Class C Acc (ISIN: GB00BJL36Z72)
Authorised Corporate Director: T. Rowe Price UK Limited

Objective To increase the value of its shares through growth in the value of its investments.
Portfolio securities The fund is actively managed and invests mainly in a widely diversified portfolio of shares of emerging market companies. The fund may use derivatives for hedging and efficient portfolio management.
Investment process The investment manager's approach is to:

- Seek companies that are undervalued but have the potential for improving earnings over time.
- Emphasise companies that are supported by a secure dividend or strong balance sheet.
- Employ fundamental research to identify change in a business that will act as a catalyst to re-rate the company.
- Employ a bottom up portfolio construction process.
- Assess environmental, social and governance ("ESG") factors to identify those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio.

Designed for Investors who typically plan to invest for five years or more.

Risk and Reward Profile

Lower Risk — Higher Risk
Typically Lower Rewards — Typically Higher Rewards

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.
The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.
The lowest category does not mean a risk-free investment.
The fund is in the category shown because it invests in a segment of the market that is moderately volatile.
The fund's risk level reflects the following:

- As a class, stocks carry higher risks than money market securities and bonds.
- Emerging markets have higher volatility than developed markets.

The fund is subject to fund-specific risks described below as well as generic risks. Certain risks are at least partially reflected in the risk/reward number.

ESG Risks could have a material negative impact on the value of an investment and performance of the fund.

Style risk may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.

MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS
Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other fund-specific risks, such as:
Country risk China Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.
