* These collectively comprise the Authorised Corporate Director's Report.

The Company

The Invesco Diversified Returns Investment Series is an investment company with variable capital ("ICVC"), incorporated in England and Wales on 30 August 2013.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 December 2022, the Company consisted of two Funds. Invesco Global Targeted Income Fund (UK) Invesco Global Targeted Returns Fund (UK)

Accounting Periods

| Annual accounting date | 31 December |
|-------------------------|-------------|
| Interim accounting date | 30 June |
| Distribution payable on | 28 February |

Invesco Global Targeted Income Fund (UK) will make monthly distributions, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2022, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS Schemes it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS Schemes it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2022 to 31 December 2022) is £49.51m of which £30.39m is fixed remuneration and £19.12m is variable remuneration. The number of beneficiaries apportioned to UK UCITS activities is 255.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2022 to 31 December 2022) is £14.91m of which £3.62m is paid to Senior Management and £11.29m is paid to other Identified Staff. Please note that remuneration for UK UCITS Schemes Identified Staff includes remuneration for staff employed by delegates.

The prices of shares will appear on our website (www.invesco.co.uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

Managing the risks presented by the Russia-Ukraine conflict

Financial markets have been impacted since February 2022, due primarily to geopolitical tensions arising from Russia's incursion into Ukraine and the impact of a subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. In the light of these events, Invesco Fund Managers Limited, on Monday, 28 February 2022, suspended the purchase of all Russian securities in its funds. There has been no significant impact on the Funds as a result of the conflict during the financial period ended 31 December 2022.

The directors of Invesco Fund Managers Limited are actively monitoring the situation and, with the support of the investment manager, continue to manage the Funds' assets within their investment and risk parameters that have been established. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Silicon Valley Bank, Signature Bank and Credit Suisse

Following the closure of Silicon Valley Bank ("SVB"), the possession of Signature Bank and the recent economic turmoil involving Credit Suisse, the Manager has assessed the impact on the Net Asset Value of the Funds as immaterial.

As at 31 December 2022, neither of the Funds were invested in SVB or Signature Bank and only the Invesco Global Targeted Returns Fund (UK) was invested in Credit Suisse, however, that investment was only 0.04% of the Net Asset Value of the Fund.

Risk Profile

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The Funds' performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Funds make significant use of financial derivatives (complex instruments) which will result in the Funds being leveraged and may result in large fluctuations in the value of the Funds. Leverage on certain types of transactions including derivatives may impair the Funds' liquidity, cause them to liquidate positions at unfavourable times or otherwise cause the Funds not to achieve their intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Funds being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. This counterparty risk is reduced by the Manager, through the use of collateral management. The securities that the Funds invest in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity, may mean that the Funds may not be able to sell those securities at their true value. These risks increase where the Funds invest in high yield or lower credit quality bonds and where we use derivatives.

Although the Funds invest mainly in established markets, they can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Fund's performance may be adversely affected by variations in interest rates.

As one of the key objectives of the Invesco Global Targeted Income Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

A more detailed description of risk factors that apply to these Funds are set out in the Prospectus.

Value Assessment (Unaudited)

The Manager conducted an assessment of value for each Fund. The assessment of value report will be made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website https://www.invesco.com/content/dam/ invesco/uk/en/pdf/invesco-value-assessment-report-2021.pdf. The latest Value Assessment as at 31 December 2021 was published in May 2022.

Holdings in other Funds of the Company

As at 31 December 2022, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Director - Alan Trotter

Director - Hayley Norford

Risk and Reward Profiles

1

for the year 1 January 2022 to 31 December 2022

| Invesco Global Targeted Income Fund (UK) | | | | | | | |
|--|----|---|---|---|-----------|------------|--|
| Lower Ris | sk | | | | Hi | igher Risk | |
| Typically lower rewards Typically higher rewar | | | | | r rewards | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | |

Invesco Global Targeted Returns Fund (UK)¹ Lower Risk Higher Risk

| Typically lower rewards Typically high | | | | | ally highe | r rewards |
|--|---|---|---|---|------------|-----------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

The risk category for this Fund changed from 5 to 4 on 31 March 2022.

The risk categories have not changed as a result of the correction of the matter as described in note 16 on page 44 and 87.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

Securities Financing Transactions Regulation (Unaudited)

for the year 1 January 2022 to 31 December 2022

SFTR, as implemented into UK law requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

The following table details the market value for open total return swaps, their respective counterparties and maturity tenor of their related cash and non-cash collateral, as at the balance sheet date:

| | | | Maturity tenor of Total Return Swaps | | | | | | | |
|--|--|-------------|--------------------------------------|-------------------------|--------------------------|---------------------------|-------------------------------|--------------------------------------|---------------|--|
| Counterparty borrower/lender | Total Return Swaps - Market value £'000 | % of AUM | <1 day £'000 | 1 to 7 days £'000 | 8 to 30 days £'000 | 31 to 90 days £'000 | 91 to 365 days £'000 | More than 365 days £'000 | Open £'000 | |
| Invesco Global Targeted Income Fund (UK) | | | | | | | | | | |
| BNP Paribas | 3 | 0.04% | - | - | - | - | 3 | - | - | |
| Citigroup | 4 | 0.06% | - | - | - | - | 4 | - | - | |

| Société Générale | 27 | 0.38% | - | - | - | - | 27 | - | - | |
| Invesco Global Targeted Returns Fund (UK) | | | | | | | | | | |
| BNP Paribas ¹ | 605 | 0.11% | - | - | - | - | 605 | - | - | |
| Citigroup ² | 189 | 0.04% | - | - | - | - | 189 | - | - | |
| Goldman Sachs ³ | 1,975 | 0.39% | - | - | - | - | 1,975 | - | - | |
| Société Générale ⁴ | 2,349 | 0.45% | - | - | - | - | 2,349 | - | - | |

¹ Collateral provided to the Invesco Global Targeted Returns Fund (UK) was in the form of Sterling cash of £5,560,000 with a maturity tenor of less than one day.

