europe, political instability in both Germany and France is at the forefront of investors' minds. Germany is heading towards an election in February after its coalition government collapsed, while in France, following Michel Barnier's government being ousted in a vote of no confidence, President Macron has now appointed his new prime minister François Bayrou.

In the UK, the Governor of the Bank of England (BoE) Andrew Bailey has indicated the BoE would employ a "gradual approach" to further easing. The Bank's next meeting is in early February.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Retained distributions on accumulation shares	1.28
Closing net asset value per share	105.70
* after direct transaction costs of:	0.07
<b>Performance</b>	
Return after charges	5.70%
<b>Other information</b>	
Closing net asset value (£'000)	296,172
Closing number of shares	280,211,100
Operating charges	0.04%
Direct transaction costs	0.15%
<b>Prices</b>	
Highest share price	112.3
Lowest share price	99.92

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

<sup>A</sup> Z Accumulation share class was launched on 23 July 2024.

<sup>B</sup> The opening net asset value stated is the share class launch price.

Creditors	9	(33)	
			(33)
<b>Total liabilities</b>			<b>(107)</b>
<b>Net assets attributable to shareholders</b>			<b>343,750</b>

There are no comparative figures shown as the fund launched on 23 July 2024.

# Notes to the Financial Statements

## 1 Net Capital Losses

	2024 £'000
Non-derivative securities	(3,771)
Derivative contracts	2
Forward currency contracts	(2)
Other gains	149
Subsidised fees taken from the capital account*	2
Transaction charges	(14)
<b>Net capital losses</b>	<b>(3,634)</b>

\* Subsidised fees are paid by the ACD.

## 2 Revenue

	2024 £'000
Bank and margin interest	8
<b>Income from Overseas Collective Investment Schemes</b>	
Franked income	34
Overseas dividends	1,671
Overseas REIT	1,031
UK dividends	128
<b>Total revenue</b>	<b>2,872</b>

## 3 Expenses

	2024 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>	
Authorised Corporate Director's periodic charge	1
General administration charge	8
	9
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>	
Safe custody fee	6
	6

# Notes to the Financial Statements

## Continued

	2024 £'000
<b>Other:</b>	
Administration fees	8
Subsidised fees*	(3)
	5
<b>Total expenses</b>	<b>20</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the period, including VAT, was £9,720.

\* Subsidised fees are paid by the ACD.

## 4 Taxation

	2024 £'000
<b>(a) Analysis of charge in period</b>	
Corporation tax	71
Double taxation relief	(55)
Overseas taxes	396
Total current tax	412
Deferred tax (note 4c)	33
<b>Total taxation (note 4b)</b>	<b>445</b>

### (b) Factors affecting total tax charge for the period

The tax assessed for the period is less than the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>2,852</b>
Corporation tax at 20%	570
Effects of:	
Revenue not subject to taxation	(366)
Overseas taxes	396
Double taxation relief	(55)
Revenue taxable in other periods	(133)
Deferred tax	33
<b>Total tax charge for period (note 4a)</b>	<b>445</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

# Notes to the Financial Statements

## Continued

	2024 £'000
<b>(c) Deferred tax</b>	
Deferred tax charge in statement of total return for period (note 4a)	33
<b>Provision at the end of the period</b>	<b>33</b>

### (d) Factors that may affect future tax charge

At the period end there are no surplus expenses and therefore no deferred tax asset in the current period.

## 5 Distributions

	2024 £'000
Distribution	3,870
	3,870
Deduct: Income received on issue of shares	(1,463)
<b>Total distributions for the period</b>	<b>2,407</b>

Details of the distribution per share are set out in this fund's distribution table.

## 6 Debtors

	2024 £'000
Accrued revenue	844
Amounts receivable from the ACD for the issue of shares	128
Expenses reimbursement receivable from the ACD	5
Overseas withholding tax recoverable	2
<b>Total debtors</b>	<b>979</b>

## 7 Liquidity

	2024 £'000
<b>Cash and bank balances</b>	
Cash at bank	553
Cash at broker	133
	<b>686</b>
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	756
<b>Net liquidity</b>	<b>1,442</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

# Notes to the Financial Statements

## Continued

### 8 Provisions for Liabilities

	2024 £'000
The provisions for liabilities comprise:	
Deferred tax payable on accrued income	33
<b>Total provisions for liabilities</b>	<b>33</b>

### 9 Creditors

	2024 £'000
Accrued expenses payable to ACD	4
Accrued expenses payable to the Depositary or associates of the Depositary	5
Corporation tax payable	16
Other accrued expenses	8
<b>Total creditors</b>	<b>33</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments and no contingent assets/liabilities.

### 11 Related Party Transactions

abrDN Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrDN Fund Managers Limited at the end of the accounting period are disclosed in notes 6 and 9.

Amounts payable to abrDN Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the period end in note 9.

Amounts receivable from abrDN Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the period end in note 6 and 9.

### 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sale collective investment schemes and derivatives during the period.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

# Notes to the Financial Statements

## Continued

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

### 13 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the period	Cancellations during the period	Closing shares 2024
B Accumulation	-	9,466	-	9,466
N Accumulation	-	48,409,770	-	48,409,770
Z Accumulation	-	280,211,100	-	280,211,100

### 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000 Level 1	2024 £'000 Level 2	2024 £'000 Level 3
<b>Fair value of investment assets</b>

### 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure 2024 £'000
Australian Dollar	21,231
Canadian Dollar	38,981
Euro	38,332
Hong Kong Dollar	5,862
Japanese Yen	14,215
New Zealand Dollar	5,756
Singapore Dollar	387
Swiss Franc	162
US Dollar	198,768
<b>Total</b>	<b>323,694</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £16,185,000.

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £17,108,000.

# Notes to the Financial Statements

## Continued

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024	
	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>		
Futures	1,328	(41)
<b>Total market exposure</b>	<b>1,328</b>	<b>(41)</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the period end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(41)	133	-	92	0.03
	<b>(41)</b>	<b>133</b>	<b>-</b>	<b>92</b>	<b>0.03</b>

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £107,000.

# Distribution Table

For the period 23 July 2024 to 31 December 2024 (in pence per share)

## Final dividend distribution

Group 1 – shares purchased prior to 23 July 2024

Group 2 – shares purchased between 23 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 26/02/25
<b>B Accumulation</b>			
Group 1	0.6106	-	0.6106
Group 2	0.3096	0.3010	0.6106
<b>N Accumulation</b>			
Group 1	0.6122	-	0.6122
Group 2	0.2517	0.3605	0.6122
<b>Z Accumulation</b>			
Group 1	1.2753	-	1.2753
Group 2	0.8117	0.4636	1.2753

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Global REIT Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the FTSE EPRA Nareit Developed Index.

Performance Target: To match the return of the FTSE EPRA Nareit Developed Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the FTSE EPRA Nareit Developed Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the FTSE EPRA Nareit Developed Index ("tracking error") will be in the region of 0.0 – 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the FTSE EPRA Nareit Developed Index are priced are different. The fund is valued at 12:00, but the FTSE EPRA Nareit Developed Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the FTSE EPRA Nareit Developed Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives may also be used to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn Global REIT Tracker Fund B Accumulation shares rose 6.30% gross of fees and 3.78% on a net asset value (NAV) to NAV basis (details below), compared with a rise of 6.34% in the performance target, the FTSE EPRA NAREIT Developed Index up to 31 October 2024 and FTSE EPRA NAREIT Developed Index from 01 November 2024.

Fund return source: Lipper. Basis: total return, NAV to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.08%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a 3 year period to 31 December 2024.

### Market Review

The global listed real estate sector recorded gains over the 12-month period. Interest-rate movements and expectations around monetary policy was a key driver of market movement and led to considerable volatility during the period.

Somewhat hawkish commentary from the US Federal Reserve (Fed) chair, coupled with better-than-expected economic growth to begin 2024, reversed the rally seen in late 2023, and sentiment once again turned negative towards global real estate securities. However, as economic growth seemed to moderate, and inflation concerns continued to ease early in the summer, investors once again gained confidence that central banks would start the long-awaited easing cycle and reduce interest rates globally. Indeed, the Fed cut the target range for its fed funds rate by 50 basis points (bps) in September and made two more 25-bp cuts in November and December, lowering it to 4.25-4.50%. Given the resilience of the US economy, some stubbornly high inflation data, and a potentially inflationary Trump presidency, investors started to expect a slower pace of rate cuts than previously expected in future. This assumption was in line with the Fed's updated projection of 50 bps of rate cuts during 2025, compared with its previous guidance of 100 bps.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the FTSE EPRA Nareit Developed Index to mitigate the impact of currency changes. In doing so, the fund will invest at least 90% in equities that make up the index.

### Portfolio Outlook and Strategy

As 2025 progresses, numerous real estate markets seem to have navigated initial price adjustments, entering a recovery phase. The strategic outlook is favourable, with the UK, Europe, and the US at the forefront. Emerging opportunities across core sectors such as logistics, residential and retail warehouses are driven by robust fundamentals and limited future supply.

Nevertheless, the path forward encompasses risks, including geopolitical tensions, macroeconomic uncertainties, and policy decisions, particularly in the US, which could affect the recovery's pace and character. While regional disparities exist, the overall sentiment is one of cautious optimism.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

- **Tracking Error Risk** – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Real Estate Investment Trust (REIT) Risk** – Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.
- **Currency Hedged Indices Risk** – Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund. In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

	2024 £'000	2023 £'000
<b>Other:</b>		
Administration fees	60	58
Subsidised fees*	(30)	(26)
	30	32
<b>Total expenses</b>	<b>81</b>	<b>74</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

\* Subsidised fees are paid by the ACD.

## 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	1,436	1,423
Double taxation relief	(932)	(928)
Adjustments in respect of prior periods	1	(38)
Overseas taxes	1,159	1,115
Total current tax	1,664	1,572
Deferred tax (note 4c)	22	5
<b>Total taxation (note 4b)</b>	<b>1,686</b>	<b>1,577</b>

### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>9,362</b>	<b>9,169</b>
Corporation tax at 20% (2023: 20%)	1,872	1,834
Effects of:		
Revenue not subject to taxation	(370)	(394)
Overseas taxes	1,159	1,115
Double taxation relief	(932)	(928)
Adjustments in respect of prior periods	1	(38)
Revenue taxable in other periods	(66)	(12)
Deferred tax	22	-
<b>Total tax charge for year (note 4a)</b>	<b>1,686</b>	<b>1,577</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
<b>(c) Deferred tax</b>		
Deferred tax charge at the start of the year	58	53
Deferred tax charge in statement of total return for year (note 4a)	22	5
<b>Provision at the end of the year</b>	<b>80</b>	<b>58</b>

### **(d) Factors that may affect future tax charge**

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

## 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	3,895	3,989
Final distribution	4,754	3,437
	8,649	7,426
Add: Income deducted on cancellation of shares	61	412
Deduct: Income received on issue of shares	(1,035)	(246)
<b>Total distributions for the year</b>	<b>7,675</b>	<b>7,592</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	7,676	7,592
Undistributed revenue carried forward	(1)	-
<b>Total distributions for the year</b>	<b>7,675</b>	<b>7,592</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,312	1,004
Amounts receivable from the ACD for the issue of shares	196	7
Expenses reimbursement receivable from the ACD	51	43
Overseas withholding tax recoverable	83	156
Sales awaiting settlement	-	892
<b>Total debtors</b>	<b>1,642</b>	<b>2,102</b>

# Notes to the Financial Statements

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	639	3,070
Cash at broker	180	-
	<b>819</b>	<b>3,070</b>
<b>Bank overdrafts</b>		
Overdraft at broker	-	(4)
	<b>-</b>	<b>(4)</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	421
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	872	-
<b>Net liquidity</b>	<b>1,691</b>	<b>3,487</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Deferred tax payable	80	58
<b>Total provisions for liabilities</b>	<b>80</b>	<b>58</b>

### 9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	3	2
Accrued expenses payable to the Depositary or associates of the Depositary	8	5
Amounts payable to the ACD for cancellation of shares	-	29
Corporation tax payable	256	229
Other accrued expenses	18	15
Purchases awaiting settlement	530	2,564
<b>Total creditors</b>	<b>815</b>	<b>2,844</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

# Notes to the Financial Statements

## Continued

### 11 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 9.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

Amounts receivable from abrdr Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 9.

### 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales

X Income	6,608,390	563,222	-	7,171,612

## 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

## 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency exposure	currency exposure
	2024	2023
	£'000	£'000
Australian Dollar	21,766	(137)
Canadian Dollar	7,278	(90)
Euro	18,042	(215)
Hong Kong Dollar	7,760	(706)
Israeli Shekel	1,372	(15)
Japanese Yen	30,647	(337)
New Zealand Dollar	798	(14)
Norwegian Krone	155	118
Singapore Dollar	9,990	(304)
South Korean Won	353	232
Swedish Krona	6,466	(112)
Swiss Franc	4,301	(64)
US Dollar	236,454	(3,847)
<b>Total</b>	<b>345,382</b>	<b>(5,491)</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £17,269,000 (2023: £(275,000)).

### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

# Notes to the Financial Statements

## Continued

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £18,399,000 (2023: £12,124,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	-	-	666,941	(474)
Futures	1,518	(64)	1,454	49
<b>Total market exposure</b>	<b>1,518</b>	<b>(64)</b>	<b>668,395</b>	<b>(425)</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(64)	180	-	116	0.03
	<b>(64)</b>	<b>180</b>	<b>-</b>	<b>116</b>	<b>0.03</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	49	(4)	-	45	0.02
	<b>49</b>	<b>(4)</b>	<b>-</b>	<b>45</b>	<b>0.02</b>

# Notes to the Financial Statements

## Continued

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000

Group 2	0.4156	1.1751	1.5907	1.4953
<b>X Income</b>				
Group 1	1.3198	-	1.3198	1.2805
Group 2	0.6945	0.6253	1.3198	1.2805

## Final dividend distribution

Group 1 - shares purchased prior to 1 July 2024

Group 2 - shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.3634	-	1.3634	1.3503
Group 2	1.0094	0.3540	1.3634	1.3503
<b>N Accumulation</b>				
Group 1	1.3520	-	1.3520	1.4180
Group 2	0.6948	0.6572	1.3520	1.4180
<b>X Accumulation</b>				
Group 1	1.3609	-	1.3609	1.4102
Group 2	0.4819	0.8790	1.3609	1.4102
<b>X Income</b>				
Group 1	1.1151	-	1.1151	1.1825
Group 2	1.1151	-	1.1151	1.1825

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Japan Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in Japanese equities (company shares).

Performance Target: To exceed the return of the MSCI Japan Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the MSCI Japan Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the Performance Target, the MSCI Japan Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI Japan Index over the longer term.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").

- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn Japan Equity Enhanced Index Fund B Accumulation shares increased by 11.79% (net of fees), compared with an increase of 11.37% in the performance target, the MSCI Japan Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The MSCI information may only be used for your internal use, may not be reproduced or redisseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdn means the relevant member of abrdn group, being Aberdeen Group plc (formerly abrdn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

# abrdn Japan Equity Enhanced Index Fund

## Continued

### Market Review

The Japanese stock market, as measured by the MSCI Japan Index, recorded a strong gain over the 12-month period. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb higher over the period.

Facing milder inflationary pressures than the world's other major central banks, the Bank of Japan (BoJ) left its key interest rate unchanged at -0.1% and the target for the 10-year government bond yield at around 0% at the start of the period. However, with annual core inflation still above the 2% target, the BoJ raised its key short-term interest rate from -0.1% to 0.0-0.1% at its March meeting. The central bank also finally ended its yield-curve-control policy. At its July meeting, it then hiked rates again, to around 0.25%, and announced a plan to reduce its monthly bond purchases from early 2026. This caused the previously weak yen to strengthen, resulting in a plunge in Japanese equities before they recovered over the rest of the period.

However, the resignation of Fumio Kishida as prime minister in August and his replacement by Shigeru Ishiba in October led to heightened political uncertainty and further yen weakness, with Japan's ruling coalition losing its parliamentary majority in a snap election. Anticipation of further BoJ tightening then saw the yen strengthen slightly in November before it continued to weaken in December. Meanwhile, according to a preliminary estimate, the Japanese economy expanded by 0.3% in the third quarter of 2024, as expected, having grown by 0.5% over the previous three months.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

2024 was a good year for multi-factor investing and was a continuation of positive performance in 2023. The aggregate return of the portfolio was materially ahead of the benchmark for the full year of 2024.

Throughout the year, we saw the benefits of a diversified approach to factor investing. Firms generating positive free cashflow lagged, but this was offset by more cyclical measures of valuation. In recent years, quality companies have struggled to deliver outsized returns in Japan;

however, our commitment to a multi-factor approach paid dividends in 2024. Across the entire spectrum of quality characteristics, high-quality companies outperformed. Efficiently run companies with high and growing profits prospered, particularly those at attractive prices. In addition to cyclical value and quality companies, companies with strong momentum in both price and earnings outperformed. The diversified exposure the fund targets across a range of factors led to favourable returns in 2024 that are shared across a broad spectrum of factors.

2024 was a year that saw significant geopolitical events and associated news flow that contributed significantly to overall market volatility, which included interest-rate and currency volatility. Our strategy was positioned appropriately so that the impact on returns was managed, evidenced by the consistency in which the strategy delivered positive returns throughout the year.

### Portfolio Outlook and Strategy

2024 was another banner year for Japanese equities, with the MSCI Japan Index rising by over 21% in yen terms. While a portion of the strong returns for the year was driven by the boost to exporters and earnings from a weaker yen, broader trends such as corporate reforms and gains from companies tied into structural growth areas, including capital investments related to artificial intelligence, also drove the rally. We are particularly encouraged by governance improvements across Japan Inc. as demonstrated by the continued unwinding of cross-shareholdings and stronger emphasis on financial measures such as return on equity and return on invested capital.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	227	172
<b>Total taxation (note 4b)</b>	<b>227</b>	<b>172</b>

#### **(b) Factors affecting total tax charge for the year**

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>2,232</b>	<b>1,591</b>
Corporation tax at 20% (2023: 20%)	446	318
Effects of:		
Revenue not subject to taxation	(438)	(325)
Overseas taxes	227	172
Overseas tax expensed	(1)	-
Excess allowable expenses	(7)	7
<b>Total tax charge for year (note 4a)</b>	<b>227</b>	<b>172</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### **(c) Factors that may affect future tax charge**

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £163,000 (2023: £170,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	1,091	777
Final distribution	1,196	782
	2,287	1,559
Add: Income deducted on cancellation of shares	164	174
Deduct: Income received on issue of shares	(446)	(314)
<b>Total distributions for the year</b>	<b>2,005</b>	<b>1,419</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

## Continued

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	133	107
Amounts receivable from the ACD for the issue of shares	-	141
<b>Total debtors</b>	<b>133</b>	<b>248</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	59	86
Cash at broker	80	160
	<b>139</b>	<b>246</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	3,890
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	2,110	-
<b>Net liquidity</b>	<b>2,249</b>	<b>4,136</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	18	10
Accrued expenses payable to the Depositary or associates of the Depositary	3	4
Amounts payable to the ACD for cancellation of shares	-	3
<b>Total creditors</b>	<b>21</b>	<b>17</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

# Notes to the Financial Statements

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of derivatives during the year, or in the prior year.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales

Commissions			0.01	0.02

# Notes to the Financial Statements

## Continued

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.12% (2023: 0.22%), this is representative of the average spread on the assets held during the year.

## 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Closing shares 2024
A Accumulation	19,551	27,504	(23,473)	23,582
B Accumulation	30,804,938	33,823,447	(18,426,007)	46,202,378
N Accumulation	7,463,748	3,637,983	(233,718)	10,868,013
X Accumulation	11,673,828	22,493	(547,214)	11,149,107

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000 Level 1	2024 £'000 Level 2	2024 £'000 Level 3	2023 £'000 Level 1	2023 £'000 Level 2	2023 £'000 Level 3
<b>Fair value of investment assets</b>						
Equities	124,008	-	-	77,020	-	-
Collective Investment Schemes	-	2,110	-	-	3,890	-
Derivatives	36	26	-	58	152	-
<b>Total investment assets</b>	<b>124,044</b>	<b>2,136</b>	<b>-</b>	<b>77,078</b>	<b>4,042</b>	<b>-</b>
<b>Fair value of investment liabilities</b>

<b>Total investment liabilities</b>	<b>-</b>	<b>(146)</b>	<b>-</b>	<b>-</b>	<b>(49)</b>	<b>-</b>

## 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

# Notes to the Financial Statements

## Continued

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Japanese Yen	126,250	81,589
<b>Total</b>	<b>126,250</b>	<b>81,589</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £6,312,000 (2023: £4,079,000).

### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £6,302,000 (2023: £4,054,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	8,069	(120)	13,896	103
Futures	2,223	36	4,450	58
<b>Total market exposure</b>	<b>10,292</b>	<b>(84)</b>	<b>18,346</b>	<b>161</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

# Notes to the Financial Statements

## Continued

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	36	80	-	116	0.09
	<b>36</b>	<b>80</b>	<b>-</b>	<b>116</b>	<b>0.09</b>

  

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	58	160	-	218	0.27
	<b>58</b>	<b>160</b>	<b>-</b>	<b>218</b>	<b>0.27</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 - shares purchased prior to 1 January 2024

Group 2 - shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>A Accumulation</b>				
Group 1	1.3476	-	1.3476	1.1943
Group 2	0.1699	1.1777	1.3476	1.1943
<b>B Accumulation</b>				
Group 1	1.9729	-	1.9729	1.7350
Group 2	0.6420	1.3309	1.9729	1.7350
<b>N Accumulation</b>				
Group 1	1.4476	-	1.4476	1.2964
Group 2	0.8639	0.5837	1.4476	1.2964
<b>X Accumulation</b>				
Group 1	1.7958	-	1.7958	1.6169
Group 2	1.5787	0.2171	1.7958	1.6169

## Final dividend distribution

Group 1 - shares purchased prior to 1 July 2024

Group 2 - shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>A Accumulation</b>				
Group 1	1.2640	-	1.2640	1.1405
Group 2	0.3973	0.8667	1.2640	1.1405
<b>B Accumulation</b>				
Group 1	1.8484	-	1.8484	1.6681
Group 2	0.6484	1.2000	1.8484	1.6681
<b>N Accumulation</b>				
Group 1	1.3785	-	1.3785	1.2347
Group 2	1.1012	0.2773	1.3785	1.2347
<b>X Accumulation</b>				
Group 1	1.7169	-	1.7169	1.5100
Group 2	1.5047	0.2122	1.7169	1.5100

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn Japan Equity Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI Japan Index.

Performance Target: To match the return of the MSCI Japan Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the MSCI Japan Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the MSCI Japan Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, dividend reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the MSCI Japan Index are priced are different. The fund is valued at 12:00, but the MSCI Japan Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the MSCI Japan Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn Japan Equity Tracker Fund B Accumulation shares rose by 9.70% (net of fees) compared with a rise of 10.62% in the performance target, MSCI Japan Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.08%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

# abrdn Japan Equity Tracker Fund

## Continued

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

The Japanese market produced positive returns over the period, with the MSCI Japan Index up by 21.15% in yen terms and by 8.68% in US dollars (USD). In sterling (GBP), the index rose by 10.62%. The pronounced weakness in the yen over the year meant that returns in USD and GBP were far lower than those produced in yen. The local currency weakened to 161 against the USD in early July – its lowest level for over 30 years – before recovering during the autumn. It ended the year on a weak tack, however, closing at approximately 157, having started the year close to 140.

The Japanese equity market was remarkably strong over the first quarter of the year. Having achieved a new all-time high of over 39,000 in February, the bellwether Nikkei 225 Index continued to rise and climbed above 40,000 towards the end of March. The surge was underpinned by strong corporate earnings, driven largely by the country's exporters which have materially benefited from the weaker yen. Signs of economic recovery and increasing evidence that Japan was emerging from its decades-long period of deflation, also boosted the stock market. In addition, evidence that a substantial number of companies were considering taking steps to improve capital efficiency and governance in an effort to boost their stock prices supported the market. The market flattened in the second half of the year as investors fretted about the effect of monetary tightening on the economy and the wild fluctuations in the yen.

After months of speculation, the Bank of Japan (BoJ) tightened its monetary policy for the first time in 17 years in March, increasing its benchmark short-term interest rate from -0.1% to a range of 0% to 0.1%. It raised rates again in July to 0.25%, and investors speculated that the central bank would hike rates again early in 2025. The central bank's tighter policy stance reflected above-target inflation levels through the year and concerns that the highest wage increases for decades in the spring would lead to persistent pricing pressure.

Economic growth remained subdued. After contracting by 2.2% on an annualised basis in the first quarter, GDP recovered in the second quarter by 2.2%, but only managed to grow by 1.2% in the third quarter. On a positive note, the BoJ's quarterly Tankan Survey showed an improvement, with the headline large manufacturers' diffusion index rising to 14 in the final quarter of the year, its highest level for almost three years.

The market faced a period of political instability in the autumn which caused some volatility in equity prices. New Prime Minister Shigeru Ishiba's decision to call a general election for the end of October to strengthen his power base backfired as the LDP and its partner Komeito lost their overall majority for the first time since 2009. This left Japan facing the uncertain prospect of a minority government being in power and the consequent compromises in policy direction. However, we expect this period to be short-lived and should ultimately have little effect on the stock market.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the MSCI Japan Index. Over the period under review, the fund continued to track the MSCI Japan Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

2024 was another banner year for Japanese equities, with the MSCI Japan index rising by over 21% in yen terms. While a portion of the strong returns for the year was driven by the boost to exporters' earnings from a weaker yen, broader trends such as corporate reforms and gains from companies tied into structural growth areas, including capital investments related to artificial intelligence, also drove the rally. We are particularly encouraged by governance improvements across Japan Inc. as demonstrated by the continued unwinding of cross-shareholdings and stronger emphasis on financial measures such as ROE (Return on Equity) and ROIC (Return on Invested Capital).

