## Manager's Investment Report

## **Investment Objective and Policy**

The Investment Objective and Policy of the Fund as disclosed within the Scheme Prospectus was updated with effect from 23 May 2023. The previous and revised Investment Objectives are set out below:

### Prior to 23 May 2023

The objective of the Fund is to provide a combination of growth and income by tracking the performance of the Markit iBoxx Sterling Non Gilts ex BBB (the "Benchmark Index") before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.

The Benchmark Index is comprised of corporate bonds that have an average rating of A, AA or AAA and are denominated in British Pounds.

The Fund is a Replicating Fund as it seeks to replicate as closely as possible the constituents of the Benchmark Index by holding all, or substantially all, of the assets comprising the Benchmark Index in similar proportions to their weightings in the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.

The Fund may also invest in bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an Associate as well as money market instruments (such as Treasury bills), cash and permitted deposits.

Fund may only use derivatives for Efficient Portfolio Management purposes.

### From 23 May 2023

The objective of the Fund is to track the performance of the Markit iBoxx Sterling Non Gilts ex BBB (the "Benchmark Index") before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.

The Benchmark Index is comprised of corporate bonds that have an average rating of  $\Lambda$ ,  $\Lambda\Lambda$  or  $\Lambda\Lambda\Lambda$  and are denominated in British Pounds.

The Fund is a Replicating Fund as it seeks to replicate as closely as possible the constituents of the Benchmark Index by holding all, or substantially all, of the assets comprising the Benchmark Index in similar proportions to their weightings in the Benchmark Index. ## Manager's Investment Report

During the period under review, the published price of the Fund's I-Class Accumulation units increased by 2.52%. Markit iBoxx, the Index compiler, calculates the Benchmark Index at the end of the business day using closing prices, whereas the Fund is valued using prevailing prices at 12 noon. Therefore, for tracking purposes the Fund has

### Market/Economic Review

Over the six months under review, inflationary pressures and tighter monetary policy continued to dominate the thoughts of market participants. Fears of an economic slowdown remain at the forefront of the minds of investors but, even with inflation falling across developed markets, expectations are that interest rates will remain higher for longer and no sharp cutting of rates is anticipated any time soon.

In the US, the economy grew at a faster-than-expected pace in the third quarter, expanding at its highest pace in nearly two years. This was despite the backdrop of interest rates at a multi-year high of between 5.25% and 5.50%. The economy expanded at an annualised rate of 4.90%, boosted by notably strong levels of consumer spending.

The European Central Bank (ECB) paused its rate-hiking programme in October, keeping rates at an all-time high of 4.50%. In the UK, annualised inflation continued to remain stubbornly high, remaining unchanged at 6.70% in September, putting pressure on the Bank of England (BoE) to take further action. The BoE paused its rate-hiking programme in September, after 14 consecutive rises, holding rates at 5.25%.

The days of widespread ultra-loose central bank monetary policy seem numbered, with the Bank of Japan (BoJ) – the last bastion of such an approach – making the notable move to tweak its yield curve control in July.

Benchmark developed market government bond yields rose (prices fell) notably over the period. The yield on the 10-year US Treasury rose most over the six months, with the move exaggerated late on in the period against the backdrop of strong economic data and persistent inflation.

The yield on the 10-year German Bund also moved higher but by a lesser extent, while the yield on the 10-year UK Gilt made a large inter-period move, jumping notably in May, June and July to match the heady highs it reached during the brief tenure of the Liz Truss-led Conservative government, before moving lower on better-than-expected inflation data late on in the period. Japanese government bond yields moved higher over the period as a whole. Towards the end of the period, the BoJ made the notable move to tweak its yield curve control.

Spreads on UK investment-grade bonds narrowed over the six months. Spreads on US investment-grade bonds narrowed too but were tighter than their UK peers, while spreads also narrowed by a lesser extent on European investment-grade bonds. High

## Manager's Investment Report continued

yield bond yield spreads, having fluctuated midway through in the period, also narrowed over the six months as a whole.

