Company Information

Company Information

Columbia Threadneedle Fund Management Limited, the Authorised Corporate Director (ACD) of the Open-Ended Investment Company (OEIC), is the sole director. The ACD has appointed Columbia Threadneedle Management Limited as the Investment Manager to the individual sub-funds of the OEIC.

Columbia Threadneedle (UK) ICVC I (the 'Company') is an investment company with variable capital under the Open-Ended Investment Company Regulations 2001 (SI2001/1228). The Company is an umbrella company with 10 individual sub-funds, and each of the sub-funds is a UCITS scheme.

Effective 4 July 2022, the Authorised Corporate Director of the Company has changed from BMO Fund Management Limited to Columbia Threadneedle Fund Management Limited.

Effective 4 July 2022, the Investment Manager of the Company has changed from BMO Asset Management Limited to Columbia Threadneedle Management Limited.

Financial Statements

These financial statements are for the period 1 May 2022 to 31 October 2022.

Shareholders

Shares of the Company have no par value and the share capital of the Company will at all times equal the sum of the net asset value of each of the sub-funds. Shareholders are not liable for the debts of the Company. The assets of each sub-fund are treated as separate from those of every other sub-fund and are invested in accordance with the investment objectives and policy of that sub-fund.

Each sub-fund is a segregated portfolio of assets and, accordingly, the assets of a sub-fund belong exclusively to that sub-fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company or any other sub-fund and shall not be available for any such purpose.

The Company adopted segregated liability status for sub-funds on 8 June 2012. From that date the assets of one sub-fund may not be used to satisfy the obligations of another sub-fund.

While the provisions of the OEIC Regulations provide for segregated liability between sub-funds, the concept of segregated liability is relatively new. Accordingly, where claims are brought by local creditors in foreign courts or under foreign law contracts, it is not yet known how those foreign courts will react to regulations 11A and 11B of the OEIC Regulations.

Instrument of Incorporation and Prospectus

The Company was incorporated and authorised by the Financial Conduct Authority on 29 June 1999 under registered number IC36.

As at 31 October 2022 the OEIC comprised the following sub-funds:

- CT Enhanced Income UK Equity Fund
- CT FTSE All-Share Tracker Fund
- CT Multi-Sector Bond Fund
- CT Multi-Sector Higher Income Bond Fund
- CT North American Equity Fund
- CT Select European Equity Fund
- CT Select UK Equity Fund
- CT Select UK Equity Income Fund
- CT Sustainable Opportunities Global Equity Fund
- CT UK Mid-Cap Fund

Additional sub-funds may be added at the ACD's discretion.

The investment objectives, investment policies and investment activity reports, for each sub-fund are included in the financial statements for that sub-fund.

Copies of the current prospectus, the latest annual report and any subsequent reports are available from the Administrator.

Company Information (continued)

Other Information

The CT Select UK Equity Fund, CT Sustainable Opportunities Global Equity Fund and CT UK Mid-Cap Fund offer only accumulation shares. The CT Enhanced Income UK Equity Fund, CT Multi-Sector Bond Fund and CT Multi-Sector Higher Income Bond Fund offer only income shares. The CT FTSE All-Share Tracker Fund, CT North American Equity Fund, CT Select European Equity Fund and CT Select UK Equity Income Fund offer both accumulation and income shares.

The Operating charges figure for each share class can be found in the sub-fund's Comparative Tables.

Following the FCA approval, termination of the CT Enhanced Income UK Equity Fund commenced at 12 noon on 22 September 2022 and termination of CT UK Mid-Cap Fund commenced at 12 noon on 8 November 2022.

There were no cross holdings between sub-funds in Columbia Threadneedle (UK) ICVC I as at 31 October 2022.

Sub-funds and Company Name

Certification of Financial Statements by Directors of the Authorised Corporate Director

This report contains the information required by the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued in May 2014, the Open-Ended Investment Companies Regulations 2001 and the Collective Investment Schemes sourcebook, in the case of interim financial statements and was approved for publication on 22 December 2022.

Director
On behalf of Columbia Threadneedle Fund Management Limited
Authorised Corporate Director
22 December 2022

Notes to the Financial Statements applicable to all sub-funds

Accounting Policies

The interim financial statements for each sub-fund have been prepared on the same basis as the audited financial statements for the year ended 30 April 2022. They are in accordance with the historical cost basis, as modified by the revaluation of investments, and the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Management Association (IMA) in May 2014 (the IMA SORP 2014), and United Kingdom Generally Accepted Accounting Practice.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aimed to provide an enhanced income return (being at least a 2% additional income yield against the FTSE 100 Index in normal market conditions, net of fees) together with some capital growth, on an annualised basis.

Capital in the Fund was at risk. There was no guarantee that the income target would be achieved over this or any time period.

The Fund combined a passive exposure to the FTSE 100 Index together with an actively managed derivatives strategy which was intended to provide extra income for the Fund.

The Fund implemented the equity element of the strategy by investing at least 95% of the Fund's assets in shares that were included in the FTSE 100 Index.

The Investment Manager aimed to replicate the performance of the Index by holding shares of all companies included in the Index in a similar proportion to their weighting in the Index.

Substantially all of the shares held were UK equities (being shares of companies that are domiciled, incorporated or exercise a significant part of their business in the UK). The Fund may have also held a small proportion of non-UK equities in order to replicate the composition of the FTSE 100.