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

# Notes to the Financial Statements

## 1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	12,828	15,889
Derivative contracts	64	429
Forward currency contracts	20	(217)
Other losses	(60)	(129)
Transaction charges	(29)	(45)
<b>Net capital gains</b>	<b>12,823</b>	<b>15,927</b>

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	18	84
Derivative revenue	1	1
<b>Income from Overseas Collective Investment Schemes</b>		
Franked income	59	-
Overseas dividends	3,595	3,406
Overseas REIT	45	66
Stocklending revenue	16	2
<b>Total revenue</b>	<b>3,734</b>	<b>3,559</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	4	5
General administration charge	16	15
	20	20
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Safe custody fee	18	17
	18	17
<b>Other:</b>		
Administration fees	15	14
	15	14
<b>Total expenses</b>	<b>53</b>	<b>51</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	7	20
Double taxation relief	(5)	(6)
Overseas taxes	371	363
Total current tax	373	377
Deferred tax (note 4c)	(1)	-
<b>Total taxation (note 4b)</b>	<b>372</b>	<b>377</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>3,681</b>	<b>3,508</b>
Corporation tax at 20% (2023: 20%)	736	701
Effects of:		
Revenue not subject to taxation	(731)	(681)
Overseas taxes	371	363
Double taxation relief	(5)	(6)
Revenue taxable in other periods	1	-
<b>Total tax charge for year (note 4a)</b>	<b>372</b>	<b>377</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Deferred tax

Deferred tax charge at the start of the year	1	1
Deferred tax charge in statement of total return for year (note 4a)	(1)	-
<b>Provision at the end of the year</b>	<b>-</b>	<b>1</b>

#### (d) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	1,557	1,657
Final distribution	1,683	1,391
	3,240	3,048
Add: Income deducted on cancellation of shares	196	209
Deduct: Income received on issue of shares	(128)	(126)
<b>Total distributions for the year</b>	<b>3,308</b>	<b>3,131</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	3,309	3,131
Overseas deferred capital gains tax on unrealised gains	(1)	-
<b>Total distributions for the year</b>	<b>3,308</b>	<b>3,131</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	177	169
Amounts receivable from the ACD for the issue of shares	4	121
Corporation tax recoverable	2	-
Sales awaiting settlement	-	110
<b>Total debtors</b>	<b>183</b>	<b>400</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	97	263
Cash at broker	11	12
	<b>108</b>	<b>275</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	58
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	456	-
<b>Net liquidity</b>	<b>564</b>	<b>333</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Deferred tax payable	-	1
<b>Total provisions for liabilities</b>	<b>-</b>	<b>1</b>

### 9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	2	2
Accrued expenses payable to the Depositary or associates of the Depositary	4	5
Amounts payable to the ACD for cancellation of shares	-	1
Corporation tax payable	-	14
Other accrued expenses	4	3
<b>Total creditors</b>	<b>10</b>	<b>25</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 11 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 9.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

# Notes to the Financial Statements

## Continued

### 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024	2023	2024	2023
Trades in the year	£'000	£'000	£'000	£'000
Equities	27,628	18,336	23,214	50,854
Collective investment schemes	28,200	5,791	28,911	2,577
Corporate actions	-	-	-	109
<b>Trades in the year before transaction costs</b>	<b>55,828</b>	<b>24,127</b>	<b>52,125</b>	<b>53,540</b>
<b>Commissions</b>				
Equities	-	1	-	(4)
<b>Total commissions</b>	<b>-</b>	<b>1</b>	<b>-</b>	<b>(4)</b>
<b>Total transaction costs</b>	<b>-</b>	<b>1</b>	<b>-</b>	<b>(4)</b>
<b>Total net trades in the year after transaction costs</b>	<b>55,828</b>	<b>24,128</b>	<b>52,125</b>	<b>53,536</b>

	Purchases		Sales	
	2024	2023	2024	2023
Total transaction costs expressed as a percentage of asset type cost	%	%	%	%
<b>Commissions</b>				
Equities	-	0.01	-	0.01

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.11% (2023: 0.24%), this is representative of the average spread on the assets held during the year.

### 13 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Closing shares 2024
B Accumulation	1,480,956	1,684,228	(2,164,561)	1,000,623
N Accumulation	4,736,789	2,374,483	(4,012,321)	3,098,951
X Accumulation	100,541,986	15,587,586	(11,948,878)	104,180,694
X Income	4,307,659	303,477	(1,075,785)	3,535,351

### 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Equities	160,736	-	-	143,494	-	-
Collective Investment Schemes	2,767	456	-	3,417	58	-
Derivatives	8	-	-	1	7	-
<b>Total investment assets</b>	<b>163,511</b>	<b>456</b>	<b>-</b>	<b>146,912</b>	<b>65</b>	<b>-</b>
<b>Fair value of investment liabilities</b>						
Derivatives	-	-	-	-	(9)	-
<b>Total investment liabilities</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>(9)</b>	<b>-</b>

### 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency	currency
	exposure	exposure
	2024	2023
	£'000	£'000
Japanese Yen	160,926	143,765
<b>Total</b>	<b>160,926</b>	<b>143,765</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £8,046,000 (2023: £7,188,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

# Notes to the Financial Statements

## Continued

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £8,198,000 (2023: £7,348,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	-	-	534	(2)
Futures	354	8	250	1
<b>Total market exposure</b>	<b>354</b>	<b>8</b>	<b>784</b>	<b>(1)</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	8	11	-	19	0.01
	<b>8</b>	<b>11</b>	<b>-</b>	<b>19</b>	<b>0.01</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	1	12	-	13	0.01
	<b>1</b>	<b>12</b>	<b>-</b>	<b>13</b>	<b>0.01</b>

# Notes to the Financial Statements

## Continued

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had no open bilateral positions.

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £18,000 (2023: £2,000) and expenses paid to the lending agent, Citibank, are £2,000 (2023: £Nil).

2023 Counterparties	Forwards £'000	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 – shares purchased prior to 1 January 2024

Group 2 – shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>B Accumulation</b>				
Group 1	1.3385	-	1.3385	1.3272
Group 2	0.4538	0.8847	1.3385	1.3272
<b>N Accumulation</b>				
Group 1	1.3651	-	1.3651	1.3325
Group 2	0.5642	0.8009	1.3651	1.3325
<b>X Accumulation</b>				
Group 1	1.3938	-	1.3938	1.3796
Group 2	0.7656	0.6282	1.3938	1.3796
<b>X Income</b>				
Group 1	1.1785	-	1.1785	1.1906
Group 2	1.1785	-	1.1785	1.1906

## Final dividend distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.4536	-	1.4536	1.2033
Group 2	0.6646	0.7890	1.4536	1.2033
<b>N Accumulation</b>				
Group 1	1.4521	-	1.4521	1.2155
Group 2	1.0278	0.4243	1.4521	1.2155
<b>X Accumulation</b>				
Group 1	1.5155	-	1.5155	1.2631
Group 2	0.8483	0.6672	1.5155	1.2631
<b>X Income</b>				
Group 1	1.2687	-	1.2687	1.0785
Group 2	1.2486	0.0201	1.2687	1.0785

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Short Dated Global Corporate Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).

Performance Target: To match the return of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in government and sub-sovereign bonds, other funds (including those managed by abrdrn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/ outflows and the cash management.

- The tracking error may be affected if the times at which the fund and the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) are priced are different. The fund is valued at 12:00, but the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) were priced at the same time.
- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/ or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdrn Short Dated Global Corporate Bond Tracker Fund B Accumulation shares rose by 5.27% (net of fees) compared with a rise of 5.37% in the performance target, Bloomberg Barclays Global Aggregate Corporate 1-5 year Index (Hedged to GBP).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdrn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.14%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

## Market Review

Corporate bonds rose in 2024, in an overall volatile environment for rates and credit. Investors bought bonds amid interest rate cuts from most major central banks, contending with political change in Europe and the inflation threat from the re-election of President Trump in the US.

The first half of 2024 saw conflicting economic data, leading investors to question when interest rates might be cut. Weaker inflation figures and signs of softening employment data were backed up by dovish comments from central banks. There was some volatility in the second quarter of 2024, motivated by geopolitical events and elections, particularly those in France. French risk assets sold off in June, equities dropped by several percent while the spread differential between French OATs and Bunds jumped to the highest level since the pandemic in 2020. The European Central Bank (ECB) made its first rate cut in June, while the Bank of England cut rates in August and the US Federal Reserve's first rate cut came

in September. Returns were good in the third quarter of the year as rate cuts came thick and fast. However, the fourth quarter was challenging for credit, mostly due to movements in rates markets. Investors sold government bonds, even as central banks continued cutting interest rates, reacting to hawkish statements and forecasts, particularly in the US.

Nevertheless, demand for credit remained strong, with spreads tightening particularly in riskier, higher yielding segments. There has been some regional variation, with unrest in France causing a sell off French debt. Shorter dated bonds generally performed better than more rate-sensitive, longer dated issues.

## Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the Bloomberg Barclays Global Aggregate Corporate 1-5 year Index (hedged to GBP). In doing so, the fund will invest at least 90% in corporate bonds (loans to companies) that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

## Portfolio Outlook and Strategy

We remain optimistic on the outlook for global corporate bonds, as the recent rise in government yields has increased the asset class's attractiveness. Euro credit spreads are around +100 basis points (bps), which we view as neither expensive nor cheap in our moderate growth scenario. Spreads on US dollar investment grade credit are around +80bps, which we view as expensive. However, with yields at a higher level than recent averages, we believe buyers will continue to be attracted. In the short term, Trump's policy proposals will likely drive macroeconomic momentum, with volatility in interest rates and, to a lesser extent, credit spreads. Tariffs and reduced migration will be inflationary and negative for global growth. However, tax cuts and deregulation are positive for the banking and corporate sectors, which should stimulate US growth.

Regarding central bank expectations, we believe the ECB's rate path remains more predictable, with the market currently pricing in four rate cuts in 2025, as Europe's growth remains sluggish and inflationary pressures are more contained. However, we cannot decouple from the US Treasury markets, which have repriced global rates higher and curves have steepened. While we believe rates may rise further from here, they remain attractive and continue to draw inflows into credit.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk			
←						→
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk – Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	1	2
Interest payable	4	30
<b>Total interest payable &amp; similar charges</b>	<b>5</b>	<b>32</b>

### 5 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Corporation tax	19	10
Double taxation relief	(19)	(10)
Overseas taxes	92	52
<b>Total taxation (note 5b)</b>	<b>92</b>	<b>52</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>94,053</b>	<b>54,236</b>
Corporation tax at 00% (2023: 00%)	18,810	10,847
Effects of:		
Overseas taxes	92	52
Double taxation relief	(19)	(10)
Distributions treated as tax deductible	(18,791)	(10,837)
<b>Total tax charge for year (note 5a)</b>	<b>92</b>	<b>52</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 6 Distributions

	2024 £'000	2023 £'000
First interim distribution	21,132	11,544
Second interim distribution	24,904	12,484
Third interim distribution	23,192	15,756
Final distribution	29,650	17,368
	98,878	57,152
Add: Income deducted on cancellation of shares	401	961
Deduct: Income received on issue of shares	(5,318)	(3,929)
<b>Total distributions for the year</b>	<b>93,961</b>	<b>54,184</b>

Details of the distribution per share are set out in this fund's distribution tables.

### 7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	27,265	16,018
Amounts receivable from the ACD for the issue of shares	2,607	17,539
Overseas withholding tax recoverable	3	3
<b>Total debtors</b>	<b>29,875</b>	<b>33,560</b>

### 8 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	1,695	790
Cash at broker	915	217
	<b>2,610</b>	<b>1,007</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	66,267
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	71,381	-
abrdrn Liquidity Fund (Lux) - Euro Fund Z3 Inc*	1,927	656
abrdrn Liquidity Fund (Lux) - US Dollar Fund Z1 Inc	10,356	1,440
<b>Net liquidity</b>	<b>86,274</b>	<b>69,370</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

# Notes to the Financial Statements

### 9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	25	17
Accrued expenses payable to the Depositary or associates of the Depositary	17	11
Amounts payable to the ACD for cancellation of shares	43	4
Other accrued expenses	38	43
Purchases awaiting settlement	-	200
<b>Total creditors</b>	<b>123</b>	<b>275</b>

### 10 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 11 Related Party Transactions

abrnd Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrnd Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 9.

Amounts payable to abrnd Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

### 12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
<b>Trades in the year</b>				
Bonds	1,243,299	1,016,681	432,333	481,308
<b>Trades in the year before transaction costs</b>	<b>1,243,299</b>	<b>1,016,681</b>	<b>432,333</b>	<b>481,308</b>
<b>Total net trades in the year after transaction costs</b>	<b>1,243,299</b>	<b>1,016,681</b>	<b>432,333</b>	<b>481,308</b>

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.37% (2023: 0.22%), this is representative of the average spread on the assets held during the year.

