**Revision date:** 31st May 2023

### What is this product?

#### Type:

The Company is a closed-ended investment company incorporated in England and Wales. The product consists of ordinary shares of nominal value £0.01 each in the capital of the Company that are admitted to the premium segment of the official list of the Financial Conduct Authority and to trading on the London Stock Exchange plc's main market for listed securities (premium segment). The shares can be bought and sold via markets. Typically, the price you pay for a share will be higher than the price at which you could sell it at the same time.

#### Objectives:

The Company's investment objective is to conduct an orderly realisation of the assets of the Company, to be effected in a manner that seeks to achieve a balance between returning cash to Shareholders promptly and maximising value.

This product does not have a maturity date. Given the illiquid nature of the Company's investments, it is very difficult to provide any certainty on the timeframe for realisation. The Board is aware that Shareholders will expect some guidance on the expected timeframe and, although Shareholders should place only limited reliance on this information, it is the Board's current estimate that the first distribution would occur at the end of 2023 or in early 2024 and distributions will continue thereafter with a substantial proportion of the portfolio being realised within three to five years. The Board will regularly communicate the expected timing of distributions as the portfolio is realised.

#### Intended retail investors:

The ordinary shares are admitted to trading on the Main Market of the London Stock Exchange and are intended therefore for investors who understand and are willing to assume the risks of losing some or all of the value of their investment.

### What are the risks and what could I get in return?

#### Risk Indicator:

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at the early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capability of the Company to pay out. This product does not include any protection from future market performance so you could lose some or all of your investment.

# VICTORY PARK

## CAPITAL

### Investment performance information:

Historical and future performance is driven by the financial performance of the Company. Although the Company has demonstrated strong NAV total return performance over the longer term (-6.97%, 39.49% and 57.60% over one year, three years and five years, respectively, to 31 December 2022), the discount to NAV per Share at which the Shares trade has been both wide and persistent despite measures taken by the Board to seek to address this. At the General Meeting on 12 June 2023, the Company's investment objective was amended to conduct an orderly realisation of the assets of the Company, to be effected in a manner that seeks to achieve a balance between returning cash to Shareholders promptly and maximising value.

#### What could affect my return positively?

The realisation process may enable Shareholders to realise the value of their investment at a price over a period of time which should be closer to NAV than that which they may have received by trading their Shares prior to the decision to change the investment policy given the discount to NAV per Share at which the Shares have traded. Performance and the timing of the distributions made by the company could be supported further by a positive macro-economic environment and buoyant financial markets. More benefits of the change in investment policy can be found in the Notice of General Meeting posted on the Company's website.

#### What could affect my return negatively?

There is no guarantee that the change to the Company's investment objective and policy will provide the returns or realise the capital sought by Shareholders. As a result of the portfolio realisation, the number of investments held by the Company will reduce over time and, as a consequence, the aggregate return on the remaining portfolio will become increasingly exposed to the performance of the remaining individual investments. This could have the effect of making performance more volatile. Negative returns could be caused or significantly impacted by market volatility, changing interest rate environment, or economic uncertainty. More risk factors can be found in the Notice of General Meeting posted on the Company's website.

Under severely adverse market conditions, there is a risk that the capital value of an investment in the Company's shares could reduce significantly, potentially down to zero.

### What happens if the Company is unable to pay out?

You may sell your shares at any time on the London Stock Exchange using your broker. Your shares are sold to another buyer in the market without recourse to the Company. If the Company goes into liquidation the investments will be sold and you will receive your pro rata share of the proceeds after settlement of any liabilities. As a shareholder of the Company you would not be able to make a claim to the Financial Services Compensation Scheme about the Company in the event that the Company is unable to pay out.

### What are the costs?

#### Costs Overtime:

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10 000. The figures are estimated and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with the information about these costs, and show you the impact that all costs will have on your investment over time.

Investment £10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years (recommended holding period)
<b>Total costs</b>	£ 337.84	£ 1,136.35	£ 2,131.12
<b>Impact on return (RIY) per year</b>	<b>3.38%</b>	<b>3.38%</b>	<b>3.38%</b>

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

#### Composition of costs:

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period
- What the different cost categories mean

<b>One-off costs</b>	Entry costs	0.00%	Stamp duty is not paid when subscribing for shares at the time of an IPO. However, stamp duty is subsequently payable on all share purchases in the secondary market in the UK, based on 0.5% of the purchase consideration.
	Exit costs	0.00%	The impact of the costs when exiting your investment.
<b>Ongoing costs</b>	Portfolio transaction costs	0.22%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1.99%	The impact of the costs of managing the Company's investments. This is comprised of the ongoing costs (1.49%) and financing costs (0.83%) of the Company.
<b>Incidental costs</b>	Performance fees	1.17%	The impact of the performance fee. The payment of any performance fees to the investment manager will be conditional on the Company achieving at least a 5.0% per annum total return for shareholders relative to a High Water Mark.

**How long should I hold it and can I take money out early?****Recommended holding period 5 years**

Listed or quoted funds are designed to be long term investments and returns through them can be volatile during their life. Shareholders wishing to realise their investment may do so by selling their shares on the market. In addition, as described above, it is the Board's current estimate that the first distribution would occur at the end of 2023 or in early 2024 and distributions will continue thereafter with a substantial proportion of the portfolio being realised within three to five years. The Board will regularly communicate the expected timing of distributions as the portfolio is realised.

**How can I complain?**

As a shareholder of the Company, you do not have the right to complain to the Financial Ombudsman Service about the management of the Company. Complaints about the Company or the Key Information Document should be sent to the address stated below, for the attention of the Company secretary:

POSTAL ADDRESS: 6th Floor, 65 Gresham Street, London, EC2V 7NQ, United Kingdom

WEBSITE: <http://vpcspecialtylending.com>

EMAIL: [info@vpcspecialtylending.com](mailto:info@vpcspecialtylending.com)

**Other relevant information**

Further information relevant to the Company is available at <http://vpcspecialtylending.com>. Such information includes details of the Company's share price, net asset value and copies of the reports and accounts and other documents and announcements published by the Company.

Past performance is no guarantee of future returns and there is no guarantee that the market price of the Company's shares will fully reflect their underlying net asset value. There is also no guarantee that the Company's investment objective will be achieved. All investment is subject to risk. The value of the shares in the Company may go down as well as up. Potential investors are advised to seek expert financial advice before making any investment decision and should be aware that they may not fully recover the amount invested.

This report is provided for the purpose of information only, and if you are unsure of the suitability of this investment you should take independent advice. NAV performance is not linked to share price performance and shareholders may realise returns that are lower or higher in performance.