Where full replication of the Index was not reasonably possible (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Fund would held an optimised portfolio to track the returns of the Index. This means that the Investment Manager would purchase the components of the Index that the Investment Manager believed provide a representative sample in order to replicate the overall performance of the Index. Consequently, the Fund may have over certain periods only held a certain sub-set of the Index.

At the same time, the Investment Manager operated an active derivatives strategy by selectively writing short dated call options over the Index or over individual securities with the aim of generating additional income for the Fund through the receipt of option premiums.

An index call option was a derivative instrument which gave the holder the right to receive the value of the underlying index (in this case, the Index) from the option writer (in this case, the Fund) in exchange for an agreed price on or by an agreed date in the future.

The call option strategy would be subject to the following parameters under normal market circumstances: (i) the Fund would write call options in respect of up to 60% of the value of the equity securities which it held; (ii) the call options would be valid for up to three months; and (iii) the strike price of the call options would always be above the current market price at the inception of trade for the Index. Applying those parameters, the Investment Manager would select call option investments based on its estimate of the levels of volatility in UK equity markets, the value of the underlying equity securities and market risks.

The Fund may have invested any cash that it received as a result of its call option strategy in index futures in respect of the Index, to seek to replicate the performance of the Index and to minimise the adverse impact which holding cash may have had on the Fund's performance.

The Fund may have also held deposits, commercial paper and short term commercial paper and invest in other regulated, open-ended collective investment schemes (including collective investment schemes operated by the ACD). The Fund may have also used derivatives for the purposes of efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 6 July 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Christopher Childs
Fund size £0.0 million
Launch date 17 December 2020

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Manager's Review

The UK equity market fell over the period. The negative trend was often concealed by the high short-term volatility of the index during this period. August witnessed a reversal of the third equity market rally of the period, with the index losing 4.7% over the month. Cyclical and growth sectors were generally hard hit, and only healthcare providers posted positive sector returns over the six months. The UK economy unexpectedly expanded by 0.2% in the second quarter of 2022, above the estimated 0.1% contraction, led by increased household consumption and a narrowing trade deficit. The Bank of England hiked interest rates four times between May and September, citing the threat of accelerating inflation, which lifted the UK base rate to 2.25% by the end of the period. UK inflation edged unexpectedly lower to 9.9% in August after a 40-year high of 10.1 % in July. The most significant downward contribution was seen in motor fuel prices. As in most developed countries, consumer confidence has plunged in the face of soaring inflation, falling real incomes and the war in Ukraine, with September witnessing a record low of -49 in the GfK index.

The Fund pursues a call overwriting strategy using exchange-traded FTSE 100 index calls. Each month the Fund "writes" call options that are above the prevailing market level and which have a maturity of between one and three months. The premium received for writing the calls is then able to be distributed to Fund holders as part of the Fund's distribution policy. The Fund seeks to make distributions through the year that in aggregate equate to the natural dividend yield of the FTSE 100 plus 2-4%.

We see some of the negative factors of 2022 abating for the UK equity market as we move into the new year. Supply issues are easing, while rates and inflation are likely to peak shortly, which means we should be able to have a more certain outlook and that the market can move forward. The economic outlook does remain cloudy but that does not mean the market cannot make progress and it will anticipate the recovery in advance of firm evidence in earnings.

Performance Summary

The CT Enhanced Income UK Equity Fund returned -2.4% over the period to 22 September 2022, when the Fund commenced termination. By comparison, the FTSE 100 Index returned -3.6%. All figures are net of fees, in sterling terms and on a total return basis.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to tracks the performance of the FTSE All-Share Index.

The Fund will invest at least 90% in shares that are included in the FTSE All-Share Index. The Fund is constrained by the Index and will hold an optimised portfolio to track the returns of the Index. This means that the investment manager will purchase the components of the Index that the investment manager believes provide a representative sample in order to replicate the overall performance of the Index.

To the extent that the Fund is not fully invested in shares which are included in the Index, the Fund may be invested in shares of companies which in the investment manager's opinion are reasonably expected to become part of the Index.

The Fund may also obtain an indirect exposure to these shares by investing in other transferable securities or collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments) as well as investing in cash and near cash, deposits and money market instruments.

The Fund may use derivatives only for the purposes of efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Christopher Childs
Fund size £320.7 million
Launch date 15 September 1988

Manager's Review

The UK equity market fell over the six-month period. The negative trend was concealed by the high short-term volatility of the index during this period. However, shares rallied in October on the back of investor optimism after the U-turn in UK government policy following its self-inflicted crisis. There were also hopes that the new earnings season might not be as bad as feared. Most sectors made positive returns in October, led by industrial materials; only beverages and precious metals and mining made losses. The UK economy contracted by 0.3% month-on-month in August, as manufacturing and services activity declined; further contractions were expected throughout the third quarter. The Bank of England hiked interest rates four times between May and October, citing the threat of accelerating inflation, which lifted the UK base rate to 2.25% by the end of the period, with further rises expected in November. UK inflation edged up to 10.1% in September, returning to the 40-year high of 10.1% reached in July. The most significant contribution was in food prices, specifically edible oils, fats, and dairy. Perhaps unexpectedly, consumer confidence, measured by the GfK index, rose slightly to -47 in October, despite the cost-of-living crisis and economic and political uncertainty.

The strategy remained focused on offering investors access to the fortunes of the UK stock market through a portfolio of investments designed to replicate the movements of the FTSE All-Share Index in a low cost and reliable manner.