X Accumulation	1,537,041,662	697,425,098	(37,629,367)	2,196,837,393

### 14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	4,929	2,392,476	-	3,237	1,560,199	-

<b>Total investment liabilities</b>	<b>(293)</b>	<b>(20,094)</b>	<b>-</b>	<b>-</b>	<b>(4,428)</b>	<b>-</b>

### 15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

# Notes to the Financial Statements

## Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>Currency</b>				
UK Sterling	72,881	93,786	2,333,046	2,499,713
Australian Dollar	122	21,544	(21,642)	24

Swiss Franc	44	6,763	(6,842)	(35)
US Dollar	5,335	929,885	(934,548)	672
<b>Total</b>	<b>75,221</b>	<b>1,557,585</b>	<b>35,510</b>	<b>1,668,316</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

# Notes to the Financial Statements

## Continued

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period

2024	Minimum	Maximum	Average
VaR 99% 1 Month	1.56%	1.82%	1.71%

  

2023	Minimum	Maximum	Average
VaR 99% 1 Month	1.84%	2.04%	1.96%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	2,351,188	94.17
Below investment grade securities	31,387	1.32
Unrated securities	14,830	0.50
<b>Total value of securities</b>	<b>2,397,405</b>	<b>95.99</b>

  

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	1,531,501	91.85
Below investment grade securities	22,825	1.38
Unrated securities	9,110	0.48
<b>Total value of securities</b>	<b>1,563,436</b>	<b>93.71</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	7,069,715	(15,455)	4,520,869	1,954
Futures	96,273	(266)	82,746	271
<b>Total market exposure</b>	<b>7,165,988</b>	<b>(15,721)</b>	<b>4,603,615</b>	<b>2,225</b>

# Notes to the Financial Statements

## Continued

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets £'000
Bank of America Merrill Lynch	(266)	915	-	649	0.03
	<b>(266)</b>	<b>915</b>	<b>-</b>	<b>649</b>	<b>0.03</b>

  

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets £'000
Bank of America Merrill Lynch	271	217	-	488	0.03
	<b>271</b>	<b>217</b>	<b>-</b>	<b>488</b>	<b>0.03</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000	
Bank of America Merrill Lynch	-	104	-	(110)	(6)
Barclays	1,299	999	-	(1,275)	1,023
BNP Paribas	52	1,251	-	(1,321)	(18)

Group 1	1.3214	-	1.3214	1.1011
Group 2	0.6291	0.6923	1.3214	1.1011

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdr Short Dated Global Inflation-Linked Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP).

Performance Target: To match the return of the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP) (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in government bonds that make up the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP).
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund may also invest in other funds (including those managed by abrdr), money-market instruments, and cash.
- 35% or more of the fund's total assets may be invested in securities issued by a single government issuer.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP) ("tracking error") will be in the region of 0.0 – 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP) are

priced are different. The fund is valued at 12:00, but the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP) is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP) were priced at the same time.

- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Bloomberg World Government Inflation-Linked 1-10 years Index (Hedged to GBP).
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdr Short Dated Global Inflation-Linked Bond Tracker Fund B Accumulation shares rose by 2.64% (net of fees), compared with a rise of 2.69% in the performance target, Bloomberg World Government Inflation Linked (1-10 Yr) (Hedged to GBP).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdr. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.36%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

## Market Review

Short-dated global inflation-linked bonds rose in 2024. Markets were volatile as investors watched for signs of action by central banks in the face of falling inflation.

Early 2024 was challenging for developed-market government bonds. Yields rose for US Treasuries, UK gilts and German bunds as investors reduced their expectations for near-term interest-rate cuts. With US economic data exceeding expectations, market pricing for rate cuts was pushed further back into 2024, and the expected magnitude of cuts was reduced. Global yields followed US yields higher. Moving into April and beyond, there were significant moves in yields each time inflation and labour market data confounded expectations. Towards the end of the quarter, European markets were dominated by political volatility in France. Following the European Parliamentary elections, where President Macron's centrist party was severely beaten by Marine Le Pen's far-right National Rally, Macron called for snap parliamentary elections. This caused European government bond spreads to widen materially.

Global government bonds rallied in the third quarter, boosted by a considerable increase in rate cut expectations. Markets welcomed a dovish shift from the US Federal Reserve (Fed), in particular. This was attributable to weaker US labour market data and signs of further easing of inflation measures. Indeed, much of September was dominated by the debate about to what extent the

Fed would reduce interest rates, and this culminated in a larger-than-consensus reduction by 50 basis points (bps). Meanwhile, the European Central Bank cut rates by 25 bps. In the UK, the Bank of England held rates steady at 5%, but Governor Bailey said the bank should be able to reduce rates gradually over time.

However, the final quarter of 2024 brought a reversal of fortunes, as 10-year government bond yields rose, and prices fell. While interest rates from major central banks were on a downward trajectory, messaging from the Fed and others seemed to suggest little hurry to lower rates. Indeed, in December, Fed chairman Powell said it would be appropriate to slow the pace of rate cuts. US data confirmed the persistence of inflation, leading to a sell-off in bonds across the curve. Donald Trump's election as US president is expected to continue to drive nominal US Treasury yields higher, dragging other government bond yields higher too, despite their own domestic economies weakening.

## Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the Bloomberg Barclays World Government Inflation Linked Index (Hedged to GBP). In doing so, the fund will invest at least 90% in government bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

## Portfolio Outlook and Strategy

The most recent inflation data shows that while the trend is still expected to be lower in the medium term, inflation still presents concern. For both the Fed and the ECB, headline and core inflation rates are still lingering slightly above the 2% target, with potential price pressures in the pipeline, not least from any new tariffs. It is likely to be a volatile journey before we reach target levels on sustained basis. There is still considerable uncertainty about the impact past policy moves will have on the broad economy and uncertainty around what policies the Trump administration may implement. Central banks will continue to monitor how tight current financial conditions are relative to the perceived neutral rate and, thereby, what will be required of them going forward. The Fed led with a more hawkish tone than expected after the December cut. Chair Powell emphasised the need for further progress on inflation, and this signalled a potential pause in the rate-cutting cycle in 2025.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk			
←			→			
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Total taxation (note 4b)	-	-

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>25,378</b>	<b>17,224</b>
Corporation tax at 20% (2023: 20%)	5,076	3,445
Effects of:		
Distributions treated as tax deductible	(4,681)	(3,047)
UK Indexation relief	(395)	(398)
<b>Total tax charge for year (note 4a)</b>	<b>-</b>	<b>-</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
First interim distribution	5,902	4,478
Second interim distribution	6,433	3,510
Third interim distribution	5,938	4,679
Final distribution	8,709	4,411
	26,982	17,078
Add: Income deducted on cancellation of shares	204	1,249
Deduct: Income received on issue of shares	(1,808)	(1,103)
<b>Total distributions for the year</b>	<b>25,378</b>	<b>17,224</b>

Details of the distribution per share are set out in this fund's distribution tables.

	2024 £'000	2023 £'000
Accrued revenue	2,088	1,145
Amounts receivable from the ACD for the issue of shares	678	2,980
Overseas withholding tax recoverable	21	22
Sales awaiting settlement	9,648	1,963
<b>Total debtors</b>	<b>12,435</b>	<b>6,110</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	255	187
	<b>255</b>	<b>187</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	759
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	2,380	-
abrdrn Liquidity Fund (Lux) - Euro Fund Z3 Inc*	28	5
abrdrn Liquidity Fund (Lux) - US Dollar Fund Z1 Inc*	53	5
<b>Net liquidity</b>	<b>2,716</b>	<b>956</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	46	23
Accrued expenses payable to the Depositary or associates of the Depositary	4	4
Amounts payable to the ACD for cancellation of shares	14	7
Other accrued expenses	10	10
Purchases awaiting settlement	5,088	3,857
<b>Total creditors</b>	<b>5,162</b>	<b>3,901</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

# Notes to the Financial Statements

## Continued

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

Trades in the year	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Bonds	355,562	214,664	107,919	216,807
Trades in the year before transaction costs	355,562	214,664	107,919	216,807
Total net trades in the year after transaction costs	355,562	214,664	107,919	216,807

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.10% (2023: 0.12%), this is representative of the average spread on the assets held during the year.

### 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	613,771	33,266	-	369,223	22,276	-
Collective Investment Schemes	-	2,461	-	-	769	-

<b>Total investment liabilities</b>	<b>-</b>	<b>(5,592)</b>	<b>-</b>	<b>-</b>	<b>(1,192)</b>	<b>-</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

# Notes to the Financial Statements

## Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>Currency</b>			
UK Sterling	75,125	572,890	648,015
Australian Dollar	4,659	(4,671)	(12)
Canadian Dollar	4,622	(4,608)	14
Danish Krone	1,606	(1,635)	(29)
Euro	133,643	(132,635)	1,008
Japanese Yen	19,726	(19,816)	(90)
New Zealand Dollar	1,020	(1,010)	10
Swedish Krona	5,127	(5,215)	(88)
US Dollar	404,225	(401,685)	2,540
<b>Total</b>	<b>649,753</b>	<b>1,615</b>	<b>651,368</b>

2023	Floating rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
<b>Currency</b>			
UK Sterling	37,672	358,849	396,521
Australian Dollar	4,242	(4,145)	97
Canadian Dollar	2,998	(2,930)	68
Danish Krone	518	(511)	7
Euro	80,342	(80,401)	(59)
Japanese Yen	14,608	(14,777)	(169)
New Zealand Dollar	1,237	(1,192)	45
Swedish Krona	3,976	(3,908)	68
US Dollar	246,862	(249,158)	(2,296)
<b>Total</b>	<b>392,455</b>	<b>1,827</b>	<b>394,282</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

# Notes to the Financial Statements

## Continued

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	2.42%	3.01%	2.74%

  

2023	Minimum	Maximum	Average
VaR 99% 1 Month	2.99%	3.41%	3.14%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	647,037	99.33
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>647,037</b>	<b>99.33</b>

  

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	391,499	99.29
Below investment grade securities	-	-
Unrated securities	-	-
<b>Total value of securities</b>	<b>391,499</b>	<b>99.29</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

# Notes to the Financial Statements

## Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	1,763,809	(4,293)	1,053,963	465
<b>Total market exposure</b>	<b>1,763,809</b>	<b>(4,293)</b>	<b>1,053,963</b>	<b>465</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depository. At the year end the fund had no exposure at the end of the current or prior year.

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
Bank of America Merrill Lynch	(37)	-	-	(37)

<b>N Income</b>				
Group 1	1.2881	-	1.2881	1.0964
Group 2	0.8154	0.4727	1.2881	1.0964
<b>X Accumulation</b>				
Group 1	1.5604	-	1.5604	1.2714
Group 2	0.6570	0.9034	1.5604	1.2714

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdr Short Dated Sterling Corporate Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.

Performance Target: To match the return of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in gilts, other funds (including those managed by abrdr), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index are priced are different. The fund is valued at 12:00, but the Markit iBoxx Sterling Non-

Gilts 1-5 years Total Return Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index were priced at the same time.

### Derivatives and Techniques

- The fund may use of derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.
- Derivative usage in the fund is otherwise expected to be very limited.

### Performance Review

For the 12 months ended 31 December 2024, the value of abrdr Short Dated Sterling Corporate Bond Tracker Fund B Accumulation shares rose by 3.89% (net of fees) compared with a rise of 4.11% in the performance target, Markit iBoxx Sterling Non-Gilts (1-5 year) Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdr. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.14%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdr\*\*. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdr\*\* or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdr means the relevant member of abrdr group, being Aberdeen Group plc (formerly abrdr plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

### Market Review

Sterling investment-grade (IG) corporate bonds were volatile during 2024, and the five-year gilt yield rose by 110 basis points (bps) to 4.40%.

Early in the year, conflicting economic data led to rising government bond yields as investors questioned when interest rates might be cut. A high volume of new issuance at attractive premia led to a repricing of issuer curves. In February and March, positive US economic data supported equity and credit markets, and credit spreads narrowed. In April, expectations of developed market interest-rate cuts were priced further into the future. Although credit spreads continued to grind tighter in sterling and euros, both markets delivered negative monthly returns. Credit spreads continued their squeeze tighter during May in all major currencies as flows continued into yield-generating asset classes. UK government bond yields fell while European yields were largely static, meaning IG credit generated positive returns in both markets.

Credit spreads in both euro- and sterling-denominated IG markets tightened marginally in July, with positive returns primarily driven by falling government bond yields. The major central banks kept interest rates on hold in July, but government bonds rallied in anticipation of further rate cuts later in the year after lower-than-expected US consumer price inflation data. August began with the Bank of England (BoE) reducing interest rates by 25 bps to 5%. Credit spreads widened in August and were a little higher in September, caused mainly by widening in the large housing association sector. October was dominated by the Autumn budget, which drove significant price action in UK government bonds. The first budget of the new Labour government detailed large increases in spending, taxation and borrowing. The additional long gilt issuance, together with concerns over renewed inflation, caused gilts to sell off sharply.

Credit spreads moved tighter in October. Utility bonds were strongest, while financials also performed well. Sterling credit moved tighter, reflecting both the move in the underlying gilt yields and continued yield buying across the curve. In November, the BoE's Monetary Policy Committee voted to cut interest rates by 0.25% to 4.75%. The meeting's accompanying forecasts pointed towards a pickup in GDP and consumer price inflation expectations

for the year ahead before a subsequent decline.

December was the best month of 2024 for sterling credit, moving 12 bps tighter versus gilts. Real estate led the way, while utilities and subordinated insurance performed well. Senior bank bonds lagged. Long-end spreads also had their best month of the year in December, partly with gilt yields higher, but also with the water sector recovering strongly after the Ofwat final determination improved sentiment.

### Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the iBoxx Sterling Non-Gilts (1-5 year) Index. In doing so, the fund will invest at least 90% in bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

### Portfolio Outlook and Strategy

Yields moved higher in December, with the market moving to price fewer rate cuts in the US and the UK, and to some degree in Europe. However, there seems little conviction on this in credit markets, which remain at or close to multi-year tight levels. This suggests that yields are likely to move lower still, and credit will remain an attractive way of adding yield for investors. The fundamentals support this as well, with generally good credit quality and with modest to better growth outlooks.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk			
←			→			
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Credit Risk – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

# Comparative Tables

<b>B Accumulation</b>	<b>2024</b> pence per share	<b>2023</b> pence per share	<b>2022</b> pence per share
<b>Change in net assets per share</b>			
Opening net asset value per share	103.11	96.67	104.12
Return before operating charges*	4.12	6.54	(7.35)
Operating charges	(0.10)	(0.10)	(0.10)
Return after operating charges*	4.02	6.44	(7.45)
Distributions	(4.54)	(3.58)	(1.74)
Retained distributions on accumulation shares	4.54	3.58	1.74
Closing net asset value per share	107.13	103.11	96.67
* after direct transaction costs of:	-	-	-
<b>Performance</b>			
Return after charges	3.90%	6.66%	(7.16%)
<b>Other information</b>			
Closing net asset value (£'000)	117,699	47,781	40,052
Closing number of shares	109,868,493	46,339,489	41,430,188
Operating charges	0.10%	0.10%	0.10%
Direct transaction costs	-	-	-
<b>Prices</b>			
Highest share price	107.3	103.2	104.1
Lowest share price	102.3	95.70	92.50

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Total taxation (note 4b)	-	-

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>52,373</b>	<b>26,851</b>
Corporation tax at 20% (2023: 20%)	10,474	5,370
Effects of:		
Distributions treated as tax deductible	(10,474)	(5,370)
<b>Total tax charge for year (note 4a)</b>	<b>-</b>	<b>-</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	11,026	5,382
Second interim distribution	13,409	6,082
Third interim distribution	14,218	7,354
Final distribution	16,691	9,225
	55,344	28,043
Add: Income deducted on cancellation of shares	384	590
Deduct: Income received on issue of shares	(3,356)	(1,782)
<b>Total distributions for the year</b>	<b>52,372</b>	<b>26,851</b>
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	52,373	26,851
Undistributed revenue carried forward	(1)	-
<b>Total distributions for the year</b>	<b>52,372</b>	<b>26,851</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	20,602	11,438
Amounts receivable from the ACD for the issue of shares	1,959	5,278
Sales awaiting settlement	78,885	50,889
<b>Total debtors</b>	<b>101,446</b>	<b>67,605</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	351	323
	<b>351</b>	<b>323</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	9,680
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	24,685	-
<b>Net liquidity</b>	<b>25,036</b>	<b>10,003</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	20	10
Accrued expenses payable to the Depositary or associates of the Depositary	10	6
Other accrued expenses	21	19
Purchases awaiting settlement	100,302	64,808
<b>Total creditors</b>	<b>100,353</b>	<b>64,843</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

# Notes to the Financial Statements

## Continued

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
<b>Trades in the year</b>				
Bonds	1,496,720	879,488	969,979	583,990
<b>Trades in the year before transaction costs</b>	<b>1,496,720</b>	<b>879,488</b>	<b>969,979</b>	<b>583,990</b>
<b>Total net trades in the year after transaction costs</b>	<b>1,496,720</b>	<b>879,488</b>	<b>969,979</b>	<b>583,990</b>

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.24% (2023: 0.27%), this is representative of the average spread on the assets held during the year.

### 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024
B Accumulation	46,339,489	69,911,802	(6,390,041)	7,243	109,868,493
N Accumulation	7,476,174	45,363,912	(17,750,455)	(7,276)	35,082,355
X Accumulation	835,971,536	416,200,082	(31,303,820)	-	1,220,867,798

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
<b>Fair value of investment assets</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
Bonds	274,016	1,166,392	-	180,140	726,248	-
Collective Investment Schemes	-	24,685	-	-	9,680	-
<b>Total investment assets</b>	<b>274,016</b>	<b>1,191,077</b>	<b>-</b>	<b>180,140</b>	<b>735,928</b>	<b>-</b>

# Notes to the Financial Statements

## Continued

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets not carrying interest £'000	Total £'000
<b>2024</b>				
Currency				
UK Sterling	25,036	1,440,408	1,093	1,466,537
<b>Total</b>	<b>25,036</b>	<b>1,440,408</b>	<b>1,093</b>	<b>1,466,537</b>

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets not carrying interest £'000	Total £'000
<b>2023</b>				
Currency				
UK Sterling	10,003	906,388	2,762	919,153
<b>Total</b>	<b>10,003</b>	<b>906,388</b>	<b>2,762</b>	<b>919,153</b>

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

#### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

<b>2024</b>	<b>Minimum</b>	<b>Maximum</b>	<b>Average</b>
VaR 99% 1 Month	2.13%	2.60%	2.32%

# Notes to the Financial Statements

## Continued

2023	Minimum	Maximum	Average
VaR 99% 1 Month	2.50%	3.01%	2.75%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

	Market value £'000	Percentage of total net assets %
<b>2024</b>		
Investment grade securities	1,436,465	97.95
Below investment grade securities	3,943	0.27
Unrated securities	-	-
<b>Total value of securities</b>	<b>1,440,408</b>	<b>98.22</b>

	Market value £'000	Percentage of total net assets %
<b>2023</b>		
Investment grade securities	901,588	98.09
Below investment grade securities	4,800	0.52
Unrated securities	-	-
<b>Total value of securities</b>	<b>906,388</b>	<b>98.61</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

#### Financial derivatives instrument risk

The fund had no exposure to derivatives as at 31 December 2024 (2023: £Nil).

#### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions:

2024 Counterparties	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock* £'000	
Barclays	1,143	-	(1,458)	(315)
Goldman Sachs	1,912	-	(2,010)	(98)
HSBC	297	-	(332)	(35)
Morgan Stanley	2,272	-	(2,420)	(148)
<b>Total</b>	<b>5,624</b>	<b>-</b>	<b>(6,220)</b>	<b>(596)</b>

\* contains the required disclosures for Concentration Data within Securities Financing Transaction Regulation (SFTR) Disclosures.

# Notes to the Financial Statements

## Continued

<b>SFTR Issuers 2024</b>	<b>Type</b>	<b>Collateral Stock £'000</b>
Germany (Fed Rep of)	Bond	(2,381)
US Treasury	Bond	(2,010)
Netherlands (Kingdom of)	Bond	(1,790)
Canada (Govt of)	Bond	(39)
		<b>(6,220)</b>

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £18,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £3,000 (2023: £Nil).

### 2023

There was no counterparty exposure as at 31 December 2023.

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £100,353,000 (2023: £64,843,000).

# Distribution Tables

Group 1	1.1354	-	1.1354	0.9591
Group 2	0.4579	0.6775	1.1354	0.9591

## Final interest distribution

Group 1 – shares purchased prior to 1 October 2024

Group 2 – shares purchased between 1 October 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.2022	-	1.2022	1.0180
Group 2	0.5920	0.6102	1.2022	1.0180
<b>N Accumulation</b>				
Group 1	1.2074	-	1.2074	1.0239
Group 2	0.4615	0.7459	1.2074	1.0239
<b>X Accumulation</b>				
Group 1	1.2242	-	1.2242	1.0379
Group 2	0.6890	0.5352	1.2242	1.0379

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdrn Sterling Corporate Bond Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Markit iBoxx Sterling Non-Gilts Overall Total Return Index.

Performance Target: To match the return of the Markit iBoxx Sterling Non-Gilts Overall Total Return Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Markit iBoxx Sterling Non-Gilts Overall Total Return Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in gilts, other funds (including those managed by abrdrn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Markit iBoxx Sterling Non-Gilts Overall Total Return Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Markit iBoxx Sterling Non-Gilts Overall Total Return Index are priced are different. The fund is valued at 12:00, but the Markit iBoxx Sterling Non-Gilts Overall Total Return Index is valued at market close and

so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Markit iBoxx Sterling Non-Gilts Overall Total Return Index were priced at the same time.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Markit iBoxx Sterling Non-Gilts Overall Total Return Index.
- Derivative usage in the fund otherwise is expected to be very limited.

### Performance Review

For the 12 months ended 31 December 2024, the value of abrdrn Sterling Corporate Bond Tracker Fund B Accumulation shares rose by 1.63% (net of fees) compared with a rise of 1.71% in the performance target, Markit iBoxx Sterling Non-Gilts Overall Total Return Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdrn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.12%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdrn\*\*. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdrn\*\* or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

\*\*abrdrn means the relevant member of abrdrn group, being Aberdeen Group plc (formerly abrdrn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

### Market Review

Corporate bonds rose in 2024, in an overall volatile environment for rates and credit. Investors bought bonds amid interest rate cuts from most major central banks, contending with political change in Europe and the inflation threat from the re-election of President Trump in the US.

The first half of 2024 saw conflicting economic data, leading investors to question when interest rates might be cut. Weaker inflation figures and signs of softening employment data were backed up by dovish comments from central banks. There was some volatility in the second quarter of 2024, motivated by geopolitical events and elections, particularly those in France.

Volatility picked up in the third quarter of 2024. The UK's general election took place at the start of July. The Labour Party won a resounding victory but markets showed little immediate reaction, as the result had been expected for many months. Credit spreads spiked in early August, due to three factors. Firstly, alarming US macro data came from a poor employment report, followed by significant downward revisions to the previous year's data. Secondly, geopolitical tensions rose, although this was far from a big driver of credit spreads. Finally, the Federal Reserve was primed to cut rates and markets rushed to price more cuts, while a rate hike in Japan led to the unwind of the yen carry trade. As investors in Japan rushed to sell higher yielding US dollar corporate bond holdings, to cover their domestic shorts. This sent reverberations through global markets for a couple of weeks. Credit spreads moved tighter in October on the back of continued yield buying across the curve. In November, the Bank of England's Monetary Policy Committee voted to cut interest rates by 0.25% to 4.75%. The meeting's accompanying forecasts pointed towards a pickup in GDP and consumer price inflation (CPI) expectations for the year ahead before a subsequent decline. Third-quarter GDP was also weaker at 0.1% quarter on quarter versus 0.2% consensus. On a sectoral basis, consumer staples groups outperformed, while housing associations were marginally tighter. December was the best month of 2024 for sterling credit.

Demand for credit remained strong, with spreads tightening particularly in riskier, higher yielding segments. Shorter dated bonds generally performed better than more rate-sensitive, longer dated issues.

### Portfolio Activity and Review

The fund aims to generate income and some growth over the long term (five years or more) by tracking the return of the iBoxx Sterling Non-Gilts Index. In doing so, the fund will invest at least 90% in bonds that make up the index. Therefore, changes to the portfolio during the review period were largely confined to reflecting changes to the index.

### Portfolio Outlook and Strategy

Yields moved higher in December, with the market moving to price fewer interest-rate cuts in the US and the UK, and to some degree in Europe. However, there seems little conviction on this in credit markets which remain at or close to multi-year tights. This suggests that yields are likely to move lower, and credit will remain an attractive way of adding yield for investors. The fundamentals support this as well, with credit quality generally very good and the growth outlook modest to better.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Credit Risk – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	-	2
<b>Total taxation (note 4b)</b>	-	<b>2</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>30,082</b>	<b>21,426</b>
Corporation tax at 20% (2023: 20%)	6,016	4,285
Effects of:		
Overseas taxes	-	2
Distributions treated as tax deductible	(6,016)	(4,285)
<b>Total tax charge for year (note 4a)</b>	-	<b>2</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
First interim distribution	7,475	3,471
Second interim distribution	7,143	5,534
Third interim distribution	7,402	6,732
Final distribution	7,733	6,913
	29,753	22,650
Add: Income deducted on cancellation of shares	1,126	477
Deduct: Income received on issue of shares	(797)	(1,703)
<b>Total distributions for the year</b>	<b>30,082</b>	<b>21,424</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	11,032	10,063
Amounts receivable from the ACD for the issue of shares	321	135
Expenses reimbursement receivable from the ACD	-	6
Sales awaiting settlement	21,271	23,001
<b>Total debtors</b>	<b>32,624</b>	<b>33,205</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	122	103
Cash at broker	46	103
	<b>168</b>	<b>206</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	6,183	586
<b>Net liquidity</b>	<b>6,351</b>	<b>792</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	8	7
Accrued expenses payable to the Depositary or associates of the Depositary	6	4
Amounts payable to the ACD for cancellation of shares	-	2,607
Other accrued expenses	27	28
Purchases awaiting settlement	24,724	22,326
<b>Total creditors</b>	<b>24,765</b>	<b>24,972</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

# Notes to the Financial Statements

## Continued

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrdr Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
<b>Trades in the year</b>				
Bonds	362,854	496,631	350,373	281,439
<b>Trades in the year before transaction costs</b>	<b>362,854</b>	<b>496,631</b>	<b>350,373</b>	<b>281,439</b>
<b>Total net trades in the year after transaction costs</b>	<b>362,854</b>	<b>496,631</b>	<b>350,373</b>	<b>281,439</b>

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.47% (2023: 0.53%), this is representative of the average spread on the assets held during the year.