² Collateral provided to the Invesco Global Targeted Returns Fund (UK) was in the form of Sterling cash of £1,040,000 with a maturity tenor of less than one day.

- ³ Collateral provided to the Invesco Global Targeted Returns Fund (UK) was in the form of Sterling cash of £6,320,000 with a maturity tenor of less than one day.
- ⁴ Collateral provided to the Invesco Global Targeted Income Fund (UK) was in the form of Sterling cash of £2,850,000 with a maturity tenor of less than one day.

The above maturity tenor analysis has been based on the contractual maturity date of the TRS.

In the portfolio statement of each Fund the TRS are referred to as Commodity Swaps and Index Swaps.

OTC derivative transactions including TRS are entered into by the Company under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Company and a counterparty that governs OTC derivative transactions (including TRS) entered into by the parties.

Total TRS losses for the period of \pounds 542,000 are accrued 100% to the Invesco Global Targeted Income Fund (UK) and are not subject to any returns sharing arrangements with the Fund's Manager or any other third parties.

Total TRS losses for the period of £53,757,000 are accrued 100% to the Invesco Global Targeted Returns Fund (UK) and are not subject to any returns sharing arrangements with the Fund's Manager or any other third parties.

Collateral in the form of cash is held with the custodian, The Bank of New York Mellon London Branch, and is not held in segregated accounts or in pooled accounts.

Securities Lending (Unaudited)

for the year 1 January 2022 to 31 December 2022

Securities Lending

Securities lending transactions entered into by the Funds, including transfer of collateral received in exchange for securities lent, are subject to a written legal agreement between Invesco Asset Management Limited (the "investment adviser", on behalf of the Funds); Citibank UK Limited (the "Depositary"); and The Bank of New York Mellon, London Branch (the "Securities Lending Agent").

Collateral received is segregated from the assets belonging to the Depositary or the Securities Lending Agent.

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and Net Asset Value (NAV) as at 31 December 2022. The income earned from securities lending is also shown for the year ended 31 December 2022. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan

| Fund | % of lendable assets | % of NAV | Income earned £'000 |
|---|----------------------|----------|------------------------|
| Invesco Global Targeted Income Fund (UK) | 3.06 | 1.65 | - |
| Invesco Global Targeted Returns Fund (UK) | 4.31 | 1.96 | 33 |

. .

The Funds entered into the securities lending programme on 10 February 2021.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

The following table details the value of securities on loan and associated collateral received, analysed by counterparty as at 31 December 2022.

| Counterparty | s Counterparty's country of establishment | Securities Lending Amount on Ioan £'000 | Collateral received £'000 |
|---|--|--|---------------------------------|
| Invesco Global Targeted Income Fund (UK) | | | |

| Merrill Lynch International | UK | 4 | 4 |
| The Bank of Nova Scotia | Canada | 1,004 | 1,105 |
| UBS AG | Switzerland | 234 | 248 |
| Total | | 10,202 | 10,896 |

All securities on loan have an open maturity tenor as they are recallable or terminable on a daily basis.

Collateral

The Funds engage in activities which may require collateral to be provided to a counterparty ("collateral posted") or may hold collateral received ("collateral received") from a counterparty.

Securities Lending (Unaudited)

for the year 1 January 2022 to 31 December 2022

Collateral continued

The following table provides an analysis by currency of the underlying cash and non-cash collateral received / posted by way of title transfer collateral arrangement by the Funds, in respect of securities lending transactions, as at 31 December 2022.

| Currency | Cash collateral receive £'000 | Cash collateral posted £'000 | Non-cash collateral received £'000 | Non-cash collateral posted £'000 |

| Total | 11 | 12 | 34 | 287 | 8,293 | 2,259 | 10,896 |

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and exchange traded funds (ETFs) received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 December 2022, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Funds by way of the title transfer collateral arrangement across securities lending transactions as at 31 December 2022.

1 Accounting Policies

| a) | Basis of preparation The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company's Instrument of Incorporation and Prospectus. |
|-----------------|--|
| b) i) | Recognition of revenue Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared. |
| ii) iii) | Interest on bank balances and deposits is recognised on an accruals basis. Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flow on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company. |
| iv) v) | All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits. All REIT dividend revenue is recognised on an accruals basis and the allocation between income and capital is estimated when the security goes ex-dividend based upon previous income/ |
| vi) | capital allocations. Returns from derivative securities are taken to capital and/or revenue depending on the motive and circumstances surrounding the particular transaction. The net revenue/expense on derivative positions are recognised as revenue and form part of the Company's distribution. |
| vii) | Distributions and accumulations, excluding equalisation, receivable on the underlying collective investment schemes are recognised as revenue when the shares are quoted ex-dividend. The Manager rebates an amount equivalent to the ongoing charge suffered on this Fund's share in the underlying collective investment schemes. Each rebate is paid to either the capital or revenue element of the Fund depending on whether the fee of the underlying Fund is charged to |
| viii) | capital or revenue. Income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues. |
| c) | Stock dividends Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital. |
| d) | Special dividends and share buy-backs The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount. |
| e) | Underwriting commission Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares. |
| f) | Expenses All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis. |
| g) | Revenue allocation to share classes Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class. |