The outlook for the UK is cloudy as capital markets and politicians navigate a frantic and uncertain period, exacerbated by a change in political leadership. The energy induced "cost of living" crisis continues, despite imposed energy price caps, with the Government's strategic approach being to grow its way out of this "crisis". Almost unprecedented levels of tax cuts, coupled with significant fiscal stimulus and a lack of funding clarity, other than through increased borrowing, led to capital market stability concerns and political uproar. Only intervention from the Bank of England consoled investors. In light of this, UK equity valuations, already at relatively depressed levels, continue to get cheaper with many companies now trading at single digit multiples of both earnings and cashflow. UK plc is effectively on sale!

Performance Summary

Over the six-month period the CT FTSE All-Share Tracker Fund returned -5.9%. By comparison, the FTSE All-Share TR returned -5.8%. All figures are in sterling, net of fees and on a total return basis.

Please note, Fund performance reflects its 12:00 pricing point whereas the benchmark (FTSE All-Share TR) performance is calculated to the close of trading at 4:30pm.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve an income return, with some capital growth.

The Fund invests primarily in a diversified multi-sector spread of fixed income investments (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a predetermined date). These may include investment grade and high yield bonds from multiple sectors including developed markets, emerging markets and asset-backed issues.

The bonds may be issued by companies or other entities including supra-nationals, sovereigns and governments. The issuers may be from anywhere in the world and issues may be denominated in any currency. Non-sterling exposure will normally be hedged back to sterling.

The investment manager selects the fixed income securities in which the Fund invests with the intention of achieving a wide degree of diversification across issuers and industries, and potentially across multiple investment sectors, while managing exposure to credit risk.

Investment grade bonds are considered by the investment manager to be those rated by independent ratings agencies such as S&P as BBB- or higher (or their equivalent), while high yield bonds are those with a rating of BB+ or lower (or their equivalent). For bonds which are not rated by an independent ratings agency the investment manager will apply a comparable quality rating to determine whether a corporate bond should be classified as investment grade or high yield.

To the extent that the Fund is not fully invested in bonds as indicated above, the Fund may also invest in other transferable securities, collective investment schemes (including those managed by Columbia Threadneedle Investments), deposits, cash, near cash, money market instruments and warrants.

The Fund may use derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) only for the purposes of efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 3, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Rebecca Seabrook
Fund size £32.4 million
Launch date 17 January 2000

Manager's Review

Both investment grade and high yield bond markets generated negative returns over the six months in review. The main driver was this sharp rise in global government bond yields over the same period on high inflation and tighter monetary policy, with the 10-year US Treasury yield increasing from 3.0% to 4.1%, a level not seen since July 2008. The US Federal Reserve (Fed) made significant rate hikes of 75 basis points (bp) in both July and September, raising policy rates by a total of 2.75% over the six months to 3.25%. The Treasury yield curve remained inverted at the end of the period, which supported expectations that recession remains likely. As a consequence, the period saw credit spreads widen. What was unusual in this sell off was that it was largely government bond driven, so while in the face of recession, we would normally expect weaker rated credits to underperform, in fact there was limited dispersion between the returns of ratings categories. In fact, on a year-to-date basis, investment grade credit has underperformed high yield on total return basis. Corporate bond issuance activity slowed during 2022 because of the war in Ukraine, the bond market selloff, and associated investor risk aversion.

Activity

New issuance in the six-month period to the end of October was limited in both the investment grade and high yield markets. We did participate in a few bank deals, including one for Bank of Ireland in sterling, Credit Suisse in dollars and Deutsche Bank in euros. Also, we participated in a dollar high yield deal for Frontier Communications, a wirelines business in the US, a business on which we have a positive fundamental view and we assessed the relative value as attractive. In secondary trading, we trimmed some more our more cyclical holdings where we didn't see enough risk / reward, in issuers such as Carnival Cruises, Asda and Victoria Carpets. We also opened new positions in certain names such as Mahle, a German auto parts name, on which we have a positive fundamental view.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Outlook

The outlook for credit assets remains mixed. We remain in a highly volatile period as central banks continue to grapple with inflation by raising interest rates, resulting in consumers and businesses facing the increasing risk of a hard landing from rising bond yields. However, credit valuations are now looking cheap relative to longer-term averages, and periods of heightened volatility and challenged liquidity could represent good buying opportunities for investors. Nonetheless, we believe these higher yields will add pressure to credit fundamentals at a time when central banks globally are looking to reduce their holdings of fixed-income securities. The primary market has virtually closed for lower credit grade issuers, given increased levels of uncertainty and volatile rates, which have increased liquidity risks. Supporting the market is the previous strengthening of balance sheets, so we expect the default rate to remain low by comparison with previous recessionary periods, though this will still entail significant casualties. Against this uncertain backdrop, credit selection will continue to be of paramount importance.

Performance Summary

The CT Multi-Sector Bond Fund returned -6.5% over the six-month period. By comparison, the IA £ Strategic Bond sector returned -7.9% (median). All figures are in sterling terms, net of fees and on a total return basis.

Overall, our relatively conservative positioning boosted our performance relative to peers.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve an income return, with some capital growth.

The Fund invests primarily in a diversified multi-sector spread of high yield investments (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a predetermined date). These may include high yield bonds from multiple sectors including developed markets, emerging markets and asset-backed issues. The bonds may be issued by companies or other entities including supranationals, sovereigns and governments. The issuers may be from anywhere in the world and issues may be denominated in any currency. Non-sterling exposure will normally be hedged back to sterling.

The investment manager selects the high yield bonds in which the Fund invests with the intention of achieving a wide degree of diversification across issuers and industries, and potentially across multiple investment sectors, while managing exposure to credit risk.