### 12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024
B Accumulation	18,149,049	17,816,700	(16,116,636)	5,127	19,854,240

### 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	76,269	567,818	-	82,103	565,698	-
Collective Investment Schemes	-	6,183	-	-	586	-
<b>Total investment assets</b>	<b>76,269</b>	<b>574,001</b>	<b>-</b>	<b>82,103</b>	<b>566,284</b>	<b>-</b>
<b>Fair value of investment liabilities</b>

<b>Total investment liabilities</b>	<b>(2)</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets not carrying interest £'000	Total £'000
<b>2024</b>				
Currency				
UK Sterling	6,351	644,087	7,857	658,295
<b>Total</b>	<b>6,351</b>	<b>644,087</b>	<b>7,857</b>	<b>658,295</b>

# Notes to the Financial Statements

## Continued

2023	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets not carrying interest £'000	Total £'000
<b>Currency</b>				
UK Sterling	792	647,801	8,233	656,826
<b>Total</b>	<b>792</b>	<b>647,801</b>	<b>8,233</b>	<b>656,826</b>

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

### VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	4.06%	5.05%	4.48%
<b>2023</b>			
VaR 99% 1 Month	4.86%	6.06%	5.39%

### Counterparty risk

#### Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	641,386	97.43
Below investment grade securities	2,602	0.40
Unrated securities	99	0.01
<b>Total value of securities</b>	<b>644,087</b>	<b>97.84</b>
<b>2023</b>		
Investment grade securities	644,672	98.16
Below investment grade securities	3,129	0.47
Unrated securities	-	-
<b>Total value of securities</b>	<b>647,801</b>	<b>98.63</b>

Investment grade information used in the above table is based on credit ratings issued by market vendors.

# Notes to the Financial Statements

## Continued

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Futures	3,604	(2)	-	-
<b>Total market exposure</b>	<b>3,604</b>	<b>(2)</b>	<b>-</b>	<b>-</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(2)	46	-	44	0.01
	<b>(2)</b>	<b>46</b>	<b>-</b>	<b>44</b>	<b>0.01</b>

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	-	103	-	103	-
	<b>-</b>	<b>103</b>	<b>-</b>	<b>103</b>	<b>-</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

# Notes to the Financial Statements

## Continued

At the balance sheet date the fund had the following positions.

2024 Counterparties	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock* £'000	
Goldman Sachs	188	-	(198)	(10)

<b>Total</b>	<b>697</b>	<b>-</b>	<b>(741)</b>	<b>(44)</b>

\* contains the required disclosures for Concentration Data within Securities Financing Transaction Regulation (SFTR) Disclosures.

SFTR Issuers 2024	Type	Collateral Stock £'000
Germany (Fed Rep of)	Bond	(534)
US Treasury	Bond	(198)
Canada (Govt of)	Bond	(9)
		<b>(741)</b>

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £8,000 (2023: £1,000) and expenses paid to the lending agent, Citibank, are £1,000 (2023: £Nil).

### 2023

There was no counterparty exposure as at 31 December 2023.

### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £24,767,000 (2023: £24,972,000).

# Distribution Tables

Group 2	0.5563	0.5089	1.0652	0.8077

# Distribution Tables

For the year ended 31 December 2024 (in pence per share) continued

## Third interim interest distribution

Group 1 – shares purchased prior to 1 July 2024

Group 2 – shares purchased between 1 July 2024 and 30 September 2024

	Revenue	Equalisation	Distribution paid 29/11/24	Distribution paid 30/11/23
<b>B Accumulation</b>				
Group 1	1.0520	-	1.0520	0.9536
Group 2	0.5532	0.4988	1.0520	0.9536
<b>N Accumulation</b>				
Group 1	1.0762	-	1.0762	0.9635
Group 2	0.6120	0.4642	1.0762	0.9635
<b>X Accumulation</b>				
Group 1	1.0773	-	1.0773	0.9708
Group 2	0.4461	0.6312	1.0773	0.9708

## Final interest distribution

Group 1 – shares purchased prior to 1 October 2024

Group 2 – shares purchased between 1 October 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>B Accumulation</b>				
Group 1	1.1094	-	1.1094	0.9767
Group 2	0.6112	0.4982	1.1094	0.9767
<b>N Accumulation</b>				
Group 1	1.1207	-	1.1207	0.9872
Group 2	0.6265	0.4942	1.1207	0.9872
<b>X Accumulation</b>				
Group 1	1.1293	-	1.1293	0.9943
Group 2	0.5608	0.5685	1.1293	0.9943

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn UK All Share Tracker Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by tracking the return of the FTSE All-Share Index.

Performance Target: To match the return of the FTSE All-Share Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 90% in equities (company shares) and equity related securities (such as depositary receipts) of companies that make up the FTSE All-Share Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

### Management Process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the FTSE All-Share Index ("tracking error") will be in the region of 0.0 - 0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, divided reinvestment, fund expenses such as annual management charges, significant inflows/outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the FTSE All-Share Index are priced are different. The fund is valued at 12:00, but the FTSE All-Share Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the FTSE All-Share Index were priced at the same time.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the value of abrdn UK All Share Tracker Fund B Accumulation shares increased by 9.31% (net of fees) compared with an increase of 9.47% in the performance target, the FTSE All Share Index.

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The realised tracking as at 31 December 2024 was 0.04%. The Realised Tracking Error measures how consistently the fund follows its benchmark and is defined as being the volatility of differences in returns between the fund and its benchmark over a three-year period to 31 December 2024.

### Market Review

UK equities performed strongly over the period thanks to continued falls in the rate of inflation and the start of Bank of England (BoE) interest-rate cuts. Sentiment earlier in the year was aided by data that broadly indicated a more positive outlook for the British economy, but there were concerns in the wake of the new Labour government's October Budget about the impact of tax rises and higher levels of state spending. The FTSE 100 Index returned 9.59% over the 12 months, having reached a new all-time high in May as large-cap energy and mining stocks were supported by higher oil and commodity prices. The domestically focused FTSE 250 Index gained 8.13% and the FTSE Small Cap Index advanced by 10.66%, with an increase in takeover activity helping both indexes to recover well from a weak start to the year.

Gains in global markets during the period were underpinned by the ongoing resilience of the US economy and hopes that artificial intelligence could drive significant productivity improvements. In particular, major technology stocks in the US continued to outperform. However, geopolitical tensions weighed on investor confidence, with conflict in the Middle East and Ukraine ongoing. Markets around the world initially welcomed Donald Trump's victory in November's US presidential election, but concerns grew about the prospect of disputes between the US and its major trading partners in 2025.

In economic news, the inflation rate in the UK fell to its long-term 2% target in May but rose slightly towards the end of 2024 due to higher transport costs and price pressures in the services sector. The BoE cut interest rates for the first time since 2020 in August and again in November, but planned rises in government spending created uncertainty about the path of future base-rate reductions. Figures published early in the period showed the UK economy had entered a technical recession in late 2023, before returning to growth in the first six months of 2024. However, UK GDP in the third quarter was flat.

### Portfolio Activity and Review

The fund aims to generate growth over the long term (five years or more) by tracking the return of the FTSE All Share Index. The fund continued to track the FTSE All Share Index. We periodically rebalanced its holdings in accordance with the changes made by the index provider at its quarterly reviews. Any intra-quarterly index changes are also traded in the fund, if required, to maintain tracking against the benchmark.

### Portfolio Outlook and Strategy

We approach 2025 with cautious optimism. The UK market remains attractively valued, particularly considering anticipated company earnings growth and expected monetary easing. On a macroeconomic level, the British economy is expected to deliver solid GDP growth, inflation is stabilising around target levels, and the BoE is likely to continue reducing interest rates, even if this is at a slower pace than previously anticipated. In combination, these factors should encourage an increase in business investment. Meanwhile, the UK consumer is benefiting from real wage growth, bolstered by an imminent rise in the National Living Wage, and maintains a robust double-digit savings ratio, indicating potential for increased spending once confidence returns. However, risks remain, including the potential for trade wars, inflationary pressures and geopolitical tensions.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Tracking Error Risk – The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>Prices</b>			
Highest share price	162.9	145.9	137.7
Lowest share price	140.0	133.9	122.7

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

<sup>^</sup> In July 2020, the Investment Association issued Guidance on Disclosure of Fund Charges and Costs effective from 30 June 2022 which updated the Ongoing Charges disclosure requirements to include indirect costs associated with funds' holdings of closed-ended investment funds. This resulted in an increase of 0.07% in the Ongoing Charges figures disclosed as at 31 December 2022.

\* In December 2023, the Investment Association issued Guidance on Disclosure of Fund Charges and Costs effective from 30 November 2023 which updated the Ongoing Charges disclosure requirements to exclude indirect costs associated with funds' holdings of closed-ended investment funds.

<b>Net assets attributable to shareholders</b>			<b>1,432,584</b>		<b>1,610,683</b>

# Notes to the Financial Statements

## 1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	85,057	60,430
Derivative contracts	1,304	1,001
Other gains	1	11
Subsidised fees taken from the capital account*	2	1
Transaction charges	(19)	(11)
<b>Net capital gains</b>	<b>86,345</b>	<b>61,432</b>

\* Subsidised fees are paid by the ACD.

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	839	986
Derivative revenue	50	54
<b>Income from Overseas Collective Investment Schemes</b>		
Unfranked income	56	52
Interest on debt securities	175	178
Overseas dividends	371	235
Stocklending revenue	87	11
UK dividends	54,193	59,807
UK REIT	1,341	1,295
<b>Total revenue</b>	<b>57,112</b>	<b>62,618</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	858	1,026
General administration charge	163	168
	1,021	1,194
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Safe custody fee	49	46
	49	46

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
<b>Other:</b>		
Administration fees	206	206
Subsidised fees*	(217)	(252)
	(11)	(46)
<b>Total expenses</b>	<b>1,059</b>	<b>1,194</b>

Irrecoverable VAT is included in the above expenses, where applicable.

The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

\* Subsidised fees are paid by the ACD.

## 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	(75)	63
<b>Total taxation (note 4b)</b>	<b>(75)</b>	<b>63</b>

### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024 £'000	2023 £'000
<b>Net revenue before taxation</b>	<b>56,052</b>	<b>61,423</b>
Corporation tax at 20% (2023: 20%)	11,210	12,285
Effects of:		
Revenue not subject to taxation	(10,912)	(12,009)
Overseas taxes	(75)	63
Excess allowable expenses	(298)	(276)
<b>Total tax charge for year (note 4a)</b>	<b>(75)</b>	<b>63</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £13,718,000 (2023: £14,016,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

## 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	31,279	31,165
Final distribution	21,868	29,272
	53,147	60,437

# Notes to the Financial Statements

## Continued

	2024 £'000	2023 £'000
Add: Income deducted on cancellation of shares	3,643	2,564
Deduct: Income received on issue of shares	(663)	(1,641)
<b>Total distributions for the year</b>	<b>56,127</b>	<b>61,360</b>

Details of the distribution per share are set out in this fund's distribution tables.

## 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	3,177	4,025
Amounts receivable from the ACD for the issue of shares	45	19
Expenses reimbursement receivable from the ACD	219	253
Overseas withholding tax recoverable	245	237
Sales awaiting settlement	-	347
United Kingdom income tax recoverable	1	-
<b>Total debtors</b>	<b>3,687</b>	<b>4,881</b>

## 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	1,050	1,008
Cash at broker	678	674
	<b>1,728</b>	<b>1,682</b>
<b>Bank overdrafts</b>		
Overdraft at bank	(49)	(5)
	<b>(49)</b>	<b>(5)</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	29,872
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	9,711	-
<b>Net liquidity</b>	<b>11,390</b>	<b>31,549</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

# Notes to the Financial Statements

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	77	94
Accrued expenses payable to the Depositary or associates of the Depositary	7	4
Amounts payable to the ACD for cancellation of shares	2,707	5,030
Other accrued expenses	44	91
<b>Total creditors</b>	<b>2,835</b>	<b>5,219</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrdr Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

### 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

<b>Total investment liabilities</b>	<b>(10)</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>

## 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

# Notes to the Financial Statements

## Continued

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £71,521,000 (2023: £80,488,000).

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Futures	11,352	74	31,936	892
<b>Total market exposure</b>	<b>11,352</b>	<b>74</b>	<b>31,936</b>	<b>892</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	74	678	-	752	0.05
	<b>74</b>	<b>678</b>	<b>-</b>	<b>752</b>	<b>0.05</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	892	674	-	1,566	0.10
	<b>892</b>	<b>674</b>	<b>-</b>	<b>1,566</b>	<b>0.10</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

Group 2	2.2890	-	2.2890	2.9980

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn UK Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To exceed the return of the FTSE All-Share Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the FTSE All-Share Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the Performance Target, the FTSE All-Share Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the FTSE All-Share Index over the longer term.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the abrdn UK Equity Enhanced Index Fund B Accumulation shares increased by 10.61% (net of fees), compared to an increase of 10.22% in the performance target, the FTSE All Share Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

### Market Review

The UK stock market, as represented by the FTSE All Share Index, recorded a gain over the period. The FTSE 100 Index, home to multinational companies, outperformed the FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy.

The performance of the FTSE 100 Index lagged those of many overseas markets given it is home to a large number of defensive shares. However, it also contains several energy and mining companies, which supported the index's return as commodity prices ended the period above where they were after the outbreak of the war in Eastern Europe in early 2022. Meanwhile, smaller UK companies performed well as the outlook for the domestic economy improved. In late May, Prime Minister Rishi Sunak announced a snap UK general election for 4 July, as he looked to capitalise on an improving economic environment. However, the Labour Party subsequently secured a substantial majority, as anticipated. In October, the new government's first Budget featured approximately £40 billion in tax increases aimed at strengthening fiscal stability, along with a commitment to increased borrowing intended to stimulate growth. Long-dated gilt yields remained elevated due to concerns about future debt issuance and higher forecast inflation, which could delay rate cuts.

