iShares AI Innovation Active UCITS ETF

A sub-fund of iShares III plc

USD Accu

ISIN: IE000G0E83X3 Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund is actively managed and aims to generate long term capital growth by investing globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is the advancement, development, and use of artificial intelligence ("AI") technology. The Investment Manager ("IM") considers a company to be an AI company if it is expected to derive future revenue from the advancement, development, and/or use of AI technology.
- In normal market conditions the Fund will invest in equity securities of companies with large, medium and small market capitalization (market capitalization is the share price of the company multiplied by the number of shares issued). Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.
- The Fund will also invest in accordance with its ESG Policy as outlined in the Fund's prospectus.
- The IM has full discretion to select the Fund's investments and is not constrained by any benchmark in this process. The MSCI ACWI Index should be used by investors to compare the performance of the Fund. The IM will also refer to the Morningstar Global Artificial Intelligence Select Index (the "AI Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IM is not bound by the components or weighting of the AI Index when selecting investments.
- The IM may use financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund may also indirectly invest in equities by investing in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"), which are listed or traded on stock exchanges and regulated markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be accumulating shares (i.e. income will be included in their value).
- Your shares will be denominated in US Dollar, the Fund's base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

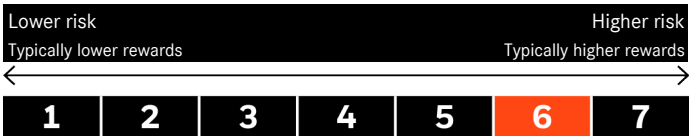
Risk and Reward Profile



- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
  - Companies in AI-related businesses will be subject to risks associated with developing technology and will face intense competition which may have an adverse effect on profit margins. It is likely that these companies will also rely heavily on Patents and other proprietary rights and any loss of, or limitation on their ability to enforce, such proprietary rights in the future could have a material adverse effect on their profitability. Certain AI technology features may also increase the risk of fraud or cyberattack.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

The benchmark is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Fund's prospectus for full disclaimer.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