| 1 Ac | counting Policies continued |
|------|--|
| h) | Measurement basis The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities. |
| i) | Basis of valuation of investments All investments are valued at their fair value as at the balance sheet date. |
| | All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. Th Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. Over-the-counter derivative contracts shall be valued on the basis of unrealised ga or loss on the contract using current settlement price. When settlement price is not used, the over-the-counter derivative contracts will be valued at their fair value in accordance with the method of valuation (as used on a consistent basis) as shall have been agreed between the Manager and the Depositary. |
| | Valuation of unquoted equity instruments Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining th fair value by the Invesco European Pricing Committee (EPC). |
| | The role of the EPC is to provide oversight of the pricing & valuation of investments in Europear domiciled funds and portfolios. Members provide insight and technical knowledge from their respective areas to sign off any pricing related recommendations (including but not limited to Fair Value of securities, markets and restricted currencies) from the Pricing team, as detailed ir the Invesco Pricing Policy and EPC Terms of Reference. |
| | As part of any determination of a level 3 security's fair value, the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following: |
| | Reference to listed securities of the same company; Consideration of seniority of the securities held and terms of repayment upon realisation; Consideration of any trading restrictions on the investment company's shares that would limi Invesco's ability to realise its holding; Consideration of any outstanding payments to be made by Invesco; Industry statistics or events (such as mergers, acquisitions and the risk of default). |
| j) | Exchange rates Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments. |
| k) | Taxation and deferred taxation Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on an accruals basis. |
|) | Efficient portfolio management Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Interest payable and similar charges' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value. |

1 Accounting Policies continued

m)

Dilution adjustment The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco Diversified Returns Investment Series:

- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.

Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as dividend distributions.

In calculating the amount to be distributed, the following Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco Global Targeted Income Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

3 Shareholders' Funds

The Manager's entry charge and Fund Management Fee (FMF) are as follows:

| | | Entry charge % | Fund Management Fee % |
|---|--------------------------------------|----------------------|--------------------------------|
| Invesco Global Targeted Income Fund (UK) | - No Trail classes | 0.0 | 1.07 |
| - | - Z classes | 0.0 | 0.87 |
| | - Y classes | 0.0 | 0.82 |
| Invesco Global Targeted Returns Fund (UK) | - Trail classes | 0.0 | 1.57 |
| | No Trail classes | 0.0 | 1.07 |
| | - Z classes | 0.0 | 0.87 |
| | - Y classes | 0.0 | 0.82 |

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each share class are shown in the comparative tables of each Fund. These can be found on:

| Invesco Global Targeted Income Fund (UK) | |
|---|--|
| Invesco Global Targeted Returns Fund (UK) | |

pages 21 to 23 pages 54 to 55

Each share class has the same rights on a winding up of the Company.

4 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company seek to achieve their objectives by using a range of investment strategies and techniques to invest actively in a broad selection of asset classes across all economic sectors worldwide. These asset classes will include equities, equity related securities, debt securities (including those issued by corporate bodies, governments and/or supranational institutions), warrants, collective investment schemes (including but not limited to exchange traded Funds), cash, near cash, money market instruments and any other eligible instrument.

The Funds may gain exposure to commodities through swaps on eligible commodity indices and investing in transferable securities in the commodities sector, such as exchange traded commodities. The Fund's investment strategies and techniques will make significant use of financial derivative instruments ("derivatives") to obtain exposure to long and short positions.

The Fund's use of derivatives may include but is not limited to derivatives on currencies, interest rates, credit, commodity indices and equities, which, may be either exchange traded or off exchange. Such derivative usage can be for the purposes of efficient portfolio management and/or meeting the investment objective of the Fund. Such derivatives have the potential to increase significantly the Fund's risk profile. The Fund may at any time have substantial holdings in ancillary liquid assets.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty's operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm's trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Currency exchange risk

The Funds' assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Investing in Collective Investment Schemes

Where the Funds of the Company invest across a range of Funds with a view of diversifying risk and potential returns, each of these underlying Funds may have specific risks including market risk, currency exchange risk, market liquidity risk and interest rate risk as set out above.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

4 Generic Risk Factors continued

Investing in Fixed Interest Securities

The following is a brief summary of some of the more common risks associated with investment in fixed interest securities:

- Interest rate risk

The Funds' investments in bonds and other fixed income securities may fluctuate as a result of changes in interest rates. Generally, the prices of debt securities rise when interest rates fall, while the prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.

- Market liquidity risk

A Fund may be adversely affected by market conditions such as a decrease in market liquidity which may mean that it is not easy to buy or sell securities. A Fund's ability to acquire or to dispose of securities at their intrinsic value may also be affected.

Issuer risk

The Funds are subject to the risk that issuers of bonds or other fixed income securities do not make payments on such securities. A lowering of the credit rating of the issuer of a bond or of the bond itself may cause volatility in the price or reduce the security's liquidity, making it more difficult to sell.

Leverage risk

Leverage exists when the Funds purchases or sells an instrument or enters into a transaction without investing cash in an amount equal to the full economic exposure of the instrument or transaction and the Funds could lose more than it invested. Such instruments may include, among others, reverse repurchase agreements, written options and derivatives, and transactions may include the use of when-issued, delayed delivery or forward commitment transactions. To the extent that the Funds are not able to close out a leveraged position because of market illiquidity, the Funds' liquidity may be impaired to the extent that it has a substantial portion of liquid assets segregated or earmarked to cover obligations and may liquidate portfolio positions when it may not be advantageous to do so. Leveraging may cause the Funds to be more volatile because it may exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. There can be no assurance that the Fund's leverage strategy will be successful.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Taking charges from capital

Where the investment objective of a Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Fund may be taken from capital instead of income. The Funds take such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

4 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) ("ESMA Guidelines").