### **Fund Review**

All investment activity was prompted either by unit holder activity or by monthly changes in the profile of the Benchmark. From the start of the period to the end of October 2023, turnover was 22.67%, 47 bonds were added to the Index whilst 10 bonds left the Benchmark.

There were no significant changes in the Index or portfolio exposure over the period in terms of sector exposure. The sovereign sector weighting remained flat; and the collateralized sector decreased by -1.20% while corporates increased by 1.28% and sub-sovereigns decreased by -0.07%.

At the end of the period, the Index consisted of 753 bonds issued by 315 issuers.

The Fund experienced net negative cash flow during the period. The cash flows were used to adjust the Fund's holdings in such a way to ensure the Fund maintained an Index distribution at all times.

#### Outlook

Looking ahead, the backdrop of higher for longer government bond yields appears unstable given the desire of central banks to bring inflation back down to target. As has happened in Europe, this likely involves cooling US economic growth and a looser labour market. The key for investors is whether this results in a soft or a hard landing. Both scenarios could look possible at first, but history suggests that once unemployment starts to rise, it is hard to avoid a recession. Recent market weakness means that some of this risk is priced in, but not to the extent of a full recession. We therefore maintain our cautious overall stance.

The Fund remains well placed to capture the performance of the Index.

### Important Note from the Manager

### COVID-19

On 5 May 2023, the WHO Director-General concurred with the advice offered by the International Health Regulations (2005) ("IHR") Emergency Committee regarding the Coronavirus 2019 disease (COVID-19) pandemic and determined that COVID-19 is now an established and ongoing health issue which no longer constitutes a Public Health Emergency of International Concern ("PHEIC").

The Manager continues to monitor the COVID-19 pandemic on an on-going basis.

### **Geopolitical Events**

In response to events in Eastern Europe and the Middle East, the Manager is closely monitoring financial markets and any potential liquidity and volatility risks which may have an impact on the Fund.

## Notes to the Financial Statements

### 1. Statement of Compliance

The Financial Statements have been prepared in compliance with UK Financial Reporting Standard 102 (FRS 102) and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Association in May 2014 (2014 SORP) and amended in June 2017.

### 2. Accounting Policies

The accounting policies applied are consistent with the most recent annual Financial Statements.

### (a) Basis of Preparation

The Financial Statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities measured at fair value through profit or loss. In making this assessment, the Manager has considered, amongst other things, factors such as Fund size, cash flows through the Fund and Fund liquidity in its assessment of the Fund's ability to meet its liabilities as they fall due for at least the twelve month period from the date the financial statements are signed. Based on this assessment, the Manager deems the basis of preparation appropriate.

## Risk and Reward Profile

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category four because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.

## Information on Tracking Error

The 'Tracking Error' of a Fund is the measure of the volatility of the differences between the return of the Fund and the return of the benchmark Index. It provides an indication of how closely the Fund is tracking the performance of the benchmark Index after considering things such as Fund charges and taxation.

Using monthly returns, over the review period, the annualised Tracking Error of the Fund is 0.11%, whilst over the last three years to the end of October 2023, the annualised Tracking Error of the Fund is 0.15%. These Tracking Errors are within the anticipated Tracking Error levels set out in the Fund's Prospectus of +/-0.50% per annum.

## **EU Savings Directive**

The Fund has been reviewed against the requirements of the Directive 2003/48/EC on Taxation of savings in the form of interest payments (ESD), following the HM Revenue & Customs debt investment reporting guidance notes.

Under the Directive, information is collected about the payment of distributions to residents in certain other countries and is reported to HM Revenue & Customs to be exchanged with Tax authorities in those countries.

The Fund falls within the 25% debt investment reporting threshold. This means that details of all distributions and redemption proceeds paid to non UK investors will be reported by Legal & General (Unit Trust Managers) Limited to HM Revenue & Customs to be exchanged with the relevant Tax authorities.