The Bank of England (BoE) kept its Bank Rate unchanged for most of the period before cutting it by 25 basis points (bps) in both August and November, bringing it to 4.75%. The headline rate of UK annual consumer inflation rose from 2.3% in October to 2.6% in November, meeting expectations but remaining above the BoE's 2% target.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

2024 was a good year for the fund, with our multi-factor approach delivering over the period. Performance was driven by value, with a notable contribution by momentum, while the performance of quality was more neutral.

Performance was positive in the first quarter of the year. Firms generating positive free cashflow performed well, along with firms demonstrating positive earnings sentiment and favourable price trends, although these were somewhat offset by the negative performance from firms with high earnings quality.

Performance was stronger in the second quarter as value stocks and high profitability firms performed well. In the third quarter, firms with momentum in price contributed positively, although this was offset by high-profitability firms detracting. However, the strong performance of inexpensive firms, as well as cash-generative companies, resulted in a positive third quarter overall. The portfolio avoided large volatility around the UK general election, and weathered the period well.

The fourth quarter was particularly strong as investors looked favourably on firms with attractive valuations, high profitability, a prudent approach to investment and positive price trends, all of which were accretive to the fund's performance. Overall, returns were strong, both in the run up to and following the US presidential election.

In summary, the fund demonstrated strong and consistent outperformance throughout the year in the face of a volatile macroeconomic environment.

### Portfolio Outlook and Strategy

We approach 2025 with cautious optimism. The UK market remains attractively valued, particularly considering anticipated company earnings growth and expected monetary easing in the coming year. On a macroeconomic level, the UK economy is expected to deliver solid GDP growth, inflation is stabilising around target levels and the BoE is likely to continue reducing interest rates, even if this is at a slower pace than previously anticipated. In combination, these factors should encourage an increase in business investment. Meanwhile, the UK consumer is benefiting from real wage growth, bolstered by a 6.7% rise in the National Living Wage scheduled for April 2025, and maintains a robust double-digit savings ratio, indicating potential for increased spending once confidence returns. However, risks remain, including the potential for trade wars, inflationary pressures and geopolitical tensions. These factors necessitate careful analysis and consideration in portfolio construction.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

<b>Total taxation (note 4b)</b>	<b>20</b>	<b>28</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>16,134</b>	<b>16,169</b>
Corporation tax at 20% (2023: 20%)	3,227	3,234
Effects of:		
Revenue not subject to taxation	(3,139)	(3,220)
Overseas taxes	20	28
Excess allowable expenses	(88)	(14)
<b>Total tax charge for year (note 4a)</b>	<b>20</b>	<b>28</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £625,000 (2023: £713,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	8,437	8,235
Final distribution	6,686	7,576
	15,123	15,811
Add: Income deducted on cancellation of shares	1,603	559
Deduct: Income received on issue of shares	(612)	(229)
<b>Total distributions for the year</b>	<b>16,114</b>	<b>16,141</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,189	1,317
Amounts receivable from the ACD for the issue of shares	-	1
Expenses reimbursement receivable from the ACD	1	1
Overseas withholding tax recoverable	48	75
<b>Total debtors</b>	<b>1,238</b>	<b>1,394</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	116	194
Cash at broker	747	407
	<b>863</b>	<b>601</b>
abrdn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	13,521
abrdn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	9,974	-
<b>Net liquidity</b>	<b>10,837</b>	<b>14,122</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	69	73
Accrued expenses payable to the Depositary or associates of the Depositary	2	2
Amounts payable to the ACD for cancellation of shares	109	468
<b>Total creditors</b>	<b>180</b>	<b>543</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

# Notes to the Financial Statements

## Continued

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrdn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

## 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

## Continued

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £20,477,000 (2023: £21,262,000).

#### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Futures	11,535	(137)	15,203	340
<b>Total market exposure</b>	<b>11,535</b>	<b>(137)</b>	<b>15,203</b>	<b>340</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

#### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	(137)	747	-	610	0.15
	<b>(137)</b>	<b>747</b>	<b>-</b>	<b>610</b>	<b>0.15</b>

# Notes to the Financial Statements

## Continued

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	340	406	-	746	0.17
	<b>340</b>	<b>406</b>	<b>-</b>	<b>746</b>	<b>0.17</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Collateral (held)/pledged			Net exposure £'000
	Stock on loan* £'000	Cash £'000	Stock* £'000

Group 2	1.7100	0.9693	2.6793	2.3458
<b>X Accumulation</b>				
Group 1	2.7219	-	2.7219	2.3848
Group 2	1.3986	1.3233	2.7219	2.3848

## Final dividend distribution

Group 1 - shares purchased prior to 1 July 2024

Group 2 - shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>A Accumulation</b>				
Group 1	2.2424	-	2.2424	2.2262
Group 2	0.6498	1.5926	2.2424	2.2262
<b>B Accumulation</b>				
Group 1	2.8952	-	2.8952	2.8653
Group 2	2.7016	0.1936	2.8952	2.8653
<b>N Accumulation</b>				
Group 1	2.1939	-	2.1939	2.1684
Group 2	1.1890	1.0049	2.1939	2.1684
<b>X Accumulation</b>				
Group 1	2.2412	-	2.2412	2.2086
Group 2	1.2475	0.9937	2.2412	2.2086

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn World Equity Enhanced Index Fund

For the year ended 31 December 2024

## Investment Objective

To generate growth over the long term (5 years or more) by investing in global equities (company shares).

Performance Target: To exceed the return of the MSCI World Index by 0.75% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the MSCI World Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

### Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the Performance Target, the MSCI World Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The tracking error of the fund, which is a measure of expected variation between the returns of the fund and the index, is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI World Index over the longer term.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").

- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund is otherwise expected to be very limited.

## Performance Review

For the 12 months ended 31 December 2024, the abrdn World Equity Enhanced Index Fund B Accumulation shares increased by 23.02% (net of fees), compared with an increase of 22.08% in the performance target, the MSCI World Index (+0.75% per annum).

Fund return source: Lipper. Basis: total return, published net asset value (NAV) to NAV, UK net income reinvested. Please note the benchmark return is quoted gross and contains no adjustment for fees. Different share classes will have accrued different returns. Performance target source: abrdn. Basis: close of business return, income reinvested, gross of expenses.

The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. ## Continued

### Market Review

Global stock markets rose strongly over the past 12 months. The prospect of an end to monetary tightening and potential rate cuts supported global bonds for much of the period, although inflation concerns led to some weakness in early 2024 and again later on in the year.

Central banks had previously raised interest rates faster and further than expected to tackle multi-decade-high inflation, which eased over the course of 2024. Global economic growth held up better than expected, though US recession fears heightened in the latter half of the period before subsiding somewhat.

Equities performed well in early 2024, supported by strong economic data, but weakened in April as stubbornly high inflation led to fears resurfacing that interest rates might remain higher for longer. These concerns also weighed on bonds. From May, renewed hopes of rate cuts and strong corporate earnings supported equities. Although equities sold off from mid-July to early August on recession fears, they recovered after reassuring data. Donald Trump's November election win, with its pro-growth agenda, initially boosted equities on hopes of economic stimulus. However, his planned measures raised concerns over inflation, contributing to a weak performance for both equities and bonds as investors reassessed the pace of monetary easing.

### Portfolio Activity and Review

The investment process underlying the fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown can help returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multi-factor framework then allows the fund to diversify with the aim of outperforming throughout the market cycle.

Our global strategy had an excellent 2024 and outperformed the benchmark; the second half of the year was a particularly favourable environment for our diversified multi-factor framework. Throughout the year, companies with momentum in both earnings and price, as well as companies with healthy profit margins, shone the brightest, with highly profitable stocks that were performing well continuing to do so. This was most evident in companies with strong earnings sentiment.

In the first half of the year, companies with conservative investment practices and good cashflow characteristics struggled. However, as the year progressed and geopolitical uncertainty increased, a premium developed on stability and these more efficiently run companies performed well, finishing the year comfortably in positive territory. When combined with the persistently positive performance of profitable and momentum stocks, our global strategy finished the year strongly. Companies with notionally attractive measures of market value relative to their fundamentals were muted, showing some initial promise in the second quarter, but ultimately fading and finishing the year flat.

### Portfolio Outlook and Strategy

The outlook for global equities is positive, although volatility is set to remain a feature of markets. With Donald Trump taking office, that has removed some of the uncertainty, but the full implications of his presidency are still unclear. Many questions remain about future trade tariffs, inflation and interest rates, not just in the US, but globally. We will have to wait and see how much of Donald Trump's campaign rhetoric translates into actual policy and how other nations react. Geopolitical tensions remain high worldwide, and particularly in the Middle East, often seeming at odds with stock markets reaching all-time highs.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←						→
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 December 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Closing number of shares	255,334	389,361	269,809
Operating charges	0.29%	0.29%	0.30%
Direct transaction costs	0.04%	0.03%	0.04%
<b>Prices</b>			
Highest share price	214.5	171.3	154.7
Lowest share price	168.8	142.4	132.5

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

# Notes to the Financial Statements

## 1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	34,375	24,236
Derivative contracts	873	454
Forward currency contracts	488	(38)
Other losses	(133)	(27)
Transaction charges	(48)	(34)
<b>Net capital gains</b>	<b>35,555</b>	<b>24,591</b>

## 2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	300	109
Derivative revenue	3	1
Overseas dividends	3,054	2,888
Overseas REIT	146	108
Stocklending revenue	4	1
UK dividends	289	276
UK REIT	6	8
<b>Total revenue</b>	<b>3,802</b>	<b>3,391</b>

## 3 Expenses

	2024 £'000	2023 £'000
<b>Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:</b>		
Authorised Corporate Director's periodic charge	358	296
General administration charge	19	15
	377	311
<b>Payable to the Depositary or associates of the Depositary, and agents of either of them:</b>		
Safe custody fee	11	9
	11	9
<b>Total expenses</b>	<b>388</b>	<b>320</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £9,720 (2023: £8,940).

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	390	342
<b>Total taxation (note 4b)</b>	<b>390</b>	<b>342</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>3,413</b>	<b>3,070</b>
Corporation tax at 20% (2023: 20%)	683	614
Effects of:		
Revenue not subject to taxation	(668)	(632)
Overseas taxes	390	342
Overseas tax expensed	(4)	(3)
Excess allowable expenses	(11)	21
<b>Total tax charge for year (note 4a)</b>	<b>390</b>	<b>342</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £316,000 (2023: £327,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions

	2024 £'000	2023 £'000
Interim distribution	1,660	1,562
Final distribution	1,514	1,084
	3,174	2,646
Add: Income deducted on cancellation of shares	85	99
Deduct: Income received on issue of shares	(236)	(17)
<b>Total distributions for the year</b>	<b>3,023</b>	<b>2,728</b>

Details of the distribution per share are set out in this fund's distribution tables.

# Notes to the Financial Statements

## Continued

### 6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	203	182
Amounts receivable from the ACD for the issue of shares	221	88
Overseas withholding tax recoverable	128	136
<b>Total debtors</b>	<b>552</b>	<b>406</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	159	75
Cash at broker	810	59
	<b>969</b>	<b>134</b>
abrdrn Liquidity Fund (Lux) - Sterling Fund Z3 Inc*	-	3,425
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	9,348	-
<b>Net liquidity</b>	<b>10,317</b>	<b>3,559</b>

\* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

### 8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	38	27
Accrued expenses payable to the Depositary or associates of the Depositary	7	3
Amounts payable to the ACD for cancellation of shares	1	66
<b>Total creditors</b>	<b>46</b>	<b>96</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil)

### 10 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

# Notes to the Financial Statements

## Continued

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

## 11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of derivatives during the year, or in the prior year.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000

X Accumulation	1,720,005	270,720	(375,994)	1,614,731

## 13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

### 14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Australian Dollar	4,253	3,061
Canadian Dollar	7,630	4,532
Danish Krone	1,340	1,087
Euro	15,845	12,097
Hong Kong Dollar	1,448	680
Israeli Shekel	1,150	327
Japanese Yen	11,426	10,543
New Zealand Dollar	-	105
Norwegian Krone	251	512
Singapore Dollar	2,479	1,506
Swedish Krona	3,230	2,558
Swiss Franc	4,780	3,751
US Dollar	176,043	107,891
<b>Total</b>	<b>229,875</b>	<b>148,650</b>

At 31 December 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £11,494,000 (2023: £7,433,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 December 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £11,809,000 (2023: £7,734,000).

