| Date of production of the KID | 19 June 2018 |

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

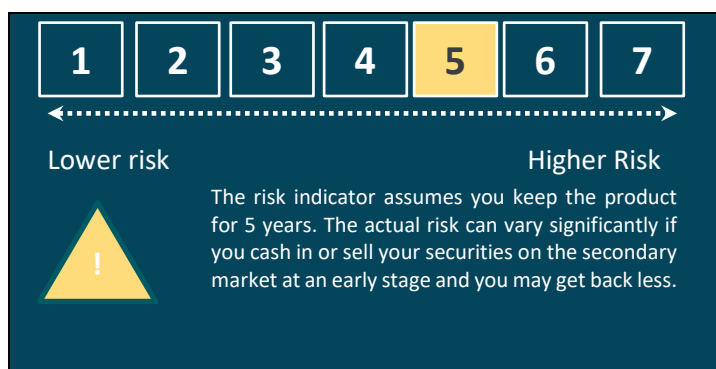

| | |
|---------------------------------|---|
| Type | Ordinary shares in a public company incorporated in England and Wales. Save for payments of dividends or other returns (e.g. on a winding up), the Company is not expecting to pay you and you are expected to generate returns through selling your shares through a bank or stockbroker. The ordinary shares have no maturity date. Shares of the Company are bought and sold via markets. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it. |
| Objectives | The Company's investment objective is to seek to provide Shareholders with an attractive return, principally in the form of quarterly income distributions, by acquiring a portfolio of debt obligations (such as loans, invoice receivables and asset financing arrangements) that have been originated or issued by direct lending platforms. The Company has borrowed to purchase assets. This will magnify any gains or losses made by the Company. |
| Intended retail investor | The ordinary shares are listed on the Main Market of the London Stock Exchange and as such are suitable for institutional investors and professionally-advised private investors seeking exposure to alternative finance investments and related instruments, including debt instruments issued or originated by direct lending platforms. The ordinary shares may also be suitable for other private investors who are capable of evaluating the risks and merits of such an investment and who have sufficient resources to bear any loss which may result from such an investment. |

What are the risks and what could I get in return?

Risk indicator The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7 which is a medium high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact your returns. The price at which shares in the Company are sold in the market has not historically tracked the Company's net asset value per share.

The whole amount of your invested capital in the Company is at risk and there can be no guarantee that you will get back any or all of the amount invested on a sale of shares in the Company. The price at which shares in the Company are sold in the market has not historically tracked the Company's net asset value per share. **REFERENCES TO THE COMPANY PAYING YOU MONEY ARE REQUIRED, WHILE YOU MAY RECEIVE SOME DIVIDENDS FROM THE COMPANY DURING YOUR INVESTMENT THE MAJORITY OF YOUR RETURN WILL LIKELY BE FROM THE BUYER OF YOUR SHARES WHEN YOU SELL.**

Performance Scenarios

This table shows the money you could get back over the next 5 years under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not exact indicators. What you will get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

| Investment Scenarios | | 1 year | 3 years | 5 years (Recommended holding period) |
|-----------------------|---|----------------------|----------------------|--------------------------------------|
| Stress scenario | What you might get back after costs Average return each year | £3,173.53 -68.26% | £3,373.49 -30.39% | £2,228.74 -25.94% |
| Unfavourable scenario | What you might get back after costs Average return each year | £6,021.80 -39.78% | £3,214.29 -31.50% | £1,821.26 -28.87 |
| Moderate scenario | What you might get back after costs Average return each year | £8,211.27 -17.89% | £5,489.30 -18.12% | £3,632.65 -18.33 |
| Favourable scenario | What you might get back after costs Average return each year | £11,138.21 11.38% | £9,325.44 -2.30% | £7,207.69 -6.34% |

What happens if Ranger Direct Lending Fund plc is unable to pay out?

As a shareholder of Ranger Direct Lending Fund plc you would not be able to make a claim to the Financial Services Compensation Scheme nor any other compensation body about the Company in the event that the Company were unable to pay any dividends or other returns it may elect to pay from time to time, or if it were unable to pay any amounts due to you on a winding up at the end of its life. If you sell your shares on the London Stock Exchange, your bank or stockbroker will receive cash on delivery of your shares and should pass that to you.

What are the costs?

Presentation of Costs

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The Company is required by law to include the information above and below without any changes. That law was drafted for investment products which pay returns directly to investors, not those for which a return is expected to be delivered by the investor selling shares on a market. The Performance Scenarios above are shown based on share price returns together with returns from dividends or other distributions net of estimated costs. The costs shown below, all of which, apart from stamp duty costs, are borne by the Company, have no direct impact on share price performance of the Company's ordinary shares.

If you chose to sell your shares, you would pay your bank's or stockbroker's dealing charges and be selling at the then available market offer price. That is likely to be lower than the bid price at which other investors could buy shares at that time. Prices quoted for shares in the media are typically the mid-price, being half way between the offer price and the bid price.

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

| Investment Scenarios £10,000 | If you cash in after 1 year | If you cash in after 3 years | If you cash in at the end of the recommended holding period |
|---------------------------------|-----------------------------|------------------------------|---|
| Total costs | £255.70 | £784.59 | £1,337.91 |
| Impact on return (RIY) per year | 2.56% | 2.55% | 2.54% |

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

| This table shows the impact on return per year | | | |
|--|------------------------------------|-------|---|
| One-off costs | Entry costs | 0.00% | The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. |
| | Exit costs | 0.00% | The impact of the costs of exiting your investment when it matures. |
| Ongoing costs | Portfolio transaction costs | 1.00% | The impact of the costs of us buying and selling underlying investments for the product. |
| | Other ongoing costs | 2.00% | The impact of the costs that we take each year for managing your investments and the costs associated with running the Company. |
| Incidental costs | Performance fees | 0.00% | The impact of the performance fee. We take these from your investment if the product outperforms its high water mark adjusted NAV (the amount of the performance fee being 10% of such outperformance). |
| | Carried interests | 0% | The impact of carried interests. |

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Listed funds are designed to be long term investments and the returns from them can be volatile during their life.

You should plan to hold your shares for at least a five year investment horizon and the recommended holding period assumes the Company's continuation vote in 2020 will be passed.

As the Company's shares are listed on the London Stock Exchange, you can expect to sell them at any time through your bank or stockbroker.

How can I complain?

As a shareholder of the Company, you do not have the right to complain to the Financial Ombudsman Service (FOS) about the management of the Company. If you have any complaints about the Company, you may lodge your complaint:

- via our website www.rangerdirectlending.uk
- in writing to Link Asset Services, 6th Floor, 65 Gresham Street, London EC2V 7NQ.

Other relevant information

Although the recommended holding period for shares is 5 years, as announced on 11 June 2018, the Company is consulting with shareholders to consider how to implement a portfolio realisation process and to agree a timetable for winding-up the Company. Further announcements will be made in due course, but the outcome of this shareholder consultation will likely result in a change to the recommended holding period for shares in the Company.

We are required to provide you with further documentation, such as the Company's latest prospectus, annual and semi-annual reports. These documents and other information relating to the Company are available online at <http://www.rangerdirectlending.uk/documents>. Past performance is not indicative of future performance.
