| ISIN         | Sedol   | Bloomberg  | Reuters          |
| GB00B3FJQ482 | B3FJQ48 | JPMUICA LN | GB00B3FJQ482.LUF |

**Investment objective:** To provide a portfolio designed to achieve income by investing at least 80% of the Fund's assets in US equities in any economic sector whilst participating in capital growth over the long-term (5-10 years).

### Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Targets companies with durable business models, consistent earnings, strong cash flows and experienced management teams.
- Targets a dividend yield above the benchmark over a market cycle.

### PERFORMANCE DISCLOSURES

*Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.*

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

The performance shown prior the launch date of this share class relates to the A share class. The A share class performance has not been amended or simulated to adjust for the lower ongoing fees of the C share class.

## Performance

- 1 Class: JPM US Equity Income Fund C - Net Accumulation
- 2 Benchmark: S&P 500 Index (Net of 15% withholding tax)
- 3 Sector average: North America

## DEFINITIONS

**NAV** Net Asset Value of a fund's assets less its liabilities per Share.

**Quoted Price** The single price at which all client orders are executed.

**Morningstar Analyst Rating™** Morningstar's forward looking fund rating.

**Overall Morningstar Rating™** assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

**Rayner Spencer Mills rated fund** rating as at 31 March 2021.

Uses both a qualitative and quantitative assessment of the funds. The fund is simply rated or not.

**Square Mile Research rating** as at 31 March 2021.

A Square Mile Fund Rating denotes a fund that is truly "best in class". Put simply, a Square Mile Fund Rating is only given to a fund that we are prepared

to recommend to our clients. Fund managers do not pay for our ratings; they cannot be purchased and are only achieved by the “best-in-class” funds.

The funds we recommend are each assigned a rating – A, AA, AAA or R – reflecting Square Mile’s conviction in each fund’s ability to deliver on expectations. These simple ratings are the result of exhaustive and detailed qualitative research, backed up by quantitative analysis. “AAA” represents the very highest level of conviction in a fund and its manager, and is a practical demonstration of our belief in the long-term consistent delivery of the fund’s objectives.

Our team of investment research analysts also works to identify newer or untested funds or managers that have real potential to deliver their stated objectives. In these circumstances, we are not in a position to award a full fund rating, and therefore these funds are assigned a “Positive Prospects” rating. Over time, if these managers deliver to our expectations and achieve their expected outcome, we would expect them to progress to A, AA, AAA or R ratings. Not widely used.

The Adviser Centre , as at 31 March 2021.

They have three key ratings: Established; Positive Watch; Recommended.

**Quartile ranking** measures how well a fund has performed in the relevant Morningstar sector. 1st quartile means ranked in the top 25% of funds in the sector, 2nd quartile is the next 25% and so on.

**Correlation** measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

**Alpha (%)** a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

**Beta** a measure of a fund’s sensitivity to market movements (as represented by the fund’s benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

**Annualised volatility (%)** an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

**Sharpe ratio** measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