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UK UCITS Scheme)/(2* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 December 2022, as well as the daily average level of leverage for each Fund during the one year period ending 31 December 2022.

5 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

Invesco Global Targeted Income Fund (UK) Invesco Global Targeted Returns Fund (UK) page 18 page 51

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Funds in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Funds. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

6 Functional Currency

The Company's functional and presentational currency is Sterling. The financial statements are presented to the nearest $\pounds'000$.

7 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

8 Transactions and Balances with Related Parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Fund. Management fee rebates are disclosed in note 2 and note 3 within each Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Fund.

All issued and redeemed shares transacted with the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and balances due from and to the ACD are shown in notes 8 and 10 to the financial statements of each Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Funds:

| | Held at 31.12.22 | Change in year | Held at 31.12.21 |
|--|---------------------|-------------------|---------------------|
| Invesco Global Targeted Income Fund (UK) Z Income shares Invesco Global Targeted Returns Fund (UK) Z Accumulation | 491,359 | (604,784) | 1,096,143 |
| shares Invesco Global Targeted Returns Fund (UK) Y Accumulation | 1,392,643 | (723,215) | 2,115,858 |
| shares | 85,736,242 | (190,935,256) | 276,671,498 |

9 Post Balance Sheet Events

The net asset value in pence per share at the balance sheet date and the latest practicable date prior to the publication of the report has been shown in the table below. The % increase/(decrease) is a reflection of market fluctuations during this period. It is likely markets will continue to be much more volatile than normal over the next few months until the Russia-Ukraine conflict impact passes.

| | Net Asset Value 31.12.22 (pence per share) | Net Asset Value 26.4.23 (pence per share) | Increase/ Decrease % |
|---|--|---|----------------------------|
| Invesco Global Targeted Income Fund (UK) | 197.72 | 201.96 | 2.14 |
| Invesco Global Targeted Returns Fund (UK) | 230.44 | 238.62 | 3.55 |

The net asset value in pence per share is based on the Z Accumulation shares.

As at the balance sheet date, 0.0% of net assets in the Invesco Global Targeted Income Fund (UK) and 0.0% of net assets in the Invesco Global Targeted Returns Fund (UK) (with a value of £Nil and £Nil respectively) were in securities with exposure to companies whose principal activities are in Russia.

Silicon Valley Bank, Signature Bank and Credit Suisse

Following the closure of Silicon Valley Bank ("SVB"), the possession of Signature Bank and the recent economic turmoil involving Credit Suisse, the Manager has assessed the impact on the Net Asset Value of the Funds as immaterial.

As at 31 December 2022, neither of the Funds were invested in SVB or Signature Bank and only the Invesco Global Targeted Returns Fund (UK) was invested in Credit Suisse, however, that investment was only 0.04% of the Net Asset Value of the Fund.

The Investment Objective and Policy of the Invesco Global Targeted Income Fund (UK)

The Fund aims to deliver a gross income of 3.5% per annum above UK 3 month SONIA (before the deduction of corporation tax), whilst aiming to preserve capital in all market conditions over a rolling 3 year period. The Fund aims to achieve this with less than half the volatility of global equities, over the same rolling 3 year period. There is no guarantee that the Fund will achieve these aims and an investor may not get back the amount invested, as capital is at risk.

The Fund seeks to achieve its objective by using a range of investment strategies and techniques to invest actively in a broad selection of asset classes across all economic sectors worldwide. These asset classes may include equities, equity related securities, debt securities (including those issued by corporate bodies, governments and/or supranational institutions), warrants, cash and money-market instruments. Exposure to these asset classes may be gained directly or indirectly through collective investment schemes (including exchange traded funds and funds managed by the Invesco group) and any other eligible instrument.

The Fund may gain exposure to commodities through swaps on eligible commodity indices and investing in transferable securities in the commodities sector, such as exchange traded commodities.

The Fund may at any time have substantial holdings in liquid assets such as cash, deposits and short-term debt securities.

The Fund will make significant use of derivatives to obtain exposure to long and short positions.

The Fund uses derivatives, including but not limited to derivatives on currencies, interest rates, credit, commodity indices and equities, which may be either exchange traded or off exchange. Such derivatives usage can be for investment purposes to meet the Fund's investment objective and/or for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income.

Such derivatives have the potential to increase significantly the Fund's risk profile.

Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 50%. Such level might be exceeded or might be subject to change in the future.

This Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 December 2022.

| Performance | | | | Perc | entage growth |

The Fund's performance has been updated to reflect the correction of the matter as described in note 16 on page 44. The Key Investor Information Documents and the Fund's factsheet issued in September 2022 also reflect the updated figures.

Comparator Benchmark: The Fund aims to preserve capital (a positive total return) in all market conditions over a rolling 3 year period. The Fund's performance can be compared against the Comparator Benchmark as a means to assess if the Fund's aim has been achieved.

Target Benchmark: The Fund targets a gross income of 3.5% per annum above UK 3 month SONIA (ICE 3 month Term Sterling Overnight Interest Average Reference Rate) (before deduction of corporation tax) over a rolling 3 year period. The Fund's performance can be measured against the Target Benchmark as a means to assess if the Fund's target has been achieved. There should not be an expectation that this target will be exceeded. On 1 January 2022, the Fund's Target Benchmark changed from a gross return of 3.5% above UK 3 month LIBOR to a gross return of 3.5% above UK 3 month SONIA.

