Schroders

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Schroder Global Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Income GBP (GB00BD8RLD38)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI World (Net Total Return) (GBP) Index (after fees have been deducted) over a 3 to 5 year period by investing in equities of companies worldwide.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide. The investment manager seeks to identify companies that it believes will deliver future earnings growth above the level expected by the market typically on a 3-5 year horizon (this is referred to as 'a positive growth gap').

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) (GBP) Index. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class pays income received from the fund's investments to you annually.

Risk and reward profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

China risk: If the fund invests in the China Interbank Bond Market via the Bond Connect or in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect or in shares listed on the STAR Board or the ChiNext, this may involve clearing and settlement, regulatory, operational and counterparty risks. If the fund invests in onshore renminbi-denominated securities, currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.60%

Charges taken from the fund under certain specific conditions
Performance fee
None

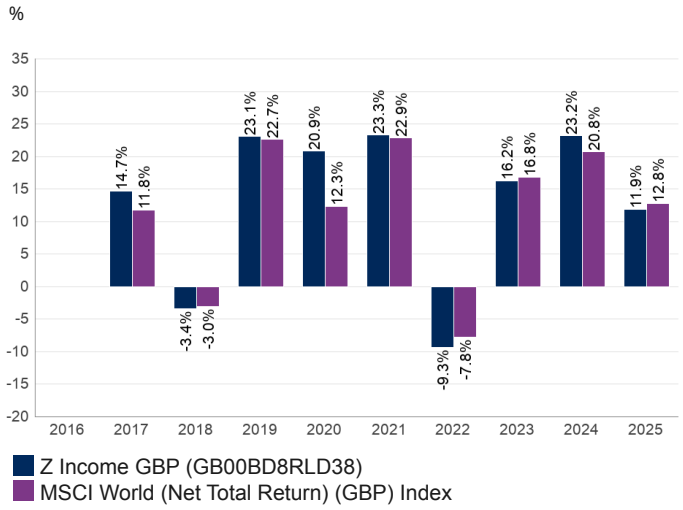
The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2025 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.62%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance



Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 24/05/1989.
The shareclass was launched on 19/02/2016.
Performance figures are only available since the launch of the respective share class.

Practical information

Trustee:J. P. Morgan Europe Ltd.