# Notes to the Financial Statements

## Continued

### Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
<b>Leveraged instruments</b>				
Forward currency contracts	12,438	86	5,515	(42)
Futures	10,190	(326)	3,781	117
<b>Total market exposure</b>	<b>22,628</b>	<b>(240)</b>	<b>9,296</b>	<b>75</b>

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

### Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	(326)	810	-	484	0.20
	<b>(326)</b>	<b>810</b>	<b>-</b>	<b>484</b>	<b>0.20</b>

  

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
<b>Broker or exchange exposure</b>					
Bank of America Merrill Lynch	117	59	-	176	0.11
	<b>117</b>	<b>59</b>	<b>-</b>	<b>176</b>	<b>0.11</b>

### Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

# Notes to the Financial Statements

# Distribution Tables

For the year ended 31 December 2024 (in pence per share)

## Interim dividend distribution

Group 1 - shares purchased prior to 1 January 2024

Group 2 - shares purchased between 1 January 2024 and 30 June 2024

	Revenue	Equalisation	Distribution paid 30/08/24	Distribution paid 31/08/23
<b>A Accumulation</b>				
Group 1	1.7383	-	1.7383	1.5786
Group 2	0.9300	0.8083	1.7383	1.5786
<b>B Accumulation</b>				
Group 1	2.5973	-	2.5973	2.3511
Group 2	2.0118	0.5855	2.5973	2.3511
<b>N Accumulation</b>				
Group 1	0.0460	-	0.0460	-
Group 2	0.0460	-	0.0460	-
<b>X Accumulation</b>				
Group 1	1.8425	-	1.8425	1.6716
Group 2	1.5320	0.3105	1.8425	1.6716

## Final dividend distribution

Group 1 - shares purchased prior to 1 July 2024

Group 2 - shares purchased between 1 July 2024 and 31 December 2024

	Revenue	Equalisation	Distribution paid 28/02/25	Distribution paid 29/02/24
<b>A Accumulation</b>				
Group 1	1.2691	-	1.2691	1.1507
Group 2	0.4992	0.7699	1.2691	1.1507
<b>B Accumulation</b>				
Group 1	1.9224	-	1.9224	1.7341
Group 2	0.9437	0.9787	1.9224	1.7341
<b>N Accumulation</b>				
Group 1	0.7294	-	0.7294	-
Group 2	0.2832	0.4462	0.7294	-
<b>X Accumulation</b>				
Group 1	1.4187	-	1.4187	1.2757
Group 2	0.5784	0.8403	1.4187	1.2757

## Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

# abrdn UK Equity Index Managed Fund (closed)

For the year ended 31 December 2024

abrdn UK Equity Index Managed Fund is no longer open to investors, having redeemed all shares on 19 April 2023. It is the intention of the ACD to terminate the fund at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund have not been prepared on a going concern basis. At the time of the share cancellation, all realisable securities were sold. Some securities which were not immediately realisable due to being delisted, continue to be held at the current balance sheet date. Should an opportunity to sell these securities for value arise, they will be sold, otherwise abrdn will, in conjunction with the Depositary, pursue any possible residual value from such securities until all such opportunities have been reasonably exhausted.

# Comparative Tables

<b>A Accumulation<sup>A</sup></b>	<b>2023</b>	<b>2022</b>
	<b>pence per share</b>	<b>pence per share</b>
<b>Change in net assets per share</b>		
Opening net asset value per share	245.50	232.42

### 4 Taxation

	2024 £'000	2023 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	(97)	141
<b>Total taxation (note 4b)</b>	<b>(97)</b>	<b>141</b>

#### (b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

<b>Net revenue before taxation</b>	<b>1</b>	<b>568</b>
Corporation tax at 20% (2023: 20%)	-	114
Effects of:		
Revenue not subject to taxation	-	(119)
Overseas taxes	(97)	141
Excess allowable expenses	-	5
<b>Total tax charge for year (note 4a)</b>	<b>(97)</b>	<b>141</b>

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

#### (c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £7,448,000 (2023: £7,448,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

### 5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Add: Income deducted on cancellation of shares	-	527
Deduct: Income received on issue of shares	-	(1)
<b>Total distributions for the year</b>	<b>-</b>	<b>526</b>

#### Movement between net revenue and distributions

Net revenue after taxation	98	427
Undistributed revenue brought forward	(99)	-
Shortfall transfer from capital to revenue	1	-
Undistributed revenue carried forward	-	99
<b>Total distributions for the year</b>	<b>-</b>	<b>526</b>

Overseas withholding tax recoverable	42	112
<b>Total debtors</b>	<b>42</b>	<b>112</b>

### 7 Liquidity

	2024 £'000	2023 £'000
<b>Cash and bank balances</b>		
Cash at bank	44	320
	<b>44</b>	<b>320</b>
<b>Net liquidity</b>	<b>44</b>	<b>320</b>

### 8 Creditors

	2024 £'000	2023 £'000
Amounts payable on termination	86	432
<b>Total creditors</b>	<b>86</b>	<b>432</b>

### 9 Capital Commitments and Contingent Assets/Liabilities

On 31 December 2024, the fund had no capital commitments (2023: £Nil) and no contingent assets/liabilities (2023: £Nil).

### 10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

### 12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### **Foreign currency risk**

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

#### **Interest rate risk**

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### **Other price risk**

The fund's investment portfolio has been disposed of, and as such it is not exposed to market price fluctuations.

#### **Financial derivatives instrument risk**

The fund had no exposure to derivatives as at 31 December 2024 (2023: £Nil).

#### **Liquidity risk**

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £86,000 (2023: £432,000).

# Securities Financing Transactions Disclosure (unaudited)

The fund's engage in Securities Financing Transactions (SFTs) (as defined in Article 3 of Regulation (EU) 2015/2365, SFTs include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, Total Return Swaps (TRS) and margin lending transactions). In accordance with Article 13 of the Regulation, the fund's involvement in and exposures related to securities lending at the year end are detailed below:

## Global aggregate data

All transactions take place under English law with a UK representative of the counterparty. All contracts can be exited at value on the same day and all collateral can be returned within 24 hours to protect the portfolio values. The registration of the counterparty is therefore within the UK for the purposes of the transaction. The tenor values are same day or 24 hours for the purposes of the transactions. TRS can be arranged to circumvent the SFT regulations, they have not been used in this way and are disclosed for completeness however do not in this capacity have the characteristics of an SFT.

### Data on reuse of collateral

Non-cash collateral will not be sold, re-invested or pledged. There are no investment returns therefore associated with the securities held as collateral.

Cash collateral will only be: Placed on deposit; Invested in high-quality government bonds; Used for the purpose of reverse repo transactions with credit institutions that are subject to prudential supervision (and on terms that permit the Manager to recall at any time the full amount of cash on an accrued basis); or Invested in short-term money market funds (as defined for the purposes by the European Securities and Markets Authority ("ESMA")).

The returns earned by the Fund from the reinvestment of cash collateral in money market funds during the year are disclosed below.

Money Market Fund	Return %
abrdr Liquidity Fund (Lux) – Euro Fund	3.24
abrdr Liquidity Fund (Lux) – Sterling Fund	4.87

### Safekeeping of collateral

Collateral is received under a title transfer arrangement and collateral received must be held by or on behalf of the Depository. Collateral is held in an account belonging to the fund with only assets belonging to the fund in this account.

Collateral is posted to a Central Counterparty Clearing House or broker in a segregated account for the fund. Where collateral is exchanged bilaterally a recall position on the assets is retained.

## Remuneration Policy

The Aberdeen Group plc Remuneration Policy (the "**Policy**") applies with effect from 1 January 2024. The purpose of the Policy is to document clearly the remuneration policies, practices and procedures of Aberdeen as approved by the Aberdeen Group plc Remuneration Committee (the "**Committee**"). The Policy is available on request.

The Policy applies to employees of the Aberdeen group of companies ("**Group**" or "**Aberdeen**"), including UCITS V Management Companies ("**ManCos**") and the UCITS V funds that the ManCo manages.

## Remuneration Principles

Aberdeen applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients / customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.
- Total remuneration delivered is affordable for the Group.

## Remuneration Framework

Employee remuneration is composed of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate; and Benefits (including pension).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced; and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow Aberdeen to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and / or Group performance does not support such an award.

## Continued

<b>Base salary</b>	Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.
<b>Benefits (including retirement benefit where appropriate)</b>	<p>Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements.</p> <p>Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.</p>
<b>Annual Performance Bonus Awards</b>	<p>Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.</p> <p>Annual bonuses are based upon Group, Business, Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors, incorporating consideration of all risk categories, including sustainability risks* (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.</p> <p>abrdn Fund Managers Limited has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process.</p> <p>The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision / team is determined on a discretionary basis by the business / function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.</p> <p>Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).</p>
<b>Other elements of remuneration – selected employees</b>	<p>The following remuneration arrangements may be awarded in certain very limited circumstances:</p> <p><b>Carried Interest Plans</b> – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group.</p> <p><b>Buy-Out Awards / Guaranteed Bonuses</b> – These are intended to facilitate / support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.</p> <p><b>Retention and Special Performance Awards / LTIP</b> – Supports retention and / or the delivery of specific performance outcomes and / or to incentivise senior employees to support the long-term, sustained performance of Aberdeen. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and / or performance outcomes. Retention and / or special performance awards comply with all relevant regulatory requirements.</p> <p><b>Severance Pay</b> – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee's remuneration is governed, as appropriate, by relevant plan or scheme rules.</p>

\*According to SFDR, sustainability risk means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

## Continued

### Control Functions

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

### Conflicts of interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

### Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

### UCITS V Identified Staff / MRTs

The 'Identified Staff' or MRTs of abrdn Fund Managers Limited are those employees who could have a material impact on the risk profile of abrdn Fund Managers Limited or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

### Quantitative Remuneration Disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Fund Managers Limited to its entire staff; and
- Aggregate total remuneration paid by abrdn Fund Managers Limited to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from **1 January 2024 to 31 December 2024** inclusive.

	Headcount	Total Remuneration £'000
<b>abrdn Fund Managers Limited<sup>1</sup></b>	<b>1,011</b>	<b>143,746</b>
of which		
Fixed remuneration		108,512
Variable remuneration		35,234
<b>abrdn Fund Managers Limited 'Identified Staff'<sup>2</sup></b>	<b>98</b>	<b>45,049</b>
of which		
Senior Management <sup>3</sup>	40	28,552
Other 'Identified Staff'	58	16,497

<sup>1</sup> As there are a number of individuals indirectly and directly employed by abrdn Fund Managers Limited this figure represents an apportioned amount of Aberdeen's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis.

<sup>2</sup> The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

<sup>3</sup> Senior Management are defined in this table as ManCo Directors and members of the Aberdeen Group plc Board, together with its Executive and Group Operating Committees, Investment Executive members and the Chief Product and Marketing Officer.

# Further Information

## Constitution

abrdrn OEIC IV was incorporated on 6 June 2003, under the FCA Regulations. The Company is an open-ended investment company (OEIC) with variable capital under regulation 14 (authorisation) of the OEIC Regulations.

Consumers' rights and protections, including any derived from EU legislation, are currently unaffected by the result of the UK referendum to leave the European Union and will remain unchanged unless and until the UK Government changes the applicable legislation.

## Documentation and Prices

Copies of the current Prospectus and Key Investor Information Documents (KIIDs) for the abrdrn OEIC IV, daily prices, together with the latest Annual (and if issued later the interim) Report and Accounts for any fund, are available to download at [abrdrn.com](http://abrdrn.com). A paper copy of the Report and Accounts is available on request from the ACD.

## Notices/Correspondence

Please send any notices to abrdrn Fund Managers Limited, PO Box 12233, Chelmsford, CM99 2EE.

Any notice to the ACD will only be effective when actually received by the ACD. All notices will be sent to the investor at the address set out in the application form or the latest address which the investor has notified to the ACD, and will be deemed to have been received three days after posting. Events detailed in these terms and conditions will be carried out on the dates specified, unless the dates are a non-business day, when they will be carried out on the next business day.

## Complaints and Compensation

If you need to complain about any aspect of our service, you should write to the Complaints Team, abrdrn, PO Box 12233, Chelmsford CM99 2EE, who will initiate our formal complaints procedure. If you prefer, you may call the Complaints Team on 0345 113 6966 or email [complaints@abrdrn.com](mailto:complaints@abrdrn.com) in the first instance.

Alternatively if you have a complaint about the Company or funds you can contact the Depositary directly.

A leaflet detailing our complaints procedure is available on request. We will endeavour to respond to your complaint as soon as possible and will notify you of our outcome within 8 weeks. If the complaint is not resolved by us to your satisfaction then you may have the right to take your complaint to the Financial Ombudsman Service (FOS). To contact the FOS Service you should write to The Financial Ombudsman Service, Exchange Tower, London, E14 9SR, email [complaint.info@financial-ombudsman.org.uk](mailto:complaint.info@financial-ombudsman.org.uk) or telephone 0800 023 4567 (free for landlines and mobiles) or 0300 123 9123 (calls cost no more than calls to 01 and 02 numbers) or +44 20 7964 0500 (available from outside the UK – calls will be charged).

We are covered by the Financial Services Compensation Scheme, which means if we become insolvent, you may be entitled to compensation. The level of compensation will depend on the type of business and the circumstances of your claim. Investments are covered up to £85,000 for claims against firms that fail on or after 1 April 2019. Details are available from the FSCS Helpline on 0800 678 1100 or 020 7741 4100 and on the FSCS website: [www.fscs.org.uk](http://www.fscs.org.uk).

## UCITS

The funds were certified under the Undertaking for Collective Investment in Transferable Securities (UCITS) directive, which allows the ACD to market the funds in member States of the European Union subject to relevant local laws, specifically marketing laws.