High yield bonds are considered by the investment manager to be either those rated by independent ratings agencies such as S&P as BB+ or lower (or their equivalent) or those which are not rated by an independent ratings agency but which the investment manager believes to be of comparable quality.

To the extent that the Fund is not fully invested in high yield bonds, the Fund may also invest in other transferable securities (including investment grade bonds), collective investment schemes (including those managed by Columbia Threadneedle Investments), deposits, cash, near cash, money market instruments and warrants.

The Fund may use derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) only for the purposes of efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 4, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Abigail Mardlin
Fund size £22.0 million
Launch date 20 November 2000

Manager's Review

Both investment grade and high yield bond markets generated negative returns over the six months in review. The main driver was this sharp rise in global government bond yields over the same period on high inflation and tighter monetary policy, with the 10-year US Treasury yield increasing from 3.0% to 4.1%, a level not seen since July 2008. The US Federal Reserve (Fed) made significant rate hikes of 75 basis points (bp) in both July and September, raising policy rates by a total of 2.75% over the six months to 3.25%. The Treasury yield curve remained inverted at the end of the period, which supported expectations that recession remains likely. As a consequence, the period saw credit spreads widen. What was unusual in this sell off was that it was largely government bond driven so while in the face of recession, we would normally expect weaker rated credits to underperform, in fact there was limited dispersion between the returns of ratings categories. Corporate bond issuance activity slowed during 2022 because of the war in Ukraine, the bond market selloff, and associated investor risk aversion.

Activity

New issuance in the six-month period to the end of October was limited; US high yield issuance is down approximately 75% year-to-date. That said, we did participate in select opportunities that came to market such as a new issue from Cirsa, a diversified gaming company predominantly in South America. Also, we participated in a euro new deal for 888 acquisitions which is also a gaming name but predominantly online; it came with a steep discount to yield in excess of 12% which we viewed as good value for the risk. At the other end of the risk spectrum, we participated in a new dollar deal for Norton, a company which provides consumer cyber security solutions. In secondary trading, we trimmed some more our more cyclical holdings where we didn't see enough risk / reward, in issuers such as Carnival Cruises and Victoria Carpets.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Outlook

The outlook for credit assets remains mixed. We remain in a highly volatile period as central banks continue to grapple with inflation by raising interest rates, resulting in consumers and businesses facing the increasing risk of a hard landing from rising bond yields. However, credit valuations are now looking cheap relative to longer-term averages, and periods of heightened volatility and challenged liquidity could represent good buying opportunities for investors. Nonetheless, we believe these higher yields will add pressure to credit fundamentals at a time when central banks globally are looking to reduce their holdings of fixed-income securities. The primary market has virtually closed for lower credit grade issuers, given increased levels of uncertainty and volatile rates, which have increased liquidity risks. Supporting the market is the previous strengthening of balance sheets, so we expect the default rate to remain low by comparison with previous recessionary periods, though this will still entail significant casualties. Against this uncertain backdrop, credit selection will continue to be of paramount importance.

Performance Summary

The CT Multi-Sector Higher Income Bond Fund returned -5.1% (share class C Inc) over the six-month period, versus the IA GBP High Yield Median return of -7.7%. Performance is net of fees and in sterling terms.

The Fund's performance was boosted against its peer group by our relatively cautious positioning. We were also boosted by our holdings in names which transitioned to investment grade, such as Centene. Positions in Energy did well.

Columbia Threadneedle Fund Management Limited 8 December 2022

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve capital growth, with some income, over the long term (at least 5 years).

The Fund invests at least 80% in shares of North American companies. North American companies are: companies which are listed, quoted or traded in the US or Canada; or companies which have their headquarters in the US or Canada; or companies which have a significant part of their activities in the US or Canada but which are quoted on a regulated market outside of the US or Canada.

The Fund may be invested, at the investment manager's discretion, in any combination of US and/or Canadian shares at any one time and in any industry sector.

To the extent that the Fund is not fully invested in shares of North American companies, the Fund may also invest in other transferable securities, collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments), deposits, cash, near cash, money market instruments and warrants.

The Fund may use derivatives for efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Manager's Review

The US stock market delivered a modest positive return over the six months. As with other indices, better-than-expected second-quarter earnings temporarily lifted investor confidence in July. However, macroeconomic factors and supply chain constraints negatively impacted the revenues of software and technology stocks which weighed on the index in August. Moreover, fears that the Federal Reserve would continue to hike interest rates for longer than anticipated worried investors through September. However, investor confidence increased in October on hopes the Fed would temper its aggressive hikes. The Fed made a 50 basis point (bp) rate increase in May, followed by two jumbo rate hikes in July and September of 75 bp each, bringing the Federal Funds rate to 3.25%. Headline CPI inflation eased for four straight months to 7.7% in October from its 9.1% peak in June (compared with 8.6% in May), with smaller increases reported for gasoline and electricity. Slowing inflation increased consumer confidence, with the Michigan consumer sentiment index expectations in October rising modestly to 59.9 from 58.6 in August, although inflation uncertainty remained. Third-quarter US economic growth expanded by 1.8%, but concerns were raised that the expansion was due to fluctuations in factors such as international trade that don't reflect the health of the US economy.

The CT North American Equity Fund is managed using a purely systematic approach, seeking exposure to our customised and unique 'True ERP' (Equity Risk Premia) factor. With this model, we aim to identify attractively valued, growing companies with good quality financial statements. We use our 'True Styles' methodology to capture the essence of the style and construct the portfolios through our proprietary construction tool. During the period, the portfolio was rebalanced a number of times in accordance with our disciplined process.

