WHAT IS THIS PRODUCT?

Type: Round Hill Music Royalty Fund Limited (the “Company”) is an investment company incorporated in Guernsey. It was registered in Guernsey under the Companies (Guernsey) Law, 2008 (as amended) on 05 August 2020.

Objectives: The Company’s investment objective is to provide investors with an attractive level of regular and growing income and capital returns from investment primarily in high quality, music intellectual property.

In order to achieve its Investment Objective the Company will invest in a songwriter’s copyright interest in a musical composition or song (being their writer’s share, their publisher’s share and their performance rights) together with the rights in the recording of the musical composition or song (known as the master recording rights) (“Copyrights”) together with all rights and assets considered by the Investment Manager to be ancillary thereto.

The Company intends to invest in small to medium sized Catalogues that are diversified by artist, genre, decade and royalty type. The Company also, intends to invest predominately in classic, older Copyrights with enduring appeal and which experience consistent usage. Such compositions have generally reached a steady state of earnings and are not subject to the natural decline in earnings and value that typically occurs within the first four to six years of a composition’s life.

Intended retail investor:

The company may be appropriate for professional investors or professionally advised retail investors seeking quarterly investment income drawn from a portfolio of copyrights, and who are capable of evaluating the potential risks of investing in the Fund and who can afford to hold the investment for a minimum period of 5 years. Most investors will hold this investment as part of a wider investment strategy and not as a single investment.

Maturity: There is no maturity date.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

This risk indicator assumes you keep the product for 5 years which is the recommended holding period. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of the Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the market or because we are not able to pay you. We have classified this Product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. This Product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay what is owed, you could lose your entire investment.
