

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV

ISIN: IE000WX7BVBO

JPM Global Equity Premium Income Active UCITS ETF - USD (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Global Equity Premium Income Active UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The objective of the Sub-Fund is to provide income and long-term capital growth.

Investment Policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund aims to (i) invest in a portfolio of equity securities of companies, globally and (ii) sell equity call options and/or equity index call options, to generate an income through the associated dividends and options premiums.

(i) Equity Portfolio

The Sub-Fund aims to invest at least 67% of its assets (excluding assets held for ancillary liquidity purposes) in equity securities of companies, globally. Issuers of these securities may be located in any country, including emerging markets.

(ii) Equity Call Options/Equity Index Call Options

The Investment Manager seeks additional income through employing a financial derivative instrument ("FDI") overlay strategy which will be implemented by systematically selling equity call options and/or equity index call options which will typically have exposure to indices comprised of Benchmark Securities. However, investors should also note that the losses from the sale of equity call options and/or equity index call options may also offset the Sub-Fund's profits from increases in the value of the equity portfolio.

The Benchmark consists of large and mid-capitalisation stocks issued by issuers in 23 developed markets globally ("Benchmark Securities"). The Benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured and as it reflects the main investment universe and strategy for the Sub-Fund.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its simulated Net Asset Value has shown medium to high fluctuations historically.

The Sub-Fund will not seek to track the performance of or replicate the benchmark, rather the Sub-Fund will hold a portfolio of equity securities (which may include but will not be limited to Benchmark Securities) which is actively selected and managed with the aim of contributing to the Sub-Fund's objective of providing an income.

The Investment Manager may overweight the securities which it considers most undervalued and underweight or not invest at all in securities which the Investment Manager considers most overvalued.

The Sub-Fund may, for investment purposes and efficient portfolio management purposes, use financial derivative instruments.

The degree to which the Sub-Fund may resemble the composition and risk characteristics of the Benchmark will vary over time and its performance may be meaningfully different.

USD is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Benchmark: MSCI World Index (Total Return Net).

Distribution Policy: This Share Class will not pay dividends.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmorganassetmanagement.ie.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- The value of FDIs can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the FDI and therefore, investment in such instruments may result in losses in excess of the amount invested by the Sub-Fund. While the Sub-Fund uses an FDI overlay strategy which is intended to provide income, there is no guarantee that the derivative strategy will achieve this. The Sub-Fund may forego some capital appreciation potential, while retaining the risk of loss should the price of the underlying decline.
- Selling call options will create exposure for the Sub-Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss.
- REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.
- Since the instruments held by the Sub-Fund may be denominated in, or have exposure to, currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

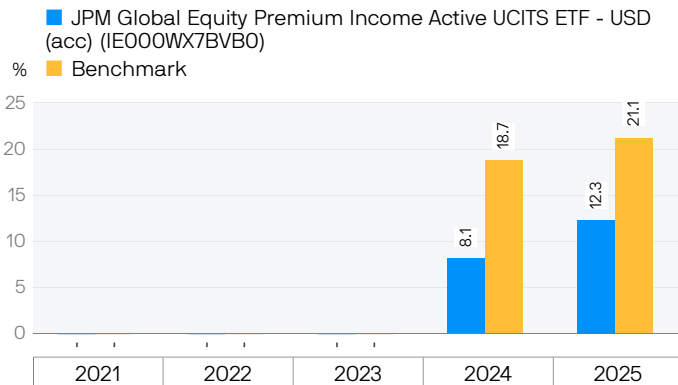

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from this Share Class over a year	
Ongoing charge	0.35%

Charges taken from this Share Class under certain specific conditions	
Performance fee	None

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in USD.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 2023.
- Share Class launch date: 2023.