Sentiment towards US equities remains extremely bearish, with markets discounting further earnings downgrades resulting in valuations becoming more attractive. The Federal Reserve is trying to convince markets that a more aggressive monetary policy is needed to bring inflation back under control from the highest levels since 1981. However, this only heightens fears that further interest rate hikes will tip the US economy into recession. As a result, sentiment towards equities is very fragile, although there is some hope that recent market weakness already discounts at least some of the earnings downgrades we are likely to get in the coming weeks. The key question remains whether current valuations are already appropriate for the stage of the cycle we are in or whether there is more pain to come.

Performance Summary

Over the six-month period the CT North American Equity Fund returned 0.1%. By comparison, the FTSE North America TR GDP returned 2.5%. All figures are in sterling, net of fees and on a total return basis. Please note, Fund performance reflects its 12:00 pricing point whereas the benchmark (FTSE North America TR GDP) performance is calculated to the close of trading that day.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve capital growth, with some income over the medium to long term (at least 3-5 years).

The Fund invests at least 80% in shares of European companies.

These are companies which are listed, quoted or traded in European (which, in the context of the Fund's primary investment excludes the UK) markets or which have their headquarters or a significant part of their activities in European markets but which are quoted on a regulated market outside of Europe.

The Fund invests in companies of any market capitalisation in any European market.

The Fund may be invested in any industry sector and in any European country.

To the extent that the Fund is not fully invested in shares of European companies, the Fund may also invest in other transferable securities (including shares of UK companies), collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments), money markets instruments, deposits, warrants and cash and near cash.

The Fund may use derivatives for investment purposes as well as for efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 6 July 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager Philip Webster
Fund size £195.4 million
Launch date 9 November 1988

Manager's Review

European stock markets delivered a negative return in the six-month period. Sentiment toward European stocks was hit by slowing growth and high inflation as oil, and especially natural gas prices, rose in euro terms, raising concerns that Europe could experience stagflation. In contrast, July was a more robust month as stock market investors appeared buoyed by higher-than-expected corporate earnings and concerns were eased over a potential energy supply crunch. However, this did not last, and stocks fell through August and September. October, however, was bullish as confidence increased on expectations that central banks would at least slow the pace of monetary policy tightening. The European Central Bank (ECB) hiked interest rates three times over the six months, from 0% to 2.0% overall, as concerns of high inflation continued to outweigh fears of slowing growth. The Fed also incrementally hiked rates from 0.25% in May to 3.25% by the end of October. Official estimates put eurozone inflation provisionally at 10.7% in October, a record high, up from 8.1% in May, driven first and foremost by surging energy prices, but rising food costs were also a factor. The eurozone economy grew 0.2% quarter on quarter over the three months until September 2022, the weakest GDP growth since the Covid regulations were lifted in June 2021; a contraction was expected for the fourth quarter. Unsurprisingly, given high inflation, a potential recession and the war in Ukraine, consumer confidence has plunged to record lows (a similar phenomenon has been observable in most developed economies). Business confidence also weakened in the latter part of the period, with the Business Climate Indicator (BCI) dropping month-on-month from June onwards, attributed to the unabating downturn in manufacturing, slowing service sector growth and deepening energy crisis.

We initiated a new position in Partners Group, the private equity group, post a sharp pullback in the valuation. We will likely see investment flows weaken given current market conditions, but the underlying business is very strong and will deliver solid performance fees once the market reopens. We also introduced a holding of Adyen, the global online payment provider, after a profit warning. The valuation has come back to reasonable levels and is pricing in a much slower growth in the future, These purchases were funded by profit-taking on holdings like Compass, which was a sizeable position and had rerated dramatically versus the market and portfolio.

Energy-intensive European businesses, many dependent on Russian gas, are nervous about the winter ahead. Our predominant focus on world-leading businesses, limits exposure to those with high energy needs and provides sound investment opportunities at a time when negativity on Europe is consensual. We are dedicated to investing in sustainable businesses with strong balance sheets and wide economic moats that provide resilience through business cycles. Valuations are becoming increasingly attractive and with several many quality growth companies remaining out of favour as interest rates rise, we seek opportunities over the coming months.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Performance Summary

The CT Select European Equity Fund returned -6.0% over the six months, whilst the benchmark, FTSE All-World Developed Europe ex-UK index, returned -5.2%. Returns are net of fees, in sterling terms and on a total return basis.

The portfolio underperformed modestly during the period. Styles dominated performance once again with Growth stocks performing well on the hope interest rates had peaked before under-performing as these hopes were dashed. Despite the style impact, stock specific impacts were the key driver of the underperformance. The largest individual detractor was Ubisoft, where the shares fell after the management did a deal with Tencent which cut out minority shareholders and strengthened the position of the Chairman/Founder. The deteriorating economic outlook hit ASML as the semi-conductor cycle began to slow. Given the capex related nature of their sales and the long-term demand for leading-edge chips they remain well placed with a multi-year orderbook. Sentiment has hit Ryanair with expectations of a post-Covid recovery hit by the consumer crunch which some expecting to a slowdown in Summer 2023 travel. On the positive side, our holding of Wolters Kluwer outperformed as investors were attracted by its very high level of recurring revenue which will allow it to be robust in a downturn. We also saw positive contribution from Compass Group, which continued to deliver very solid results so it is seen to be a defensive stock, and Deutsche Boerse, which benefitted from volatility in markets and commodities and rising interest rates.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve long term capital growth, with some income over the long term (at least 5 years).