Constraining Benchmark: The Fund aims for less than half the volatility of global equities (as measured by MSCI World GBP Hedged Index, Net Total Return) over a rolling 3 year period.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 21 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 21 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Strategy, review and outlook

The Fund fell by 2.6% during the twelve months to 31 December 2022.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

2022 has not been kind to investors who have historically relied on traditional 60/40 equity/bond portfolios to provide diversification given both asset classes sold off sharply. The Invesco Global Targeted Income Fund (UK), although ending slightly lower, performed relatively well in an environment which saw most equity and bond markets fall by double digits.

In terms of the fund's performance, 'Inflation - Short UK' was one of the worst performing ideas as the increase in commodity prices following the war in Ukraine had a severe impact on UK inflation given it exports most of its energy. The outbreak of the war in Ukraine also negatively impacted the sentiment of most other European ideas. This challenged the performance of our 'Equity - European Infrastructure vs Market', 'Equity - Europe', and 'Equity - Equity European Banks' ideas.

More broadly speaking, long credit and equity ideas generally performed badly given the negative market environment, as did interest rate ideas. 'Interest rates - Yield Compression' and 'Equity - Taiwan carry' were amongst the biggest detractors in this regard.

At the other end, US dollar positions vs developed markets and emerging market currencies delivered strong upside as risk averse investors sought a perceived "safe haven" currency. Expectations that the Federal Reserve System would hike interest rates more aggressively than other central banks also supported the dollar on a relative basis. 'Currency - US Dollar vs Asia' and 'Currency - US Dollar vs UK Pound' were two notable performers.

The increased divergence in monetary policy expectations across regions has led to an increase in the level of volatility among currencies, benefiting our 'Volatility - Global FX Volatility' idea.

2022 was also a rich hunting ground for stock pickers. Our 'Equity - Diversified Alpha' idea allocates to underlying Invesco equity managers and shorts (sells) the broad market index via futures. Over the year, this was a top performing idea as our underlying managers were able to outperform the broad market.

In 2022, policy shocks (impacted by inflation) have been the main driver of financial conditions and markets, with fears of a global slowdown playing a relatively smaller role. In 2023, we think the balance between the two is likely to be more even, as the pace of interest rate hikes slows and recession risks remain in focus.

Slower global growth is part of our central thesis, but the probability of recession and potential depth varies by region. Out of the major developed market economies, the UK is most vulnerable followed by Europe which is clearly hostage to the decisions of the Kremlin. Although we think the US could avoid outright recession, recession risks are clearly higher than normal.

Recession fears aside, we are closely monitoring the corporate earnings outlook. Stock valuations have fallen this year as interest rates have risen, but we are yet to see real weakness in analysts' earnings estimates. The early part of 2023 is likely to be dominated by assessing the degree to which they will be revised down versus what is already in the price.

Notes to the financial statements

| 6 Taxation | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |
|---------------------------------------|---------------------------------|---------------------------------|
| a) Analysis of charge for the year | | |
| Corporation tax | 79 | 123 |
| Corporation tax prior year adjustment | 1 | (13) |
| Deferred tax | - | (1) |
| Double taxation relief | - | (1) |
| | 80 | 108 |
| Overseas tax | 5 | 18 |
| Overseas capital gains tax paid | 3 | 21 |
| Total tax charge | 88 | 147 |

b) Factors affecting the tax charge for the year

The tax assessed for the year is the same as (2021 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

| | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |
|--|---------------------------------|---------------------------------|
| Net revenue before taxation | 438 | 759 |
| Corporation tax at 20% (2021 - 20%) | 88 | 152 |
| Effects of: Capitalised income subject to tax Double taxation relief Overseas capital gains tax paid Overseas tax Prior year adjustment Revenue not subject to tax | 1 - 3 5 1 (10) | (1) 21 18 (13) (30) |
| Total tax charge | 88 | 147 |

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

| c) Deferred tax | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |
|---------------------------------------|---------------------------------|---------------------------------|
| Deferred tax at the start of the year | - | 1 |
| Deferred tax credit | - | (1) |
| Deferred tax at the end of the year | - | _ |

Notes to the financial statements

| 7 Distributions | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2021 – Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 17. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £897,000 (2021 - £1,328,000) and amounts paid in respect of purchases in the accounting year is £1,086,000 (2021 - £170,000). Amounts received in respect of dividends in the accounting year is £37,000 (2021 - Nil). Management fee rebates are disclosed in note 2. Amounts due at the end of the accounting year for Fund Management Fees of £5,000 (2021 - £9,000) are disclosed in note 10 within accrued expenses.

Invesco Global Targeted Income Fund (UK) Notes to the financial statements

13 Generic Risk factors

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 10 of the notes applicable to the financial statements of all Funds on pages 13 to 16.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

| Counterparty Details of OTC Financial Derivative Transactions | | | | | | |

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was Nil (2021 - £20,000) in the form of cash and is shown in note 10.

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

| | Assets £'000 | Liabilities £'000 |
|---------------------------------|-----------------|----------------------|
| 31.12.22 | | |
| Level 1: Quoted prices | 2,761 | 93 |
| Level 2: Observable market data | 3.644 | 430 |
| Level 3: Unobservable data | - | - |
| | 6,405 | 523 |
| 31.12.21 | | |
| Level 1: Quoted prices | 2,455 | 120 |
| Level 2: Observable market data | 5,784 | 776 |
| _evel 3: Unobservable data | - | - |
| | 8,239 | 896 |

