Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sprott Uranium Miners UCITS ETF (the **Fund**) – ISIN: IE0005YK6564

Accumulating ETF Share Class

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to track the price and yield performance, before fees and expenses, of the North Shore Sprott Uranium Miners Index (the "**Index"**).

The Index is governed by a published, rules-based methodology and is designed to measure the performance of a global investable universe of publicly listed companies that are involved in the mining, exploration, development and production of uranium and/or hold physical uranium and uranium royalties.

To be eligible for inclusion in the Index, constituents must meet the following criteria:

- be listed on regulated markets as disclosed in Appendix 1 of the Prospectus;
- have or expect to have a significant part of its business operations related to the uranium industry (in particular uranium mining, exploration for uranium, physical uranium investments and technologies related to the uranium industry);
- minimum market capitalisation and liquidity requirements as specified in the supplement for the Fund (**the Supplement**).

The Index is rebalanced semi-annually. A cap may be applied to the maximum weight of any one security.

Replication: The Fund will employ a "passive management" (or indexing) investment strategy and will seek to employ a replication methodology, meaning as far as possible and practicable, it will invest in the equity securities of companies in proportion to the weightings comprising the Index.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund's investments will not be distributed in respect of the Shares of this class and instead income will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the Supplement.

Risk and Reward Profile

Lower risk — Typically lower rewards

Higher risk — Typically higher rewards

1	2	3	4	5	6	**7**

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (**7**) is due to the nature of the Fund's investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements.
- The fund may engage in securities lending activity.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Energy Sector Risk:** Companies in energy-related industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers. The energy sector may need to make substantial investment, or incur significant amounts of debt, in order to maintain or expand their reserves.`
- **Uranium Companies Risk**: Uranium companies may be significantly subject to the effects of competitive pressures and the price of uranium. The price of uranium may be affected by changes in inflation rates, interest rates, monetary policy, economic conditions and political stability. The price of uranium may fluctuate substantially over short periods of time, therefore the Fund's NAV may be more volatile than other types of investments.
- **Commodity Exposure Risk**: The Fund invests in uranium companies, which may be susceptible to fluctuations in the underlying commodities market. Securities of companies held by the Fund that are dependent on a single commodity, or are concentrated on a single commodity sector, may typically exhibit even higher volatility attributable to commodity prices.
- **Emerging Market Risk:** The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty.
- **Currency risk**: The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund. Risks not covered by the indicator, but which are materially relevant to the Fund include:
- **Tracking error risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations,

changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%*
Exit charge	0%*

Charges taken from the Fund over a year	
Ongoing charges	0.85%**

Charges taken from the Fund under certain specific conditions	
Performance fee	None

* Authorised participants dealing directly with the Fund may pay an entry charge up to a maximum of 5% and an exit charge up to a maximum of 3%. The Fund is currently not exercising its entitlement to apply entry and exit charges.

Since the Fund is an ETF, secondary market investors will not typically be able to deal directly with HANetf ICAV. Investors buying Shares on exchange will do so at market prices which will reflect broker fees and/or transactions charges and bid-ask spreads as well as underlying company prices at the time of trading on the secondary market.

* Authorised participants dealing directly with the Fund will pay related transaction costs. * For Investors dealing directly with the Fund, switching between sub-funds may incur a maximum switching charge of 3%.

** The ongoing charges are paid to the Manager which is responsible for discharging from its fee the cost of operating the Fund. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another investment fund.

The Fund may engage in securities lending, whereby 70% of the revenues arising from securities lending will be returned to the Fund and 30% of the revenues will be retained by the Manager and securities lending agent.

Please see "**General Charges and Expenses**" and "**Management Charges and Expenses**" sections of the Prospectus and "**Charges and Expenses**" and "**Key Information for Share Dealing**" sections of the Supplement for further information about charges.