The Fund invests at least 80% in shares of UK companies. These are companies in any economic sector that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK. Some companies may however have overseas earnings as part of their trading profits. The Fund may be invested in any industry sector.

The Fund invests in companies of any market capitalisation.

To the extent that the Fund is not fully invested in shares of UK companies, the Fund may also invest in other transferable securities, collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments), money markets instruments, deposits, warrants and cash and near cash.

The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Fund manager David Moss
Fund size £42.7 million
Launch date 24 April 1970

Manager's Review

The UK equity market fell over the six-month period. The negative trend was concealed by the high short-term volatility of the index during this period. However, shares rallied in October on the back of investor optimism after the U-turn in UK government policy following its self-inflicted crisis. There were also hopes that the new earnings season might not be as bad as feared. Most sectors made positive returns in October, led by industrial materials; only beverages and precious metals and mining made losses. The UK economy contracted by 0.3% month-on-month in August, as manufacturing and services activity declined; further contractions were expected throughout the third quarter. The Bank of England hiked interest rates four times between May and October, citing the threat of accelerating inflation, which lifted the UK base rate to 2.25% by the end of the period, with further rises expected in November. UK inflation edged up to 10.1% in September, returning to the 40-year high of 10.1% reached in July. The most significant contribution was in food prices, specifically edible oils, fats, and dairy. Perhaps unexpectedly, consumer confidence, measured by the GfK index, rose slightly to -47 in October, despite the cost-of-living crisis and economic and political uncertainty.

The de-rating witnessed in perceived 'quality' stocks provided attractive entry points to names that, for valuation reasons, have been difficult to justify before now. This allowed for the ongoing upgrade in terms of underlying business quality, for names held within the Fund. Against this background we initiated positions in Diploma and Howden in the portfolio. Both shares had de-rated as quality/growth sold-off, providing attractive entry points for what are proven, established businesses with track records for value creation. We then introduced holdings in both Games Workshop and Renishaw, both high quality business with established and proven business models. Both have seen a material de-rating of late, providing the opportunity to invest at more palatable levels and continue to move up the quality curve more broadly within the Fund. These businesses are market leaders in the respective niches, net cash balance sheets, high gross margins which in aggregation, should provide some support in a tougher economic backdrop. To fund these purchases we exited Lloyds, DCC and C&C, small, low-conviction positions, which no longer meet our benchmark for quality. We sold Vistry, while the business is fine, we own better quality, as attractively valued, cyclical and domestic consumer exposure. The holding of Brewin Dolphin was sold post the bid from RBC at a 60% premium.

The outlook for the UK is cloudy as capital markets and politicians navigate a frantic and uncertain period, exacerbated by a change in political leadership. The energy induced "cost of living" crisis continues, despite imposed energy price caps, with the Government's strategic approach being to grow its way out of this "crisis". Almost unprecedented levels of tax cuts, coupled with significant fiscal stimulus and a lack of funding clarity, other than through increased borrowing, led to capital market stability concerns and political uproar. Only intervention from the Bank of England consoled investors. In light of this, UK equity valuations, already at relatively depressed levels, continue to get cheaper with many companies now trading at single digit multiples of both earnings and cashflow. UK plc is effectively on sale!

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Performance Summary

The CT Select UK Equity Fund returned -5.5% over the six-month period. By comparison, the FTSE All-Share Index returned -5.8%. All figures are net of fees, in sterling terms and on a total return basis.

Pleasingly, the Fund modestly outperformed these weak markets, supporting the primary cornerstone of downside protection. While the largest individual contributor was on the back of a bid, with Euromoney Institutional Investor seeing a private equity bid at a 30% premium. Our holding in Beazley, the insurance group, outperformed the back of loss estimates unchanged despite claims ahead of expectations. Detractors included Intertek Group, whose premium rating eroded on growth concerns and oil exposure. Howden Joinery Group underperformed as a consumer exposed name, as did National Express Group, with rising energy prices also a concern.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve an income yield which is higher than that of the FTSE All-Share Index, net of fees and in normal market conditions, with some long-term (over 5 years) capital growth.

The Fund invests at least 80% in shares of UK companies. These are companies in any economic sector that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK. Some companies may however have overseas earnings as part of their trading profits.

The Fund may invest in any industry sector.

From time to time at the investment manager's discretion, the Fund may also obtain an indirect exposure to these shares by investing in other collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments).

To the extent that the Fund is not fully invested in shares of UK companies or collective investment schemes, the Fund may also invest in other transferable securities (including non-UK shares), money market instruments, warrants, cash and near cash. The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 17 June 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Manager's Review

The UK equity market fell over the six-month period. The negative trend was concealed by the high short-term volatility of the index during this period. However, shares rallied in October on the back of investor optimism after the U-turn in UK government policy following its self-inflicted crisis. There were also hopes that the new earnings season might not be as bad as feared. Most sectors made positive returns in October, led by industrial materials; only beverages and precious metals and mining made losses. The UK economy contracted by 0.3% month-on-month in August, as manufacturing and services activity declined; further contractions were expected throughout the third quarter. The Bank of England hiked interest rates four times between May and October, citing the threat of accelerating inflation, which lifted the UK base rate to 2.25% by the end of the period, with further rises expected in November. UK inflation edged up to 10.1% in September, returning to the 40-year high of 10.1% reached in July. The most significant contribution was in food prices, specifically edible oils, fats, and dairy. Perhaps unexpectedly, consumer confidence, measured by the GfK index, rose slightly to -47 in October, despite the cost-of-living crisis and economic and political uncertainty.