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

14 Portfolio transaction costs

for the year 1 January 2022 to 31 December 2022

| Purchases (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
|--|-------------------------------|----------------------|---|----------------|---|
| Equity instruments | 596 | - | - | - | - |
| Debt instruments | 3,899 | - | - | - | - |
| Collective investment schemes | 918 | - | - | - | - |
| Total purchases | 5,413 | - | | - | |
| Total purchases including transaction costs | 5,413 | | | | |

| Sales (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |

| Equity instruments | 1,258 | 1 | 0.08 | 1 | 0.08 |
| Debt instruments | 3,514 | - | - | - | - |
| Collective investment schemes | 283 | - | - | - | - |
| Total sales | 5,055 | 1 | | 1 | |
| Total sales net of transaction costs | 5,053 | | | | |
| Derivative transaction costs | | 3 | | - | |
| Total transaction costs | | 4 | | 1 | |
| Total transaction costs as a % of average net assets | | 0.05% | | 0.01% | |

Invesco Global Targeted Income Fund (UK) Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 January 2021 to 31 December 2021

| Purchases (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
|---|-------------------------------|----------------------|------|----------------|------|
| Equity instruments | 2,039 | 1 | 0.05 | 2 | 0.10 |
| Debt instruments | 8,903 | - | - | - | - |
| Total purchases | 10,942 | 1 | | 2 | |
| Total purchases including transaction costs | 10,945 | | | | |
| Sales (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
| Equity instruments Debt instruments | 13,180 27,777 | 4 | 0.03 | 6 | 0.05 |
| Total sales | 40,957 | 4 | | 6 | |
| Total sales net of transaction costs | 40,947 | | | | |
| Derivative transaction costs | | 10 | | - | |
| Total transaction costs | | 15 | | 8 | |
| Total transaction costs as a % of average net assets | | 0.06% | | 0.03% | |

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.51% (2021 - 0.74%).

| Closing shares | 39,344 | 999,102 | 2,156,330 |

16 Prior period accounting matter

During the reporting period, an accounting matter was identified in relation to the margin accounts for a Brazilian Real (BRL) equity index futures contract initially entered into in March 2017. The foreign exchange transactions relating to the margin accounts were omitted from the accounts. As a result, the Fund's net asset value was misstated through to the date of the correction, which took place on 20 June 2022.

The Manager compensated the Fund on 29 June 2022 for the net shortfall in amounts paid by the Fund for shares created and or shares cancelled during the period of the matter in the amount of £384,444. The relevant value of this compensation asset has been recognised at each balance sheet date.

17 Post balance sheet events

The Fund's post balance sheet events are set out on page 17.

Group 1: shares purchased prior to 1 December 2022

Group 2: shares purchased on or after 1 December 2022

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

The Investment Objective and Policy of the Invesco Global Targeted Returns Fund (UK)

The Fund aims to achieve a positive total return in all market conditions over a rolling 3 year period. The Fund targets a gross return of 5% per annum above UK 3 month SONIA. The Fund aims to achieve this with less than half the volatility of global equities, over the same rolling 3 year period. There is no guarantee that the Fund will achieve a positive return or these targets and an investor may not get back the amount invested.

The Fund seeks to achieve its objective by using a range of investment strategies and techniques to invest actively in a broad selection of asset classes across all economic sectors worldwide. These asset classes will include equities, equity related securities, debt securities (including those issued by corporate bodies, governments and/or supranational institutions), warrants, collective investment schemes (including exchange traded funds and funds managed by the Invesco group), cash, money-market instruments and any other eligible instrument.

The Fund may gain exposure to commodities through swaps on eligible commodity indices and investing in transferable securities in the commodities sector, such as exchange traded commodities. The Fund may at any time have substantial holdings in liquid assets such as cash, deposits and short-term debt securities.

The Fund will make significant use of derivatives to obtain exposure to long and short positions.

The Fund uses derivatives, including but not limited to derivatives on currencies, interest rates, credit, commodity indices and equities which, may be either exchange traded or off exchange. Such derivatives usage can be for investment purposes to meet the Fund's investment objective and/or for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income.

Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 50%. Such level might be exceeded or might be subject to change in the future.

This Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 December 2022.

The Fund's performance has been updated to reflect the correction of the matter as described in note 16 on page 87. The Key Investor Information Documents and the Fund's factsheet issued in September 2022 also reflect the updated figures.

Comparator Benchmark: The Fund aims to achieve a positive total return in all market conditions over a rolling 3 year period. The Fund's performance can be compared against the Comparator Benchmark as a means to assess if the Fund's aim has been achieved.

Target Benchmark: The Fund targets a gross return of 5% per annum above UK 3 month SONIA (ICE 3 month Term Sterling Overnight Interest Average Reference Rate) (before deduction of corporation tax) over a rolling 3 year period. The Fund's performance can be measured against the Target Benchmark as a means to assess if the Fund's target has been achieved. There should not be an expectation that this target will be exceeded. On 1 January 2022, the Fund's Target Benchmark changed from a gross return of 5% above UK 3 month LIBOR to a gross return of 5% above UK 3 month SONIA.

Constraining Benchmark: The Fund aims for less than half the volatility of global equities (as measured by the MSCI World GBP Hedged Index, Net Total Return) over a rolling 3 year period.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 55 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 55 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Strategy, review and outlook

The Fund fell by 1.1% during the twelve months to 31 December 2022.

Fund average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

2022 has not been kind to investors who have historically relied on traditional 60/40 equity/bond portfolio to provide diversification given both asset classes sold off sharply. The Invesco Global Targeted Returns Fund (UK), although ending slightly lower, performed relatively well in an environment which saw most equity and bond markets saw double digit declines.

In terms of the fund's performance, 2022 can be broadly summarised as a year of two halves. The first half was a relatively more difficult period for the portfolio with many credit and equity ideas coming under pressure against a backdrop of changing central bank policy (e.g., interest rate hikes), rising bond yields and stronger than expected inflation. Russia's invasion of Ukraine also had direct negative implications for the fund with our long exposure to local currency Russian government bonds accounting for a substantial portion of the losses following the full write down of the position to zero.

