Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Global Equity Diversified Fund (Income - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00BF93WG43
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund aims to provide a return greater than that of the MSCI World Net Total Return Index GBP (the "Index") by 0.4% to 0.8% per annum over rolling 3- year periods, through capital growth, after the deduction of charges.

Policy At least 90% of the Fund is invested in the shares of companies globally that are listed on stock exchanges in their respective countries.

There are no restrictions on the Fund in terms of sector and market capitalisation when investing in shares of companies. The Fund's country and sector weights will, however, be broadly in line with those of the Index.

The remainder of the Fund (up to 10%) may be invested in money market instruments, other transferable securities (including both government and public securities) and deposits.

Up to 10% of the Fund may be invested in other funds known as collective investment schemes (including exchange-traded funds and funds managed by Royal London Unit Trust Managers Limited or another Royal London Group company).

The Fund may use derivatives for the purposes of Efficient Portfolio Management (including hedging). The use of derivatives for this purpose is unlikely to increase the risk profile of the Fund.

Cash may be held for investment purposes and to manage inflows and outflows of investors' money in the Fund, however cash is not expected to exceed 10% of the Fund.

Strategy The Fund is actively managed, meaning the Investment Manager uses its expertise to select investments to meet the objective.

Benchmark The target benchmark is the MSCI World Net Total Return Index GBP (the "Index") which represents the share price performance of the stock markets of 23 developed market countries and includes more than 1,500 listed companies. The Index has been selected as a target benchmark because it is representative of the type of companies in which the Fund invests, and it is therefore an appropriate measure for the Fund's performance.

The performance comparator for the Fund is the IA Global sector (the "IA Sector").

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Capital Growth Capital growth is defined as the rise in an investment's value over time.

Rolling 3 Year Period A rolling 3-year period is any period of three years, no matter which day you start on.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	3	4	**5**	6	7

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

The fund is shown in risk category 5 because its share price has shown a medium to high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.
The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.
A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.
The indicator is calculated using a standard methodology derived from EU rules.
The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.
The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:
Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.
EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.
Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.
Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.
Emerging Markets Risk Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.
Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.41%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.
The Fund was launched on 10 October 2017 and the share class on 5 March 2018.

Source: RLAM and DataStream as at 31 December 2025

Past performance is not a guarantee or reliable indicator of future returns. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. All performance shown assumes reinvestment of dividends.

Practical information

Depositary: HSBC Bank plc