The strategy remained focused on providing investors with long-term capital growth and income from a portfolio of equities that generates an above-average dividend yield.

The outlook for the UK is cloudy as capital markets and politicians navigate an uncertain period where the energy induced "cost of living" crisis continues, despite imposed energy price caps. After a period of extreme turmoil during the period Liz Truss was Prime Minister, the change in UK leadership and subsequent policy U-turn has calmed markets and UK borrowing costs have fallen back. This has helped to ease some of the pressure on the UK consumer, but mortgage costs are still rising and this is already producing a weaker housing market. With house prices a big driver of consumer sentiment, this bodes poorly for consumption. The market is of course already aware of this and UK equity valuations, already at relatively depressed levels, continue to get cheaper with many companies now trading at single digit multiples of both earnings and cashflow. UK plc is effectively on sale!

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Performance Summary

The CT Select UK Equity Income Fund returned -8.1% during the six-month period whilst the benchmark (FTSE All-Share Index) returned -5.8%. All figures are net of fees, in sterling and on a total return basis.

The Fund underperformed during the period. An underweight position in oil stocks, such as Shell and BP, was negative as energy prices remained high due to the on-going Russo-Ukraine war. The largest individual detractor was Wizz Air, where expectations of a post-Covid recovery were hit by the consumer crunch causing a slowdown in Summer 2023 travel. We saw a positive contribution from Compass Group, which continued to deliver very solid results so it is seen to be a defensive stock, Positive contributions also came from avoiding many of the large cap underperformers, such as Anglo American, Segro and HSBC.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aims to achieve medium to long-term capital growth, with some income.

The Fund invests primarily in equities (ordinary shares) of companies which may be listed, quoted or traded anywhere in the world.

The Fund generally invests in large companies and on the world's main markets but may, at the investment manager's discretion, also invest in smaller or medium sized companies and on smaller markets.

At any one time, the scope of investment may be themed by geography or industry to take advantage of opportunities identified by the investment manager. In particular, the investment manager's approach will be based on positive, sustainable investment themes, including environmental, social and governance opportunities. However, the Fund is not limited to such themes and is not subject to negative screening or portfolio exclusions.

To the extent that the Fund is not fully invested in equities, the Fund may also invest in other transferable securities, collective investment schemes, money market instruments, warrants, cash and near cash. The Fund may use derivatives for the purposes of efficient portfolio management only.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Manager's Review

Global equity markets were slightly down over the period, with sterling weakness boosting the returns of overseas assets. During the period, stocks struggled against soaring inflation, with the Russia-Ukraine conflict adding to the upward pressures on commodity prices. Continued economic growth combined with premature hopes amongst investors that the peak in the interest rate hiking cycle was in sight, drove market rallies in June and again in the second half of July through to mid-August. Despite gaining ground during a volatile October due to renewed investor optimism that the Federal Reserve (Fed) would temper its aggressive rate hikes, equity markets were still down over six months. Global government bond yields rose sharply over the six months on high inflation and tighter monetary policy, with the 10-year US Treasury yield increasing from 3.0% to 4.1%, the highest level since July 2008. Moreover, the yield curve remained inverted at the end of the period, which supported expectations that recession remains likely. The Fed made significant rate hikes of 75 basis points (bp) in both July and September, raising policy rates by a total of 2.75% over the six months to end the period at 3.25%.

We added a new holding in US provider of data analytics to the construction and agricultural markets, Trimble, attracted by its focus on resource efficiency. Another new position was US pharmaceutical company, Eli Lilly, where we like the growth opportunities in its diabetes and Alzheimer's franchise. We also added to US software security business, NortonLifelock, as we added to business-to-business industrial tech companies and away from more consumer facing names. As rising governance issues weakened both the investment thesis and our confidence in the company, we sold US diagnostics business, Illumina. We also sold Belgian cathode materials provider, Umicore, where we see its target market expanding, but worry that this will see higher capital requirements and threat of greater competition.

We logged some key engagement milestones over the period, including welcoming the appointment by Hoya of a Chief Sustainability Officer who will develop and implement the group's overarching sustainability strategy across its global operations, products and supply chains. Keyence appointed an additional outside independent director to its board, which meets the minimum level of outside oversight we expect. Mettler-Toledo set new targets for sustainable packaging materials, after we have engaged on initiatives and targets to reduce waste and increase recycling. Shimadzu set a new Co2 Emission Reduction Target. We welcome this move by the company and are encouraged that it has set a new target of practically zero Co2 emissions by 2050.

Sentiment towards equities remains extremely bearish, with markets discounting further earnings downgrades, thus making valuations more attractive. Current monetary tightening around most of the globe to combat rising core inflation has coincided with several factors: an increase in long-dated gilt yields, continued US dollar strength, diminishing growth prospects in China, the ongoing gas crisis in Europe, and Japan's Ministry of Finance intervening to try and halt further currency depreciation. This is a reminder to investors that many obstacles need to be navigated as we wait for inflationary pressures and central bank monetary tightening to ease, explaining why the market is having a hard time making up its mind. As we enter the earnings season, expectations are lower, offering a degree of comfort, but market volatility is likely to continue in the short-term.

Authorised Corporate Director's Investment Report

(continued)

for the period 1 May 2022 to 31 October 2022 (unaudited)

Performance Summary

Over the six-month period the CT Sustainable Opportunities Global Equity Fund returned -2.4%. By comparison, the IA Global sector median returned -3.6%. All figures are in sterling, net of fees and on a total return basis.

