

PERSONAL ASSETS TRUST PLC

KEY INFORMATION DOCUMENT							
Purpose <p>This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, cost, potential gains and losses of this product and help you compare it with other products.</p>							
Product <p>Product Name: Personal Assets Trust plc ISIN: GB00BM8B5H06 Website: https://www.patplc.co.uk</p> <p>PRIIP Manufacturer Name: Juniper Partners Limited Telephone: +44 (0) 131 378 0500 Regulator: Financial Conduct Authority</p> <p>Date of document production : 23 December 2022</p>							
What is this product? <p>Type Personal Assets Trust plc ("the Company") is an investment company as defined by Section 833 of the Companies Act 2006 and carries on business as an investment trust. The Company's shares are listed and traded on the London Stock Exchange and the Company is subject to the UK Listing Rules. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it. The Company operates a discount and premium control mechanism, which aims to ensure that the price of a share will closely reflect the value of the net assets attributable to the share.</p> <p>Objectives The Company is an investment trust run for private investors, who may often have committed to it a substantial proportion of their personal wealth. Its investment policy is to protect and increase (in that order) the value of shareholders' funds per share over the long term. The Company has the ability to invest globally. While it uses the FTSE All-Share Index as its comparator for the purpose of monitoring performance and risk, the composition of the FTSE All-Share has no influence on investment decisions or the construction of the portfolio.</p> <p>The Company may use derivatives as a way of increasing or reducing its investment exposure and may borrow to purchase assets for the Company. This will magnify any gains or losses made by the Company.</p> <p>Intended retail investor Investors with no specific financial expertise seeking to protect and increase capital over the long term, by investing globally in a range of assets. Financial experience is not considered a necessity. However, investors must at least understand a product where capital is at risk and have the capacity to bear losses (possibly total) on their original investment, accepting risk to their capital. The product may be suitable as a component of a portfolio and for investors who are looking to set aside their capital for the long term (at least five years), though shares may be sold on a daily basis.</p>							
What are the risks and what could I get in return? <p>Risk Indicator</p> <p>Lower risk ← <table border="1"><tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td></tr></table> → Higher risk</p> <p> The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your investment easily or you may have to sell at a price that significantly impacts on how much you get back.</p> <p>The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.</p> <p>We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. However, the summary risk indicator only reflects historic share price volatility of the Company's shares. It excludes other risks inherent in the product and, therefore, does not show the full risk to the investor.</p> <p>Capital may be at risk as the value of investments may go down as well as up and is not guaranteed therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance.</p> <p>This product does not include any protection from future market performance so you could lose some or all of your investment.</p>	1	2	3	4	5	6	7

PERSONAL ASSETS TRUST PLC

Performance Information

Main factors which could influence your return

- The Company's objective**
 The Company's objective is to protect and increase (*in that order*) the value of shareholders' funds per share over the long term.
- The Company's investment approach**
 The Company has the ability to invest globally and will invest in equities and fixed income securities. It may also hold cash and cash equivalents (which may, depending on circumstances, include gold). The Company may use derivatives as a way of increasing or reducing its investment exposure and to protect investment positions. It may also make use of currency hedging.
- Portfolio concentration**
 The Company has no predetermined maximum or minimum exposures to asset classes, currencies or geographical areas. The Company's equity portfolio is typically concentrated in a short list of stocks and turnover tends to be low.
- The level and volatility of discount/premium**
 The Company operates a discount control mechanism that aims to ensure, in normal market conditions, the Company's shares trade at close to their underlying net asset value by virtue of issuing or buying-in shares, as appropriate.
- The level of costs**
 The Company's costs are detailed below. The main cost is the fee paid to the investment manager which is linked to the underlying net asset value of the Company. Administration costs are relatively stable.
- Economic and market conditions**
 Broader economic and market conditions will have an impact on the performance of the Company's portfolio. The Company prioritises the avoidance of permanent capital losses.

Benchmark

The Company does not have a benchmark but reports against the FTSE All-Share Index. The index is only used to assess performance over material periods and the composition of the portfolio is likely to vary substantially from that of the index

What could affect your return positively

- Strong global equity markets
- Good asset allocation
- Good stock selection

What could affect your return negatively

- Weak global equity markets
- Poor asset allocation
- Poor stock selection

Outcome under severely adverse market conditions

In severely adverse market conditions the value of the Company's shares could reduce significantly. The Company's shares are traded on the London Stock Exchange and their value is dependent on their traded price.

What happens if the Company is unable to pay out?

Any default by the Company would have a material impact on the value of your shares.

The Company's shares are traded on the London Stock Exchange. Therefore, as a shareholder of the Company you would not be able to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay out. A default by the Company or any of the underlying holdings could affect the value of your investment.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and the impact that all costs will have on your investment over time. Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary.

Investment £10,000 Scenarios	If you cash in after 1 year	If you cash in after 5 years
Total costs	£71	£355
Impact on return (RIY) per year	0.71%	0.71%

PERSONAL ASSETS TRUST PLC

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period; and
- the meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	0.00%	The impact on the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.04%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.67%	The impact of the expenses necessarily incurred in the operation of the Company. This includes the annual management fee paid to the investment manager (0.59%) and administration costs (0.08%).
Incidental costs	Performance fees	N/A	The impact of performance fees on your investment.
	Carried interests	N/A	The impact of carried interests on your investments.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

There is no minimum or maximum holding period for the shares. However, the shares should be considered a medium to long-term investment. The shares can be sold on the London Stock Exchange when the market is open. Dealing charges and taxes may be incurred on transactions. There is no guarantee of any appreciation in the Company's shares and investors may not get back the full value of their investments. The value of the shares and the income derived from them (if any) may go down as well as up. The Company does not have a fixed wind up date and therefore, unless shareholders vote to wind-up the Company, investors will only be able to realise their investment through the market.

How can I complain?

As a shareholder of the Company you do not have a right to complain to the Financial Ombudsman Service (FOS) about the management of the Company. Complaints about the Company or the Key Information Document can be sent by email, telephone or post to the Company Secretary:

Email: cosec@junipartners.com

Telephone: +44 (0) 131 378 0500

Post: Juniper Partners Limited, 28 Walker Street, Edinburgh EH3 7HR

Other relevant information

As stated in the section 'What are the risks and what could I get in return?' the scenarios of estimated future performance are based on evidence from the past on how the value of this investment has varied and are not an indicator of future performance. The scenarios are calculated on historical performance figures based on the last 5 years when markets have been particularly strong and might not be replicated in the future. When there has been steady and consistent growth over the relevant period of time it can make the performance scenarios look overly optimistic; past performance is not a guide to future performance and future returns could be significantly worse than shown.

The cost and risk calculations included in this Key Information Document follow the methodology prescribed by the FCA rules.

The person advising on or selling the product may have to provide you with additional information as required by their financial regulator or national law.

Further information on the Company is available within the Annual and Interim Reports which can be accessed on the Company's website at <https://www.patplc.co.uk>.

The most up to date version of this Key Information Document is available on the Company's website at <https://www.patplc.co.uk>. If you are in any doubt about any action you may be considering taking, you should seek independent financial advice.