In the second half of the year, the fund staged a strong come-back despite ongoing market volatility. The team was able to exit in full, and recover most of the losses, of its remaining Russian debt exposure following an improvement in liquidity and pricing conditions helped performance. Long US dollar positions continued to do well as did interest rate and currency ideas expressing a negative view of the Australian economy which were introduced over the period. Credit ideas also finished the period in positive territory.

In 2022, policy shocks (impacted by inflation) have been the main driver of financial conditions and markets, with fears of a global slowdown playing a relatively smaller role. In 2023, we think the balance between the two is likely to be more even, as the pace of interest rate hikes slows and recession risks remain in focus. Slower global growth is part of our central thesis, but the probability of recession and potential depth varies by region. Out of the major developed market economies, the UK is most vulnerable followed by Europe which is clearly hostage to the decisions of the Kremlin. Although we think the US could avoid outright recession, recession risks are clearly higher than normal.

Recession fears aside, we are closely monitoring the corporate earnings outlook. Stock valuations have fallen this year as interest rates have risen, but we are yet to see real weakness in analysts' earnings estimates. The early part of 2023 is likely to be dominated by assessing the degree to which they will be revised down versus what is already in the price.

Comparative figures for the year ending 31.12.20 have been restated. Refer to note 16 on page 87 for further details.

103.85

112.00

114.09

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 12, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Notes to the financial statements

| 6 Taxation | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |
|---------------------------------------|---------------------------------|---------------------------------|
| a) Analysis of charge for the year | | |
| Corporation tax | 6,067 | 18,508 |
| Corporation tax prior year adjustment | 131 | (2,258) |
| Double taxation relief | (4) | (413) |
| | 6,194 | 15,837 |
| Overseas tax | 933 | 1,508 |
| Overseas capital gains tax paid | 109 | 1,209 |
| Total tax charge | 7,236 | 18,554 |

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2021 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

| | 01.1.22 to 31.12.22 £′000 | 01.1.21 to 31.12.21 £'000 |
|---|---|---|
| Net revenue before taxation | 35,046 | 108,502 |
| Corporation tax at 20% (2021 - 20%) | 7,009 | 21,700 |
| Effects of: Double taxation relief Indexation allowance Overseas capital gains tax paid Overseas tax Prior year adjustment Revenue not subject to tax | (4) (24) 109 933 131 (918) | (413) (30) 1,209 1,508 (2,258) (3,162) |
| Total tax charge | 7,236 | 18,554 |

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of Nil (2021 - Nil). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of Nil (2021 - Nil) has not been recognised.

| 7 Distributions | 01.1.22 to 31.12.22 £'000 | 01.1.21 to 31.12.21 £'000 |

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2021 – Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 17. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £35,583,000 (2021 - £147,068,000) and amounts paid in respect of purchases in the accounting year of £7,665,000 (2021 - £14,035,000) are included within the figures disclosed in note 14. Amounts received in respect of dividends in the accounting year is £315,000 (2021 - £35,000). Management fee rebates are disclosed in note 3. Amounts due at the end of the accounting year for Fund Management Fees of £397,000 (2021 - £963,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 10 of the notes applicable to the financial statements of all Funds on pages 13 to 16.

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

| Counterparty Details of OTC Financial Derivative Transactions | | | | | | |
|---|-----------------------------|-------------------------------------|----------------------------|-------------------|-------------------------|--|

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £30,480,000 (2021 - £13,750,000) in the form of cash and is shown in note 10.

Collateral pledged to these counterparties in respect of derivative contracts was $\pounds 20,740,000$ (2021 - $\pounds 11,070,000$) in the form of cash and is shown in note 8.

Notes to the financial statements

13 Generic Risk factors continued

| b) Portfolio Statement Credit Ratings Breakdown | 31.12.22 % | 31.12.2: % | |
|---|---------------|---------------|--|
| Investment Grade | 23.30 | 17.92 | |
| Non-Investment Grade | 14.60 | 15.31 | |
| Not Rated | 1.04 | 4.87 | |
| Other | 39.02 | 32.79 | |
| Portfolio of investments | 77.96 | 70.89 | |
| Net other assets | 22.04 | 29.11 | |
| Net Assets | 100.00 | 100.00 | |

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

| | Assets £'000 | Liabilities £'000 |
|---------------------------------|-----------------|----------------------|
| 31.12.22 | | |
| Level 1: Quoted prices | 98,288 | 3,621 |
| Level 2: Observable market data | 360,981 | 50,490 |
| Level 3: Unobservable data | 33 | - |
| | 459,302 | 54,111 |
| 31.12.21 | | |
| Level 1: Quoted prices | 220,839 | 12,917 |
| Level 2: Observable market data | 720,484 | 67,560 |
| Level 3: Unobservable data | 2,602 | - |
| | 943,925 | 80,477 |

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value by the Invesco European Pricing Committee (EPC).

The role of the EPC is to provide oversight of the pricing & valuation of investments in European domiciled funds and portfolios. Members provide insight and technical knowledge from their respective areas to sign off any pricing related recommendations (including but not limited to Fair Value of securities, markets and restricted currencies) from the Pricing team, as detailed in the Invesco Pricing Policy and EPC Terms of Reference.