The portfolio outperformed over the period. Stock selection was key with the largest contributor being Humana, the US managed-care organisation, which gained following results, with strength in its pharmacy business leading to a full year guidance upgrade. The US water infrastructure company, Xylem, benefited from its defensive end-market exposure in a slowing growth environment. Motorola Solutions outperformed as results beat expectations and guidance was raised. HDFC Bank benefitted from the recovery in the Indian economy, but also saw accelerating loan growth and market share gains. Detractors included Illumina, the US life science company, on a number of setbacks, including the surprise departure of its CFO. TSMC saw softening demand in key semi-conductor markets which could undermine planned price increases in 2023. SVB Financial Group underperformed on concerns around the health of its end-markets.

Authorised Corporate Director's Investment Report

for the period 1 May 2022 to 31 October 2022 (unaudited)

Fund Objective

The Fund aimed to achieve capital growth over the long term (at least 5 years).

The Fund invested at least 80% in medium sized UK companies. Medium sized companies were defined for the Fund as companies which, at the time of initial purchase, have a market capitalisation in the lower half of the FTSE 100 index or equivalent to companies listed in the FTSE Mid 250 ex-IT index. UK companies were those from any economic sector that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK.

From time to time at the investment manager's discretion, the Fund may also have invested in other UK companies or obtained an indirect exposure to UK companies by investing in other collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments).

To the extent that the Fund was not fully invested in shares or collective investment schemes, the Fund may also have invested in other transferable securities, money market instruments, warrants, cash and near cash.

The Fund may have used derivatives for investment purposes as well as for efficient portfolio management.

Synthetic Risk and Reward Indicator

The Synthetic Risk and Reward Indicator ("SRRI"), is calculated in accordance with the Key Investor Information Regulations and is disclosed in a fund's KIIDs (Key Investor Information Documents). It is calculated from the last five years' performance data and shows the historic volatility of the Fund and is updated periodically. The SRRI is reported against standard bands ranging from 1 (lower risk/reward) to 7 (higher risk/reward). This classification is intended as a general indication of the overall level of risk of a fund in order to facilitate comparisons between funds.

The most recent value of the SRRI for the Fund was 6, published on 26 August 2022. From the most recent review it has been determined that this is still appropriate.

A fuller explanation of the SRRI and the risk and reward profile of the Fund is contained in the Fund's KIIDs.

Manager's Review

The UK equity market fell over the six-month period. The negative trend was concealed by the high short-term volatility of the index during this period. However, shares rallied in October on the back of investor optimism after the U-turn in UK government policy following its self-inflicted crisis. There were also hopes that the new earnings season might not be as bad as feared. Most sectors made positive returns in October, led by industrial materials; only beverages and precious metals and mining made losses. The UK economy contracted by 0.3% month-on-month in August, as manufacturing and services activity declined; further contractions were expected throughout the third quarter. The Bank of England hiked interest rates four times between May and October, citing the threat of accelerating inflation, which lifted the UK base rate to 2.25% by the end of the period, with further rises expected in November. UK inflation edged up to 10.1% in September, returning to the 40-year high of 10.1% reached in July. The most significant contribution was in food prices, specifically edible oils, fats, and dairy. Perhaps unexpectedly, consumer confidence, measured by the GfK index, rose slightly to -47 in October, despite the cost-of-living crisis and economic and political uncertainty.

We initiated positions in both Diploma and Howden. Both names de-rated as quality/growth sold-off, providing attractive entry points for what are proven, established businesses with track records for value creation. We sold Brewin Dolphin post the bid from RBC at a 60% share price premium. The de-rating witnessed in perceived 'quality' stocks provided attractive entry points to names that, for valuation reasons, have been difficult to justify before now. This allowed for the ongoing upgrade in terms of underlying business quality, for names held within the Fund.

The outlook for the UK is cloudy as capital markets and politicians navigate a frantic and uncertain period, exacerbated by a change in political leadership. The energy induced "cost of living" crisis continues, despite imposed energy price caps, with the Government's strategic approach being to grow its way out of this "crisis". Almost unprecedented levels of tax cuts, coupled with significant fiscal stimulus and a lack of funding clarity, other than through increased borrowing, led to capital market stability concerns and political uproar. Only intervention from the Bank of England consoled investors. In light of this, UK equity valuations, already at relatively depressed levels, continue to get cheaper with many companies now trading at single digit multiples of both earnings and cashflow. UK plc is effectively on sale!

Performance Summary

The CT UK Mid-Cap Fund returned -6.0% over the six-month period whilst the benchmark, FTSE Mid-250 (ex-IT), returned -13.7%. All figures are net of fees, in sterling terms and on a total return basis.

Pleasingly, the Fund strongly outperformed these weak markets, supporting the primary cornerstone of downside protection and driven by a relative underweight in UK domestically-focus stocks. While the largest individual contributor was on the back of a bid, with Euromoney Institutional Investor seeing a private equity bid at a 30% premium, equally there were other companies that were bid for that we did not hold, including HomesServe, which detracted. Our holding in Beazley, the insurance group, outperformed the back of loss estimates unchanged despite claims ahead of expectations and Lancashire Holdings also contributed after previous weakness in the insurance market. Detractors included Intertek Group, whose premium rating eroded on growth concerns and oil exposure. Howden Joinery Group underperformed as a consumer exposed name, as did National Express Group, with rising energy prices also a concern.