As part of any determination of a level 3 security's fair value, the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 January 2022 to 31 December 2022

| Purchases (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
|---|-------------------------------|----------------------|------|----------------|------|
| Equity instruments | 42,972 | 21 | 0.05 | 86 | 0.20 |
| Debt instruments | 156,744 | - | - | - | - |
| Total purchases | 199,716 | 21 | | 86 | |
| Total purchases including transaction costs | 199,823 | | | | |
| | Transaction | | | | |

| Sales (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
|---|-------------------------------|----------------------|------|----------------|------|
| Equity instruments | 161,478 | 51 | 0.03 | 72 | 0.04 |
| Debt instruments | 375,401 | - | - | - | - |
| Collective investment schemes | 1,487 | - | - | - | - |
| Total sales | 538,366 | 51 | | 72 | |
| Total sales net of transaction costs | 538,243 | | | | |
| Derivative transaction costs | | 298 | | - | |
| Total transaction costs | | 370 | | 158 | |
| Total transaction costs as a % of average net assets | | 0.04% | | 0.02% | |

14 Portfolio transaction costs continued

for the year 1 January 2021 to 31 December 2021

| Total purchases including transaction costs | 1,094,336 | | | | |
|---|-------------------------------|----------------------|------|----------------|------|
| Total purchases | 1,093,868 | 106 | | 362 | |
| Collective investment schemes | 1,420 | 1 | 0.07 | - | - |
| Debt instruments | 847,031 | - | - | - | - |
| Equity instruments | 245,417 | 105 | 0.04 | 362 | 0.15 |
| Purchases (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |

| Sales (excluding derivatives) | Transaction Value £'000 | Commissions £'000 | % | Taxes £'000 | % |
|---|-------------------------------|----------------------|------|----------------|------|
| Equity instruments | 1,354,571 | 454 | 0.03 | 545 | 0.04 |
| Debt instruments | 2,587,276 | - | - | - | - |
| Collective investment schemes | 3,402 | 1 | 0.03 | - | - |
| Total sales | 3,945,249 | 455 | | 545 | |
| Total sales net of transaction costs | 3,944,249 | | | | |
| Derivative transaction costs | | 882 | | - | |
| Total transaction costs | | 1,443 907 | | 907 | |
| Total transaction costs as a % of average net assets | | 0.05% | | 0.03% | |

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.55% (2021 - 0.66%).

15 Share movement

for the year 1 January 2022 to 31 December 2022

| | Accumulation | Accumulation | Z Accumulation | Y Accumulation |
|------------------|--------------|-------------------|----------------|----------------|
| | shares | shares (No Trail) | shares | shares |
| Opening shares | 72,295,867 | 171,973,169 | 48,940,653 | 396,447,514 |
| Shares issued | 4,644,910 | 14,371,453 | 2,585,384 | 16,164,790 |
| Shares redeemed | (57,692,799) | (93,790,854) | (21,621,239) | (257,486,554) |
| Shares converted | - | (5,317) | 23,139 | (21,872) |
| Closing shares | 19,247,978 | 92,548,451 | 29,927,937 | 155,103,878 |

16 Prior period accounting matter

During the reporting period, an accounting matter was identified in relation to the margin accounts for a Brazilian Real (BRL) equity index futures contract initially entered into in March 2017. The foreign exchange transactions relating to the margin accounts were omitted from the accounts. As a result, the Fund's net asset value was misstated through to the date of the correction, which took place on 20 June 2022.

The Manager compensated the Fund on 29 June 2022 for the net shortfall in amounts paid by the Fund for shares created and or shares cancelled during the period of the matter in the amount of £33,277,680. The relevant value of this compensation asset has been recognised at each balance sheet date.

17 Post balance sheet events

The Fund's post balance sheet events are set out on page 17.

Invesco Global Targeted Returns Fund (UK) Distribution table

Distribution table

for the year 1 January 2022 to 31 December 2022

| Distribution paid 28 February 2023 | Net revenue pence per share | Equalisation pence per share | Net distribution paid 28.2.23 pence per share | Net distribution paid 28.2.22 pence per share |
|--|--------------------------------------|------------------------------------|--|--|
| Accumulation shares Group 1 Group 2 | 1.4403 0.7543 | - 0.6860 | 1.4403 1.4403 | 1.2856 1.2856 |
| Accumulation shares (No Trail) Group 1 Group 2 | 3.4458 2.2075 | - 1.2383 | 3.4458 3.4458 | 3.1166 3.1166 |
| Z Accumulation shares Group 1 Group 2 | 7.3691 4.3990 | - 2.9701 | 7.3691 7.3691 | 6.7178 6.7178 |
| Y Accumulation shares Group 1 Group 2 | 7.0015 3.5844 | - 3.4171 | 7.0015 7.0015 | 6.3895 6.3895 |

Group 1: shares purchased prior to 1 January 2022

Group 2: shares purchased on or after 1 January 2022

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Diversified Returns Investment Series (the "Company") Regulatory statements

Regulatory statements

Statement of the Manager's Responsibilities The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/ 1228) (the OEIC Regulations), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary's Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Citibank UK Limited London 28 April 2023

Independent auditors' report to the Shareholders of Invesco Diversified Returns Investment Series

Report on the audit of the financial statements

In our opinion, the financial statements of Invesco Diversified Returns Investment Series (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 31 December 2022 and of the net revenue and the net capital losses on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Diversified Returns Investment Series is an Open Ended Investment Company ('OEIC') with two sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 31 December 2022; the statements of total return and the statements of change in net assets attributable to shareholders for the year then ended; the distribution tables; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Report of the Authorised Corporate Director

In our opinion, the information given in the Report of the Authorised Corporate Director for the financial year for which the financial statements are prepared is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager's Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual subfunds, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of noncompliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/ industry, we identified that the principal risks of noncompliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the **Open-Ended Investment Companies Regulations** 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting Opinion on matter required by the Collective **Investment Schemes sourcebook**

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
